\* 1. *Gen.*: The name given in the West Indies to any one who cured flesh or fish in the way described in the etymology. This was done continually by the men described under 2.

2. *Spec.*: An order of men, not quite pirates, yet with decidedly piratical tendencies, who, for nearly two hundred years, infested the Spanish main and the adjacent regions. A bull of Pope Alexander VI., issued in 1493, having granted to Spain all lands which might be discovered west of the Azores, the Spaniards thought that they possessed a monopoly of all countries in the New World, and that they had a right to seize, and even put to death, all interlopers into their wide domain. Enterprising mariners belonging to other nations, and especially those of England and France, naturally looked at the case from quite an opposite point of view, and considered themselves at liberty to push their fortunes within the prohibited regions. Being cruelly treated, when taken, by the Spaniards, their comrades made reprisals, and a state of war was established between the Spanish governments in the New World and the adventurers from

the old, which continued even when the nations from which they were drawn were at peace in Europe. The association of buccaneers began about 1524, and continued till after the English revolution of 1688, when the French attacked the English in the West Indies, and the buccaneers of the two countries, who had hitherto been friends, took different sides, and were separated for ever. Thus weakened, they began to be suppressed between 1697 and 1701, and soon afterwards ceased to exist, pirates of the normal type to a certain extent taking their place. The buccaneers were also called "filibusters," or "filibusters"—a term which was revived about the middle of the nineteenth century in connection with the adventures of "General" Walker in Spanish America. [FILIBUSTERS.]

• **bū-cōl-l-cal**, a. [From Eng. bucolic, s., and suffix -al-]. The same as bucolic, s. (q.v.). "Old Quintilian, with his declamations, Theocritus with his bucolical relations."—Skelton: Poems, p. 13.

**būd(1)**, \***būdde**, s. [From Wel. *budd* = profit, gain (?). (Jamieson). Or from A.S. *bōt* = a . . . remedy, . . . compensation. (Skinner).] A gift, spec. a bribe.

"They pluck the pair, as they war powand hadder; And taks buds fra men bath air and far."—Priests of Peblis, p. 24.

**būd(2)**, \***būdde**, s. [Apparently from Dut. *bout* = a bud, an eye, a shoot; *būtz* = a core. Fr. *bouton* = a button, a bud, a germ.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II. 1 (q.v.). ". . . every tree displays the same fact, for buds must be considered as 'individual plants.'"—Darwin: Voyage Round the World, ix. 203.

2. *Fig.*: The germ of anything.

"Boys are, at best, but pretty buds unblown."—Cowper: Tirocinium.

II. Technically:

1. *Bot.* (*A Bud or Leaf-bud*): The germ of future leaves which arises from a node immediately above the base of a leaf, or, in other words, from the axil of a leaf. Any one appearing in a different situation is regarded as latent or adventitious. A bud consists of scales imbricated over each other, the outer series being the hardest and thickest, as being designed to afford protection to those within against the weather. In the centre of the scales is a minute but all-important cellular axis, or growing point, whence the future development is to take place.

"Buds are distinguished into stem-buds (plumules), leaf-buds, and flower-buds."—Thomé: Struct. & Physiol. Bot. (transl. by Bennett), 3rd ed., 1875, p. 52.

2. *Zool.*: A protuberance, or gemmule, on polypes and similar animals, which ultimately develops into a complete animal.

**bud-scales**, s. pl.

*Bot.*: Scales protecting buds which persist through the winter. They are dry, viscid, covered with hairs, or smooth.

**būd(1)**, v. t. [From bud (1), s. (q.v.).] (*Scotch.*) To bribe.

"I have nothing that can hire or bud grace; for if grace would take hire, it were no more grace."—Rutherford's Letters, 55.

**būd(2)**, \***būd-dūn**, v. t. & t. [From bud (2), s. (q.v.).] In Dut. *botten*.]

A. Intransitive:

1. *Lit.* (of plants): To put forth buds.

"The rose is fairest when 'tis budding new, And love is loveliest when embalm'd in tears."—Scott: Lady of the Laka, iv. 1.

2. *Fig.* (of animals or of anything):

(1) To begin to grow.

"There the fruit, that was to be gathered from the confus, quickly budded out."—Clarendon.

(2) To be blooming.

B. Transitive: [BUDDING, C. 1.]

**būd(3)**, **būde**, v. *impers.* Behaved.

"Now while the early buds are just new."—Keats: Endymion, l. 4.

**Būd-dha**, s. [BOODHA.]

¶ *Būdha* is the spelling on Sir Wm. Jones's system, and *Boodha* that on the rival system of Gilchrist. The former is more scientific, but carries with it the disadvantage that many readers mispronounce the word *Būdha*. An Englishman is likely to pronounce the word *Boodha* correctly, but where double o (*oo*) is introduced for his benefit, the Sanscrit and Pali have only a single vowel.

**Būd-dhīṣṇ**, s. [BOODHĪṢṆ.]

**Būd-dhīstic**, a. [BOODHĪSTIC.]

**būd-dīng**, pr. par., a. & s. [BUD (2), v.]

A. & B. As pr. par. & particip. adj.: In senses corresponding to those of the verb.

"'Tis true, your budding Miss is very charming."—Byron: Beppo, 30.

C. As substantive:

1. *Hortic.*: The operation of grafting a bud from one plant upon the stock of some nearly-allied species. A bud, with the leaf to which it is axillary, is cut with a sharp knife from the stem on which it grew. It is inserted into an incision shaped like a capital T (T) in the stock of the allied tree, and then tied round by a ligature of matting.

2. A variety of reproduction by fission. [GEMMIPARITY.] (Rossiter.)

¶ The so-called budding of yeast: A continual formation of sporidia, under special circumstances, in yeast. (Thomé.)

**būd-dle**, s. [Etymology doubtful. Cf. Ger. *buteln*, *bütteln* = to shake. (Mahn-).]

*Mining*: An oblong, inclined vat, in which stamped ore is exposed to the action of running water, that the lighter portions may be washed away. There are trunk-buddles or German chests, stirring-buddles, nicking-buddles or aleeping-tables, and buddle-holes or sluiceways.

**būd-dle**, v. i. [From buddle, a. (q.v.).]

*Mining*: To wash ore.

**buffy-coat**, *s.* A layer of fibrine at the top of the coagulum, formed on blood drawn from the veins of a patient during severe inflammation, and especially during pleurisy. The term *buffy* is applied to it because the red corpuscles being of heavier specific gravity fall to the bottom, leaving the lighter-coloured on the top. The buffy-coat varies from less than one line to one or two inches in thickness. It is called also *buff* and *size*.

**buff-fô**, *s.* [Lat. *bufo* = a toad.]

**Zool.**: A genus of Batrachians, the type of the family *Bufonidae* (q.v.). The body is inflated, the skin warty, the hind feet of moderate length, the jaws without teeth, the nose rounded. There are numerous species widely distributed throughout the world, some of them being very common in the United States. They are among the most harmless of animals, while useful as insect destroyers. [TOAD.]

**buff-fô-ni-a**, *s.* [BUFFONIA.]

**buff-fôn-i-dæ**, *s. pl.* [From Lat. *bufo* = a toad, and fem. pl. suffix -*idæ*.]

**Zool.**: A family of Batrachians. They are distinguished from the Pipidae by their possessing a well-developed tongue, and from the Ranidae (Frogs) by the absence of teeth.

**buff-fôn-ite**, *s.* [Lat. *bufo* = a toad.] Literally toad-stone; a name given to the fossil teeth and palatal bones of fishes belonging to the family of Pycnodonts (thick teeth), whose remains occur abundantly in the oolitic and chalk formations. The term *bufonite*, like those of "serpent's eyes," "batrachites," and "crapandines," by which they are also known, refers to the vulgar notion that these organisms were originally formed in the heads of serpents, frogs, and toads.

**bug (1)**, **bügge**, *s. & a.* [In Dan. *büggehus* = (bug-louse) = the insect called a bug; Wel. *bug* = a hobgoblin; *bugan* = a bugbear, a hobgoblin; *bugwth* = to threaten, to scare, from *bu* = a threat, terror, a bugbear; Ir. & Gael. *bocan* = a bugbear; Ir. *pucka* = an elf, a sprite, Puck (*Shaksp.*: *Midsummer Night's Dream*, II. 1., 40, 148; IV. 1., 69; V. 438, 442). Cf. *Mahratta bagal* = a bugbear, a boggle.]

**A. As substantive:**

**I. Ordinary Language:**

\* 1. Of terrifying objects: An object of terror, a bugbear (q.v.). (*Lit. & Fig.*)

"Matrimony hath ever been a blacke bugge in their sinagoge and church."—*Bate*: *Voluntary* (Pref.) (*Richardson*.)

2. Of insects, whether contemptible or annoying:

(1) Of contemptible insects: Any insect of diminutive size, or in other ways contemptible.

"Do not all as much and more wonder at God's rare workmanship in the ant, the poorest bug that creeps, as in the highest elephant."—*Rogers*: *Naaman the Syrian*, p. 74.

(2) Of annoying insects: The bed-bug (*Cimex lectularius*). [II.] Its unattractive form and manner of life are too well known to require description. The eggs, which are white, are deposited in the beginning of summer. They are glued to the crevices of bedsteads or furniture, or to the walls of rooms. Before houses existed, the bug probably lived under the bark of trees.

(3) Any similar insect.

"Yet let me flap this bug with gilded wings,  
This pointed child of dirt which stinks and stings."  
*Pope*: *Prot. to Satires*, II. 303.

**II. Zoology:**

1. The English name of the genus *Cimex*, to which the bed-bug (A. 1. 2. (2)) belongs.

2. The English name of the family Cimicidæ, of which *Cimex* is the type.

3. The English name of the sub-order Heteroptera, one of two ranked under the order Hemiptera or Rhyncota. Most of the species essentially resemble the bed-bug, except that they have wings. Some suck the blood of animals, and others subsist on vegetable juices. Not a few species are beautiful, but many have the same unpleasant smell which emanates from the bed-bug.

**B. As adjective:** Pertaining to bugs, designed to destroy bugs.

\* 2. To live, dwell.  
"Brittises the baronage, that bildes tharein."—*Morte Arthure*, 1841.

¶ Crabb thus distinguishes between *build*, to erect, and *to construct*:—"The word *build* by distinction expresses the purpose of the action, erect indicates the mode of the action; *construct* indicates contrivance in the action.

What is *built* is employed for the purpose of receiving, retaining, or confining; what is *erected* is placed in an elevated situation; what is *constructed* is put together with ingenuity. All that is *built* may be said to be *erected or constructed*; but all that is *erected or constructed* is not said to be *built*; likewise what is *erected* is mostly *constructed*, though not *vice versa*. We *build* from necessity; we *erect* for ornament; we *construct* for utility and convenience. Houses are *built*, monuments *erected*, machines are *constructed*." (Crabb: *Eng. Synon.*)

**A. As substantive:**

**I. Ordinary Language:**

1. In the same sense as II. 1. (q.v.).

2. A protuberance shaped more or less like a bulb, as the bulb of a chronometer.

"If we consider the bulb or ball of the eye."—Ray.

**II. Technically:**

**I. Botany:** A scaly body, formed at or beneath the surface of the ground, sending roots downward from its lower part and a stem upwards from its centre. It propagates itself by developing new bulbs in the axils of the scales of which it is formed. There are two kinds

BULBS (REDUCED).

1. Tunicated bulb, Hyacinth. 2. Section of ditto.  
3. Scaly bulb, Lily (*L. candidum*). 4. Section of ditto.

of bulbs: (1) a *tunicated bulb*, literally a coated bulb, that is, a bulb furnished with a tunic or covering of scales, the outer series of which is thin and membranous, example, the onion; and (2) a *naked bulb*, or one in which the outer scales are not membranous and united, but distinct and fleshy like the inner ones, example, the lilies. The so-called solid bulb of the crocus is, properly speaking, not a bulb at all, but an underground stem with buds upon it, technically called a corm (CORM), whereas a proper bulb is analogous not to an underground stem but to a bud only.

**2. Hort.:** Bulbs placed in water tend to rot; they flourish best when fixed in very light soil or even in the air an inch above water, into which their roots enter. They should have abundance of light.

**B. As adjective:** [BULB-TUBER.]

**bulb-tuber, bulbo-tuber, s.** A corm.

**būlb, v. t.** [From *bulb, s.* (q.v.).] To take or possess the form of a bulb.

"Bulbing out in figure of a sphere."  
Cotton: *Wonders of the Peaks* (1851), p. 11.

**būlb-ā-ḡ-ūūs, a.** [From Lat. *bulbaceus*.] Pertaining to a bulb, bulbous. (Johnson.)

**bulbar paralysis, s.** *Myelitis bulbi acuta*, acute inflammation of the medulla oblongata, with difficulty of swallowing and speaking, and considerable affection of the extremities. The chronic form is characterised by muscular paralysis of the tongue, soft palate, lips, pharynx, and larynx, which derive their nervous supply primarily from the bulbus, from atrophy of the grey nuclei in the floor of the fourth ventricle. (Erb. *Ziemssen: Cyclop. of Pract. of Med.*, London, 1875.)

**būlbēd, a.** [Eng. *bulb*; and suffix -ed.] Having the figure of a bulb, swelling into a sphere at the lower part.

**†būl-bēr-rŷ, būll-bēr-rŷ, s.** [From *bull* (1), and *berry*.] The fruit of *Vaccinium Myrtillus*. [BILBERRY.]

**būlb-if-ēr-ūs, a.** [In Fr. *bulbifère*. From

Lat. *bulbus* (q.v.), i connective, *fero* = to bear, and Eng. suff. -ous.]

**Botany:** Bearing bulbs. Example, *Globba marantina*. (Lindley.)

**būl-būl, būl-būl-lūs, s.** [Lat. *bulbulus*, dimin. of *bulbus* = a bulb.]

**Botany:**

1. A small bulb at the side of an old one.

2. A bulblet (q.v.).

**būl-bī-nē, s.** [Gr. βολβός (bolbos) = a certain bulbous plant much prized in Greece.]

**Bot.:** A genus of plants belonging to the order Liliaceæ (Lilyworts), and the section Anthereæ. The species, which are all ornamentals, are common in flower-gardens.

**būlb-lēt, s.** [Eng. *bulb*; dimin. suff. -let.]

**Bot.:** A small bulb growing above ground on some plants, and which ultimately drops off, and, rooting itself in the ground, becomes a new plant. (Gray.)

**būlb-ōse, a.** [In Sp., Port., & Ital. *bulbosus*; from Lat. *bulbosus*.] The same as BULBOUS (q.v.).

**būlb-ōūs, a.** [In Fr. *bulbeux*.]

Of plants, roots, &c.: Having a bulb, consisting of a bulb. Example, *Cyperus*.

**būl-būl, s.** [Pers. *bulbul* = a bird in voice like the nightingale.] The Indian name of any bird belonging to the Pycnonotidæ, a sub-family of Turdidæ, or Thrushes. The bulbuls are admired in the East for their song, like the nightingale among ourselves. Some species are found in Africa. *Pycnonotus jocosus*, which can be easily tamed, is kept for this end, and *P. hemorrhous* for fighting purposes.

"... the *Bulbul* (*Pycnonotus hemorrhous*), which fight with great spirit, ..."—Darwin: *The Descent of Man*, vol. I, pt. II, ch. xiii., p. 41.

"The peaceful sun, whom better suits  
The music of the *bulbul's* nest."

Moore: *Lalla Rookh: The First-Verse*.

**būlb-ūle, s.** [From Lat. *bulbulus* = a little bulb; dimin. of *bulbus*.]

**Botany:**

1. A little bulb.

2. One of the little seeds growing along the shoots of plants.

\***būl-chin, s.** [Eng. *bull* (q.v.).] A young male calf; used also as a term of endearment and of reproach. (N.E.D.)

"And better yet than this, a *bulchin* two years old,  
A curd pate calf it is, and oft might have been sold."  
Dryden: *Polyolb.*, s. xxi., p. 1,050.

\***bulde, pres. of v.** [BULL, BUILD.]

"Of Cadmus, the which was the first man  
That Thebes bulde, or first the town hygan."  
Chaucer: *C. T.*, l. 1,649-50.

\***būld-rie, s.** [O. Eng. *bulde* = build, and suff. -rie = -ry.] Building, method of building.

"This muddle and buldris  
Was maist magnificent."  
Burel's *Pilg.*, Watson's *Coll.*, II. 33.

\***būle** (1), s. [BULL.]

**būle** (2), s. [BOUL.] (Scotch.)

**būlge, būlge, s.** [From Sw. & Dan. *bölga* = the belly; A.S. *bealg*, *bealg* = a bulge, budget, bag, purse, belly; Gael. *bealg* = belly.] [BELLY.]

1. The protuberant part of a cask.

2. The flat portion of a ship's bottom.

† The same as BILGE, s. (q.v.).

**būlge, v. t.** [From O. Sw. *bulga* = to swell out; A.S. *bealgan*.]

1. To jut out; to be protuberant.

"The side, or part of the side of a wall, or any timber that bulges from its bottom or foundation, is said to better, or hang over the foundation."—Moxon: *Mech. Ex.*

\* 2. To take in water, to leak.

"Thrice roled the ship was tost,  
Then bulg'd at once, and in the deep was lost."  
Dryden.

B. *As substantive*: A native of Burgundy.

**Būr-gūn-dŷ**, s. & a. [In Sw. *bourgogne*; Ger. *burgunder* = a kind of wine (def. 2). From Sw., Dan., & Ger. *Burgund*; Dut. *Bourgondië*; Fr. *Bourgogne* = a country (def. 1).]

A. *As substantive*:

1. *Geog. (Burgundy)*: An old province of France, inhabited originally by a Germanic people, who invaded and settled in it in Roman times. The capital was Dijon. It now forms the Departments of Côte-d'Or, Saône-et-Loire, Ain, and part of Yonne.

2. *Ord. Lang. (burgundy)*: The finest of all the French wines, the produce of vines cultivated in the Côte-d'Or, a portion of the ancient province of Burgundy. The most noted of the red wines of Burgundy are Richebourg and Chambertin. The white wines are less celebrated.

B. *As adjective*: Pertaining to or brought from the place indicated under A. 1.

**Burgundy-hay**, s. A plant, *Medicago sativa*.

**Burgundy-pitch**, s.

1. *Bot., Chem., & Comm.*: *Pice Burgundica*, the resinous exudation of the stem of the Spruce-fir, *Abies excelsa* or *Pinus Abies*, melted and strained. It is got from Switzerland, but seldom genuine. It is hard and brittle, opaque, of a dull reddish-brown colour, empyreumatic odour, and aromatic taste. It gives off no water when heated, is not bitter, and is free from vesicles. It consists chiefly of resin and a little volatile oil, whence its odour. The resin resembles that of turpentine, and of the American frankincense.

2. *Pharma.*: *Offic. prep.*, *Emplastrum piceis*, pitch-plaster. It acts externally as a slight stimulant to the skin. It enters also into the composition of the iron-plaster.

\*1. Originally. (Of the forms *burials*, *buryals*, *biriel*, *buriall*): A tomb, a burying-place.

"... that hidden sepulchris of profetes and maken laire the *burials* of Iust men."—*Wycliffe*; [Parvey], *Mat.* xxiii. 29.

2. *Nov.* (Of the form *burial*): The act of burying, the state of being buried, interment, sepulture.

(1) *Gen.*: In the foregoing sense.

"... the duke take order for his *burial*."

*Shakspeare, Richard III.*, l. 4.

(2) *Spec.*: The act of placing anything under earth or water.

"We have great lakes, both salt and fresh; we use them for *burials* of some natural bodies; for we find a difference of things buried to earth, and things buried in water."—*Bacon*.

II. Technically:

1. *Archæol. & Hist.*: Most nations have selected burial as the best method to dispose of their dead; the practice of burning them on a funeral pile, prevalent to a limited extent among the Greeks and the Romans and nearly universal among the Hindus, being the exception and not the rule. About 1860 (?) B.C. Abraham buried Sarah. The Egyptians, and, at least, in some special cases, the Jews, embalmed their dead (Gen. l. 3, 26; John xii, 39, 40). [EMBALMMENT] In Europe, according to Sir John Lubbock, interments in which the corpse is in a sitting or contracted posture belong to the stone age, those in which it has been burnt and only the ashes interred to the bronze age, and those in which the corpse lies extended presumably to the age of iron. During the first French Revolution a proposal was made to adopt the process of cremation, but it failed. The project was revived on the continent during this century, and has of late years been strongly advocated in the United States. Crematories have been built in several of our large cities, and many bodies reduced to ashes, with the result of some growth of the custom in public favor. As yet, however, the weight of public opinion strongly favors the old method of burial, and this innovation can make its way but slowly.

2. *Law*: In 1693, 1733, and 1783 Acts were passed imposing a tax on burials, but it has been long since repealed. A *felo de se* or suicide was formerly buried in the highway with a stake driven through his body, and all his goods and chattels were forfeited to the king. (*Blackstone*, bk. iv., ch. 14.) [BURIAL-GROUND, BURIAL-SERVICE.]

B. As adjective: (See the compounds.)

† Obvious compound; *Burial-plain*.

**burial-aisle**, *s.* An aisle in which a body has been interred. (*Lit. & fig.*)

"Looks he also wistfully into the long *burial-aisle* of the Past."—*Carlyle*; *Sartor Resartus*, bk. l., ch. xi.

**burial-board**, *s.* A board of persons appointed to regulate burials.

**burial-case**, *s.* A mummy-shaped form of coffin, alleged to be an improvement on the ordinary one in the lids, in having glass over the face, in the means of fastening, in hermetical sealing, and in the complete isolation of the body from air by enveloping the corpse in a resinous or other air-excluding compound.

**burial-ground**, *s.*

I. *Ord. Lang.*: Ground set apart or used for the interment of the dead.

1. *Literally*:

"Their mingled shadows intercept the sight Of the broad *burial-ground* outstretched below." *Scott*; *Don Roderick*.

2. *Figuratively*:

"... we at the time exclaimed that it was the *burial-ground* of all the gods in the island."—*Darwin*; *Voyage round the World* (ed. 1870), ch. viii., p. 168.

II. *Law*:

1. In *England*: Burial-grounds are almost universally situated around churches, urban as well as rural. They are consecrated by bishops, and till recently no one could officiate at the funeral except the clergyman of the parish or another one appointed by him. On his part he was bound, without delay, to bury any corpse brought to the church or churchyard in the manner and form prescribed by the Book of Common Prayer.

2. In *America*: In the United States each city has its large public cemeteries, in which there is no sectarian or other restriction to burial, or to character of service. Many societies and some religious denominations have their special cemeteries.

3. In *Scotland*: The Scottish parochial burying-grounds have long been open to all de-

nominations, the conductors of a funeral having the right to request whom they please to officiate.

4. In *Ireland*: Some years previous to the disestablishment of the Irish Church the burial-grounds were similarly thrown open to all denominations.

**burial-place**, *s.* A place for burying the dead.

† A more general word than burying-ground. When one is interred in a church or committed to the deep the church or the ocean-bed is to him a burial-place, but it is not the burial-ground in which he sleeps. The Romans interred their dead outside the cities; the early Christians imitating them in this respect. Then the latter began to bury around their churches. Haydn makes the first Christian burial-place be instituted in 596, burial in cities in 742, in consecrated places in 750, and in churchyards in 758. Of late, cemeteries, with a consecrated portion for Church of England interments and an unconsecrated one for those of Dissenters, have been opened, Kensal Green in 1832 being the first. Sanitary considerations have led to a gradually increasing number of these places of interment being located outside of cities.

"At rest on the tombs of the knightly race, The silent throngs of that *burial-place*." *Hemans*; *The Lady of Proseance*.

**burial-service**, **burial service**, *s.*

1. *Ecclesiast.*: What is called in the Liturgy "The Order for the Burial of the Dead."

2. *Law*: This "office," the Liturgy intimates, "is not to be used for any that die unbaptized, or excommunicate, or have laid violent hands upon themselves." Till 1880 the clergyman had to read it over all others to whom burial in the parish churchyard was accorded, but by the "Burials Laws Amendment Act" of that year a certain measure of discretion was given him. The same act opened the parochial grounds to any one who had previous rights of interment there without the limitations that an ordained clergyman must officiate, and the burial service must be used. Any person professing to be a Christian can officiate at the request of the relatives, provided proper notice be given to the incumbent. Latitude is given as to the service, but it must be performed in a decent and orderly manner, and without covert attack on Christianity. An ordained clergyman can also officiate now in unconsecrated ground without incurring any ecclesiastical penalty or censure.

6. **Charcoal manuf.**: To expel the volatile elements from wood to reduce it to charcoal.

7. **Brick manuf.**: To bake dry or harden by means of fire.

**B. Intransitive**:

**I. Ordinary Language**:

1. Literally:

(1) To be on fire, to flame.

"... the bush *burned* with fire, and the bush was not consumed."—*Exod.* III. 2.

(2) To emit light, to shine.

"And sacred lamp in secret chamber hid,  
Where it should not be quenched day nor night,  
For fears of evil fates, but *burnen* ever bright."  
*Spenser: F. Q.*, I. XII. 37.

**2. Figuratively**:

(1) *Of feeling or emitting heat*:

(a) To feel a sensation of heat in the physical frame.

(b) To be under the influence of passion, affection, or desire.

(i) Of anger or hatred.

(ii) Of affection or desire.  
"She *burns*, she raves, she dies, 'tis true;  
But *burns*, and raves, and dies for you."  
*Addison*.

† Sometimes it is followed with *with*.  
"Balaigh, the scourge of Spain, whose breast with all  
The rage, the patriot, and the hero *burn'd*."  
*Thomson: Seasons: Summer*.

(c) To flame or glow as that passion, affection, or desire itself.

"... shall thy wrath *burn* like fire!"—*Psalms* LXXXII. 4.

(d) To carry passion into action with destructive effect.

"The nations bleed where'er her steps she turns,  
The groan still deepens, and the combat *burns*."  
*Pope*.

(2) *Of shining or emitting light*: To shine, to sparkle.

"Oh princes; oh wherefore burn your eyes? and why?"  
*Keats*.

**II. Technically. Children's games**: To be near the concealed object of which one is in quest. It is generally worded "You are a burning."

"I flatter myself that I burn (as children say at hide-and-seek, when they approach the person or thing concealed); yes, I do flatter myself that I burn in the conclusion of this paper."—*Blackw. Mag.*, Jan. 1821, p. 335. (Jamieson.)

**C. In special compounds and phrases**:

1. *To burn a bowl*:

**Games**: To displace a bowl accidentally while the game of bowls is being played. (Ogilvie.)

2. *To burn daylight*: To lose one's time.

3. *To burn one's fingers*:

(1) *Lit.*: To do so literally.

(2) *Fig.*: To hurt oneself by meddling with something dangerous, as with financial speculation, quarrel not belonging to one, &c.

4. *To burn out*, *v.t. & i.*: To flame or burn as long as combustible material is accessible, and then to expire.

† *To be burnt out* means (1) to be compelled by fire to quit a place, (2) to be completely burnt.

5. *To burn together*, or simply *to burn*:

**Metal**: To fuse two surfaces of a metal together by pouring over them some of the same metal in a melted state.

6. *To burn up*, *v.t.*:

(1) Wholly or almost wholly to consume.

"O that I could but weep, to vent my passion!  
But this dry sorrow *burns* up all my tears."  
*Drayden*.

(2) To expel the sap or moisture from a plant and thus cause it to wither.

**burned (1), bürnt, \* burned, \* burnde, \* brend, \* brende, \* brent (Eng.), burnt, brunt, \* bront, \* brende, \* brent (Scotch), pa. par. & a.** [BURN, v.; BURNT.]

\* **burned (2), \* bourned, \* borned, \* broned, \* brend, \* brende, pa. par. & a.** [BURN (2), v.] Burnished.

"Wrought al of burned steel, ..." *Chaucer: C. T., l. 1065.*

**bür-nër, s.** [Eng. burn; -er. In Ger. *brenner, verbrenner.*]

**I. Ordinary Language:**

1. *Of persons:* One who burns any thing or person.

2. *Of things:* A thing which does so. (Often used in composition, as a gas-burner.)

**II. Technically:**

**1. Lighting:**

(1) The part of a lighting apparatus at which combustion takes place.

(2) The corresponding portion of a gas-heater or of a gas-stove.

**2. Chem.: [BONSEN'S BURNER.]**

¶ *Bunsen's Burner:* [Named from Herr Bunsen, professor of chemistry at the University of Breslau.]

*Chem.:* A Bunsen's burner consists of a jet surmounted by a wide, brass tube, at the bottom of which are several holes for the admission of air. The air and gas mix in the wide tube in such proportion that they burn with a non-luminous flame. The flame has the following structure. It consists of (1) a dark cone *a*, consisting of cold unburnt coal-gas, mixed with 62 per cent. of air.

(2) The flame-mantle *b*, composed of burning coal-gas mixed with air.

(3) A luminous point *c*, seen only when the air-holes at the base of the lamp are partly closed; the area of this zone may be regulated by opening or shutting the holes to a greater or less extent. The flame of a Bunsen's burner—

(1) *At a low temperature,* is suitable for observing the flame colourations of volatile substances.

(2) *At the highest temperature,* is suitable for fusions at high temperatures.

¶ *The lower oxidising flame* is suitable for oxidation of substances in borax or other beads.

*The lower reducing flame* is suitable for reductions on charcoal, and for fusing borax or other beads in the reducing flame.

*The upper oxidising flame* (obtained by admitting the maximum of air) is suitable for oxidation at lower temperatures than are found at (2) (q.v.).

*The upper reducing flame* is suitable for reductions, and possesses greater reducing power than the lower reducing flame already mentioned.

**bür-nët (1), a. & s.** [From Fr. *brunette* = a dark brown stuff formerly worn by persons of quality; Low Lat. *bruneta, brunatum*; from Fr. *brun* = brown.] [BROWN, BRUNETTE.]

**A. As adj.:** Of a brown colour.

"Sam peirs, sam pale, sam burnet, and sam blew." *Doig: Virg., 104.*

**B. As subst.:** A brown colour.

"Burnet, colour. *Burnatum.*"—*Prompt. Para.*

**burnet-moth, s.**

*Ord. Lang. & Entom.:* The name for the genus of Hawkmoths called Anthrocera, or by some *Zygena*. *Anthrocera stipendula* is the Six-spot Burnet-moth. The six spots, which are on the superior wings, are red, while the rest of the wings are green. It is common in England in June. Its caterpillar, which feeds on the plantain, trefoil, dandelion, &c., is yellow, spotted with black. *A. Loti* is the Five-spot Burnet-moth. It is less common. The caterpillar feeds on honeysuckle, bird-foot trefoil, &c.

**bür-nët (2), a. & s.** [M. E. *burnet* = the pimpernel; cog. with O. Fr. *brunete* = the name of a plant; Mod. Lat. *burneta* = springwort.]

**A. As substantive:**

1. The Pimpernel.

2. *Puterium*, a genus of Rosaceæ (Roseworts). It is called also Salad-burnet and Lesser Burnet. The Common or Garden Salad-burnet (*Poterium sanguisorba*) is abundant in England, but less frequent in Scotland and Ireland. It is a herbaceous plant one or two feet high, with pinnate leaves and dull purplish flowers. The leaves taste and smell like cucumber, and are eaten in salad. The Muricated Burnet, or Salad-burnet (*A. muricatum*), has larger fruit than the former, to which it is closely allied. It is not common. There are other species, but they are foreign. The Great Burnet is *Sanguisorba officinalis*.

**B. As adjective.** (See the compounds.)

**burnet-bloodwort, s.** A plant, *Sanguisorba officinalis*.

**burnet-ichneumon, s.**

*Entom.:* An Ichneumon, the larva of which preys upon the caterpillar of the Burnet-moth.

**burnet-rose, s.** A book-name for *Rosa spinosissima*.

**burnet-saxifrage, s.** A book-name of Pimpinella, a genus of umbelliferous plants. There are two British species, the Common Burnet-saxifrage (*Pimpinella saxifraga*) and the Greater Burnet-saxifrage (*P. magna*). The former is frequent, the latter inclining to rare. The root of the common species is acrid, and is used as a masticatory in toothache, also as an external application to remove freckles, and in gargles to dissolve viscid mucus.

\* **bür-nët'te, s.** [BRUNETTE.]

"In mourning black, as bright burnettes." *The Romant of the Rose.*

**bür-nët-tize, v.t.** [Named after Burnett, who patented the process in 1837.] To use a certain process to prevent decay in wood and fibrous fabrics. [BURNETIZING.]

**bür-nët-tiz-ing, pr. par. & s.**

**A. As present participle.** (See the verb.)

**B. As substantive:** A process for preventing decay of wood and fibrous materials or fabrics. The wood or fibre is immersed in a solution of chloride of zinc, 1 pound; water, 4 gallons for wood, 5 gallons for fabrics, 2 gallons for felt, contained in a wooden tank. Timber is saturated two days for each inch of thickness, and then set on end to drain for from two to fourteen weeks. Cotton, yarns, cordage, and woollens are immersed for forty-eight hours. (*Knicht.*)

**bür-në-win, s.** [From Eng. burn; Scotch *e* = the, and win = wind. Burn the wind.] A ludicrous appellation for a blacksmith.

"Then *Burnetwin* comes on like death At ev'ry chaunc." *Burns: Scotch Drink.*

**bür-nie, †bür-nÿ, s.** [From Scotch *burn* = a stream, and diminut. suff. -ie = little.] A little "burn,"bourne, or stream. (*Scotch.*)

"Ye burnies wimplin' down your glens, Wi' toddin' din." *Burns: Elegy on Captain Mathew Henderson.*

**bürn'-ing, \*brën'-ning, \*bern'-inde, pr. par. a., & s.** [BURN, v.]

**A. As present participle:** In senses corresponding to those of the verb.

**B. As adjective:**

**I. Literally:**

**1. Flaming.**

"Thus once, when Troy was wrapped in fire and smoke, The helpless gods their burning shrines forsook." *Dryden: To the Lord Chancellor Hyde.*

**2. Hot.**

"I know that from thine agony Is wrung that burning rain." *Hemans: The Psalms Wye.*

**II. Figuratively:**

**1. Of the body:** Producing or feeling a sensation of bodily heat.

"Her burning brow, or throbbing breast." *Hemans: Tale of the Secret Tribunal.*

**2. Of the heart or the emotions:**

"... that burning shame Detains him from Cordelia." *Shaksp.: Lear, iv. 2.*

**3. Of the utterance of the lips, or of the pen, or of anything similar:**

"Every burning word be spoken." *Cowper: Roadside.*

**C. As substantive:**

**I. Ordinary Language:**

**1. & 2.** The act or operation of consuming by fire, or the state of being so consumed.

"... burning for burning, wound for wound, ..." *Exod. xli. 28.*

**3. Fire, flame. (Lit. or fig.)**

**(1) Literally:**

"In liquid burnings, or on dry, to dwell, Is all the sad variety of hell." *Dryden.*

**(2) Figuratively:**

"The mild surely, of itself, can feel none of the burnings of a fever."—*South.*

**II. Technically:**

**1. Law:**

(1) Maliciously to burn the sovereign's ships is a highly penal offence; so also is the setting fire to a house, barn, a haystack, &c. [ARSON.] One can be fined even for setting fire to furze, heath, &c., in a forest, chase, on a common, or any similar place.

(2) Burning was once itself a penalty.

(a) *Burning in the hand:* [BRANDING, BENEFIT OF CLERGY.]

(b) *Burning alive:* Women were formerly burned alive for treason, as men were for the crime against nature, and under Edward I. for arson. It was also the punishment during the fifteenth and sixteenth centuries for so-called heresy; the first person who thus suffered being Sir William Sawtre, priest of St. Oysth, London, 12th February, 1401. The cruel practice reached its consummation in Queen Mary's reign (1553-8), during three years of which 277 persons, most of them religious reformers, were consumed at the stake. (*Blackstone: Comment., &c.*)

2. *Metal-working:* Joining metals by melting their adjacent edges, or heating the adjacent edges and running into the intermediate space some molten metal of the same kind. It differs from soldering in this—in burning a heat is required sufficient to melt the original metal, and a flux is seldom used. In soldering a lower heat is used and a more fusible metal employed, assisted by a flux. (*Knicht.*)

3. *Ceramics:* The final heating of clay ware, which changes it from the dried or biscuit condition to the perfect ware. The glaze or enamel is applied to the baked ware, and is vitrified in the burning. (*Knicht.*)

**burning-bush, burning bush, s.**

1. *Lit.:* The bush of Exod. iii. 2-4.

**2. Botany:**

(1) The Artillery plant, *Pilea serpyllifolia*, an urticaceous species.

(2) *Buonymus atropurpureus*, and *E. americanus*. (*American.*)

(3) *Dietamnus fraginella*, a garden plant, which is said to give off so much essential oil that if a light be brought near it it will ignite.

**burning-glass, s.**

1. *Lit. Optics:* A convex lens of large size and short focus, used for causing an intense heat by concentrating the sun's rays on a very small area. The larger the circular area of the lens and the smaller the area of the spot on which the concentrated rays fall, the greater is the effect produced.

2. *Fig.:* Anything which produces the heat of passion, *Spec., love.*

"Dazzling and rich, as through love's burning-glass." *Moors: Titled Prophet of Eborac.*

**burning-house, s.**

*Metal.:* A miner's term for a kiln or roasting.

bäl, böy; pöüt, jöwi; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing, -clan, -tian = shan. -tion, -sion = shün; -tion, -sion = shün. -tious, -sious, -cious = shüs. -ble, -die, &c. = bäl, del.

ing-furnace, in which volatile mineral matters are expelled, as the sulphur from tin pyrites; a kiln.

burning-mirror or reflector, s.

Optics: A concave mirror, or a combination of plane-mirrors, so arranged as to concentrate the rays of the sun into a focus and thus produce heat. Its operation is the same as that of a convex lens.

Archimedes is stated to have burnt the Roman fleet of Marcellus before Syracuse, by concentrating on them the force of several large burning-mirrors.

burning-nettle, s. Urtica urens or Urtica pilulifera.

burning-on, s.

Metal: A process of mending castings by uniting two fractured portions, or by attaching a new piece to a casting.

burning thorny-plant, s.

Bot. or Ord. Lang.: A species of Euphorbia. (Webster.)

būr-nīsh, \*būr-nīs, \*būr-nīsch, \*būr-nīs, v.t. & i. [From Fr. brunissant, pr. par. of brunir = to make brown, from brun = brown.] [BURN (2), v.]

burnt ear, s.

Bot.: A disease in grain caused by a fungus, Uredo carbo, which covers the seed-coat with a black dust, while leaving the interior apparently uninjured, but abortive.

burnt-offering, burnt offering, s. [Eng. burnt; offering. In Ger. brandopfer.]

Scrip. & Theol.: One of the sacrifices divinely enjoined on the Hebrew Church and nation. It is called in their language חֵטֶה (olah), or חֵלֶה (olah), from the root חָלַה (alah) = to ascend, because, being wholly consumed, all but the refuse ashes was regarded as ascending in the smoke to God. In the New Testament it is called θολοκαυσίμα (holokautōma), meaning a whole-burnt offering, an offering wholly burnt. In the Vulgate it is called holocaustum, which has the same meaning. [HOLOCAUST.] Stated burnt-offerings were presented daily, every Sabbath, at the new moon, at the three great festivals, on the day of atonement, and at the feast of trumpets. Private ones might be presented at any time.

\*burnt silver, \*brint silver, s. Silver refined in the furnace. (Scotch.)

business (pron. biz'-nēs, \* bus-i-nēsse, \* bus-y-nēsse, \* bus-y-ness (us as iz), \* bis-y-nēsse, \* bis-y-ness, \* bes-i-ness, s. & a. [Eng. busy; -ness.]

A. As substantive:

I. Subjectively:

†1. The state of being industriously engaged. "The fantasy and the curious busy-ness Fro day to day gan in the soule impress." - Chaucer: C. T., 9, 451-2.

†2. To do business: To apply oneself steadily to any work. "The pilours idlen busynesse and cure." - Chaucer: The Knights Tale, 140.

2. The state of being anxious; anxiety, care.

3. The act of engaging industriously in certain occupations.

(1) The act of forming mercantile or financial bargains. More generally an abundance of such acts done by separate individuals.

"Apparently business was partial in the Discount Market." - Daily Telegraph, October 8, 1877.

(2) The act of engaging in serious work, as distinguished from mere pastime. "Pastime and business both it should exclude." - Cooper: Progress of Error.

II. Objectively: That with which one is engaged; that about which one is or should be busy or anxious. Specially—

1. A multiplicity of affairs. [¶1.] Specially mercantile transactions, commercial intercourse.

2. A single affair or transaction. "You are so much the business of our souls." - Dryden.

¶ In this sense it may have a plural. "I am full of businesses." - Shakep.: All's Well, i. l.

3. An affair of honour, a duel. (Affectedly.) "For that's the word of tincture, the business. Let me alone with the business. I will carry the business. I do understand the business. I do find an affront in the business." - Macbeth of Mervey, &c., vol. v., p. 481.

4. A calling or occupation; also special province, sphere, or duty. "The great business of the senses being to take notice of what hurts or advances the body." - Locke. "... the management of a wine and spirit business, or other position of trust." - Times, Nov. 18, 1878.

5. Legitimate occupation. "What business has a tortoise among the clouds?" - L'Étranger.

6. That which requires to be done, an object. "... a perpetual spring will not do their business; they must have longer days, a nearer approach of the sun." - Bentley.

\*7. Labour and endeavour. "To drawe folk to heven by fatnesse, By good example, this was his business." - Chaucer: C. T., Prologue, 590.

¶ Special phrases:

1. A man of business: A man naturally gifted with capacity, adaptation, and love for managing a great commercial enterprise, a department of the political government, or anything similar. "He was one of the most skilful debaters and men of business in the kingdom." - Macaulay: Hist. Eng., ch. lv.

2. To do the business for one: To kill one, destroy or ruin one, that being the most serious thing which can be done to him. (Colloquial.)

3. To have no business in a place or to do anything: To have no occupation calling one thither, or no obligation or even right to do the thing.

(1) Lit.: Of persons. "A frown upon the atmosphere. That hath no business to appear. Where skies are blue, and earth is gay." - Byron: The Prisoner of Chillon, x.

(2) Fig.: Of things. ¶ (a) Crabb thus distinguishes between business, occupation, employment, engagement, and avocation: "Business occupies all a person's thoughts, as well as his time and power; occupation and employment occupy only his time and strength: the first is mostly regular, it is the object of our choice; the second is casual, it depends on the will of another. Engagement is a partial employment, avocation a particular engagement; an engagement prevents us from doing anything else; an avocation calls off or prevents us from doing what we wish. . . . A person who is busy has much to attend to, and attends to it closely; a person who is occupied has a full share of business without any pressure; he is opposed to one who is idle: a person who is employed has the present moment filled up; he is not in a state of inaction: the person who is engaged is not at liberty to be otherwise employed: his time is not his own; he is opposed to one at leisure."

(b) Business, trade, profession, and art are thus discriminated: "These words are synonymous in the sense of a calling, for the purpose of a livelihood: business is general, trade and profession are particular; all trade is business, but all business is not trade. Buying and selling of merchandise is inseparable from trade; but the exercise of one's knowledge and experience, for purposes of gain, constitutes a business; when learning or particular skill is required, it is a profession; and when there is a peculiar exercise of art, it is an art: every shop-keeper and retail dealer carries on a trade; brokers, manufacturers, bankers, and others, carry on business; clergymen, medical, or military men follow a profession; musicians and painters follow an art."

(c) The following is the distinction between business, office, and duty: "Business is what

bēn, hōy; pōāt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -man = shən. -tion, -sion = shūn. -tion, -sion = zhūn. -clous, -tious, -sious = shūs. -ble, -kle, &c. = bēl, kel.

one prescribes to one's self; *office* is prescribed by another; *duty* is prescribed or enjoined by a fixed rule of propriety; mercantile concerns are the *business* which a man takes upon himself; the management of parish concerns is an *office* imposed upon him often, much against his inclination; the maintenance of his family is a duty which his conscience enjoins upon him to perform. *Business* and *duty* are public or private; *office* is mostly of a public nature: a minister of state, by virtue of his *office*, has always public *business* to perform; but men in general have only private *business* to transact; a minister of religion has public *duties* to perform in his ministerial capacity; every other man has personal or relative *duties*, which he is called upon to discharge according to his station." (*Crabb: Eng. Synon.*)

**business-like, a.** Like business, with proper accuracy, with attention to details, and a careful adaptation of means to the end aimed at, such as is seen in men expert in business, and is one of the most important elements in their success.

"There is no need, however, that it should diminish that strenuous and business-like application to the matter in hand."—*J. & Mill: Political Economy* (1848), vol. 1, bk. 1, ch. vii., § 2, p. 128.

büs'-sle, s. [BUSTLE.] (Scotch.)

\* bust (1), s. [BOIST.] (Scotch.)

1. A box.

2. A tar mark upon sheep, generally the initials of the proprietor's name.

büst (2), s. [In Ger. büste; Fr. buste; Prov. bust; Sp. & Port. busto; from Ital. busto = bust, staya, boddice; Low Lat. bustum = the trunk of a body without the head. Mahn thinks that it is from Ger. bust = breast.] [BREAD, BUSTO.]

Ordinary Language & Sculpture :

1. A statue of the upper part of the body, i.e., the head, shoulders, and breast, without the arms.

"His library, where busts of poets dead And a true Plindar stood without a head, Received of wits..." Pope: Prologue to Satires, 235.

2. The chest or thorax of the human body, the trunk, more specifically the portion of the human body between the head and the waist; whether—

(1) In the actual person. Or (2) in a statue.

\* bust, v.t. [Etymology doubtful. Cf. baste, v.] To beat.

"Beateth the and busteth the as his bothe thral." Bai Meihenhad, p. 51.

büs'-tam-ite, s. [Named after Mr. Bustamente, its discoverer, and suff-ite (Min.) (q.v.).]

Min.: A variety of Rhodonia (q.v.). Dana makes it the equivalent of his calciferous Rhodonite. It is greyish-red in colour.

büs'-tard, s. [In Fr. outarde; Provinc. & O. Fr. bistarde, bostarde, boustarde; Prov. austarde; Sp. avutarda; Port. abetarda, betarda; Ital. ottarda; from Lat. avis tarda (Pliny) = slow bird.]

Ornith.: The name of a genus of birds, the Otis, which is the typical one of the family Otitidae. [ORIS, OTITIDÆ.] Three species occur in Britain, the Great Bustard (Otis tarda), the Little Bustard (O. tetrix), and Macquens's Bustard (O. Macquensii). The Great Bustard was formerly common in Wiltshire and in Norfolk, but being large, the male about four feet long and the female three, it was too conspicuous a bird to escape persecution, and now it is a rare visitor. It is one of the indigenous animals which Sir Chas. Lyell cites as having been recently extirpated or all but extirpated in England. (Prin. of Geol., ch. xlii.) It has the plumage on the back of a bright-yellow traversed by a number of black bars, the rest of the plumage being greyish. It runs and flies well. It is still common on parts of the Continent. The Little Bustard (O. tetrix) is a Mediterranean bird which occasionally straggles to Britain. It is brown dotted with black above, and beneath is whitish. The male has a black neck with two white collars.

Thick-kneed bustard: One of the English names for a bird, the Common Thick-knee (Oidienemus Bellonii).

\* büs-të-öüs, \* büs-ti-öüs, a. [BUSTROÜS.]

\* büs'-tine, s. [Of uncertain origin; perhaps from Eng. fustian, or from O. Fr. boutaine = a fabric made at Montpellier.] A fabric, resembling fustian, of foreign manufacture.

"Nest, nest she was, in bustine waistcoat clean." Ramsay: Poems, li. 70.

büs'-tle, \* büs-tël (t silent), \* büs'-le, \* büs'-kle, \* büs-kle, v.t. & t. [Bustle is probably from Icel. bustla = to bustle, to splash about in the water; and bustle from A.S. bysgian = to be busy. (Skeat, Mahn, &c.).]

A. Intransitive:

1. In a good sense: To be active.

"Come, bustle, bustle; caparison my horse." Shakespeare: Rich. III., v. 3.

2. In a slightly bad sense: To move about in a fussy manner; to go hither and thither with agitation, and generally with unnecessary noise or stir.

"Wherefore now began the hisshopes to bustle and bear rule?" Ope: Exord. of David, li.

"A wing the world, and bustling to be great!" Granville.

"Of idle busy men the restless fry Ran bustling to and fro with foolish haste, In search of pleasure vain that from them fly." Thomson: Castle of Indolence, l. 49.

† B. Transitive: To cause to move about with unnecessary noise or stir; to jostle, to push about.

büs'-tle (t silent) (Eng.), büs'-sle (Scotch), s. [From bustle, v. (q.v.).] In Icel. bustl = a bustle, the splashing about of a fish.] The act of hurrying about with much noise, generally to an unnecessary extent; stir, agitation, tumult.

"The bustle of the mariners, In stillness or in storm, Wordsworth: The Blind Highland Boy.

Crabb thus distinguishes between bustle, tumult, and uproar:—"Bustle has most of hurry in it; tumult most of disorder and confusion; uproar most of noise; the hurried movements of one, or many, cause a bustle; disorderly struggles of many constitute a tumult; the loud elevation of many opposing voices produces an uproar. Bustle is frequently not the effect of design, but the natural consequence of many persons coming together; tumult commonly arises from a general effervescence in the minds of a multitude; uproar is the consequence either of general anger or mirth. A crowded street will always be in a bustle; contested elections are always [not even in the olden time 'always, and now under the ballot rarely] accompanied with a great tumult; drinking parties make a considerable uproar, in the indulgence of their intemperate mirth." (Crabb: Eng. Synon.)

büs'-tle (2) (t silent), s. [Etymology doubtful. Perhaps connected with busk (2), s.] A pad or cushion, formerly worn by ladies beneath their dress to expand their skirts behind, and relieve the wearer of part of their weight. It was called also a bishop.

† büs'-tler (t silent), s. [Elog. bustle; -er.] One who bustles; an active, stirring man.

"Forgive him, then, thou bustler in concerns Of little worth, an idler in the best." Cowper: Task, bk. vi.

büs'-tling (t silent), büs-tël-yng, pr. par., a., & s. [BUSTLE, v.]

\* büs-tö (pl. bustoes), s. [Ital. busto.] [Bust, s.] A bust (prose and poetry).

"... a vestibulo niched with pillars, with some antique bustoes in the niches." Ashmole, Berk. lib. 115.

"Worn on the edge of days, the brass consumes, The busto moulders, and the deep-cut marble, Unsteady to the steel, give up its charge." R. Blair: The Grass.

\* bus-tu-ous, \* bus-të-ous, \* bus-ti-ous, \* bus-tous, s. [BOISTROUS.] Large in size; strong, powerful; terrible, fierce; rough, unpolished, boisterous, rude. (Dunbar: The Thrusell and the Ross, 5; Doug.: Virgil, 151, 27; Lyndsay: Warkis (1592), p. 167.)

\* bus-tu-ous-ness, s. [BOISTROUSNESS.] (Scotch.) (Jamieson.) (Doug.: Virg., 374, 45.)

büs-ÿ, \* büs-ie, \* büs-i (us as iz), \* büs-y, \* büs-l, \* büs-y, \* büs-i (Eng.), büs-ÿ, \* büs-ÿ (Scotch), a. [A.S. bysig, bisig, bysi (Sommer); Dnt. bezig.] [BUSINESS.]

1. Of persons, or of the inferior animals: Occupied so that the attention is fixed on what is being done; occupied, with much work to be done.

(1) Occupied at the time to which attention is being directed.

"Gude ale keeps me bare and bysig, Gaur me tippel till I be dizzy." (Jamieson.)

Remains of Nithsdale Song, p. 96.

"Sir, my mistress sends you word

That she is busy and she cannot come." Shakespeare: Taming of the Shrew, v. 2.

(2) Troublesome; vexatiously meddlesome. "The Christians, sometimes valiantly receiving the enemy, and sometimes charging them again, repulsed the proud enemy, still busy with them." Knolles: History of the Turks.

(3) Habitually occupied, with only necessary remission; bustling, active, industrious. (a) In a good or in an indifferent sense: Occupied.

"... or the controversy of opinions, wherein the busy world has been so much employed." Temple.

(b) In a bad sense: Fussy, meddling. "On meddling monkey, or on busy ape." Shakespeare: Mid. Night's Dream, li. 1.

2. Of things personified: At work temporarily or habitually. Used—

(1) Of the hands, feet, &c., or other material instruments of man's action.

"Display with busy and laborous hand The blessings of the most indebted land." Cowper: Exposition.

(2) Of the powers or faculties of the human mind.

"This busy pow'r is working day and night." Davies.

(3) Of such abstract conceptions as rumour, scandal, science, culture.

"Rumours strange, And of unholy nature, are abroad, And busy with thy name." Byron: Manfred, III. 1.

¶ Compounds of obvious signification: Busy-looking (Pope), busy-minded.

büs-ÿ (us as iz), \* büs-i-on, \* bis-i-on (pret. busied), v.t. & t. [From busy, a. (q.v.) A.S. bysigan, bysgian.]

A. Trans.: To make or keep busy, to engage, to employ industriously or with unremitting attention.

"Loveri busied ee of me."—E. Eng. Pealier: Pe xxxix. 18.

¶ It is followed by with, in, about, amid, &c., or by an infinitive.

"Be it thy course to busy gladdy minde With foreign quarrels." Shakespeare: 2 Hen. IV., iv. 4.

"... busied with dice and claret, love letters and chattering."—Macaulay: Hist. Eng., ch. xx.

"The learning and disputes of the schools have been much busied about genus and species."—Locke.

¶ It is often used reflexively.

"For the rest, it must be owned he does not busy himself by entering deep into any party."—Swift.

\* B. Intrans.: To be active, to be much engaged.

"Martha Mayade aboute moche seruyce."—Wicliffe: Luke x. 40.

"Naf I now to busy bot bare thre dayes." Sir Gaw. and the Gr. Knight, 1,066.

büs-ÿ-böd-ÿ (us as iz), s. [Eng. busy; body.] A person at a certain period or habitually engaged with things with which he has no duty or no clear call to intermeddle. (Used of either sex.)

"And withal they [the younger widows] learn to be idle, wandering about from house to house, and not only idle but idlers also, and busybodies, speaking things which they ought not."—1 Tim., v. 13.

"William thought him a busybody who had been properly punished for running in to danger without any call of duty."—Macaulay: Hist. Eng., ch. xxi.

büs-ÿ-ÿng (us as iz), pr. par. [BUSY, v.]

\* bus-y-ship, \* bis-i-shippe, \* bes-i-ship, s. [O. Eng. bis, best = Eng. busy, and affix -ship.] Business, exercise.

"Lionelliche besichthepe is to lutei wurth."—Ancoren Riehe, p. 684.

büt (1), \* bütte, \* bute, \* bot, \* bote, \* buton, \* boue, \* buten, prep., conj., adv., & s. [A.S. butan, buton, butun, buta, bute, as prep. = without, except; as conj. = unless, except, save, but (Bosworth), from A.S. be, Eng. bit = by, utan, site = without, beyond; O. Sax. bitlan, bitan. [OUT.] In Dut. bituen = without, out, besides, except.]

A. As preposition:

¶ Technically it is one of separation or exclusion (Bain: Higher Eng. Gram.) Its signification is excepting.

1. Except, unless, besides, save.

"... and we have no objection but the obscurity of several passages by our ignorance in facts and persons."—Swift.

2. Without.

"Touch not the cat but a glove; the motto of the Macintoshes." (Jamieson.)

B. As conjunction:

I. Ordinary Language:

¶ Technically it is a co-ordinate conjunction of the division called adverbative, and the subdivision arrestive, that is, it is a conjunction in which the second sentence or clause is in opposition to the one preceding it, and arrests an inference which that first sentence or clause would else have suggested. (Bain: Higher Eng. Gram.) Its significations are—

1. Properly or strictly:

(1) Yet still, notwithstanding which, contrary to what might have been expected.

¶ It expresses that the inference which would naturally be deduced from the first of the two clauses which it couples together cannot legitimately be drawn, there being a disturbing element which destroys its validity.

"The words of his mouth were smoother than butter, but war was in his heart; his words were softer than oil, yet were they drawn swords."—Psalms, li. 21.

† (2) Except that, except that, unless that, were it not that, had it not been that.

böl, böy; pöüt, jöwi; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. pb = f -siam, -man = shan. -tion, -sion = shün; -fion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -tle, &c. = bpl, tpl

¶ Properly it is an ellipsis for *but that*.  
 "And, *but* my noble Moor  
 Is true of mind, and made of no such baseness  
 As jealous creatures are, it were enough  
 To put him to ill thinking." *Shakespeare: Othello*, III. 4.

(8) Except, unless, otherwise than, otherwise than that.  
 "I should sin  
 To think *but* nobly of my grandmother."  
*Shakespeare: Temp.*, I. 2.  
 "Who shall believe  
 But you misuse the reverence of your place?"  
*Ibid.: 2 Hen. IV.*, IV. 2.

2. *More loosely*: Yet, still, however, added to which; as a complementary statement to which.

¶ In this second sense it is used, though there is no disappointment of expectation with regard to the inference derivable from the first clause.

(1) Yet, still, however, nevertheless.  
 "... he [Nasam] was also a mighty man in valour;  
*but* he was a leper." *—Eng.*, v. 1.  
 (2) Added to which, as a complementary statement to which.  
 "By the blessing of the upright, the city is exalted;  
*but* it is overthrown by the mouth of the wicked."  
*—Prov.*, XI. 11.

¶ In the foregoing example there is an opposition between the words exalted and overthrown, and between upright and wicked, but the second clause, taken as a whole, is complementary and not antithetical to the first.

(3) Without this consequence following.  
 "Frosts that constrain the ground,  
 Do seldom dry their surging power withdraw,  
*But* raging floods pursue their hasty hand."  
*Dryden.*  
 (4) Than.  
 "The full moon was no sooner up and shined in all  
 its brightness, *but* he opened the gate of Paradise."  
*—Gardner.*

(5) Therefore, but that, that, for anything otherwise than that.  
 "It is not therefore impossible *but* I may alter the  
 complexion of my plays." *—Dryden.*  
 "... many looking *but* he should have died."  
*—Spalding*, I. 18. (*Jamieson.*)  
 (6) Provided that.  
 "But only he have the crysendom."  
*Robt. of Brunne*, 8, 76A.

**II. Technically:**  
 1. *Logic*: The connecting word which introduced the minor term of a syllogism.  
 "God will one time or another make a difference  
 between the good and the evil. *But* there is little or no  
 difference made in this world; therefore there must be  
 another world, wherein this difference shall be made."  
*—Watts: Logic.*

¶ The word *but* in such a case being useless, and even incorrect, is omitted by Whately and other modern logicians.

"All wits are dreeded; some who are admired are wits; therefore some who are admired are dreeded."  
*—Whately: Logic*, II, III. § 4.  
 2. *Math.*: As assumed or formally proved.  
 "... therefore the side DB is greater than the side BC;  
*but* DB is equal to BA and AC." *—Simon: Euclid*,  
 bk. I, prop. 20.

**C. As adv.:**  
 1. Without.  
 "Whose wale mel boon *buten*." *—Ancren Riwle*, p. 618.  
 2. Not more than, only.  
 "... there is *but* a step between me and death." *—1 Sam.*, XX. 4.

**D. As substantive:**  
 1. The word *but* or the idea which it expresses.  
 "If they [a man's virtues] be like a clear light, eminent,  
 they will stab him with a *but* of detraction." *—Fulham*,  
 pt. 1, Res. 55. (*Richardson.*)  
 2. A hindrance, an impediment. (*Scotch.*) (*Jamieson.*)

**E. In special phrases and compounds:**  
 1. *But-and, but and, botand, bot and, conj.* [*O. Eng.*, *but, bot, &c.*] Besides.  
 "Or I call brene youss therein,  
 Bot send your helles thre."  
*Edmon & Gordon, Percy's Rhetiquem*, I. 88.

2. *But for*: Without, had it not been for.  
 "Rash man, forbear: *but* for some unbelied,  
 My joy had been as fatal as my grief." *—Wallen.*  
 3. *But-if, bot if, but if, but gif, bute if*: Unless, except.  
 "But *if* he wold in all wis - him-self schew  
 forment." *—William of Palerne*, 987.  
 "I cannot gif you that pre-emyence and place, *but*  
*if* I knew some excellent godlie learning and gude  
 lyfe in you mar than all the ancient Doughtouris."  
*—Kennedy of Corraquall in Keith's Hist.*, App. p. 137.  
*(Jamieson.)*

4. *But perswaving*: Without being seen.  
 "Thai set thair seideres to the wall,  
 And *but* perswaving, cam vp all."  
*Barbour: Bruce*, xvii. 91-2

5. *But that, bote that, bute that, buttan that, buton that*: Unless, except.  
 "He woldde all his kinkelond seltten on beore lond,  
*but* that he ideope wore king of than lond." *—Lagamon*, III. 222.  
 5. *But yet*: Yet, still, notwithstanding, stated more emphatically.  
 "But yet, Madam—  
 I do not like *but* yet; it does allay  
 The good precedence; fe upon *but* yet!  
 But yet is as a goaler, to bring forth  
 Some monstrous malefactor."  
*Shakespeare: And. & Cleop.*, II. 4

**but-and, prep.** [*But*, E (1).]  
**but-if, conj.** [*But*, E (3).]

**büt** (2), **bütt**, *prep., adv., & a.* [*From A.S. bitan, biton, bitun*, (*prep.*) = without, except. *From prefix be and ðan* = without, beyond.] (*Scotch.*)  
**A. As prep.**: Towards the outer part of the house.  
 "Liffs up his head, and looking *butt* the floor."  
*Ros: Helene*, first ed., p. 74.  
 "Flaught bred upon her *but* the house he sprang."  
*Ibid.*, p. 76.  
**B. As adv.:**  
 1. Towards the outer apartment of a house.  
 "And *but* who come into the hall anone;  
 And syne who went to se gif yit occur."  
*Dunbar: Maitland Poems*, p. 70.  
 2. In the outer apartment.  
 "... to the bernis *but* her sweet blenkis I cast."  
*Dunbar: Maitland Poems*, p. 64. (*Jamieson.*)

¶ **But-and-ben, a.**: Outside and inside; pertaining to the two rooms of a two-roomed cottage.

**C. As substantive**: The outer room in a two-roomed cottage. It is the kitchen, while the "ben" (be-in), or inner room, is the parlour. [*BEN.*] (*Scotch.*)  
 "Mony blenkis ben our the *but* [that] full far sittis."  
*Dunbar: Maitland Poems*, p. 62. (*Jamieson.*)

**büt** (3), **s.** & **a.** [*Butt.*] The thick end of anything. [*Butt.*]

**but-end, butt-end, s.**  
 1. *Ordinary Language*:  
 1. *Lit.*: The thick end of anything; thus the *but-end* of a musket or rifle is the end opposite to the muzzle.  
 "Another had rudely pushed back a woman with the  
*but end* of his musket." *—Macaulay: Hist. Eng.*, ch. XI.  
 2. *Fig.*: The most important portion of anything.  
 "Amen; and make me die a good old man!  
 That is the *but-end* of a mother's blessing."  
*Shakespeare: Richard III.*, II. 2

**II. Gardening**: In a similar sense.  
 ¶ *The but end of a tree*: The part of the stem nearest the root; the part at which the lowest measurement is taken.

**but-hinges, s. pl.** [*Butt*, *HINGES.*]  
 • **büt** (4), **s.** [*Dnt. bot; Sw. butta; Ger. bütt.*] The pecten or scallop-shell (?). [*Butt* (6).]

**büt-äl-an-ine, s.** [*Eng., &c., butyl*] *alane*.  
*Chem.*: Amidoisovaleric acid C<sub>6</sub>H<sub>9</sub>(NH<sub>2</sub>)O<sub>2</sub> or (H<sub>3</sub>C)<sub>2</sub>CH.CH(NH<sub>2</sub>).CO(OH). It occurs in the pancreas of the ox. It can be formed by heating bromoisovaleric acid with ammonia. It crystallises in shining plates, which can be sublimed. It is soluble in alcohol and in water.

**bü-täne, s.** [*From Eng., &c., butyl; suff. -ane.*]  
*Chem.*: A compound, also called Tetrane, C<sub>4</sub>H<sub>10</sub>. It exists in two modifications: (1) *Normal Butane*, CH<sub>3</sub>.CH<sub>2</sub>.CH<sub>2</sub>.CH<sub>3</sub>, or Diethyl, a paraffin hydrocarbon occurring in petroleum, also obtained by heating ethyl iodide with zinc in sealed tubes to 100°. It is a colourless gas which may be condensed into a liquid boiling at 1°C. (2) *Isobutane*, CH<sub>3</sub>-CH<CH<sub>3</sub>, is obtained from tertiary butyl alcohol by converting it into tertiary butyl iodide and acting on that with nascent hydrogen. It is a gas which liquefies at 17°.

**bütch-ër, \*boch-ër, \*boch-ëre, \*bowch-ër, \*bouch-ër, s. & a.** [*Fr. boucher; Prov. bochier; Ital. beccato, beccaro; Low Lat. bocherius* = (1) a killer of goats (2) a butcher generally. *From O. Fr. boc; Fr.*

 "Or *butcher-sire* that reaves his son of life."  
*Shakespeare: Venus and Adonis*, 76A.

**butcher's-broom, s.** [So called because the green shoots of the plant were formerly used by butchers to sweep their blocks.] The English name of the Ruscus, a genus of plants belonging to the order Liliaceæ (Lily-worts), and the section Asparagus. The Common Butcher's-broom (*Ruscus aculeatus*) is wild in England, being the only native monocotyledonous shrub. It has a rigid branched stem, very rigid and pungent, with ovate, acuminate leaf-like expansion, with a solitary inconspicuous white flower on their upper surface. This is succeeded by a red berry almost as large as a cherry. The tender shoots have sometimes been gathered by the poor in spring and eaten like asparagus. There are several foreign species.

**butcher's-meat, butcher-meat, s.** Such animal food as a butcher deals in, beef, mutton, lamb, &c., as distinguished from fish, fowl, shellfish, and such like.

**butcher's prick-tree, s.** Two plants —(1) *Rhamnus Frangula*, (2) *Euonymus europæus*.

† **butcher-work, s.** The work of a butcher. (Contemptuously applied to slaughter in war.)  
 "That those who loathe alike the Frank and Turk  
 Might once again renew their ancient *butcher-work.*"  
*Byron: Child Harold*, II. 67.

**bütch-ër, v.t.** [*From butcher, s. (q.v.).*]  
 1. *Lit.*: To kill an animal, in butcher fashion, for food.  
 2. *Figuratively*:

\* Six thousand years are near hand fled, Sin I was to the butchering trade. Burns: Death and Doctor Hornbook.

**butchering-tool**, *s.* A contemptuous appellation for a sword.

\* But as yet, though the soldier wears openly, and even parades, his butchering-tool, nowhere, far as I have travelled, did the schoolmaster make show of his instructing-tool.—Carlyle: Sartor Resartus, bk. ii, ch. iii.

\* **būčh-ēr-lī-nēss**, *s.* [Eng. *butcherly*; -ness.] The quality of being butcherly or resembling a butcher. (Johnson.)

\* **būčh-ēr-lý**, \* **booch-ēr-lý**, *a.* [Eng. *butcher*; -ly.]

1. Of persons: Butcher-like, sanguinary, cruel.

2. Of things: ↑(1) Subjectively: As if inspired by a butcher; as if one were being butchered.

\* There is a way, which brought into schools, would take away this *butcherly* fear in making of Latin.—Achim.

(2) Objectively: Butcher-like, cruel.

\* What stratagem, how fall, how *butcherly*, This deadly quarrel daily doth beget?—Shaksp.: 3 Hen. VI., II. a.

\* **būčh-ēr-y**, \* **boch-ēr-y**, \* **boch-ēr-ye**, *s.* [Eng. *butcher*; -y. In Fr. *boucherie*.]

I. Literally:

1. The procedure of a butcher in killing animals for food.

\* Yet this man, so ignorant in modern *butchery*, has cut up half an hundred hares, and quartered five or six miserable lovers, in every tragedy he has written.—Pope.

\* 2. A slaughter-house, a place where animals are killed or human beings in large numbers put to death.

\* This is no place; this house is but a *butchery*; Abhor it, fear it, do not enter it.—Shaksp.: As you like It, II. a.

II. Figuratively: Cruel and remorseless slaughter of human beings, especially on an extensive scale.

\* I did savor To do this ruthless piece of *butchery*.—Shaksp.: Richard III., IV. a.

\* The *butchery* was terrible.—Macaulay: Hist. Eng., ch. xli.

\* **būte**, *v. t.* [From Icel. & Sw. *bíta* = to change, to exchange, to truck, to shift, to divide, to share; Dan. *bytte* = to exchange; Dut. *buiten* = to puffer, to get booty.] [Boor (1), *v.*; Boort, *BUTTING*.] (Scotch.)

\* O. Scots Law: To divide for a prey. (Used specially of prizes at sea.)

\* . . . to *bute* and part the prizes taken either in their presence or absence.—Ba'four: Pract., p. 68.

\* **būte**, *pret. of v.* [BEAT, *v.*] Beat.

\* By that he hanted y-blowe a blast, On the town they *bute* tabours taste, and made noyse horryble.—Sir Ferumbras (ed. Herrtage), p. 3, 895-96.

\* **būte**, *s.* [Boor (1), *s.* From *bute*, *v.*]

1. Remedy, help. (Rowlands and Ottwell (ed. Herrtage), 495.)

2. Booty. And gilt it beis main, it sall remane to *bute* and parting.—Ba'four: Pract., p. 64.

\* **būte**, *prep. & conj.* [BUT.]

**būte if**, *conj.* [BUT IF.]

\* **bū-tē-a**, *s.* Named after John, Earl of Bute (1713-92), a magnificent patron of botany.

*Bot.*: A genus of papilionaceous plants, consisting of trees and scandent shrubs. *Butea frondosa* (Downy-branched Butea) is a large tree called in India *pulinis*, whence the name *Plassy*, the locality of the celebrated battle on June 23, 1757, which laid the foundation of the Indian empire. It has large axillary and terminal racemes of deep-red downy flowers, which dye cotton cloth, previously impregnated with a solution of alum, or of alum and tartar, a fine yellow colour. They are used also as a discentient to indolent tumours. The gum-lac of commerce comes from the same tree.

\* **būte-īng**, *pr. par. & a.* [BUTE, *v.*]

A. As present participle: (See the verb.)

B. As substantive:

1. The act of dividing goods captured; the state of being so divided.

\* . . . the ball right that they shall have to the said *bute* and *buteing* of goods. . . —Ba'four: Pract., p. 63.

2. The goods divided.

\* Of all pilings, the captain, the master, &c. gettin na part nor *buteing*, but it shall be equalis dividit among the remnant of the companie wateriers that mak watch, and gangis to the ruder.—Ba'four: Pract., p. 64.

\* **būte-lang**, *s.* [From O. Scotch *bute* = a butt, and *lang* = long, length.] The length or distance between one butt, used in archery, and another.

\* As his maleste was within the pair of *bute-langs* to the towne of Perth, . . . —Acts Ja. VI., 1000 (ed. 1814), p. 203.

\* **būte-lēsse**, \* **bote-lēsse**, *a.* [BOOTLESS.] (*Morte Artoure*, 981 & 1,014.)

\* **bu-ten**, *prep. & adv.* [A.S. *būtan*.] About.

\* Those *buten* noe long awing he dreg.—Story of Gen. & Exod., 563.

\* **bū-tēne**, *s. & a.* [Eng. *but(yin)*, and -ene, a termination used for hydrocarbons having the formula C<sub>n</sub>H<sub>2n</sub>.]

A. As substantive:

*Chem.*: An organic, distomic, fatty radical, C<sub>4</sub>H<sub>8</sub>, called also Butylene, Quartene, and Tetrene. There are three modifications of it, having the formula C<sub>4</sub>H<sub>8</sub>. Normal Butene, CH<sub>3</sub>-CH<sub>2</sub>-CH=CH<sub>2</sub>; Pseudo-*n*-butene, CH<sub>3</sub>-CH=CH-CH<sub>2</sub>; Iso-butene,

Normal-butene is produced by the action of alcoholic potash on primary-butyl-iodide (CH<sub>3</sub>-CH<sub>2</sub>-CH<sub>2</sub>-CH<sub>2</sub>I), or by the action of zinc ethide Zn(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub> on brom-ethene (CH<sub>2</sub>=CHBr). It is a gas at ordinary temperatures; at 10° it is condensed into a liquid.

Pseudo-butene is formed by the action of alcoholic potash on a pseudo-butyl-iodide (CH<sub>3</sub>-CH<sub>2</sub>-CH(I)-CH<sub>3</sub>). It boils at 3°. It can also be obtained by the decomposition of amyl alcohol at red heat.

Iso-butene is formed by the action of alcoholic potash and tertiary-butyl-iodide, or by the electrolysis of isovaleric acid. It boils at 6°. It is absorbed by strong H<sub>2</sub>SO<sub>4</sub>; on diluting with water and distilling, tertiary-butyl-alcohol is obtained, C(CH<sub>3</sub>)<sub>2</sub>OH. The di-bromides of the three isomeric butenes, C<sub>4</sub>H<sub>8</sub>Br<sub>2</sub>, boil—normal at 160°, iso at 159°, and pseudo at 149°.

B. As adjective: (See the compound.)

**butene glycols**, *s. pl.* Chemical compounds, C<sub>4</sub>H<sub>8</sub>(OH)<sub>2</sub>, called also butylene alcohols and quartene alcohols. They are diatomic alcohols. Six are theoretically possible. The following have been examined:—

1. Normal Butene Glycol: CH<sub>3</sub>-CH(OH)-CH<sub>2</sub>-CH<sub>2</sub>(OH). Formed by leaving a cold mixture of acetic aldehyde and dilute hydrochloric acid for a few days, when aldol, the aldehyde of butene glycol, is formed; this is treated with sodium amalgam. It is a thick liquid, boiling at 204°. By oxidating with chromic acid mixture it is converted, first into crotonic aldehyde, then into acetic and oxalic acids.

2. Ethyl Glycol: CH<sub>3</sub>-CH<sub>2</sub>-CH(OH)-CH<sub>2</sub>(OH), obtained from normal butene bromide by saponification with caustic potash. It is a viscid liquid, boiling at 192°. By rapid oxidation it is converted into oxalic acid, but by dilute nitric acid into glycollic and glyoxylic acids.

3. Isobutene Glycol:  $\begin{matrix} H_3C \\ | \\ H_3C > C(OH) - CH_2(OH) \end{matrix}$ , or dimethyl glycol. It is prepared by heating isobutene bromide for several days with potassium carbonate. It boils at 178°. Oxidised by potassium permanganate into carbonic and acetic acid.

\* **bū-tē-ō**, *e.* [Lat. *buteo* = a buzzard.]

*Ornith.*: A genus of raptorial birds, the typical one of the sub-family Buteoninae. There are two British species, *Buteo fuscus*, the Brown or Common Buzzard, and *B. lagopus*, the Rough-legged Buzzard. [BUZZARD.]

\* **bū-tē-ō-nī-nas**, *s. pl.* [From Lat. *buteo* = a buzzard, and *f. pl. suff. -inæ*.]

*Ornith.*: A sub-family of Falconidae, containing the Buzzards. It is placed near the Aquifinae (Eagles), and has a remote affinity to the Vulturidae (Vultures). [BUZZARD.]

\* **bu-tē-ō-nine**, *a.* [BUTEONINE.] Pertaining to, or resembling the Buzzard.

\* **būth**, \* **būthe**, 1, 2, and 3 pers. *pl. pr. indic. of v.* [BEN.] Are.

\* No *būth* here in this *būth* but our selue tweyne.—William of Palerne, 4,447.

\* [a] If they two ne *būth* nocht bolds! agben me to Eghte on stour.—Sir Ferumbras (ed. Herrtage), p. 4, l. 100.

\* **būths-carle**, *s. pl.* [A.S. *būthe-carl* = a sailor.]

O. Law: Mariners, seamen. (Selden: *Mare Clausum*, 184.) (Wharton.)

\* **būt-lēr**, \* **būt-tel-ar**, \* **bu-tel-er**, \* **bot-tel-er**, \* **bot-ll-er**, \* **bōt-ēl-ēr**, \* **bōt-ēr**, *s.* [Fr. *bouteiller*; Norm. Fr. *butuiller*; Prov. *boteillier*; Sp. *botillero*; Ital. *bottigliere*; Low Lat. *buticularius*. From Fr. *bouteille*; Norm. Fr. *butuville* = a bottle.] [BOTTLE.]

\* 1. A cup-bearer.

\* This *butelet* Joseph sone for-gat.—Story of Gen. & Exod., 2,092.

\* Botlere (*boteler*, P.). *Piacenza, promus, propi nator, acalculis, Cath.*—Prompt. Para.

\* And thou shalt deliver Pharaoh's cup into his hand, after the former manner than thou wast his *butelet*.—Gen. xl. 13.

2. An officer who had charge of the wine for the royal tables, and certain duties connected with the import of wine. [BUTLER-AGE.]

3. The head male servant of a household, who has charge of the plate, wines, &c.

\* This letter, notwithstanding the poor *butelet's* manner of writing it.—Spectator.

\* **būt-lēr-age** (age as *īg*), *s.* [Eng. *butler*, and suff. -age.] An ancient hereditary duty belonging to the crown. It was the right of taking two tuns of wine from every ship importing twenty tuns or more into England. This right, which is mentioned in the great roll of the Exchequer in 8 Richard I., was commuted under Edward I. for a duty of two shillings on every tun imported by merchant strangers. The proceeds were given to the king's butler, whence the name *butlerage*. It was called also *prisage* of wines. (Blackstone: *Comment.*, bk. I., ch. 8.)

\* Those ordinary finances are casual or uncertain, as be the *excise*, the customs, *butlerage*, and impost.—Bacon.

\* **būt-lēr-ship**, \* **būtt-tel-lar-shypp**, *s.* [Eng. *butler*, and suff. -ship.] The office or functions of a butler.

\* . . . and restored the chiefe buttelar vnto hys *buttelarshypp*.—Bible (1851), Gen. xl.

\* And he restored the chief butler unto his *buttel-ship* again; and he gave the cup into Pharaoh's hand.—Gen. xl. 21.

\* **būtt-mēnt**, *s.* [Contr. from Eng. *abutment* (q.v.).]

*Architecture*:

1. The buttress of an arch; the supporter, *i.e.*, the part which joins it to the upright pier. [ABUTMENT.]

2. The mass of stonework at the extremities of a bridge to give lateral support to its arches, or support to the ends of the beams if the bridge be a wooden one.

**butment-cheek**, *s.*

*Carp.*: The part of a mortised timber surrounding the mortise, and against which the shoulders of the tenon bear.

\* **bū-tō-mā-çē-æ**, *s. pl.* [From Mod. Lat. *butomus* (q.v.), and fem. pl. suff. -æ.]

*Bot.*: Butomads, an order of plants placed by Dr. Lindley under his seventeenth or Alismal alliance. The sepals are three, generally herbaceous. The petals are three, coloured, and petaloid, being generally purple or yellow. The flowers are in umbels. There are three, six, or more ovaries distinct, or united into a single mass. The seeds are numerous and minute. The leaves, which are very cellular, have parallel veins, and often a milky juice. The species are found in marshes in Europe and in tropical America. In 1845 Dr. Lindley estimated their number at seven, in four genera.

\* **bū-tōm-ads**, *s. pl.* [From Mod. Lat. *butomus* (q.v.), and Eng. pl. suff. -ads.]

*Bot.*: Lindley's name for the order Butomaceæ (q.v.).

\* **bū-tōm-ūs**, *s.* [In Fr. *butome*; Sp. & Ital. *butomo*; Gr. *βούτομος* (*butomus*); *βούτομος* (*butomus*); from *βούτ* (*bute*) = an ox, and *τομος* (*tomos*) = to cut. So called because the sharp leaves cut the mouths of oxen which feed upon them.]

**Bot.** : Flowering-rush, formerly called also Water-gladiole, or Grassy-rush. A genus of plants, the typical one of the order Butomaceae. It has nine stamens, a very unusual number, and six capsules. *Butomus umbellatus*, or Common Flowering-rush, is wild in ditches and ponds in England and Ireland. It is a highly ornamental plant, with the leaves, which are all radical, two or three feet long, and an umbel of many rose-coloured flowers.

**butt (1), bütt, s. & a.** [Fr. *bout*; O. Fr. *bot* = an end.]

**A. As substantive:**

**I. Ord. Lang.:** The end, the furthest limit of anything.

**II. Technically:**

**1. Tools, weapons, &c.:**

(1) *Gen.*: The hinder, larger, or blunter end of an object; as of a gun, a connecting-rod, a crow-bar, &c.

(2) *Spec.*: The shoulder-end of a gun-stock covered with a heel-plate.

**2. Tanning, &c.:**

(1) The thick part of an ox-hide.

(2) *Pl. (butts)*: Those parts of the tanned hides of horses which are under the crupper. (*Jamieson.*)

**B. As adjective:** (See the compound.)

**butt-end, s.** [BUT-END.]

**butt (2), s.** *in compos.* [From *butt (1)*, *v.* = to shut.] An abuttal.

**Butts and bounds:** The abutments and boundaries of land. (*Holloway.*)

"But or bertel or bysselle (bersell, P.) *Meta.*"—*Prompt. Parv.*

**I. Joinery, &c.:**

(1) The end of a connecting-rod against which the boxing is attached by the strap, cotter, and gib.

(2) The end of an object where it comes squarely against another.

(3) A joint where the ends of two objects come squarely together without scarfing or chamfering.

**2. Shipbuilding:** The meeting-joint of two planks in a strake. The joint between two strakes is a seam.

**3. Door-hinges:** A form of door-hinge which screws to the edge of a door, and butts against the casing instead of extending along the face of a door, like the strap-hinge. It consists of two oblong plates, one edge of each of which is dentated to fit its fellow, a pintle traversing each interlocking portion to form a joint. [BUTT-HINGE.]

**4. Fire-engines:** The standing portion of a half-coupling at the end of a hose.

**butt-chain, s.**

**Saddlery:** A short chain which reaches from the leather-ting to the single-tree, to each of which it is hooked.

**butt-hinge, butt-hinge, s.** A hinge formed of two plates and interlocking projecting pieces which are connected by a pintle.

**butt-howel, s.**

**Coopering:** A howling-adze used by coopers.

**butt-joint, s.**

**Carp.:** A joint in which the pieces come square against each other, endwise. In iron-work the parts are welded, and the term is used in contradistinction to a lap-joint or weld.

**butt-weld, s.**

**Forging:** A weld in which the edges are square-buttet and jammed against each other, and then welded; a jump-weld.

**bütt (3), s. & a.** [From Fr. *but* = a butt, a mark, aim, a laughing-stock; *butte* = a hillock, a mark, a mound of earth, point, aim, goal, butt.]

**A. As substantive:**

**I. Ordinary Language:**

**1. A place or person aimed at.**

(1) *Lit.*: A place on which a mark is placed to be shot at, a target. [II., 1.]

¶ Often in the plural, referring to a line of marks to be aimed at rather than a single one.

"But ehlet, beside the butts, there stand Bold Robin Hood and all his band."

*Scott: Lady of the Lake, v. 22.*

¶ **A butt's length:** The distance at which the butt is from the person aiming at it.

(2) *Figuratively:*

(a) A place which one aims at reaching.

"Here is my journey's end, here is my butt, The very sea-mark of my utmost sail."

*Shakespeare: Othello, v. 2.*

(b) A person or persons viewed as an object for angry attack, or for ridicule.

"The papists were the most common-place, and the butt against whom all the arrows were directed."—*Clarendon.*

"Finds thee, O butt, the butt to crack his joke on."

*Pope: Satire, 1, 760.*

**2. Ground appropriated for practising archery.** (*Scotch.*)

**3. A piece of ground which in ploughing does not form a proper ridge, but is excluded at an angle; a piece of land in any way disjoined from the rest.** (*Scotch.*)

"And that other riggs or butt of land of the same lyceid in the field called the Galloobank, or the Lall or south and therout."—*Act Oats II. (ed. 1614), VIII. 285.*

¶ Hence a small piece of land is sometimes called the butts. (*Jamieson.*)

**II. Technically:**

**Rifle and Artillery Practice:**

**1. A target.**

**2. A wooden structure, consisting of several thicknesses of boards, separated by small intervals, for the purpose of ascertaining the depth of penetration of bullets.**

**3. A frame of iron and wood, representing a large section of armour-plating, and moored in position for determining the destructive power of shot, shell, and given charges of powder.**

**4. A mound of earth to receive the bullets in the proof of gun-barrels.** (*Knight.*)

**B. As adj.:** (See the compounds.)

\* **butt-shaft, \* but-shaft, s.** A kind of arrow, used for shooting at butts; formed without a barb, so as to stick into the butts, and yet be easily extracted. (*Nares.*)

"The very pila of his heart sleft with the blind bow-boy's butt-shaft."—*Shakespeare: Rom. & Jul., II. 4.*

"Cupid's butt-shaft is too hard for Hercules' club."—*Shakespeare: Love's Labour Lost, I. 2.*

**bütt (4), s.** [From *butt (1)*, *v.* = to strike as a ram does; Fr. *botte* = a blow in fencing with a foil or sword; Sp. & Port. *bote* = a thrust, a blow, a rebound; Ital. *botta, botta* = a blow, a stroke.]

**I. Ordinary Language:**

**1. The act or operation of aiming a blow.**

**2. A blow given by a ram, or other animal, with its forehead.**

\* **II. Fencing:** A stroke given in fencing.

"It disputes arise Among the champions for the prize, To prove who gave the fairest butt, John above the chalk on Robert's coat."

*Prior.*

**bütt (5), s.** [Fr. *botte* = a boot, a vessel, a butt; O. Fr. *bout, bouz, bouz*; Sp. *botá* = a leather bottle, a butt, a boot; Ital. *botte* = a cask, a vessel, a boot.] [BOOT, s.]

**1. Of wine:** A cask containing 126 gallons.

"... he, being adjudged for a traitor, was privily drowned in a butt of malmsiey."—*For: A Tale and Monumente (ed. Caxley), vol. III. p. 75a.*

**2. Of beer:** A vessel containing 108 gallons.

**3. Of currants:** A vessel containing from 15 to 22 cwt.

**bütt (6), \* bütte, \* but, s.** [In Sw. *butta* = a turbot; Dut. *bot*; and Ger. *bütt, butte* = a flounder.]

**1. (Of the form but):** A pecten, a scallop-shell (?).

"But, lyscha. Pecten."—*Prompt. Parv.*

\* **2. (Of the form butte):** A turbot (?). (*Havlok the Dane, 759.*) (*Herbert Coleridge.*)

**3. (Of the form bütt):** A name given at Yarmouth to the flounder (*Platessa flesus*). (The term is of northern origin.)

**bütt (1), \* butten, \* button, v. & f.** [Norm. Fr. *buter*; O. Fr. *boter* = to push, to strike; Sp. *botar* = to rebound; Port. *botar* = to throw; Ital. *buttare* = to throw.]

**A. Intrans.:** To strike against with the forehead, as a ram or a bull does.

"For bigge Bulles of Basna brace hem about, That with theyr hornes butteth the more stoutest."—*Spenser: Shep. Cal., IX.*

"He seeks the fight; and, idly butting, coils His rival godd in every knotty trunk."

*Thomson: The Seasons: Spring.*

**B. Trans.:** To strike with the forehead, as a ram; to drive. (*Lit. & fig.*)

"Come, leave your tears; a brief farewell—the best"

With many heads butts me away."—*Shakespeare: Coriolanus, IV. 1.*

**bütt (2), v. t.** [Contracted from *abut*, *v.* (q. v.)] To abut, to join at the extremity = at the side, to be as a boundary to.

"And Burnedale then doth butt on Don's well-watered land."

*Drayton.*

**büt-töd, pa. par.** [BUT (1), *v. t.*]

**büt-töd, a.** [From *but (2)*, *v.*]

**büt-tör (1), \* büt-töre, \* büt-türe, \* büt-türe, \* büt-tyr, \* büt-öre, \* bot-üre, \* bot-ere, \* bot-yr, s. & a.** [A.S. *butere, butyre, butera*; Fries. *butere*; Dut. *bater*; Ger. *butler*; Fr. *beurre*; Prov. *buire, boder*; Ital. *burro*; Lat. *butyrum, butyrum, buturium*; Gr. *βούτυρος (boutyros)* = (1) butter, (2) a kind of salve; *βους (bous)* = an ox, bullock, or cow, and *τύρος (tyros)* = cheese.]

**A. As substantive:**

**I. Ordinary Language:**

**1. Lit.:**

(1) In the same sense as II. 1 (q. v.).

"Beure [butyr, x.]. *Buturum.*"—*Prompt. Parv.*

(2) **The butter of Scripture:** In most cases curdled or inspissated milk.

"And he took butter, and milk, and the calf which he had dressed, and set it before them..."—*Gen. xviii. 8.*

**2. Fig.:** A substance resembling butter in consistency, or in any other obvious quality. [II. 2.]

**II. Technically:**

**I. Dairy-work, Comm., &c.:** The fatty portion of milk or cream solidified by churning. In the making of butter, the cream is collected from time to time and kept in covered jars. When a sufficient quantity of cream has been obtained, it is transferred to a churn, or other suitable apparatus, and kept constantly agitated, until the butter forms. In order to preserve the flavour and colour, it is important that the agitation should be as regular as possible, and that the temperature in the churn should never exceed 64° Fahr. As soon as the churning is finished, the butter is thoroughly washed with cold water to free it from the adhering butter-milk, and a small quantity of salt, not exceeding 2 per cent., is worked into it.

Pure butter should consist entirely of milk fat, with a small and variable quantity of water; but in the process of manufacture it is found impossible to exclude altogether the other constituents of the milk. We find, therefore, in genuine butter, from 0.8 to 2.0 per cent. of casein, or curd, and a trace of milk sugar. The "fat" of butter consists of the glycerides of the insoluble fatty acids—stearic, palmitic, and oleic—in combination with from 5 to 7 per cent. of the glycerides of the soluble or volatile fatty acids, principally butyric. The characteristic taste and smell of butter are chiefly due to the presence of these volatile acids.

For many years it was held by chemists of considerable repute that milk fat was similar in every respect to pure beef and mutton fats, and that there were no means of detecting foreign fat, when added to butter. This difficulty is now overcome, and detection of such adulterations can be easily made.

Butter making in the United States has of recent years been largely performed in creameries, or butter factories, each of which uses the material supplied by a considerable number of farms. These were instituted to overcome the difficulty of obtaining good results in small establishments, and their results have been excellent. By employing the co-operative principle farmers are enabled to employ the best trained and most skillful operators, and to introduce the best machinery and other appliances, the purpose being to keep the product up to a uniformly high standard, the output of a well-conducted creamery, when once well known, securing a price above that of ordinary farm-made butter. Another part of the work of many of the creameries is the conversion of skim milk into cheese, some pure oil being first added to make up for the loss of the butter fat. Of late years the American creamery system has been introduced into Britain and Ireland, with a considerable improvement in the quality of the butter produced. Centrifugal separators are used, as in America, to remove the cream from the milk as soon as possible, the skim milk being sold while still sweet and fresh.

**Butter** is an article of food very frequently adulterated, the chief adulterants being water, curd, and prepared animal fats. The quantity of water in butter should never exceed 15 per cent. In some cases as much as 30 per cent. has been found. Curd is used in some parts of Ireland to increase the bulk and weight of the butter; any excess above 4 per cent. should be considered an adulteration. Animal fats, as the fat of beef, mutton, and pork, are prepared on a large scale, and extensively sold and eaten under the name of "butterine," "oleo-margarine," &c. These are frequently added to butter to the extent of from 50 to 70 per cent. [BUTTERINE.] So long as the fats used are pure and good, and the purchasers know that they are not buying butter, but a mixture of butter and fat, there can be no objection to its sale; but when this mixture is sold as genuine butter, at a genuine butter price, the seller renders himself justly liable to the heaviest penalties. An excessive quantity of common salt is sometimes added to butter for the purpose of causing it to absorb and hold more water. Fresh butter should not contain more than 2 per cent. of salt, whilst salt butter should never exceed 6 per cent.

**2. Botany:**  
**Butter and eggs:** Several plants, the flowers of which are of two shades of yellow; *spec.*, (1) *Narcissus pseudonarcissus*; (2) *N. incomparabilis*; (3) *N. biflorus*; (4) *N. poeticus*; (5) the double-flowered variety of *N. aurantiacus*; and (6) *Linaria vulgaris*, with other plants of which the name *butter* and *eggs* is known only locally. (Britten & Holland.)

**3. Vegetable Chem.:** A name given to certain concrete fat oils, which continue of a butyrateous consistence at ordinary temperatures.

(1) **Butter & Tallow:** A greasy juice found in various parts of the butter and tallow tree, but specially in the fruit.

**Butter and Tallow Tree:** The *Pentadesma butyracea*, a Sierra Leone tree belonging to the order Ciniaceae, or Guttiferae. It has large handsome flowers, and opposite coriaceous leaves with parallel veins. [1.]

(2) **Butter of Cacao:** A concrete oil, obtained from the seeds of *Theobroma cacao*.

(3) **Butter of Canara:** A solid oil, obtained from the fruits of *Vateria indica*, and called Piney-tallow.

**\* 4. Inorganic Chem.:** Old names for various chemical compounds, specially for chlorides. They were so-called from their soft butyrateous consistence.

¶ (1) **Butter of Antimony:** Sesquichloride of antimony, terchloride of antimony. [ANTIMONY.]

(2) **Butter of Arsenic:** Sesquichloride of arsenic.

(3) **Butter of Bismuth:** Chloride of bismuth.

(4) **Butter of Sulphur:** Precipitated sulphur.

(5) **Butter of Tin:** Sublimated muriate of tin, protochloride of tin.

**büt-tër-flip, s.** [Second element doubtful.] A local name for the Avocet (q.v.).

**büt-tër-flöw-ër, s.** [Eng. *butter*; *flower*.]

So called, apparently, because the common people thought that the yellow colour of butter arose from the cattle eating these plants, which they never do. (Curtis.)

1. *Gen.*: The same as buttercup; the popular English name of the plants belonging to the genus *Ranunculus*.

2. *Specialty:*

(1) One of the names popularly given to a plant, the *Ranunculus bulbosus*, or Bulbous Crow-foot. It is called also Buttercups, King's-cups, and, by Shakespeare, Cuckoo-buds of yellow hue. It flowers in May, and may, without digging for its root, be accurately identified by observing that the segments of its calyx are reflexed, whereas in *R. repens*,

often confounded with it, they are tolerably erect.

"The watered meadows are yellow with *butter-flowers*."—*Aubrey: Nat. Hist. of Wilt.* (Britten & Holland.)

(2) *Ranunculus acris*.

(3) *R. repens*.

(4) *R. Ficaria*.

**büt-tër-flÿ, \*büt-tër-flie, \*bot-ur-flÿe, s. & a.** [Eog. *butter*; *fly*; A.S. *butter-flÿe* (Somner); *butter-flÿe*; Dut. *boter-vliege* (Skeat); Ger. *butterfliege*. Why so called is not certain. It may be from appearing at the beginning of the season for butter, or because some species are yellow, or because the droppings of some are butter-like.]

**A. As substantive:**

**I. Ordinary Language:**

1. *Lit.*: In the same sense as II.

2. *Fig.*: A person who is dressed attractively, but is shallow in intellect and of no perceptible use to society.

"The tops are painted *butterflies*." *Pope: To Moors, the Worm Doctor*, 17.

**II. Entom.**: The English name for any species of the Diurnal Lepidoptera, or Rhopsocera.

The antennæ end in a club; the wings in repose are generally quite upright, and there are no bristles on the hinder pair. They fly by day, whilst their allies the Hawk-moths do so by twilight, and the Moths by night. Before coming to the perfect state they exist first as the caterpillar, and afterwards in the chrysalis state. Butterflies exist in all climates except those marked by extreme cold; the tropical species are, however, most numerous, besides being the largest in size and, as a rule, the brightest in colouring. The Butterflies, or Diurnal Lepidoptera, are divided into four families: Papilionidae, Nymphalidae, Lycaenidae, and Hesperidae (q.v.).

**B. As adj.:** (See the compounds.)

**butterfly-cock, s.** A valve having two semicircular wings pivoted on a central cross-bar. A butterfly-valve.

**butterfly-fish, s.** [Named from the colour.] A name for a fish, the Ocellated Blenny (*Blennius ocellaris*). It has the dorsal fin bilobate. Its anterior lobe is elevated and marked with a round black spot, surrounded with a white circle and a black one. It is found in our seas.

**butterfly-net, s.** A net of very fine gauze, attached to a handle, and used by entomologists for capturing butterflies, moths, &c.

**butterfly-nut, s.**

*Mach.*: A nut having two wings attached, so that it may be easily turned by hand.

**butterfly-orchis, s.**

*Bot.*: A common book-name for two varieties of orchis, viz. (1) *Habenaria chlorantha*; (2) *Habenaria bifolia*.

**butterfly-plant, s.**

*Botany:*

1. The name of an Orchid (*Oncidium papilio*) brought from Trinidad. It is so called because its large yellow and red blossoms, poised on slender footstalks so as to vibrate with every breath of wind that blows, resemble butterflies hovering on the wing.

2. The Indian Butterfly Plant, *Phalenopsis amabilis* of Lindley, not of Blume, is another Orchid. It is a very beautiful epiphyte.

**butterfly-shaped, a.**

*Bot.*: Somewhat resembling the aspect of butterfly on the wing. Used especially of the corolla, in what have been called, from the same circumstance, papilionaceous flowers. [PAPILIONACEOUS.]

**butterfly-shell, s.** Any shell of the genus *Volva*.

**butterfly-valve, s.** A double clock-valve, each leaf of which is hinged to a bar crossing the passage-way. There are butterfly pump-valves and butterfly throttle-valves.

**butterfly-weed, s.** A plant (*Asclepias tuberosa*).

**büt-tër-ine, s.** [From Eng. *butter*, and suff. *-ine*.] A substance prepared in imitation of

**butter** from animal or vegetable fats. The fat is first freed from all impurities, and by heat converted into olein. The olein is then transferred to a churu containing a small quantity of milk, and churned into butterine. Lastly, it is coloured, in imitation of butter. Freshly prepared, it is sweet and palatable, and when spread on bread or cold toast, is but slightly inferior to a fair quality butter. Butterine is imported into this country under various names, "Oleomargarin," "Oleine butter," "Normandy Oleine butter," &c. It is frequently used to adulterate butter.

[MARGARINE.]

... there was a manufactory for 'butterine,' which no sooner got into the shops than it lost the 'ina.'—*Mr. H. C. Bartlett, in Times.*

**büt-tër-lîng** (Eng.), **büt-tër-in'** (Scotch), *pr. par. & s.* [Buttes, v.]

**A. As present participle:** (See the verb.)

"It is a fine simile in one of Mr. Congreve's prologues, which compares a writer to a *buttering* gamester, that stakes all his winning upon one cast; so that if he loses the last throw he is sure to be undone."—*Addison.*

**B. As substantive:** Flattery. (Scotch.)

**büt-tër-is**, *s.* [From Fr. *écutoir* = a tool used by carriers and farriers; Prov. *boulevard* (q.v.)]

**Farriery:** A knife with a bent shank, used by blacksmiths to pare the hoofs of horses. It has a blade like a chisel, and is operated by a thrust movement, the handle resting against the shoulder.

**büt-tër-man**, *s.* [Eng. *butter*; *man*.] A man who sells butter.

**büt-tër-milk**, *s.* [Eng. *butter*; *milk*. In Ger. *buttermilch*.] That part of the milk which remains when the butter is extracted. "A young man, fallen into an unceremonious consumption, devoted himself to *buttermilk*."—*Harvey.*

**büt-tër-nût**, *s.* [Eng. *butter*; *nut*.] The English name of a North American tree, called also the Oil-nut and the White Walnut. It is the *Juglans cinerea*. It has oblong, lanceolate, serrate leaflets, downy beneath. The petioles are viscid and the fruit oblong ovate. It grows to the height of thirty feet. The North American Indians use the nuts as cathartics.

**büt-tër-wëed**, *s.* [Eng. *butter*; *weed*.] A composite plant, *Erigeron canadensis*.

**büt-tër-wife**, *s.* [Eng. *butter*; *wife*.] A woman who sells butter. [BUTTERWOMAN.]

"Divers of the queen's and the said duchess's kindred and servants, and a *butterwife*, were indicted of misprison of treason, ..."—*Ld. Herbert's Hist. of K. Hen. VIII., p. 478.*

**büt-tër-wòm-an**, *s.* [Eng. *butter*; *woman*.] A woman who sells butter. [BUTTERWIFE.]

"Tongue, I must put you into a *butter-woman's* mouth, ..."—*Shakspeare: A's Well, l. 1.*

**büt-tër-wört**, *s.* [From Eng. *butter*, A.S. *butare*, and A.S. *wyrt* = wort, an herb, a plant. The leaves coagulate milk, like rennet.]

**Botany:**

1. *Sing.*: The English name of *Pinguicula*, a genus of plants constituting the typical one of the order Lentibulariaceae (Butterworts). The Common Butterwort has the leaves, which are thick and greasy to the touch, all radical. The flowers are in single-flowered scapes, purple in colour, with a spur. The capsule is one-celled. Common in Scotland, less so in England. There are three other British species of the genus, the Large-flowered (*Pinguicula grandiflora*), the Alpine (*P. alpina*), and the Pale (*P. lusitanica*). The alpine one has yellowish flowers.

2. *Plur.*: Lindley's name for the order Lentibulariaceae. The type is *Pinguicula*. [See I.]

**butyl alcohols, s. pl.**

**Chem.:** C<sub>4</sub>H<sub>10</sub>O = quartyl alcohols, or tetryl alcohols. Four alcohols having this formula are known, two primary, one secondary, and one tertiary; they are metameric with ethylic ether. They are, (1) *Normal Butyl Alcohol*, or

*Propyl Carbinol*, C  $\begin{cases} \text{CH}_2\text{CH}_2\text{CH}_2 \\ | \\ \text{OH} \end{cases}$

*Alcohol*, or *Isopropyl Carbinol*, C  $\begin{cases} \text{CH}_3 \\ | \\ \text{CH}(\text{CH}_2) \\ | \\ \text{OH} \end{cases}$

(3) *Secondary Butylic Alcohol*, or *Methyl-ethyl*

*Carbinol*, C  $\begin{cases} \text{CH}_3 \\ | \\ \text{CH} \\ | \\ \text{OH} \end{cases}$ , C<sub>4</sub>H<sub>9</sub>(OH)<sub>2</sub>, and (4) *Terti-*

*ary Butyl Alcohol*, or *Trimethyl Carbinol*,

C  $\begin{cases} (\text{CH}_3)_3 \\ | \\ \text{OH} \end{cases}$

**butyl aldehyde, s.**

**Chem.:** CH<sub>3</sub>.CH<sub>2</sub>.CH<sub>2</sub>.CO.H. It is obtained by distilling a mixture of butyrate and formate of calcium. It boils at 75°. By the action of iodine and phosphorus it is converted into normal butyl iodide, and by that of nascent hydrogen into normal butyl alcohol. Butyl, or butyric aldehyde, heated with alcoholic ammonia, forms dibutyramine, C<sub>12</sub>H<sub>17</sub>ON, which distilled yields paracaine.

**butyl carbinol, s.**

**Chem.:** [AMYL ALCOHOL.]

**bü-tÿl'-ä-mide, s.** [Eng., &c., *butyl*, and *amide* (q.v.).]

**Chem.:** C<sub>4</sub>H<sub>9</sub>O.NH<sub>2</sub> is a crystalline compound which melts at 115°, and boils at 216°.

**bü-tÿl'-ä-mine, s.** [Eng. *butyl*; *amine*.]

**Chem.:** C<sub>4</sub>H<sub>11</sub>N, or C<sub>4</sub>H<sub>9</sub>

$\begin{matrix} \text{H} \\ | \\ \text{N} \end{matrix}$ . There are a

Normal Butylamine, CH<sub>3</sub>(CH<sub>2</sub>)<sub>3</sub>NH<sub>2</sub>; an Isobutylamine, CH(CH<sub>3</sub>)<sub>2</sub>CH<sub>2</sub>NH<sub>2</sub>; a Secondary Butylamine,  $\begin{matrix} \text{H}_3\text{C} \\ | \\ \text{CH}_2\text{CH} \\ | \\ \text{H}_3\text{C} \end{matrix}$  .NH<sub>2</sub>; and a Tertiary Butylamine, or Katabutylamine, (CH<sub>3</sub>)<sub>3</sub>C.NH<sub>2</sub>.

**bü-tÿl-ëne, s.** [From Eng., &c., *butyl*, and suffix *-ene*.]

**Chem.:** The same as BUTENE (q.v.).

**bü-tÿr-ä'-cë-öus, a.** [In Fr. *butyracé*. From Lat. *butyrum* = butter, and suffix *-accus*.] Having the consistency of butter.

**bü-tÿr-äte, s.** [From Lat. *butyr(um)*; and Eng., &c., suffix *-ate*.] [BUTYRIC ACID.]

**bü-tÿr-ël'-ite, s.** [From Lat. *butyrum* = butter, and dimin. suffix *-elium*, with Eng. suffix *-ite* (*Mtn.*) (q.v.).]

**Mtn.:** An acid hydrocarbon, called also Bog-butter and Butyrite. Its consistency is like that of the substances after which it is named. It crystallises in needles. It is soluble in alcohol or ether. Its colour is white. Compos.: Carbon, 75.0; hydrogen, 12.5; oxygen, 12.5 = 100. It is derived from the Irish peat bogs. (*Dana*.)

**bü-tÿr'-ic, a.** [Lat. *butyr(um)*; and Eng. suff. *-ic*.] Connected with butter (q.v.).

**butyric acid, s.**

**Chem.:** C<sub>4</sub>H<sub>8</sub>O<sub>2</sub>.

**Normal Butyric Acid:** C  $\begin{cases} \text{CH}_2\text{CH}_2\text{CH}_3 \\ | \\ \text{OH} \end{cases}$

= propyl formic acid, or ethyl seetic acid. Obtained by the oxidation of normal butyl alcohol with chromic acid; also by the action of alkalis on normal propyl cyanide, or by the action of hydrochloric acid on succinic acid; also by saponification of butter which contains tributyrin; and by the fermentation of sugar in contact with putrid cheese and chalk, calcium lactate is first formed which decomposes into butyrate, which is then distilled with sulphuric acid. Butyric acid is a colourless liquid, boiling at 164°. Its salts are called *butyrates*, and are soluble in water. By oxidation with nitric acid it yields succinic acid, *isobutyric acid*, C<sub>4</sub>H<sub>8</sub>O<sub>2</sub> + 2O yields H<sub>2</sub>O + C<sub>2</sub>H<sub>4</sub>

(CO.OH)<sub>2</sub> C  $\begin{cases} \text{CH}(\text{CH}_2) \\ | \\ \text{OH} \end{cases}$  = *isopropionic formic*

*acid*, or dimethyl-acetic acid, obtained by oxidising isobutyl alcohol, or by the action of alkalis on isopropyl cyanides. It is a colourless liquid, boiling at 164°. Both these acids form fragrant ethers with ethyl.

‡ Butyric acid has an odour of rancid butter. It is found in sweat, urine, and other fluids, and, as a neutral fat, in small quantities in milk. It is the chief product of the second stage of lactic fermentation. [DEXTROSE.]

**butyric ether, s.** The same as ETHYL BUTYRATE (q.v.).

**bü-tÿr-ite, s.** [From Lat. *butyr(um)*, and suffix *-ite* (*Mtn.*) (q.v.).]

**Mtn.:** The same as Butyrellite (q.v.).

**bü-tÿr-öne, s.** [Lat. *butyrum*; and Eng., &c., *ketone*.]

**Chem.:** A ketone of the fatty series, also called *äpropyl ketone*, CO"  $\begin{cases} \text{CH}_2\text{CH}_2\text{CH}_3 \\ | \\ \text{CH}_2\text{CH}_2\text{CH}_3 \end{cases}$

It boils at 144°, and, by the action of oxidizing agents, it is converted into butyric acid,

CH<sub>3</sub>CH<sub>2</sub>CH<sub>2</sub>CO.OH, and propionic acid, CH<sub>3</sub>CH<sub>2</sub>CO.OH. It can be obtained by the dry distillation of calcium butyrate.

**bū-tŷr-ōus, a.** [From Lat. *butyrum*=butter, and Eng. suffix *-ous*.] Having the properties of butter.

"Its oily red part is from the butyrous parts of chyle." *Floyer.*

**būx-bāu-mī-a, s.** [Named after John Christian Buxbaum, a German who published a botanical work on Asia Minor in 1728.]

*Bot.*: A genus of mosses containing a solitary species (*Buxbaumia aphylla*), so like a fungus that it might be easily mistaken for one. It is found, though rarely, in Britain.

† Buxbaumia is by some made the type of an order, Buxbaumiaceae.

\* **būx-ē-ōūs, a.** [From Lat. *buxeus* = (1) of boxwood; (2) of the colour of boxwood; *buxus* = the box-tree.] Pertaining to the box-tree.

**būx-ōm (1), \* būx-ōme, \* būck-sōme, \* būx-ūm, \* box-ome, \* box-some, \* bo-som, \* boc-som, \* bow-some (Eng.), \* bousum, \* bowsum (Scotch), a.** [A.S. *bocsum, būhsom* = obedient, flexible, tractable, *buxom* (Somner). In Dut. *buigzaam*; Ger. *biegsam, beugsam* = pliant, flexible. From A.S. *būgan, beggan* = to bow, bend, stoop, give way, submit, yield.]

1. Of persons, whether male or female, but spec. the latter:

(1) Pliable, compliant, obedient to those to whom obedience is due, polite or courteous to those who can claim no more than these.

"For who can be so buxom as a wyf? Who is so trewe and sek so ententif." *Chaucer: C. T., 8163-4.*

† In this sense often followed by to.

"To make these buxom to her lawe." *The Romaunt of the Rose.*

"... to make them more tractable and buxome to his government..." *Spenser: State of Irelands.*

**II. Zoology:** The English name of the *Buteo*, a genus of birds. These are—

¶ The Buzzards are birds of prey, belonging to the family of Falconidae, and approach closely to the eagles in appearance and general character, though not their equal in strength and courage. In the United States and Canada the Rough-legged Buzzard (*Archibuteo lagopus*) is a bird of common occurrence, and is equally plentiful in the Eastern Hemisphere. The Red-tailed Hawk (*Buteo borealis*) is another American Buzzard, and one in very bad repute among the farmers and housewives of the United States, from its frequent attacks upon the tenants of the poultry yard. This habit has given it the title of Hen Hawk. The Common Buzzard of Europe (*Buteo vulgaris*) is plentiful in all the wooded parts of that continent, as well as in North Africa and Western Asia. This bird measures nearly four feet from tip to tip of the expanded wings, and is a very useful bird of prey, from its destruction of mice,adders and similar noxious animals. The Turkey Buzzard of the United States, a common scavenger in some of the Southern cities, does not call for description here, as it is not properly a buzzard, but belongs to the family of vultures.

¶ *Bald-buzzard*: One of the names for the Fishing Osprey (*Pandion haliaetus*).

*Capped-buzzard*: [HONEY-BOZZARD.]

*Honey-buzzard*: The English name of a predatory bird, the *Pernis apivorus*, called also the Beehawk, or the Brown Beehawk. [HONEY-BUZZARD.]

*Moor-buzzard*: The Marsh-harrier (*Circus aeruginosus*).

\* **B. As adj.**: Senseless, stupid.

"Those who thought no better of the living God, than of a buzzard idol."—*Milton: Aiconoclastes*, ch. 1.

"Thus I reclaimed my buzzard love to fly At what, and when, and how, and where I choose."—*Dennis: Poems*, p. 41.

**buzzard-cock, buzzard cock, s.** The male of the buzzard.

"Sometimes he'll hide in the cave of a rock, Then whistle as shrill as the buzzard cock."—*Wordsworth: Address to a Child During a Solitary Winter Evening*.

\* **büz-zar-dét, t.** [Eng. *buzzard*, and suff. *-et*.] *Ornith.*: A North American bird, said by Pennant to resemble the common buzzard, except in having slightly longer legs. Perhaps the Pennsylvanian Buzzard (*Buteo pennsylvanicus*).

**3. Of agency, conjoint agency, causation, and instrumentality.**

(1) *Of agency*: Noting the agent by whom or by which anything is done.

"By Hector slain, thir faces to the sky, All grim with gaping wounds our heroes lie."—*Pope: Iliad*, xix. 201-2.

(2) *Of conjoint agency or action*: By aid of, by conjoint action of.

"The sons of Abraham by Keturah."—*Gen.* xxv. (title).

(3) *Of causation*: Noting the cause by which any effect is produced.

"Fissures near Serocame, in Calabria, caused by the earthquake of 1783."—*Lyell: Prin. of Geol.*, ch. xlix.

(4) *Of instrumentality*: Noting the instrument or means by which anything is done.

"... and the brazen altar shall be for me to enquire by."—*2 Kings*, xvi. 15.

"Such a danger England and Holland might lawfully have averted by war."—*Macaulay: Hist. Eng.*, ch. xlii.

¶ *Of the part in relation to the whole*:

"He tok his chylde by the hande."—*Isambard*, 325.

¶ Regarding the distinction between *with* and *by*, Johnson says that *by* is commonly used after a verb neuter, while *with* would be put after an active one. Blair says both these particles express the connection between some instrument, or means of effecting an end, and the agent who employs it; but *with* expresses a more close and immediate connection, *by* a more remote one. "We kill a man with a sword; he dies by violence. The criminal is bound with ropes by the executioner. In a passage of Dr. Robertson's *History of Scotland*, we are told that when one of the old kings was making an enquiry into the tenure by which his nobles held their lands, they started up and drew their swords: "By these," said they "we acquired our lands, and with these we will defend them." (*Blair: Lectures on Rhetoric & Belles Lettres*, ed. 1817, vol. i. p. 233.)

4. *Of the effect of causation*: Used to denote ground of judgment or comparison in reasoning back from effect to cause, in constructing an a posteriori argument, in reasoning from a fact or occurrence to any similar one.

"By this I know that thou favorest me."—*Psalm*, xli. 11.

5. *Of relation with respect to number or magnitude*:

(1) Measured by, estimated by.

"Ballion will sell by the ounces for six shillings and five pence unelipped money."—*Locke*.

(2) By the magnitude or number of.

"Meantime she stands provided of a Lulus, More young and vigorous too by twenty springs."—*Dryden*.

(3) *Of addition to*: Beside, over and above; in Scotch foreby. (*Scotch*.)

"... she [the ship] wasted all the woods in Fife, which was oak-wood, by all timber that was gotten out of Norway."—*Fitzoecris*: *Cron.*, p. 107.

(4) In succession to, after, following.

"The best for you, is to re-examine the cause, and to try it even point by point, argument by argument."—*Hooker*.

(5) In the case of.

"Als it false bi a tre."—*Psalm*, l. 8.

"So saith it by a rycous servant."—*Chaucer: C. T.*, 440.

6. *Of specification*: In specification of. (Used in naming one, or doing anything similar.)

"Greet the friends by name."—*3 John*, 14.

7. *Of taking of oaths, & of adjuration*:

"I swear not at all: neither by heaven, for it is God's throne, nor by the earth."—*Mat.*, v. 34.

"I adjure thee by the living God."—*Ibid.*, xxvi. 62.

8. *Of duty, conduct, or action towards*.

"He had discharged his duty by them."—*Macaulay: Hist. Eng.*, ch. 27.

9. *Of accordance with*: According to, noting permission or conformity.

"It is excluded. By what law of works? Nay; but by the law of faith."—*Rom.*, iii. 27.

10. *Of preference for*: Beyond, above, more than, in preference to. (*Scotch*.)

"For thow may rew by all the rest."—*Davidson: Schott's Diccion.*, ch. 7. (*Jameson*.)

\* 11. *Of absence of or contrariety to*, implying the passing of anything by: Without, without regard to, contrary to. (*Scotch*.)

"... I think him to be his husband, by the adwyse and counsel of the lordis, for they knew nothing thairof a long time thairfore."—*Fitzoecris*: *Cron.*, p. 384.

\* 12. With regard to, with reference to. (*Scotch*.)

"I speake not this by english courtiers."—*George Gascoigne*, 168.

\* 13. Against.

"I know nothing by [Rev. Ver. against] myself."—*1 Cor.* iv. 4.

**B. As adverb:**

1. Near; situated or temporarily resting in proximity to.

"... I also was standing by, and consenting unto his death."—*Acts* xxii. 20.

2. Near, passing near; moving past; past.

"I did hear The galloping of horse: who was't come by?"—*Shakespeare: Macbeth*, iv. 1.

3. Aside, beside.

\* 4. Though a certain contingency take place, as "I carena by" = I don't care, though I agree to your proposal. (*Scotch*.) (*Jameson*.)

**C. In special phrases:**

1. *By and by, by-and-by, adv. & s.*

(1) *As adverb*:

(a) *Of place*: Hard by. (*Chaucer*.)

(b) *Of numbers, or of a plurality of persons or things*:

(i) From time to time.

"By and by. *Stigmatum*."—*Prompt. Favr.*

¶ The *Medulla* renders *stigmatum* (f) *stigmatum* or *singulatum*, from *seel to ael*. (*Hart. MS.*, 2, 257.) (*Way*.) Probably *stigmatum* is a mistake for *singulatum*.

(ii) One by one, singly.

"Natura did yield therto: and by-and-by Bids Order call them all before her Majesty."—*Sponsor: P. Q.*, vii. vii. 27.

(c) *Of time*:

(i) At once, as soon as possible, quick, immediately.

"I will that thou give me by and by in a charger the head of John the Baptist."—*Agnes*, vi. 24.

¶ In the Greek of this verse, *by and by* is  $\xi\kappa\ \alpha\upsilon\tau\acute{\alpha}\varsigma$  (*ex autis*) = at the very point of time; at once; from  $\xi\kappa\ \alpha\upsilon\tau\acute{\alpha}\varsigma$   $\tau\eta\varsigma$   $\alpha\upsilon\tau\eta\varsigma$  (*ex autis itis horae*) = from this very time. (*Trench*.)

(ii) After a short time; after a time. As Trench well shows, the tendency of mankind to prostration has altered the meaning of

bäll, böj; pout, jöwl; cat, cell, ohorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bpl, dpl.

Law: A private statute made by the members of a corporation for the better government of their body. A voluntary association, not incorporated, has no right to make binding laws. Nor can a corporation do so if the bylaws affect the good of society, or the common profit of the people. If they are found to be contrary to the law of the land, they are null and void. A forfeiture imposed by the bylaws of a corporation is enforceable in a law court. [BURAW.] (Blackstone: Comment, bk. I, ch. 18; bk. III, ch. 9.) Railway or other incorporated companies, social, charitable, or political societies of any character in this country are allowed to make bylaws. "Bylaws are orders made in courts-lesse, or court-barous, by common assent, for the good of those that make them, further than the publick law binds."—Coveat.

**bÿ-zänt**, *s.* [BEZANT.]

**Bÿ-zän-tian**, *a.* [Lat. & c. *Byzanti(um)* = the city (BYZANTINE), and suff. *-an*.] Pertaining to Byzantium.

**Bÿz-an-tine**, **Bÿ-zän-tine**, *a. & s.* [In Ger. *byzantinisch*; Fr. *byzantin*; Lat. *Byzantinus*. From Lat. *Byzantium*; Gr. *Byzantion* (*Byzantium*) = Byzantium. From a probably mythic Byzas, a Megarian, said to have been its founder.]

*A. As adj.*: Pertaining to Byzantium, a Doric-Greek city on the European side of the Bosphorus, alleged to have arisen about B.C. 666. A new and more magnificent quarter, added by Constantine between A.D. 328 and 330, was called Constantinople, and occupied the site of part of the modern Turkish city.

¶ (1) *Byzantine architecture*:

*Arch.*: The style of architecture prevalent at Byzantium whilst it was the capital of the Greek empire in the East. The Byzantine churches are usually built in the form of a Greek cross, the centre being covered by a large cupola, and the four arms or projections by semicirculars. The arches are generally semicircular, but sometimes segmental or horse-shoe shaped. The cupolas, which taper downwards, are square blocks, ornamented with foliage or with basket-work. The masonry is varied by horizontal and sometimes by vertical lines of bricks, besides which tiles, arranged so as to constitute the Greek letter *gamma*, or other figures, are often found on the exterior of the building. Interiorly, there is fine mosaic ornamentation. The mouldings, which have a bold projection, with the angles rounded off, are ornamented with foliage, and sometimes also with morocco or painting. A zigzag ornament, with stiff foliage, may be seen under the eaves and elsewhere. The apex is continually present. The Byzantine style of architecture has been divided into three periods—the first from the time of Constantine to that of Justinian in the middle of the sixth century; the second extends to the eleventh century; and the third to the conquest of Constantinople by the Turks in 1453. Few specimens of the first period remain; many of the second and third do so, the former being considered pure Byzantine, the latter Byzantine mingled with Italian, from the influence produced by Venice. [See *Gloss. of Architecture* (Oxford, 1845.)]

The most interesting example of this architecture now existing is the grand Mosque of St. Sophia at Constantinople, an edifice built as a Christian church, under Justinian, in the first half of the sixth century, and adapted to their use by the Mohammedans, and their conquest of the Eastern Empire. In this building the interior is composed of a great central dome, 107 feet in diameter and 132 feet in height, which is supported on four piers, while length is given the building by the addition of

a semi-dome at each end. The latter serves also to sustain the pressure of the main dome. The building, in its lower part, is divided up with small pillars and arches, whose effect is to enhance the size and grandeur of the great dome. Around the base of the latter is a row of windows, a characteristic which became a constant feature in the later Byzantine architecture. One striking characteristic of Byzantine edifices is the extensive use of colored decoration in their interior. This is particularly the case in the Mosque of St. Sophia, and adds much to its interior effect. The pillars are formed of the richest colored marble, and the walls lined with them, while splendid mosaics adorned the domes.

Byzantine ornament differs considerably alike from the Classic and from the Gothic, being always flat and incised, while the latter is bold. The Byzantines were distinguished during the Medieval period for all kinds of carving and metal work, which undoubtedly had an influence on the development of art, while their mural illuminations led the way to the revival of painting. A well-known and very interesting example of Byzantine architectural art exists in the celebrated Church of St. Mark's, at Venice. This is the only example in the West, and doubtless arose through the commercial relations of Venice with the Eastern Empire. It was copied shortly after its erection, in the eleventh century, at Perigueux, in Aquitaine, and, as a consequence, the use of the dome has been extensive in that part of France.

(2) *Byzantine historians*:

*Hist.*: Numerous historians proper, and chroniclers who lived in the Byzantine empire between the fourth and fifteenth centuries A.D., and wrote its history. The most celebrated was Procopius, of Caesarea. These historians are divided into three classes: (1) Those whose works are confined in subject to Byzantine history; (2) those who profess to deal with universal history, but give disproportionate space to Byzantine events; (3) those who wrote on Byzantine customs, architecture, antiquities, &c. Their literary style is lacking in force and originality, as might be expected from the despotism of pedantry during the time in which they wrote, but despite this their works are invaluable, as our only sources of information concerning the history of the Empire of the East. This is particularly the case with those who confine their attention to events which took place under their own observation, or in which they took part. The principal works of the Byzantine historians were collected and published in Paris in 36 volumes, with Latin translations (1654-1711). In 1828 Niebuhr, with others, began a *Corpus Scriptorum Historiae Byzantinae*, carried on until 1855 in 43 volumes, and continued by the Berlin Academy of Sciences.

*B. As subst.*: The same as *besant*, *bezant*, *bezant*. [BEZANT.]

¶ If any obsolete words have been omitted in their modern spelling will probably be found at *bi*, *be*, or *bu*.

¶ A list of words in which *by* is a prefix has been given in page 763, column 1. The following more simple words have the modern spelling *bi*, at which they may be found.—*Examples*: \* *byache*, \* *bycke* (= hitch), \* *byde*, \* *byge* (= big), \* *byke*, \* *bykere*, *s.* (= bicker, *s.*), \* *bycker*, \* *byckir*, \* *byker*, (= bicker, *v.*), \* *byl*, \* *bylle* (= bill), *bynde*, *a.* (= bind), \* *bynge*, *s.* (= bing (2), *s.*), \* *byrde* (= bird), \* *byrk* (= birch) (Scott.), \* *byrle* (= birle, *D.*), \* *byrthe*, \* *byshop* (= bishop), \* *byshopprache* (= bishopric), \* *bysm* (= bism, *Scott.*), \* *bysscrite* (= biscuit), \* *byshoppe* (= bishop), \* *byssoperike* (= bishopric), \* *bytle* (= bite), \* *byti* (= bit, *s.*), \* *bytyr* (= bitter), \* *bytterly* (= bitterly), \* *bytyrnesse* (= bitterness), \* *bytyrswete* (= bitter-sweet), \* *bytyne* (= bite), \* *bytynge* (= biting).

(2) A very few others are found with the spelling *be*. *Examples*—\* *byngere* (= benger), \* *bytyle* (= beetle).

(3) Sometimes the old *by* becomes *bu* in a modern word. *Examples*—\* *byrdune*, \* *byrdens* (= burden), \* *byrtele* (= burial), \* *byrgyn*, *byrgyn* (= bury), \* *byryrd* (= buried), \* *byrchele* \* *bysshel* (= bushel), \* *byry* (= busy), *byrily* (= busily), \* *byrynesse* (= business).

C.

**C.** In Anglo-Saxon was taken directly from the Latin alphabet, the source, it is believed, whence it has passed into various languages. In English words immediately derived from Anglo-Saxon, the c of the Anglo-Saxon often becomes k in English, as A.S. *cuning* = Eng. *king*; A.S. *cyn* = Eng. *kin*, or *kindred*. Sometimes the A.S. c becomes q in English, as A.S. *cwen* = Eng. *queen*. At others it is changed into ch, as A.S. *child* = Eng. *child*. (See *Bosworth: A.S. Dict.*) In Modern English c has two leading values. Before i and e it is sounded as s (examples: *certain*, *cincture*), and before a, o, and u as k (examples: *cat*, *cost*, *curtly*). It is mute before k, as *trick*.

**C.** As an initial is used:

1. In Chronol.: Chiefly for Christ, as B.C. = (Before Christ).  
 ¶ In the ambiguous letters A.C., C may be (1) Christ, and A.C. = After Christ. Or it may be (2) Christum, and A.C. = ante Christum, before Christ; or (3) Christi, and A.C. = Anno Christi. See also A as an initial.
2. In Music: For counter-tenor or contralto.
3. In University degrees: For Civil, as D.C.L. = Doctor of Civil Laws; also for *Chirurgia* = surgery.

**C.** As a symbol is used:

1. In Numer.: For 100. Thus CII is = 102, CC = 200, CCC = 300, CCCC = 400.  
 ¶ C in this case is the initial of Lat. *centum* = 100.
2. In Chem.: For the element carbon, of which it is also the initial letter.
3. In Music: (1) For the first note of the diatonic scale, corresponding to do of the Italians.  
 (2) For the natural major mode, that in which no sharps or flats are employed.  
 (3) For common or four-crotchet time.
4. In Biblical Criticism: For the Ephraem manuscript of the Greek New Testament, A being the Alexandrian manuscript, B the Vatican manuscript, D the manuscript of Beza, and  $\kappa$  (A in Heb.) the Sinaitic manuscript. [Conx.]

**C barré.** [Fr.]  
 Music: The term for the time indicator. C with a dash through it. (*Stainer & Barrett.*)

**C clef.** [Fr.]  
 Music: The clef showing the position of middle C, in which are written the alto, tenor, and (in old music) other parts. (*Stainer & Barrett.*)

**C dur.** [Ger.]  
 Music: C major. (*Stainer & Barrett.*)

**ca' (1), v. t.** [CALL.] To call. (Scott.)

 Chem.: The symbol for the element calcium.

**ca, \*co, \*coo, \*ka, \*kaa, \*koo, s.**  
 [A.S. *ca*; G. H. Ger. *caha*; Dan. *kaa*; Sw. *knja*.] A crow or chough, a jackdaw. [CAD-DOW.]

"A ka. *Monedula.*"—Osh. *Ampl. in Prompt. Parv.*

**ca'-ba-be, ka'-ba-be, ka'-q-bah, ka-bah', s.**  
 [Arab. *ka'bah* = a square building; *ka'b* =

a cube.] The Mohammedan temple at Mecca, especially a small cubical oratory within, adored by Mohammedans as containing the black stone said to have been given by an angel to Abraham. (*Webster.*) The Kaabah is described by the late Sir R. Burton, who visited Mecca disguised as a Mussulman, to be an oblong massive structure, eighteen paces in length, fourteen in breadth, and from thirty-five to forty feet in height. It was entirely rebuilt in A. D. 1627. It is of grey Mecca stone in large blocks of different sizes, joined together in a very rough manner with bad cement.

**ca'-am, s.** [Wel. *cawnen* = a reed; *cawn* = reeds, stalks.]  
 Weaving: The weaver's reed; the sley or else.

**ca'-am-ing, s.** [From Technical Eng. *caam* (q.v.).] The setting of the reed by the disposing of the warp threads. (*Knight.*)

**\*caas (1), s.** [CASE (1).] (*Chaucer.*)

**\*caas (2), s.** [CASE (2).] (*Chaucer.*)

**ca-a-ti-gua, s.** [Native name.] A Brazilian name for a plant, the *Moschoydon cattiva*, a plant of the Meliaceae or Melioid order. It yields leather bright yellow.

**cab (1), s.** [Contracted from *cabriolet* (q.v.).]  
 1. A covered public carriage having two or four wheels, and drawn by one horse. Cabs were first used for hire in London in 1823.  
 ¶ In a *Hansom cab* the driver's seat is behind, not in front. This form of cab was patented in 1834, being named after its inventor, the architect of the Birmingham town-hall. It originally consisted of a square body, the two wheels, about 7½ feet in diameter, being the same height as the vehicle. This has been from time to time modified and improved, until the present "hansom" has emerged. Cabs with india-rubber tires have been introduced and are increasing in numbers. The Hansom cab, as a convenient method of street locomotion, has been introduced into the cities of the United States, and is used there to some extent, particularly in connection with railroad stations, but can scarcely increase greatly in competition with the abundant and cheap street railway service.

2. The covered part in front of a locomotive which protects the engineer and fireman, and shields the levers, &c.  
 ¶ Obvious compounds: *Cab-driver, cab-fare, cab-horse, cab-man, cab-stand, &c.*

**cab-boy, s.** A page who stands behind a cab.  
 "As at that time I was chiefly occupied with the desire of making as perfect a stud as my fortune would allow, I sent my *cab-boy* (ralph Tiger) to inquire of the groom whether the horse was to be sold, and to whom it belonged."—Sir E. L. Bulwer: *Felham*, ch. xlv.

**cab (2), s.** [Heb.  $\text{קַב}$  (*qab*) = a hollow or concave (vessel); from  $\text{קַבַּב}$  (*quabab*) = to render hollow.] A Jewish measure of capacity, mentioned only in 2 Kings vi. 25. The Rabbinists make it  $\frac{1}{3}$ th of a *seah* or *setum*, and  $\frac{1}{12}$ th of an ephah. If so then it would be  $\frac{1}{24}$  pints of British corn measure, or  $\frac{3}{8}$  pints of wine measure.  
 ". . . an ass's head was sold for fourscore pieces of silver, and the fourth part of a *cab* of dove's dung for five pieces of silver."—2 Kings vi. 25.

**cab, v. t.** [CAB (1), s.] To travel in a cab, as in the popular phrase, "Do you mean to cab it?"

**\*cab-age, s.** [CABAGE.]

**ca-bál, s.** [In Ger. *cabala*; Fr. *cabale* = a club or society. Cognate with Heb. *cabala* and, perhaps, Eng. *cavil* (q.v.).]  
 1. A small number of persons closely united for some purpose, and not making their proceedings public. At first not necessarily in a bad sense.  
 "She often interposed her royal authority to break the *cabals* which were forming against her first ministers."—Addison.  
 2. A junta, a small number of persons in secret conclave carrying out their purposes in Church and State by intrigue and trickery. This bad sense was acquired in the time of Charles II. (See the example.)  
 "During some years the word *cabal* was popularly used as synonymous with cabinet. But it happened by a whimsical coincidence that in 1871, the Cabinet consisted of five persons, the initial letters of whose

names made up the word *cabal*, Clifford, Arlington, Buckingham, Ashley, and Lauderdale. These ministers were therefore emphatically called the *Cabal*; and they soon made the appellation so infamous that it has never since their time been used except as a term of reproach."—Macaulay: *Hist. Eng.*, ch. li.  
 "In dark *cabals* and nightly justos met."  
 Thomson: *Castle of Indolence*, l. 14.  
 3. Intrigues, secret machinations.  
 "The numerous members of the House of Commons who were in town, having their time on their hands, formed *cabals*, and heated themselves and each other by murmuring at his partiality for the country of his birth."—Macaulay: *Hist. Eng.*, ch. xlv.

**ca-bál, v. t.** [In Ger. *cabaliren*; Fr. *cabaler*.] To join a cabal, to intrigue secretly with others in the hope of gaining some coveted object or end.  
 ". . . that the men who held those offices were perpetually *caballing* against each other."—Macaulay: *Hist. Eng.*, ch. xx.

**cab'-a-la, cab'-bal-ah, kab'-bal-ah, s.** [In Ger. *cabala*; Fr. & Ital. *cabala*; all from Heb. קַבָּלָה (*qabala*) = (1) reception, (2) a doctrine derived from oral tradition; קָבַל (*qibbal*), piel of an obsolete root קָבַל (*qabal*) = to receive, to accept a doctrine.]

1. Historically: A system of Jewish theosophy, bearing a certain similarity to Neo-Platonism. Its founders are considered by Dr. Ginsburg to have been Isaac the Blind and his disciples Ezra and Azariel of Zerona, who flourished between A. D. 1200 and 1230. It was designed to oppose the philosophical system of Maimonides. The *cabala* represented God, called  $\text{קַבָּלָה}$  (*Ain Soph*), meaning Without End or Boundless, as being utterly inconceivable. He has become known, however, by means of ten intelligences, named Crown, Wisdom, Intelligence, Love, Justice, &c., whom he has brought into being, and by whom he created and now governs the world.  
 2. Popularly: An occult system of doctrine, something hopelessly mystical and unintelligible.  
 "Eager he read whatever telle  
 Of magic, *cabala*, and spells,  
 And every dark pursuit allied."  
 Scott: *Lady of the Lake*, III. 4.

**cab'-al-ism, cab'-bal-ism, s.** [Eng. *cabal*(a); -ism. In Ger. *caballismus*.] The system of Jewish belief called *cabala* (q.v.).  
 "Vigorous impressions of spirit, ecstasies, pretty allegories, parables, *caballisms.*"—Spencer on *Proph. Res.*, p. 207.

**cab'-al-ist, s.** [Eng. *cabal*(a); -ist. In Ger. *caballist*; Fr. *cabaliste*; Ital. *cabalista*.]  
 1. One who professes acquaintance with and faith in the Jewish mystic doctrines of the *Cabala*.  
 "Not thine, immortal Neufgrimm!  
 Cost studious *cabalists* more time."—Scott.

2. A factor or broker in French commerce. (*Wharton.*)

**cab'-a-lis-tic, \*cab'-a-lis-tick, cab'-a-lyst'-i-cal, s.** [Eng. *cabalist*; -ic, -ical. In Ger. *cabalistiche*; Fr. *cabalistiche*; Ital. *cabalistiche*.]  
 1. Pertaining to the *cabala*.  
 2. Mystical, mysterious, occult; hard to be understood, like the *cabala*.  
 "The letters are *cabalistical*, and carry more in them than it is proper for the world to be acquainted with."  
 Addison.  
 "He taught him to repeat two *cabalistic* words, in pronouncing of which the whole secret consisted."  
 Spectator.

**\*cab'-a-lyst'-i-cal-ly, adv.** [Eng. *cabalistical*; -ly.] After the manner of the *cabals*; in an occult manner; mystically, unintelligibly.  
 "Babbi Elias—from the first verse of the first chapter of Genesis, where the letter *aleph* is six times found, *cabalistically* concludes that the world shall endure just six thousand years; *aleph* in computation standing for a thousand."—Sir T. Herbert: *Travels*, p. 123.

**\*cab'-a-lize, \*cab'-bal-ize, v. t.** [Eng. *cabal*(a); -ize.] To speak, write, or believe like a *cabalist*.  
 "Here St. John seems to *cabalize*, as in several places of the *Apocalypses*, that is, to speak in the language of the learned of the Jews."—Mors: *Hist. of Godliness*, l. 3.

**ca-bál'-lér, s.** [Eng. *cabal*; -er. In Fr. *cabaleur*.] One who joins in a cabal; one who secretly intrigues with others to gain a certain end.  
 "Cautious in the field, he should'n't the sword,  
 A close *caballer*, and tongue-valiant lord."  
 Dryden.

**cab'-al-ine, s.** [From Lat. *caballinus* = pertaining to a horse; *caballus* = a pack-horse, a nag, a pony; Gr.  $\text{καβαλλῆς}$  (*caballēs*) = a nag.

*Caballine Aloes*: Horse Aloes (*Aloe caballina*). [ALOES.]

**ca-bál-ling**, *pres. par. & a.* [CABAL, v.] Joining a cabal, intriguing secretly with others. "What those caballing captains may design I must prevent, by being first in action." *Dryden*.

**ca-bál-list**, *a.* [Eng. cabal; -ist.] One who cabals, a caballer, intriguer.

"We now see plainly that the cabalists of this business have, with great prudence, reserved themselves until due preparations should be made for their design."—*King Charles I's Answer to Propositions by both Houses of Parliament*, ed. 1629, p. 11.

**ca-ban**, **ca-bane**, *s.* [CABIN.]

**ca-b-a-rét**, *s.* [Fr.] A public-house, an almshouse.

"... passing by some cabaret or tennis-court where his comrades were drinking or playing."—*Grandmaitre Hobbes*.

**ca-barr**, *s.* [GABERT.] (Scotch.) A lighter. (Spalding.)

**ca-bá-s-sou**, *s.* [French] A French name for a mammal, the Giant Tatoa, or Armadillo (*Dasyurus pigmatius*). It is the largest of the Armadillos, being sometimes three feet long without the tail.

**cab-back**, *s.* [KEBBUCK.] (Scotch.)

**ca-b-á-ge** (1), **ca-b-á-ge**, **ca-b-bysshe**, **ca-b-bidge**, *s.* [G. Fr. *choux cabus* = a cabbage (*Coletrage*); O. Fr. *cabus*, *cabuce* = round-headed, great-headed. Indirectly from Lat. *caput* = head; Ital. *capuccio* = a little head; *lattuga-capuccio* = cabbage-lettuce. (Skeat.)

1. Gardening: Specially those garden varieties of the *Brassica oleracea* which have plain leaves and "hearts," but sometimes employed in a more general sense for the genus *Brassica* itself. The common Cabbage is said to have been introduced into England by the Romans, but was little known in Scotland until brought into that country by Cromwell's soldiers. The principal varieties were known at least as far back as the sixteenth century, but minor varieties are coming frequently into use. These varieties differ greatly from each other, and from the original wild cabbage, and could not be recognized for the same plant but that their steps of deviation are well known. The Cabbage in several of its varieties is widely grown in the United States, and is a common article of food in most sections. It varies, in its several varieties, from the Kohl-Rabi, in which the growth force is carried back into the stem, which swells into an underground turnip-like form, to the common Cabbage, in which the vegetation is developed into a compact head, and the Cauliflower, in which the flowering head is enormously developed. Other varieties are the Brussels Sprouts and the Jersey Cabbage. In the last the stem grows to 8 or 10 feet high, and supplies walking sticks and small building timber, such as spars for small thatched roofs, &c. The changes in the Cabbage are easily accounted for. The present form is of highly vegetative character, as is shown by its habit and habitat. The surplus vegetative force may express itself simply in an increased development of the leaf, which is thrown into wavy folds, as in the common Kale; it may remain in the midribs, which become succulent, as in the Portugal Cabbage; may be carried back into the stem, causing a root-like swelling, as in the Kohl-Rabi, or a tall growth of the stem, as in the Jersey Cabbage; it may be applied to the formation of buds, which develop with the peculiar luxuriance of the Brussels Sprouts; or may be withheld from the lateral buds and supplied to the apical one alone, which swells into the enormous head of the common Cabbage. The most evolved and final variety is the Cauliflower, in which the vegetative force acts upon the flowering head, of which the flowering is largely checked. There are other varieties, but the above covers the diverse variations.

"Good worts good cabbage."—*Shakespeare: Merry Wives of Windsor*, I, 1.  
"The leaves are large, fleshy, and of a glaucous colour; the flowers consist of four leaves, which are succeeded by long taper pods, containing several round acrid seeds. The species are cabbage, Savoy cabbage, Broccoli, The cauliflower. The musk cabbage, branching tree cabbage from the sea-coast. Colewort. Perennial Alpine colewort. Ferfoliated wild cabbage, &c."—*Miller*.

2. Ordinary Language:

(1) In the same sense as 1.  
(2) The huge terminal bud of some palm trees.

"Their 'cabbage' (that of the trees of *Sagunus szechuanensis*) is moreover edible, like that of the West Indian Cabbage-palm (*Laguncularia*), whose huge terminal bud is known by this name."—*Antley: Fig. King* (ed. 1843), 137.

**Brazil Cabbage**: An aroid plant, *Caladium sagittifolium*.

**Dog's cabbage**: A plant—the *Thelygonum cynocrambe*—which belongs either to the Chenopodiaceae or the Urticaceae. Though subacid and somewhat purgative it is occasionally used as a potherb.

**St. Patrick's Cabbage**: One of the names of the *Saxifraga umbrosa*, the London-pride, or "None-so-pretty," called St. Patrick's, because it is a native of Ireland.

**The Skunk Cabbage**: An orniticeous plant, the *Symplocarpus foetidus*.

**cabbage-bark**, *s.* Bark resembling cabbage.

**Cabbage-bark tree**: The Worm-bark, *Andira inermis*, a leguminous plant of the sub-order *Cesalpiniæ*.

**cabbage-beetle**, *s.* [CABBAGE-FLIEA.]

**cabbage-butterfly**, *s.* (1) *Pontia brassica*, † (2) *P. Rapæ*.

**cabbage-eater**, *s.* He who or that which eats cabbage.

"*Lymnæhoris*, one who loves the lake. *Crambopagus*, cabbage-eater."—*Pease: Battle of the Frogs and Mice*. (Names of the Mice.)

**cabbage-fliea**, *s.*

*Entom.*: The name sometimes given to a small leaping beetle, the *Altica*, or *Haltica consobrina*, the larvæ of which destroy seedling cabbages, as those of the allied species, *A. nemorum*, do young turnips. [ALTICA.]

**cabbage-flower**, *s.* The flower of the cabbage.

"Yet the pistil of each cabbage-flower is surrounded not only by its own six stamens, but by those of the many other flowers on the same plant."—*Darwin: Origin of Species* (ed. 1859), ch. IV., p. 99.

**cabbage-lettuce**, *s.* A variety of lettuce with leaves forming a low, full head like a cabbage.

**cabbage-moth**, *s.* A moth of the family Noctuidæ (*Mamestra brassica*).

**cabbage-net**, *s.* A small net to boil cabbage in.

**cabbage-palm**, *s.* [CABBAGE-TREE.]

"Here the woods were ornamented by the cabbage-palm, one of the most beautiful of its family."—*Darwin: Voyage Round the World*, ed. 1870, ch. II., p. 25.

**cabbage-rose**, *s.* The *Rosa centifolia*.

"... one of which afforded a most accurate if not picturesque view of *Brassica*, while the other glowed with a huge wreath of cabbage-roses and kouskous."—*Disraeli: Henrietta Temple*, bk. VI., ch. x.

**cabbage-tree**, *s.*

1. The English name for the palm-genus *Areca*, and specially for the *A. oleracea*, the cabbage-palm of the West Indies. It is so called because the bud at the top of its stem is like a cabbage, and the inner leaves which form this bud are eaten like the vegetable now mentioned, though the removal of its bud for the sake of these leaves is the destruction of the magnificent tree.

2. A garden name for *Kleinia nervifolia*, a composite plant.

**Australian cabbage-tree**: A palm-tree—the *Corypha australis*. Its leaves are made into hats, baskets, &c.

**Bastard Cabbage-tree**: *Andira inermis*, a leguminous plant of the sub-order *Cesalpiniæ*.

**cabbage-wood**, *s.*

1. *Eriodendron anfractuosum*, a tree belonging to the Bombacæ, a family of the Stéruliacæ, or Stérulidæ.

2. The wood of the cabbage-tree.

"Cabbage-wood... is sometimes used in ornamental furniture; but does not answer very well, as the ends of the fibres are too hard and the medullary part is too soft for holding joint. The surface is, also, very difficult to polish, and cannot be preserved without varnish. The trunk of the genus part is rotted out, forms a drebbish waterpipe."—*Waterston: Cyclopædia of Commerce*.

**cabbage-worm**, *s.*

*Entom.*: The caterpillar, or larva of several species of moths or butterflies, especially that of the *Pontia*, or *Pieris brassicae*, which attacks cabbages. [CABBAGE BUTTERFLY.]

**ca-b-á-ge** (2), *s.* [Fr. *cabus* = a basket.] Cant word for the shreds and clippings made by tailors.

"For as tailors preserve their cabbage, so squires take care of bag and baggage."—*Second Part of Bractes* (spiritous), p. 56: 1665.

**ca-b-á-ge** (1), **ca-b-bidge**, *v.t.* [From the substantive.] To form a head like that of the cabbage.

"Cabbage, to cabbage; to grow to a head, or grow round and close together as a cabbage."—*Cotgrave*.  
"To make lettuce cabbage, they trisquent it, taking care during the great heats to water it; otherwise, instead of poming, it runs to seed."—*Rees: Cyclopædia*.

**ca-b-á-ge** (2), *v.t.* [Fr. *cabasser* = to put into a basket; *cabas* = a basket.]

A cant term among tailors: To steal a portion of the cloth used when a tailor is cutting out some article of dress.

"Your taylor, instead of shreds, cabbages whole yards of cloth."—*Arbutnot*.

**ca-b-á-ged**, *pa. par. & s.* [CABBAGE, v.] Grown into a head like that of a cabbage.

**ca-b-á-g-íng**, *pr. par. & s.* [CABBAGE, v.]

A. *As pr. par.*: (See the verb.)

B. *As subst.*: The act or process of forming a head like that of the cabbage.

"Cabbageing, among gardeners, is sometimes used to denote the knitting and gathering of certain potherbs into round bunched heads; in which case it amounts to the same with what Evelyn calls poming, pommer, &c. applying or growing appliwise."—*Rees: Cyclopædia*.

**ca-b-á-l-á**, *s.* [CABALA.]

**ca-b-á-ble**, *v.t.* To break up into pieces. [CABBING.]

**ca-b-á-ble**, *pa. par. & a.* [CABLE, v.]

**ca-b-á-blér**, *s.* [CABLE.] One who breaks up the iron in the process of cabbling.

**ca-b-á-blíng**, *pr. par. & s.* [CABLE, v.]

A. *As pr. par.*: (See the verb.)

B. *As substantive*:

*Metal.*: A term among metallurgists in Gloucestershire, also called "cabbling." "Finery," that is the cast or pig iron, after it has been subjected to the influence of the refinery, is melted with charcoal; it is then worked up with iron bars into a large ball of 2—2½ cwt., which is afterwards hammered into a flat oval from 2—4 inches thick; this is allowed to cool, and then the process of cabbling commences, which is simply breaking up this flat iron into small pieces. These pieces are again heated almost to fusion, hammered, and drawn out into bar-iron.

**ca-b-á-bý**, *s.* [CAB (1).] A cabman, one who drives a cab.

**ca-b-á-ça**, *s.* [Port.] The finest kind of India silk, as distinguished from the *bariga*, or inferior kind; *cabasæ*. (*Simmonds*.)

**ca-bel**, *s.* [CABLE.]

**ca-beld**, *pa. par.* [CARLED.] (Scotch.)

**ca-b-á-r**, *s.* [CABIR.]

1. A rafter, a joist.

2. A long pole. (Used specially in the game of tossing the caber.)

**ca-b-á-r-á-s**, *s.* [Etymology unknown.] A genus of Infundibulate Polyzoa (Bryozoa) of the sub-order Cheilostomata, and family Caberea. There is but one British species, *C. Hookeri*.

**ca-b-á-r-á-i-dæ**, *s. pl.* [Caberæa]; fem. pl. suff. -idæ.] A family of Infundibulate Polyzoa, distinguished by the unjointed polyplodim, the narrow branches, the cells in two or more rows, with vibracula (whipls) or sessile avicularia at the back. There are two genera, one of which, *Caberea*, is British. (*Griffith & Henfrey*.)

**ca-b-á-í-á-l**, *s.* [Brazilian *cabial*.] Buffon's name for a South American mammal—the Capybara. [HYDROCEBUS, CAPYBARA.]

**ca-b-in**, **ca-b-an**, **ca-b-ane**, *s.* [Fr. *cabane*; Wal, Ir., & Gael. *caban* = a booth, cabin, dimin. of *cab* = a booth.]

1. A little hut or house; a small cottage.

bell, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -íng. -clan, -tlan = shan. -tion, -sion = shün; -tion, -sion = zhün. -tions, -sions, -cions = shüs. -ble, -tle, &c. = bpl, tpl.

- "Crops into a cabana."—*P. Plorerna, 1, 129.*
- "... on the south side of the ford were a few mud cabins, and a single house built of more solid materials."—*Macaulay: Hist. Eng., ch. xvi.*
- 2. Any temporary shelter or dwelling-place.**  
"Some of green boughs their slender cabins frame, Some lodged were Tortosa's streets about."—*Fairfax.*
- 3. A little room. [CABINET.]**  
"So long in secret cabin there he held Her captive to his sensual desire."—*Spenser.*
- 4. A compartment or small room in a ship.**  
"Give thanks you have lived so long, and make yourself ready in your cabin for the mischance of the hour, if it so hap."—*Shakespeare: Tempest, 1, 1.*  
"Men may not expect the use of many cabins, and safety at once, in the sea service."—*Raleigh.*

**cabin-boy, s.** A boy whose office it is to attend in the cabin or elsewhere on the officers of a ship.  
"... two weather-beaten old seamen who had risen from being cabin-boys to be admirals."—*Macaulay: Hist. Eng., ch. xv.*

**cabin-mate, s.** One who shares the same cabin with another.  
"His cabin-mate, I'll assure ye."—*Beaumont and Fl.: Sea-Voyage.*

**cab-in, v. t. & i.** [From *cabin, s.*]  
**1. Intrans.** : To live in a cabin, or in some similarly humble dwelling.  
"I'll make you feed on berries and on roots, And feed on curds and whey, and suck the goat, And *cab-in* in a cage."—*Shakespeare: Titus Andronicus, 1, 2.*

**II. Trans.** : To confine closely, as in a cabin or cell. (*Lit. & fig.*)  
"They feel themselves in a state of thraldom, they imagine that their souls are caged and *cabined* in, unless they have some man or some body of man dependent on their mercy."—*Burke: Speech at Bristol in 1784.*

**cab'-ined, pa. par. & a.** [CABIN, v.]  
† **A. As pa. par.** : Confined closely, as in a cabin or small cell.  
"I'm *cab-in'd*, cribb'd, confin'd, bound, To assy doubts and fears."—*Shakespeare: Macbeth, III, 4.*  
"Though from our birth the faculty divine Is chain'd and tortured—*cab-in'd*, cribb'd, confin'd, And bred in darkness."—*Byron: Child Harold, 1, 137.*

**B. As adjective:**  
**1.** Containing or furnished with cabins.  
**2.** Pertaining to a cabin.  
"The nice morn, on the Indian steep, From her *cab-in'd* leopolds peep."—*Milton.*

**cab'-in-nét, s.** [In Ger. *cabinet*. From Fr. *cabinet*, dimin. of *cabane* = a hut; Sp. *gabinete*: Ital. *gabinetto*.]  
**I. Ordinary Language:**  
**1. Literally:**  
(1) A little hut or cottage.  
"Hearken awhile, from thy greens *cabinet*, The rural song of careful Colinet."—*Spenser: Shepherds' Calendar, xii.*  
"Their groves he held; their gardens did defend; Their arbors epyle; their *Cabinets* suppress."—*Ibid.: F. Q., II, xii, ss.*

(2) A closet, a small room.  
"At both corners of the farther side, laid there be two delicate or rich *cabinetts*, daintily paved, richly hang'd, glassed with crystalline glass, and a rich canopy in the midst, and all other elegance that may be thought on."—*Deacon.*

(3) A private room, used for consultations, &c.  
"You began in the *cabinet* what you afterwards practised in the camp."—*Dryden.*

(4) A piece of furniture, containing drawers or compartments in which to keep curiosities and other articles of value.  
"In vain the workman shew'd his wit, With rings and hinges counterfeit, To make it seem, in this disguise, A cabinet to vulgar eyes."—*Swift.*

**2. Figuratively:**  
(1) Any place of rest or shelter.  
"Lo! here the gentle lark, weary of rest, From his little *cabinet* mounts up on high."—*Shakespeare: Venus and Adonis, l. 1.*

(2) Any thing in which articles of value are preserved.  
"Who sees a soul in such a body set, Might love the treasure for the *cabinet*."—*Ben Jonson.*

"Young ladies and young gentlemen too Do no small kindness to my Pilgrim show; Their *cabinetts*, their bosoms, and their hearts, My Pilgrim has; 'cause he to them imparts His pretty riddles in such wholesome strains."—*Bunyan: P. P., pt. II, Intro.*

**II. Tech.** : A kind of deliberative committee or council of the Executive, consisting of the principal members of the Government. In the United States the Cabinet consists of a body of

great officials appointed by the President as his advisers and assistants in the conduct of the government, and confirmed in their office by the Senate. They comprise the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Agriculture, the Attorney General, and the Postmaster General. Each of these is the head of the Department indicated by his title, and as a collective body they act as an Advisory Board to the President. The United States system differs from the English in the fact that the Cabinet Ministers are not members of Congress, and that there is no Prime Minister, the President occupying the place of that official, and being responsible for the acts of the Government. The members of the Cabinet receive salaries of \$8,000 per year. They are removable at the will of the President, but generally hold office till their successors are appointed and confirmed.

In England the Cabinet is differently constituted, being formed of members of Parliament of whom the Prime Minister, or Premier, is chosen by the Queen, and the others chosen by him. The Cabinet includes the First Lord of the Treasury, the Lord Chancellor, the Lord President of the Council, the Lord Privy Seal, the five Secretaries of State, the Chancellor of the Exchequer, and the First Lord of the Admiralty, eleven members in all. It has occasionally had others, to the number of seventeen. The English Cabinet grew out of the former Privy Council, the advisers of the Crown. This was a large body, and a smaller advisory body grew up within it, from which the present Cabinet emerged after the Revolution of 1688. The members are the leaders of the majority in the House of Commons, who are expected to leave office if defeated in any bill they have supported before the House. The only power at present possessed by the Sovereign is to appoint a new Premier, in which she has some, but not a wide, power of choice. The Premier, when appointed, becomes the responsible head of the Government, but one with a very uncertain tenure of office, as his position depends on his control of the vote of the House. The English Cabinet has grown out of the exigencies of the Government, and has no formal place in the constitution, while its functions are limited by no written rules. It is one of those expedients of which modern government is now so largely composed. The acquisition of the actual governing power by the Premier and the loss of it by the Sovereign, with the general suffrage of the people, assimilates Great Britain very closely to the Republican form of government.

The Cabinet has been adopted by other countries, such as France and Italy, under conditions closely similar to those of England, the Cabinet Ministers being members of the legislature, and expected to resign office when defeated in any measure. The elective head of the Government in France and the King in Italy, however, retain a power which has been lost by the Queen in England, the Cabinet standing to them in a position somewhat resembling that of the American Cabinet to the President.

"The *Cabinet* council, shortly termed the *cabinet*, forms only part of the more extensive council. . . . It is the (privy council's) duties of advising the crown and conducting the government of the country, are almost exclusively performed by the principal ministers of state, who form another section of it called the *cabinet* council. This is so termed on account of its being originally composed of such members of the privy council as the king placed most trust in, and conferred with, apart from others, in his *cabinet*, or private room. Speaking constitutionally, however, there is no difference between a *cabinet* and a privy councillor."—*A. Fontblanque, Jan.: How we are Governed, lct. 2.*

"Few things in our history are more curious than the origin and growth of the power now possessed by the *cabinet*. From an early period the kings of England had been assisted by a privy council, to which the law assigned many important functions and duties. During several centuries this body deliberated on the gravest and most delicate affairs of state. But by degrees its character changed. It became less busy for despatch and secrecy. The rank of privy councillor was often bestowed as an honorary distinction on persons to whom nothing was confided, and whose opinion was never asked. The sovereign, on the most important occasions, resorted for advice to a small knot of leading ministers. The advantages and disadvantages of this course were early pointed out by Bacon, with his usual judgment and sagacity; but it was not till after the Restoration that the interior council began to attract general notice. During many years old-fashioned politicians continued to regard the *cabinet* as an unconstitutional and dangerous board."—*Macaulay: Hist. Eng., ch. II.*

**cabinet-council, s.**  
**1.** A meeting of the Cabinet for consultation.

"A *Cabinet Council* was hastily summoned yesterday morning, and met at midday at the official residence of the Premier. . . ."—*Daily Telegraph, March 29, 1891.*

**2. The Cabinet.**  
"From the highest to the lowest it is universally read, from the *cabinet-council* to the nursery."—*Gay to Swift.*

**cabinet-edition, s.** An edition of a small neat size.  
"He is, indeed, a walking *cabinet edition* of Goethe, in all the externalities of manner and style; itching restlessness almost into abnity; witching pretentiousness that looks like beauty."—*Foreign Quarterly Review, No. 1. Memoirs of Varnhagen von Ense.*

**cabinet-file, s.**  
**Cabinet-making and Joinery:** A smooth, single-cut file, used in wood-working.

**cabinet-maker, s.** One whose trade it is to make cabinets or receptacles for curiosities and valuables. Also applied more widely to a maker of household furniture in general.  
"The root of an old white thorn will make very fine boxes and combs, so that they would be of great use to the *cabinet-makers*, as well as the turners and others."—*Mortimer.*

**cabinet-making, a. & s.**  
**A. As adjective:** Pertaining to the making of household furniture.  
**B. As substantive:**

**1.** The making of cabinets in a political sense.  
"Excepting for *cabinet-making*, I doubt for that delicate purpose, they're rather worn out."—*Moor: Two-penny Post-boy, Sale of the Tools.*

**2.** The trade or business of a maker of household furniture.

**cabinet-organ, s.**  
**Music:** A superior class and size of reed organ.

**cabinet-picture, s.** Properly small valuable pictures or paintings from the old masters, on copper, panel, and canvas; such as, from their size and value, would be preserved in cabinets. Any picture or painting of a small size. Also applied to photographs of a size larger than *cartes-de-visite*, and generally to anything of value of a small, neat, size, fitted for preservation in a cabinet. (*Lit. & fig.*)

**cabinet-secret, s.** A close secret.  
"And if all that will not serve our turn, but we must press into his *cabinet-secrets*, invade the book of life, and divulge to all men *abcondita Domini Dei nostri*, then are God's mercies unworthily repaid by us, and those indulgences which were to bestow eternity upon the world, have only taught us to be more rude."—*Hammond: Works, vol. IV., p. 623.*

**cab'-in-nét, v. t.** [CABINET, s.] To enclose as in cabinet or casket.  
"This is the frame of most men's spirits in the world; to adorn the casket, and content the jewel that is *cabined* in it."—*Swift: Sermon, p. 87.*

**cab'-in-ing, pr. par. or a.** [CABIN, v.]

**cab'-ir, kab'-ar, keb-bre, s.** [From Wel. *ceibren*, *ceibren* = a rafter; Ir. *ceobar* = a coupling; Gael. *caobar* = a pole, lath.] (*Scotch.*)

**1.** A rafter.  
**2.** The transverse beams in a kiln on which grain is laid to be dried.

† **Ca-bi-rō'-an, † Cab-ir'-i-an, a. & a.** [CABIR.]  
**A. As adjective:** Pertaining to the Cabiri or their worship.  
**B. As substantive:** One of the Cabiri.

**Ca-bi-rī, s. pl.** [Gr. *καβίροι* (*kabēiroi*) Strabo says that the name came from Mt. Cabirus, in Berycynthia.]

**Ethnic & Class. Myth.** : Certain Pelasgian divinities, pigmy statures of which still exist among the terra-cottas of the British Museum. They were specially worshipped in Samothrace, Lemnos, Imbros, and the Troad.

**Ca-bi-ric, a.** [CABIR.] Of or pertaining to the Cabiri or their worship.

**Ca-bi-rit'-ic, a.** [CABIR.] The same as CABIRIC.

**fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sir, marīne; gō, pēt, or, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūre, unīte, cūr, rāle, fāl; trī, Sīrian. s, c=ē. ay=a. qu=kw.**

**cá-ble, \*ca-bel, \*ca-belle, \*ca-bulle, \*ca-byt, s. & a.** [O. Fr. *cabel, cable, chabale*; Fr. *cable*; Low Lat. *capillum*; Lat. *capito* = to take hold of; M. Gr. *καπλιον (kaplion)*; Dut., Dan., Sw., & Ger. *Kabel*.]

**A. As substantive:**

**I. Nautical, in Telegraphy, &c.:**

1. A strong, thick rope, exceeding ten inches in circumference, originally only made of hemp, but now also of iron or copper wire, or most commonly of iron links. A rope less than ten inches in circumference is called a *hawser*.

¶ *Hemp* is laid up right-handed into yarns. Yarns are laid up left-handed into strands. Three strands are laid up right-handed into a hawser. Three hawsers laid up left-handed make a cable. The circumference of hemp rope varies from about 3 inches to 28. The strength of a hemp cable of 18 inches circumference is about 60 tons, and for other sizes the strength varies according to the cube of the diameter. Wire rope consists usually of three strands, laid or spun around a hempen core, while each of these strands consists of six wires laid the opposite way around a smaller hempen core. Hempen and wire ropes are usually employed for tow lines and for mooring purposes, but chain cables have now almost superseded those of hemp for anchoring purposes. These are made in links, each about six times the diameter of the iron employed, in length, and three and a half times in breadth. Compared with the strength of hemp cable, a one-inch diameter chain cable is equal to about 3½ hamp, and a 2 inch chain to an 8 inch hemp cable.

(1) The rope or chain to which a ship's anchor is attached. [CHAIN-CABLE.]

\**Cable, or cables (cable), or schyp roop, A. P. I. Curcuds, &c.—Prompt Paris.*

¶ *Cachen vp the crossay, cables they fasten.* Allit. Poems (ed. Morris); *Patience*, 102.

(2) The wire ropes used for the support of some suspension bridges.

(3) The wire rope used for submarine telegraphs. Deep sea telegraph cables vary greatly in construction, so that no general description can be given. One laid in 1865 consisted of a core of seven copper wires, of which six were wound spirally around a central one. These were thoroughly surrounded with Chatterton's Compound (a mixture of resin, Stockholm tar, and gutta percha). Over this four coatings of and gutta percha were alternately laid. Around this *juta* was carefully wrapped, and the whole was sheathed with ten iron wires, each of which was wrapped in strands of tarred manilla yarn. The total diameter was 1½ inches, and the breaking strain 8 tons. "Shore end" cable has always an additional protection of wire and hemp. The cables which are subsequently been laid, and which are so numerous and extended as to bring almost all parts of the earth into telegraphic communication, vary from the above, as the result of experience, but the same care to produce complete insulation of the central conductor is taken.

2. A nautical measure of distance = 120 fathoms, or 720 feet, by which the distances of ships in a fleet are frequently estimated. This term is often misunderstood. In all marine charts a cable is deemed 607.56 feet, or one-tenth of a sea mile. In rope-making the cable varies from 100 to 115 fathoms; cablet, 120 fathoms; hawser-laid, 130 fathoms, as determined by the Admiralty in 1830. (*Smyth*.) According to Ure, a cable's length is 100 to 140 fathoms in the merchant service; in the Royal Navy four cables are employed, each of 100 fathoms, two cables being attached end to end.

**II. In architecture:**

1. A wreathed or torus convex moulding made in the form of a rope. [CABLE-MOULDING.]

CABLE-MOULDING.

2. A moulding representing a cable or spiral scroll.

¶ *Cable* is used in many nautical phrases, s.g.:

1. *A shot of cable:* Two cables spliced together.

2. *To bend the cable:* To make it fast to the anchor.

3. *To bit the cable:* To fasten it round the bits. [Brit.]

4. *To drag the cable:* Said of a ship when the cable fails to hold it securely, owing to roughness of weather.

5. *To fleet the cable:* To allow it to surge back on the whelps of the capstan or windlass, as the cable climbs on to the larger part of the cone.

6. *To keekle the cable.* [To serve the cable.] [CACKLE (2), v.]

7. *To pay out the cable:* To let it run out.

8. *To pay the cable cheap:* To let it run out fast; to hand it out space.

9. *To plait the cable:* To serve it.

10. *To rope the cable:* To bind it round with ropes, canvas, &c., so as to prevent it from being galled in the hawser.

11. *To slip the cable:* To let it run out, and leave it, when there is no time to weigh anchor.

12. *To splice the cable:* To join the ends of two cables, or of a broken cable, by working the strands into one another. In the case of iron cables the splice is effected by means of shackles.

13. *To steer the cable:* To let more out.

14. *To worm the cable:* To fill the spiral crevices between the lays with strands.

**B. As adjective:** (See the compounds.)

¶ *Compounds of obvious signification: Cable-length, cable-maker.*

**cable-bends, s. pl.** Two small ropes for lashing the end of a hempen cable to its own part, to secure the clinch by which it is fastened to the anchor-ring. (*Smyth*.)

**cable-bit, s.** [Brit.]

**cable-bitted, a.** So bitted as to enable the cable to be nipped or rendered with ease.

**cable-buoy, s.** A buoy or cask used to keep a rope cable to prevent it from being cut in rocky anchorages. Also used to support the end of a broken cable, to assist in recovering it.

**cable-cane, s.** A species of Palm, *Calamus rudentum*, a native of the East Indies, Cochin-china, &c.

**cable-car, s.** A street railway car moved by a wire rope or cable running in an iron conduit under the street. In the surface of this conduit is a slot, through which passes an iron arm fixed to the car, and gripping or releasing the cable at the will of the operator. The cable is moved by steam power at a central station. Cars of this kind have been introduced in a number of the cities of the United States as an acceptable substitute for horse cars, largely in San Francisco and Chicago, and to a less extent in Philadelphia and New York. The idea of using a rope or cable for this purpose is of old date, and various patents have been taken out, but it was first practically applied in 1873, by Mr. Hallidie, of San Francisco, on Clay Street of that city. This is a very steep street, with a rise of about one foot in six, and horse power was impracticable, but the method proved so successful that it was quickly applied to other streets, and San Francisco has now nearly 100 miles of cable road. It was adopted in Chicago about ten years later, and since then in some eastern cities. American engineers laid the first cable lines in Britain, they being opened in several cities, and particularly in Edinburgh, where very steep streets exist. In most places they will probably soon be superseded by electric trolley lines, which are coming widely into operation, but they are likely to be long retained in such cities as San Francisco and Edinburgh, whose steep gradients render them especially applicable.

**cable-gripper, s.**

*Naut.:* A lever compressor over the cable-well, by which the cable is stopped from running out.

**\* cable-hatband, s.** Twisted gold or silver cord worn as a hatband.

"... more cable till he had as much as my cable-hatband to fence him."—*Marston: Ant. & Heliod.*, II. 1.

**cable-hook, s.**

*Nautical:*  
1. A hook for attachment to the messenger by which the cable is hauled in on a man-of-war, or other ship having a large number of hands, without having recourse to the capstan. It may also be attached to a hawser, underrunning the cable.

2. A hook by which a cable is handled. Each seaman has a hook in lighting-up the cable or packing in terra.

\* **cable-laid, a.** Twisted in the manner of a rope or cable, in which each strand is a hawser-laid rope.

**cable-moulding, s.** [CABLE, A. 2.]

**cable-nipper, s.**

*Naut.:* A device serving to bind the messenger to the cable, and composed of a number of rope-yarns or small stuff marled together. (*Knight*.)

\* **cable-rope, s.**

*Naut.:* A thick strong rope, a cable.

**cable-shackle, s.**

*Naut.:* A D-shaped ring or clevis, by which one length of cable is connected to another, or, upon occasion, the cable connected to an object such as the anchoring. (*Knight*.)

**cable-sheet, sheet-cable, s.** The spare bower anchor of a ship.

**cable-stage, s.** The place in the hold or cable-tier for coiling ropes and hawsers.

**cable-stopper, s.**

*Naut.:* A device to stop the paying-out of the cable.

**cable-tier, s.**

*Nautical:*

1. That part of the deck where the cables are stowed.

2. The coils of a cable.

**cable-tire, s.**

1. *Naut.:* The coils of a cable.

2. *Mech.:* Any large rope used in raising weights, as in pulleys, cranes, etc.

3. *Arch.:* A moulding of a convex form at the back of the futes, representing a rope or a staff laid in a flute.

4. *Milit.:* The large rope used in dragging guns.

**cable-well, s.**

*Naut.:* The part of the ship where the cable is coiled away.

**cá-ble, v. t. & i.** [CABLE, s.]

**I. Transitive:**

1. *Naut.:* To fasten or secure with a cable. (*Dyer: Fleece*, ii.)

2. *Arch.:* To fill the futes of columns with cable-moulding.

3. *Teleg.:* To transmit (as news, &c.) by the submarine telegraph cable. Since the opening of the oceanic telegraph cables the price of messages over them has been greatly reduced, the total reduction having been from \$5 to 25 cents per word, though quite high rates continue to more distant points, as from England to Brazil, where it varies from 6s. 2d. (in the north), to 1£, 8s. 10d. There are at present fourteen cables crossing the Atlantic, owned by six different companies, besides cables to numerous other parts of the world and telegraphs are not without hope of being able to apply the telephonic system to ocean wires, and enable people to talk from continent to continent.

"Had Messrs. . . . cabled the refusal of the order, or even written by return mail, there could have been no possibility of any misunderstanding."—*Daily News*, Sept. 19, 1874.

**II. Intrans.:** To send a message by the submarine telegraph cable.

Chemistry: Arsenidimethyl, As<sub>2</sub>(CH<sub>3</sub>)<sub>2</sub>. Cacodyl is a colourless transparent liquid, boiling at 179°. = As(CH<sub>3</sub>)<sub>2</sub>. It takes fire in the air, and is obtained in an impure state by distilling equal weights of potassium acetate and arsenious oxide. It is called Cadet's Fuming Liquid or Alkarsen. Its vapour is very poisonous. The chloride, iodide, and cyanide are known. Cacodyl cyanide, As(CH<sub>3</sub>)<sub>2</sub>CN, is easily obtained by distilling alkarsin with mercuric cyanide. It is a colourless liquid, boiling at 140°. It takes fire when heated. It is fearfully poisonous and could be used to fill shells to fire at ironclad vessels, as a shell would kill all the people in the vessel. Cacodyl oxidised with water at a low temperature forms Cacodylic acid or Alkarsen, As(CH<sub>3</sub>)<sub>2</sub>HO<sub>2</sub>. It forms colourless crystals, soluble in water.

*Med.*: Bad or defective nourishment.

**caē-ōx-ēne**, **caē-ōx-ēn-ite**, s. [In Ger. *kakoxen*. From Gr. κακός (*kakos*) = bad, evil, δέξις (*oxus*) = sharp, . . . pungent, acid. Cf. also κακοφένος (*caecoxenos*) = . . . inhospitable; suffix *-ene* / *-ite* (*Min.*) (q. v.).]

*Min.*: A mineral, supposed to be an iron-wavellite. It occurs in radiated tufts of a yellow or brownish-yellow colour, becoming brown on exposure, at the Arbeck mine in Bohemia. Compos.: Phosphoric acid, 9.20—25.71; sesquioxide of iron, 36.32—41.46; alumina, 0—10.01; lime, 0—1.1; silica, 0—8.90; hydrofluoric acid, 18.98—32.83. (*Dana.*)

**caē-tā-ōē-se**, s. pl. [Named from the *Cactus* (q. v.).]

*Bot.*: Indian Figs, an order of exogenous plants, placed by Lindley under his fifty-second alliance, the Cactales. The sepals and petals are numerous and confounded with each other. The stamens are indefinite, the ovary fleshy, inferior, one-celled; the fruit succulent, one-celled, many seeded. The flowers are sessile,

GIANT CACTUS (*Cereus giganteus*).

and usually last only one day or night. The leaves are generally wanting, but an inexperienced observer might mistake for them the usually angular foliaceous stems. The Cactaceae are natives of America, whence they have been imported into the warmer parts of the Eastern hemisphere. About 800 are known. The fruit of some species is refreshing and agreeable, that of others insipid. The juice of *Mammillaria* is slightly sickly, being at the same time sweet and insipid.

Many of the Cactaceae are of very abnormal forms.

**caē-tā-ōē-ōūs**, a. [CACTACEAE.] Pertaining to the Cactaceae.

**caē-tāl**, a. [CACTALES.] Pertaining to group or order to which the *Cactus* plants belong.

**caē-tā-lōp**, s. pl. [From Lat. *cactus* (q. v.), and pl. adj. suff. *-ales*.] Lindley's fifty-second alliance of plants. It stands between Myrtales and Grossales, and belongs to the fourth subclass, or Epigynous Exogena.

**caē-tin**, s. [Eng., &c. *cactus*; -in.] *Chem.*: A red colouring matter extracted from the fruit of some Cactuses.

**caē-tūs**, s. [Lat. *cactus*; Gr. κακτός (*kakotos*) = a prickly plant.]

*Bot.*: An old and extensive genus of Linnaeus, in four sections:—(1) The Echinocactae; (2 & 3) *Cerei* of two kinds; and (4) *Opuntiae*. It is now broken up into a number of genera. It is still popularly used as the designation of nearly the whole of the Cactaceae, to which order, moreover, it has given its name. *Cacti* are sometimes called *Melon Thistles*.

*Hedgehog cactus*: A designation of the genus *Echinocactus*.

*Leaf cactus*: The *Epiphyllum*.  
*Melon thistle cactus*: The *Melocactus*.  
*Nipple cactus*: The *Mammillaria*.

**cactus-wren**, s. *Ornith.*: Coues' name for birds of the genus *Campylorhynchus*, from their frequenting and nesting in cactus-plants.

**ca-cū-mēn** (pl. **ca-cū-mīn-a**), s. [Lat.] The top. (Used only in dispensing and in anatomy.)

**ca-cū-mīn-āl**, a. [Lat. *caecumen*, gen. *caecumin*(is) = the top, the summit; Eng. suff. *-al*.] Pertaining to the top of anything.

\* **ca-cū-mīn-āte**, v. t. [Lat. *caecumino*; from *caecumen* (genit. *caecuminis*) = a top, an apex.] To make sharp or pyramidal; to reduce to a point or an apex.

*cadence*, *cadence*, *cadence*, *s.* [*Fr. cadence* = a falling; *Lat. cadentia*, neut. pl. of pr. par.; from *cado* = to fall; *Sp. & Port. cadencia*; *Ital. cadenza.*]

*I. Ordinary Language:*

1. *Lit.*: The act of falling or sinking; the state of having act.

"Now was the sun in western *cadence* low  
From noon."  
*Milton: P. L.*, x. 92.

2. *Fig.*: The act or process of passing from one subject or thought to another.

"The *cadence* or manner how Paul falls into those words."  
—*Hammond: Works*, iv. 687.

*II. Technically:*

1. *Rhetoric:*

(1) The fall or sinking of the voice in singing or speaking, especially at the end of a sentence.

"The length of the verse keepeth the ears too long from his delight, which is to hear the *cadence* or timely accent in the ends of the verse."  
—*Puttenham: Art of Poetry*, bk. II, p. 6.

"... for it is inconceivable how much weight and effectual paths can be communicated by sonorous depth and melodious *cadences* of the human voice to sentiments the most trivial."  
—*De Quincey: Works* (ed. 1868), vol. II, p. 100.

(2) The modulation of the voice generally, especially in reading or speaking.

(a) *Of human beings:*

"Listen'd intensely; and his countenance soon brighten'd with joy; for murmurs from within were heard—sonorous *cadences!* whereby to his belief, the monitor express'd."  
*Wordsworth: Excursion*, bk. iv.

(b) *Of animals:*

"Around him feeds his many-heating flock  
Of various *cadence*."  
*Thomson: Seasons; Spring*, 385.

(3) The rhythm or flow of language, a kind of blank verse or poetic prose.

"Books, songs, and ditties,  
In time, or else in *cadence*."  
*Chaucer: House of Fame*, 627.

"The *cadence* of one line must be a rule to that of the next; as the sound of the former must slide gently into that which follows."  
—*Dryden.*

(4) The modulation of any tone or sound.

"How soft the music of those villages bells,  
Falling at intervals upon the ear  
In *cadence* sweet, now dying all away  
Now pealing loud again, and louder still."  
*Cowper: Task*, vi. 4.

2. *MU.*: A regularity and uniformity of pace in marching.

"Elizabeth kept time to every *cadence* with look and finger."  
—*Scott: Emielworth*, ch. xvii.

3. *Music:*

(1) *Spec.*: A close, the device which in music answers the use of stops in language. The effect is produced by the particular manner in which certain chords succeed one another, the order being generally such as to produce suspense or expectation first, and then to gratify it by a chord that is more satisfying to the ear. They are commonly divided into three kinds: the *perfect cadence* (again sub-divided into *authentic* and *plagal*), the *imperfect cadence*, and the *interrupted cadence*. (*Grove.*)

(2) *Gen.*: The closing phrase of a musical composition.

"A strain of music closed the tale,  
A low, monotonous funeral wail,  
That with its *cadence*, wild and awe  
Made the long *Saga* more complete."  
*Longfellow: Tales of a Wayside Inn*, Interlude.

4. *Her.*: The various steps in the descent of a family; the distinction of houses.

5. *Horsemanship*: (For definition see example.)

"*Cadence* is an equal measure or proportion which a horse observes in his motions, when he is thoroughly managed."  
—*Farrier's Dictionary.*

*cadenced*, *a.* [*CADENCE*, *s.*]

1. In *cadence*, regulated, in measure.

"A certain measured, *cadenced* step, commonly called a dancing step, which keeps time with, and as it were beats the measure of, the music which accompanies and directs it, is the essential characteristic which distinguishes a dance from every other sort of motion."  
—*A. Smith: On the Imitative Arts.*

2. Sung or written in *cadence*.

"These parting numbers, *cadenced* by my grief."  
*Philips: To Lord Carteret.*

*ca-den-çy*, *s.* [*CADENCE*.]

\* *ca-dene*, *s.* [*Fr. cadene*; *Sp. cadena*; *O. Fr. cadene*; *Fr. chaîne*; *Lat. catena* = a chain, from the chain-like appearance of the warp.] An inferior description of Turkey carpet.

*A. As adjective:*

\* *I. Ordinary Language:* Falling, dropping.  
"With *cadent* tears fret channels in her cheeks."  
*Shakespeare: King Lear*, l. 4.

*II. Technically:*

\* 1. *Music:* In *cadence*; regulated, in measure.

\* 2. *Astrol.*: Applied to a planet when it is in a sign opposite to that of its exaltation.

\* 3. *Geol.*: The tenth of the fifteen series of beds into which Professor Rogers subdivides the palæozoic strata of the Appalachian chain. It corresponds in age to the Lower Middle Devonian rocks of the British Isles.

*B. As substantive:*

*Geol.*: The series of rocks described under *A.*, II. 3.

*ca-dén'-za*, *s.* [*Ital. cadenza*.] [*CADENCE*.]

*Music:* A flourish of indefinite form introduced upon a bass note immediately preceding a close.

*cad-ét*, *s.* [*Fr. cadet* = a younger brother; *Prov. Fr. capdet*, from *Lat. capitulum* = a little head; the eldest son being called the *caput*, or head of the family.]

\* 1. *Ord. Lang.*:

(1) A younger brother, the youngest son.  
"Joseph was the youngest of the twelve, and David the eleventh son, and the *cadet* of Jesse."  
—*Brown: Vulgar Errors.*

(2) The younger of two brothers in a gentleman's family.

"Walker Buek was a *cadet* of the house of Flanders."  
—*Sir G. Buck: Hist. of Rich. III.*, p. 68.

\* 2. *Mil.*: Formerly a volunteer who served in the army, with or without pay, with the chance of gaining a commission. Now applied to students at the military academies, colleges, and schools, where civilians pay a fixed rate for their education, which is generally but not always, purely military. The age for admission varies from 16 to 22 years, and cadets are subject to military discipline, are drilled, and wear a distinguishing uniform.

"About four hundred captains, lieutenants, *cadets*, and gunners were selected."

*Bot.*: Three plants—(1) *Sinapis arvensis*, (2) *S. nigra*, (3) *Brassica Napus*. No. 1 is sometimes called *Rough Cadlock*, and No. 3 *Smooth Cadlock*.

*Cad-mé-an*, *Cad-mæ-an*, *a.* [*Lat. Cadmeus* = pertaining to Cadmus, the mythical founder of Thebes.] Of or belonging to Thebes, Theban.

"In Theban games the noblest trophy bore, . . .  
And singly vanquished the *Cadmean* race."  
*Pope: Homer: Iliad* xxiii. 708

*cad'-mi-um*, *s.* [*From Lat. cadmia* (*Pliny*); *Gr. καδμια* (*cadmeia*), *καδμια* (*cadmia*) = calamine, an ore of zinc.]

*Chem.*: A diatomic metallic element, discovered in 1818; symbol, Cd; atomic weight, 112; sp. gr., 8.6; melting point, 315°, boils at 860°. Cadmium is a white, ductile, malleable metal. It scarcely tarnishes in the air; it burns when heated in the air, forming a brown oxide, CdO. It dissolves readily in nitric acid; it decomposes water at red heat. Its vapour density is 3.9 compared with air. Cadmium is found in some zinc ores; when these are distilled it rises in vapour before the zinc does so. It also occurs in the form of sulphide in greenockite. The oxide dissolves in acids, forming colourless salts. The oxide absorbs CO<sub>2</sub> readily, and is converted into a white insoluble carbonate. Cadmium sulphate, CdSO<sub>4</sub>.H<sub>2</sub>O, forms colourless monoclinic crystals easily soluble in water, and forms double sulphates with potassium and ammonium sulphates. Cadmium chloride, CdCl<sub>2</sub>, is very soluble; it forms double salts. The bromide and iodide are also white soluble salts, used in photography. Cadmium sulphide, CdS, is a bright-yellow powder, insoluble in dilute HCl; it is obtained by passing H<sub>2</sub>S through an acid solution of a cadmium salt; it is insoluble in ammonium sulphide, thus easily distinguished from sulphides of arsenic, antimony, or tin. Cadmium sulphide is used as a yellow pigment. Cadmium is readily detected by the properties of its sul-

phide. Ammonia gives a white precipitate, soluble in excess; sodium carbonate a white precipitate of carbonate of cadmium, insoluble in excess. Cadmium is easily separated from zinc by passing H<sub>2</sub>S into their solution in HCl; the cadmium is precipitated as yellow sulphide, CdS. Cadmium can be separated from copper in analysis by dissolving their sulphides in nitric acid and adding ammonias in excess, filtering off oxides of other metals; then potassium cyanide is added till the precipitate first formed redissolves, then H<sub>2</sub>S gas is passed through the liquid, from which it throws down the cadmium as sulphide.

**cadmium-blende, s.**

*Min.*: The same as GREENOCKITE (q.v.). Formerly called also Sulphure of Cadmium.

**cadmium-yellow, s.** A pigment, consisting of cadmium sulphide. [CADMIUM.]

**cad'-oik, cad'-doick, s.** [Fr. *caduc*; Lat. *caducus* = falling; *cado* = to fall.] A casualty; forfeited or echeated property.

**ca-dû-coüs, a.** [Lat. *caducus* = falling; *cado* = to fall.]

*Bot.*: Dropping off; falling off quickly, or before the time, as the calyx of a poppy or the gills of a tadpole.

**\* ca-dû-ke (Eng.), \* ca-duc (Scotch), a.** [Fr. *caduc*; from Lat. *caducus* = falling; *cado* = to fall.] Failing, perishable.

"All their happiness was but *caduks* and unlasting."—*Hobbes: Lucian*.

**cad'-ÿ, a.** [CADGY.] (Scotch.)

**çæ'-çal, s.** [From Lat. *caecum* (q.v.), and Eng.

suff. -al.] Terminating blindly, i.e., in a closed end; pertaining to the caecum.

**çæ'-çal-ÿ, adv.** [Eng. *caecal*; -ÿ.] Blindly, with an opening at one end only; in the manner of a caecum (q.v.).

**\* çæ'-çl-çs, s.** [Gr. *κακίας* (*kaikias*) = the north-east wind.] A personification of the north-east wind.

"Now from the north,  
Boreas and Caecias, and Argæus loud,  
And Thræcias, rend the woods, and seas apart."  
—*Milton: P. L.*, I, 662.

**çæ'-çl-gên'-ÿ-çs, s. pl.** [Lat. *caecus* = blind; *genitus* = brought forth, pa. par. of *gigno* = to beget.]

*Entom.*: A subtribe of insects, order Hemiptera. The species are generally bright-scarlet with black spots. One is found in Britain.

**çæ'-çil'-ÿ-ç, çæ'-çil'-ÿ-a, s.** [Lat. *caecilia* = a kind of lizard, probably the blindworm (q.v.); *caecus* = blind.]

1. *Zool.*: A genus of serpent-shaped amphibians, the type of the family Caeciliidae (q.v.).

2. *Ichthy.*: A name used by some authors for the fish more usually known by the name of the Acus. It is common in the Mediterranean, and is called by the Venetian fishermen *Biscia*, that is, Viper-fish.

**çæ'-çil'-ÿ-anç, s. pl.** [From Lat. *caecilia*; Eng. pl. suff. -ans.]

*Zool.*: The English name for the family Caeciliidae (q.v.).

**çæ'-çil'-ÿ-i-dæ, s. pl.** [From Mod. Lat. *caecilia* (q.v.).]

*Zool.*: Caecilians, serpent-shaped amphibians. They belong to the order Gymnophiona. The young have internal branchia, while the adults breathe by lungs. None have been found fossil.

**\* çæ'-çit-çs, s.** [Lat. *caecities* = blindness, from *caecus* = blind.]

*Med.*: Blindness.

**çæ'-çl-tis, s.** [Mod. Lat. *caecum* (q.v.); suff. -itis, denoting inflammation.]

*Med.*: Inflammation of the caecum; typhlitis.

**çæ'-çüm, s.** [Nent. of Lat. *caecus* = blind, invisible.]

1. *Anat.*: The beginning of the great gut, commonly called the blind-gut, because it is perforated at one end only; it is the first of the three portions into which the intestines are divided.

2. *Zool. & Paleont.*: A genus of molluscs, by some considered to be the type of a family Caecidae, but generally placed under the family Turritellidae. The species are recent or tertiary, commencing in the Eocene period.

**çæ'-ÿüm, s.** [Lat. *caelum* = a chisel or burin of a sculptor or engraver, a graver; from *cado* = to fall, . . . to cut.]

*Caelum sculptoris*: The sculptor's tool.

*Astron.*: One of Lacaille's constellations. It is not visible in England.

**çæ-nânçh'-ÿ-ÿüm, s.** [See def.] An incorrect form of cenanthium (q.v.).

**ca'-er, in compos.** [Wel. = a wall, a fort, a city.] A town, a city, as Caerleon.

**çæ'-rê-ba, s.** [Etymology doubtful. Agassiz calls it "a barbarous word."]

*Ornith.*: A genus of birds, the typical one of the sub-family Cærebinae (q.v.).

**çæ-rê-bi-næ, s. pl.** [From Mod. Lat. *cæreba* (q.v.), and fem. pl. suff. -inæ.]

*Ornith.*: A sub-family of the Promeropidae, or Sun-birds. It contains the Guitquita, the American representatives of the Sun-birds of the Old World.

**\* çæ-r'-ule, \* çer'-ule, a.** [From Lat. *cæruleus* = azure blue.] Azure blue. [CERULEAN.]

"Whose *cærule* streams, rombling in Pible stone."  
—*Spenser: Virgils's Genet.*

**\* çæ-r-ÿ-lës-çënt, çer-ÿ-lës-çënt, a.** [Formed by analogy as if from a Lat. *cærulesco*, from *cæruleus* = azure blue; and Eng. suff. -escent.] Becoming more or less sky-blue.

**çæ-sål-pin'-ÿ-a, s.** [Named after Andreas Casalpini, chief physician to Pope Clement VIII., in the latter part of the sixteenth century.]

*Bot.*: The typical genus of the leguminous sub-order Casalpinieæ (q.v.). They are trees or shrubs, with showy yellow flowers, ten stamina, and bipinnatifid leaves. About fifty species are known. The intensely astringent *Casalpinia coriaria* has legumes which contain so much tannin that they are valuable for tanning purposes. They are known in commerce as Dividivi, Libidivi, or Libidibi, and come from the West Indies and South America. *C. crista*, also West Indian, *C. echinata*, from Brazil, and other species, produce valuable red, orange, and peach blossom dyes. The wood of the latter, given in powder, is tonic. *C. brasiliensis*, which, however, is not from Brazil, and is now called *Peltophorum Linnei*, is said to produce the Brazil-wood of commerce. [BRAZIL-WOOD.] *C. Sappan*, from India, furnishes the Sappan-wood. [BUNKUM WOOD, SAPPAN-WOOD.] An oil is expressed from the seeds of *C. oleosperma* and other species. The roots of *C. Nuga* and *C. Moringa* are intensely bitter. Several Chinese species bear soap-pods, that is, pods which may be used as a substitute for soap. [Lindley, *Treas. of Bot.*, &c.]

**çæ-sål-pin'-ÿ-ç, s. pl.** [From Mod. Lat. *Casalpinia* (q.v.); pl. fem. adjectival suff. -æ.]

*Bot.*: One of the great sub-orders into which the Leguminosæ are divided. They have an irregular flower, but not at all so much so as the Papilionaceæ. The petals are spreading, the stamens adhere to the calyx. They are mostly ten in number, though in rare cases less than five. They have purgative qualities. Though none are wild in Europe, they constitute a notable and attractive feature of the vegetation in India and other tropical countries. Lindley divides them into eight tribes—(1) Leptolobieæ, (2) Euceasalpinieæ, (3) Casicieæ, (4) Swartzioleæ, (5) Amherstieæ, (6) Bauhinieæ, (7) Cynometreæ, (8) Dimorphandree.

**Çæ-sår'-ÿ-an (1), a.** [From Lat. *Cæsarianus*, *Cæsarius* = pertaining to Cæsar, i.e., spec. to Caius Julius Cæsar.] Pertaining to any of the Cæsars, and especially to the great Caius Julius Cæsar.

**çæ'-sår'-ÿ-an (2), çê'-sår'-ÿ-an, a.** [From Lat. *cæsura* = a cutting, an incision; or possibly the same as (1); see def.] Involving the act of cutting, especially in the operation described under the compound terms.

**cæsarian operation, s.**

*Surgery & Midwifery*: The most serious operation in midwifery, and only resorted to in extreme cases, to save life; as, for example, when a woman fully pregnant dies suddenly, by accident or otherwise, the child being still alive in utero; or when, by reason of deformity, the birth cannot take place naturally or with the aid of ordinary obstetrical instruments, *per naturales vias*. The operation consists in making an incision in the abdomen and removing the child with the contents of the womb *en masse*, and then sewing up the wound thus made in the usual way. As might be expected, the danger to life from this operation is very great in those cases where the living mother is operated upon. Certain cases, however, have survived the operation—some have even gone through a repetition of it, and the proportion of these cases is increasing, owing to the improvements in modern surgery. The Cæsarian operation was known to the Greeks. The Romans also practised it, and it was considered by them a fortunate circumstance to be so born. According to Pliny, Scipio Africanus was delivered in this way (*Auspiciatus prior matre nascuntur sicut Scipio Africanus prior natus*). This author, with others, also asserts that the name of Cæson, afterwards Cæsar, was first given to those thus born (*Quia cæso matris utero in lucem prodierunt*).

**cæsarian section, s.** The same as CÆSARIAN OPERATION (q.v.).

**çæ'-sår-ÿ-m, s.** [Eng., &c. *Cæsar*; -ism; see CÆSARIAN (1).] Despotism; imperialism.

**çæ'-si-a, s.** [In honour of Frederico Cæzio, an Italian naturalist.]

Bot. : A genus of filiceous plants, belonging to the order Anthriscaceae.

cae-si-o-s, s. [Named after Frederico Caesio.] Icthyol. : A genus of acanthopterygious fusiform fishes, having the dorsal and anal spines much larger than the others, and their base thickly covered with small scales. Family, Chaetodontidae.

cae-si-o-us, a. [Lat. caesius = bluish-grey. (Used generally of the eyes.)]

Bot. : Bluish-grey, lavender-colour. Akin to glaucous, but greener. (Lindley.)

cae-si-um, s. [From Lat. caesius = bluish grey, sky-coloured.]

Chem. : A monad metallic element; symbol Cs., at. weight 133. It was discovered in 1860 by spectrum analysis in mineral waters and in several minerals, as mica, feldspar, &c., also in the ashes of plants. It is separated by the greater insolubility of the double chloride with platinum. The hydrate is a strong base. Caesium carbonate can be separated from rubidium carbonate by its solubility in absolute alcohol. Caesium gives characteristic blue lines in its spectrum.

cae-si-pit-ose, a. [From Mod. Lat. caespitosus; Class. Lat. caespes (genit. caespitis) = a turf, a sod.]

Bot. : Growing in tufts.

cae-si-pit-u-lose, a. [From Lat. caespes (genit. caespitis) = a turf, a sod; dimin. suffix -ul; and Eng. suffix -ose, from Lat. -osus.] Growing in small tufts forming dense patches, as the young stems of many plants.

cae-si-tus, i cae-si-tus, s. [Lat. caesius = cestus.] A boxing-glove. It was of leather, in certain cases loaded with lead or iron.

CESTUS.

"The prizes next are order'd to the field, For the bold champions who the cestus wield." Pope: Homer's Iliad, xxiii. 789-4.

cae-si-u-s, s. [Lat. caesus = beaten.]

Bot. : A genus of plants, consisting of a single species, C. azillarica, a native of India. It is a small weed, growing in moist places, and has purple or white florets.

cae-si-ur-a, cae-si-ur-a, \*cae-si-ure, \*cae-si-ure, s. [In Fr. caesure; Sp. & Ital. cesura; Lat. caesura = a cutting off, from caedo = to cause to fall, to fall, to cut.]

\* I. Ord. Lang. : Of the forms caesure and caesura.

"Volgar languages that want Words and sweetness, and be scant Of true measure, Tyrant rime hath so abused, That they long since have refused Other caesure." B. Jonson : A Fit of Rime against Rime. "And I beyond measure, Am ravish'd with pleasure, To answer each caesure." Dryden : The Two Nymphs.

II. Prosody : A pause in a verse. If in all cases such a rest for the breath occurred only at the termination of the several words, a painful sense of monotony would be experienced; hence the caesura, as a rule, cuts off the last syllable from a word, and on the syllable so separated the stress is laid. In the line— "Arm'd vi | rãmquë cã | nõ Trõ | jõe qui | primãs ãb | õris,"

no is the caesura. In the following lines from Milton's Paradise Lost, bk. ii.—

"Orens | and Ha | des, and | the dread | ed name Of Dem | ogor | gon; Ru | mour oert | and Charon, And Tre | milt | and | Conu | sion, all | embroll'd, And Dis | cord, with | a thou | sand va | rious mouths," des, gon, milt, and cord are the chief caesuras.

cae-si-ur-aed, a. [From Lat. caesura, and Eng. suffix -ed.] Pronounced with a caesura, slowly drawn.

"No accents are so pleasant now as those, That are caesura'd through the pastor's nose." Brown : A Satire on the Rebellion. cae-si-ur-al, cae-si-ur-al, a. [From Lat. caesura (q.v.), and Eng. suffix -al.] Pertaining to a caesura, produced by a caesura.

cae-tër-is pãr-i-bùs, used as adv. [Lat.] Logic & Ord. Lang. : Other things being equal.

"These characters are all caeteris paribus, in an inverse relation to one another." Todd & Bowman : Physiol. Anat., vol. I, ch. 7, p. 190.

\*caf, \*cof, \*kof, \*kafe, a. [A.S. caf.] Quick, eager. (Rel. Antiq., i. 212.) (Stratmann.)

parts of America. Its flowers are variegated with green, purple, red, or yellow; its leaves are narrowly elliptical. Its fruits are oval or globular, and are so hard externally that where they grow they are used as household utensils, such as basins, water-bottles, and even kettles. They are not easily broken by rough usage or burnt by exposure to fire. The pulp is purgative, and considered useful in chest diseases; when roasted, it is employed as a poultice for bruises and inflammations.

2. The fruit of the above tree, which is enclosed in a shell used by the natives of the Caribbee Islands for drinking-cups, pots, musical instruments, and other domestic utensils.

3. A cup or utensil made of the shell enclosing the fruit of the above tree.

**calabash-nutmeg**, *s.* The *Monodora myristica*, a tree of the order Anonaceæ, introduced into Jamaica probably from Western Africa. The fruits resemble small calabashes, hence the name. It is called also American Nutmeg, or Jamaica Nutmeg.

**calabash-tree**, *s.* [CALABASH.]

*Sweet Calabash*: The *Passiflora maliformis*.

**cal-á-de**, *s.* [Fr. *calade*; from *caler* = to lower; Sp. & Port. *calar*; Ital. *calare*; Lat. *calo*; Gr. *χαλῶ* (*chalō*) = to slacken, let down.]

**Horsemanship:** The slope of a riding-ground, down which a horse is ridden in a gallop to teach him how to ply his haunches.

**cál-a-dē-ní-a**, *s.* [Gr. *καλός* (*kalos*) = beautiful; *αδών* (*adōn*) = a gland.]

**Bot.:** A genus of Australian plants, belonging to the order Orchidaceæ, or Orchida. The flowers are covered in a very remarkable way with glandular hairs, which have suggested the name.

**cál-a-dí-ō-sē**, *s. pl.* [From *caladium*, with fem. pl. suff. -*ez*.]

**Bot.:** A family of plants belonging to the natural order Ardoceæ, or Araceæ. The genera have the stamens and pistils numerous, contiguous, or separated by the rudimentary bodies; spadix usually naked at the point and the cells of the anthers with a very thick connective.

**cal-ā-dí-ūm**, *s.* [Latinized from *kale*, the native name of the root-stock.]

**Bot.:** A genus of endogenous plants, the typical one of the family Caladiaceæ (q. v.). They are cultivated in greenhouses here, and flourish in warmer parts of the world. The leaves of *Caladium sagittifolium* are boiled and eaten as a vegetable in the West Indies. The root-stock or rhizomes of others are eaten there and in the Pacific, the process of cooking destroying the dangerous acidity.

\* **ca'-lad-rie**, *s.* [Sp. *caladre*, *calandria*; Ital. *calandra*; Gr. *καλάνδρα* (*calandra*)] A bird, either a jay or a lark.

"A cornetant and a *caladrie* . . ."—*Wycliffe's Dent.* xiv. 13.

κάλας (kalats or kallats) = a topaz or chrysolite.]

Min.: The same as Turquois (q. v.)

cal-ám-a-grò's-tis, s. [Lat. calamus = a reed; agrostis = a grass.]

Bot.: A genus of the grasses belonging to the Arundinaceae, or Reed family. Two species are British, Calamagrostis epifloja and C. stricta, which are found in bogs. Order, Gramineae. They are used as diuretica and emmenagogues.

cal-a-mán'-cò, s. [Low Lat. calamancus, calamacus, calamantus; Mod. Gr. καμελακίων (kamelaukion) = a head-covering of camels' hair; Sp. calamaco; Fr. calmande; Ger. kal-mank; Dut. kalminck, kaleminck.]

Comm.: A kind of woollen stuff made in the Netherlands, which has a fine gloss, and is chequered in the warp, so that the checks are seen on one side only. It was fashionable in Addison's time.

"He was of a bulk and stature larger than ordinary, had a red coat, flung open to show a gay calamanco waistcoat."—Tatler.

cal-a-mán'-dèr, s. [COROMANDEL.] calamander-wood, s. [COROMANDEL-WOOD.]

cal-a-mar-ý, s. [Lat. calamarius = pertaining to a reed-pen, from the ink-bag of the animal, or its "pen" of cuttle-bone.]

Zoology:

1. The English name of the cephalopodous genus Loligo, and specially of the Loligo vulgaris, or Common Calamary.

2. Pl.: The English name for the Cephalopod molluscs of the family Teuthidae. The shell consists of an internal expansion or "pen," with a central shaft and two lateral wings. The species are called also Squids. [TEUTHINÆ.]

ca-lám'-bac, s. [G. Fr. calambac, calambouc; Sp. calambac, calambuco; Port. calamba, calambuco; from Pers. kalambak = a fragrant kind of wood.]

Bot.: Aloes-wood, the product of a tree growing in China and some of the Indian Isles. It is of a very light, spongy texture, containing a soft, fragrant resin, which is chewed by the natives. [AOALALOB, ALOES-WOOD.]

ca-lám'-boir, s. [CALAMBAC.]

Bot.: A species of Calambac, less fragrant, and of a dark, mottled colour; much used by cabinet-makers.

cal-am-if-ér-òus, a. [Lat. calamus = a reed; fero = to bear.] Bearing reeds, reedy.

cal-a-mine, cal-a-min-ár'-is, s. [In Ger. galmel. From Low Lat. calaminaris, in the term lapis calaminaris, a former name for this mineral. Lat. calamus = a reed, in allusion to the staccatic form of one variety; or more probably a corruption of Lat. calmia, cadmea; Gr. καμία (kadmia); καμία (kadmia) = calamine.]

Min.: A transparent or translucent brittle orthorhombic mineral, of a vitreous or even adamantine lustre, its colour white yellowish or brown, its hardness 4.5-5, its sp. gr. 3.16-3.90. It possesses double refraction. Compos.: Silica, 23.2-26.23; oxide of zinc, 62.85-68.30; and water, 4.4-10.8. It is a native carbonate of zinc, ZNCO<sub>3</sub>. It is often associated with Smithsonite. [SMITHSONITE.] It occurs in England, in Cumberland, near Matlock in Derbyshire, on the Mendip Hills, &c.; in Scotland, at Leadhills, and in the island of Fetlar, where the name has been corrupted into "clemmel," and has given rise to the "Clemmel Gio" (i. e., the Calamine Creek); in Wales, in Flintshire; on the continent of Europe, and in America. Dana makes three varieties:—1. Ordinary (1) In crystals (2) Mammillary or Staccatic, the latter including Wagate; 2. Carbonated; 3. Argillaceous. (Dana, &c.)

"We must not omit those, which, though not of so much beauty, yet are of greater use, viz., loadstones, whetstones of all kinds, limestones, calamine, or lapis calaminaris."—Locke.

"Brass is made of copper and calaminaris."—Bacon: Phytol. Rem., § 8.

Earth calamine: [HYDROZINCITE.]

cal-a-mint (Eng), cal-a-min'-tha (Lat.), s. [Lat. calamintia; Gr. καλαμίνθη (kalamínthē); καλαμίνθος (kalamínthos) = catmint, mint; κάλα, fem. of Æol. adj. καλός (kalos) = beauti-

ful; and μίνθη (mínthē), μίνθη (mínthē), μίνθος (mínthos) = mint.] [MINTHA, MINT.]

Botany:

1. (Of the form Calamintha): A genus of labiate plants, tribe Melissæe. Among the species may be named Calamintha officinalis, C. clinopodium, and C. aetna.

2. (Of the form Calamint): The English name of Calamintha officinalis. It is a British perennial plant, with ovate leaves and secund cyruces.

cal-a-mist, s. [Lat. calamus = a reed.] One who plays upon a pipe or reed instrument.

cal-a-mis-träte, v. t. [O. Fr. calamistrer; Lat. calamistratus, pa. par. of calamistrum = to curl the hair; calamister, calamistrum = a curling-iron; calamus = a reed.] To curl or frizzle the hair.

"Which belike makes our Venetian ladies, at this day, to countersit yellow hair so much; great women to calamistrate and curl it up, to adorn their heads with sparkles, pearls, and made-flowers; and all courtiers to affect a pleasing grace in this kind."—Burton: Anat. of Mel., p. 468.

cal-a-mis-trä-tion, s. [CALAMISTRATE.] The act or process of curling the hair.

"Those curious needle-works, variety of colours, jewels—embroideries, calamistrations, ointments, &c., will make the veriest dowry otherwise, a goddess."—Burton: Anat. of Mel., p. 475.

cal-a-mite, † cal-a-mit (Eng), cal-a-mi'-tës (Lat.), s. [Fr. calamite; Lat. calamus = a reed.]

1. Bot. & Paleont.: A coal fossil plant recurring in the form of jointed fragments, formerly cylindrical, and perhaps hollow, but now crushed and flattened. The stems are branched, and there appears to have been a distinct wood and bark. Both stems and branches are ribbed and furrowed. Some refer the numerous species of Calamites to Equisetaceae, but the presence of wood and bark has led others to place them among the Dicotyledons. (Balfour.)

"Calamites are the stems of fossil Equisetaceae."—Thomé (transl. by Bennet) (1879), p. 282.

2. Min.: An obsolete name for TREMO-LITE.

ca-lám'-it-òus, a. [Fr. calamiteux; Lat. calamitosus = full of calamity or misery; calamitas = calamity, misery.]

1. Objectively: Causing distress or unhappiness; attended with misery; unhappy, wretched.

"Meanwhile abridged Of daily comforts, gladly reconciled To numerous self-denials, Margaret Went struggling on through those calamitous years." Wordsworth: Excursion, bk. 1.

"And he in that calamitous prison left." Milton: Samson Agonistes, 1480.

2. Subjectively: Wretched, unfortunate; involved in calamity.

"This is a gracious provision God Almighty hath made in favour of the necessitous and calamitous."—Calamy.

ca-lám'-it-òus-ly, adv. [Eng. calamitously; -ly.] In a calamitous or wretchedly unfortunate manner or state.

"... these negotiations, which have resulted so calamitously."—Daily News, July 30, 1870.

† ca-lám'-it-òus-nëss, s. [Eng. calamitous; -ness.] The state of being in calamity; misery, wretchedness.

ca-lám'-it-ý, s. [Fr. calamité; Lat. calamitas, the origin of which is uncertain, by some supposed to be calamus = a reed; or, as some connect it with \*calamis = damaged, the imagined source of in calamis = safe, uninjured, sound.]

1. That which causes extreme misfortune, misery, or distress.

"Another ill accident is drought, and the spinning of the corn, which with us is rare, but in hotter countries common; inasmuch as the word calamity was first divided from calamitas, when the corn could not get out of the stalk."—Bacon.

2. The state of extreme misery or distress.

"... for yet my prayer also shall be in their calamities."—Psalm, cxli. 8.

"This infinite calamity shall cease To human life, and household peace confound." Milton: P. L., x. 907.

cal-am-ò-dèn'-dròn, s. [Gr. κάλαμος (kalamos) = a reed, and δένδρον (dendron) = a tree.]

Bot. & Paleont.: A doubtful genus of fossil plants found with Calamites, and by some believed to be identical with it, whilst others maintain them to be different.

cal-am-ò-dý'-tä, s. [From Gr. κάλαμος (kalamos) = a reed, and δύτης (dýtēs) = a diver, from δύω (dýō) = to sink, to get into.]

Ornith.: A genus of insectorial birds, belonging to the sub-family Sylvine, or True Warblers. Calamoglyta arundinacea is the Reed-warbler, which supports its nest by the help of three or four reed stems.

cal-a-mò-ph-íl-üs, s. [Gr. κάλαμος (kalamos) = a reed; φίλέω (phíleō) = to love.]

Ornith.: A synonym of Panurus (q. v.). The single species, C. biarmicus, is the Bearded Tit.

cal-ám'-pél-is, s. [Gr. καλός (kalos) = beautiful; ἀμπέλις (ampelis) = a vine.]

Bot.: A genus of plants, natives of China, belonging to the order Bignoniaceae. [ECCRE-MOCARPUA.]

cal-a-mis, s. [Lat. calamus; Gr. κάλαμος (kalamos) = a reed or cane.]

1. Scripture: A sort of reed or sweet-scented wood, mentioned in Scripture with the other ingredients of the sacred perfumes. It is a knotty root, reddish without and white within, which puts forth long and narrow leaves, and is brought from the Indies. The prophets speak of it as a foreign commodity of great value. These sweet reeds have no smell when they are green, but when they are dry only. Their form differs not from other reeds, and their smell is perceived upon entering the marshes.

"Take thou also into thee principal spices of pure myrrh, of sweet cinnamon, and of sweet calamus."—Ecclesiast., xxi. 20.

2. Music: A reed-flute. Probably a simple rustic instrument like our oaten-pipe. But some suppose it to have been similar in construction to the syrinx, or pan-pipes, and to have been synonymous with arundo. From calamus is derived the post-classical calamaulis, a flute made of reed, whence calamaulis (καλαμαύλις and καλαμαυλίτης) a player on reed-pipes; hence too, chalameau, schalmey, shawm, the precursor of the modern clarinet, one of the registers of which is still said to be of chalameau tone. (Stalner & Barrett.)

3. Botany:

(1) A fistular stem without any articulation.

(2) A genus of palm trees. Upwards of 80 species are known, nearly all from Southern Asia. Calamus Rotang, C. rudentum, C. verus, C. riminalis, furnish the rattans or oses used for the bottoms of chairs and couches, and C. Scipionum the Malacca canes employed in walking.

calamus aromaticus, s.

1. Popul. Bot.: A plant, Diotis maritima. It grows in the Isle of Anglesey.

2. Acorus calamus: Common sweet-flag.

calamus-scriptorius, s. [Lat. scriptorius = pertaining to writing or a writer; scribo = to write.]

Anat.: A canal at the bottom of the fourth ventricle of the brain, so called from its resemblance to the calamus scriptorius, or writing-pen of the ancients.

† ca-lan'-dò, pr. par. [Ital. calando, pr. par. of calare = to decrease, lower.]

Music: Gradually diminishing in loudness and rapidity; becoming softer and slower.

ca-lá'n-dra, s. [Ital. calandra; Fr. calandré; Sp. calandria; Low Lat. calandra; Gr. καλάρδρα (kalandra) = a kind of lark.]

1. Ornith.: A species of lark, Melanocorypha calandra, with a thick bill, the upper part of the body of a reddish brown spotted with black. It is larger than the skylark.

2. Entom.: A genus of coleopterous insects of the family Rhynchophora, one species of which, C. granaria, the Corn-weevil, in its larva state, is very destructive to corn. Another species, C. oryzae, attacks rice.

ca-lá'n-dre, ca-lá'n-dër, s. [CALANDRIA.]

ca-lán-drin'-ya, s. [Named in honour of J. C. Calandrini.]

Bot.: A genus of South American plants, belonging to the order Portulacæe. They are chiefly natives of California and South America.

ca-lá'n-dròne, s. [Ital. calandra = a wood-lark.]

Music: A small reed instrument of the shawm or clarinet character, with two holes,

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hère, camêl, hër, thère; pine, pít, síre, sír, marine; gò, pôb, or, wòre, wòlf, wòrk, whò, sòn; müte, oùb, cùre, quite, cür, rûle, füll; trý, Sýrian. æ, œ = ê. ey = ä. qu = kw.

much used by the Italian peasantry. (*Stainer & Barrett.*)

\* **ca-lán-gây, s.** [Etym. unknown; probably a native name.] A species of white parrot from the Philippine Islands.

\* **cal-ango, \* cal-an-gý, v.** [CHALLENGE.]

**cal-án-thê, s.** [Gr. *kalós* (*kalos*) = beautiful; *ánthos* (*anthos*) = a flower.]

*Bot.*: A genus of herbaceous orchids the type of the order Calanthideae. They are natives of the East Indies and Madagascar; a few are American. About thirty species are known. The flowers are white, lilac, purple, or copper-colored.

**ca-lán-thí-d'ê-ø, s. pl.** [*Calanthe*; and fem. pl. suff. *-ideæ*.]

*Bot.*: A family of orchideous plants.

**ca-lá-p-pá, s.** [Etymology doubtful.]

*Zool.*: A Fabrician genus of decapod Crustaceans. Tribe, Brachyura. *C. granulata* and *C. depressa* are known as box-crabs.

**cá-lá'sh, \* cá-lê'che, s.** [Fr. *calèche*; Ger. *Kalesche*, from Russ. *koliaska* = a calash carriage.]

1. A light pleasure or travelling carriage,

CALASH.

with low wheels, having a top or hood removable at pleasure.

"Daniel, a sprightly swain, that used to slash  
The vigorous steeds that drew his lord's calash."  
*King.*

"The ancients used calashes, the figures of several of them being to be seen on ancient monuments. They are very simple, light, and drove by the traveller himself.—*Arabian Nights* on Coins.

2. The hood of a carriage.

\* 3. A hood for a lady's head, made of silk, supported with hoops of cane or whalebone, and projecting considerably over the face. (*Latham.*)

"... huddled her calash over her head."—*Sala's The Ship-Chandler.*

**calash-top, s.**

*Vehicles*: A folding leather top, with bows and joints; sometimes called a half-head.

**ca-la'-ta, s.** [Ital.] An Italian dance in two-fourths time, of a sprightly character. (*Stainer & Barrett.*)

**ca-lá-thê-a, s.** [Gr. *kalathos* (*kalathos*) = a basket, from their being woven in baskets (*Craig*), or from the form of the stigma (*Louison*).]

*Bot.*: A genus of plants belonging to the order Marantaceæ, the Canne of Jussieu. The species are natives of tropical America, and several are in cultivation for the sake of their handsome foliage.

**ca-lá-th-i-an, a.** [Lat. *calathiana* = the blue violet.] A term used only in the subjoined compound.

**calathian-violet, s.**

*Bot.*: A plant so called (*Gentiana pneumonanthe*), native, though rare.

"It is called *Viola autumnalis*, or autumnal violet, and seemeth to be the same that *Valerius Cordus* calleth *Pneumonanthe*, which he says is named in the German tongue *Lungen Blumen*, or lung-floure; in English, *Autumn Belliflora*, *Calathian Violet*, and of some *Harvest-bell*."—*Gerardus: Herball*, p. 458, ed. 1632.

**cál-a-thí-d'ý-úm, ca-lá-thí-úm, s.** [Gr. *kalathos* (*kalathos*) = a basket.]

*Bot.*: A name given by some continental botanists to an umbel, in which all the flowers are sessile. (*Craig*.)

**ca-lá-th'ý-form, a.** [Lat. *calathus*; Gr. *kalathos* (*kalathos*) = a basket.]

*Bot.*: Having the form of a basket; basket-shaped, cup-shaped.

**cál-a-thô-dêa, s.** [Gr. *kalathos* (*kalathos*) = a basket; *êidos* (*eidos*) = appearance, likeness.]

*Bot.*: A genus of Ranunculaceæ, comprising a single species, *Calathodes palmata*, from Sikkim. It is a perennial herb, with large terminal and solitary flowers; petals none.

**cál-a-thús, s.** [Lat. *calathus*; Gr. *kalathos* (*kalathos*) = a basket.]

\* 1. A kind of hand-basket, made of light wood or rushes. Used by women sometimes to gather flowers, but chiefly, after the example of Minerva, to put their work in. It was narrow at the bottom and widening upwards.

2. *Entom.*: A genus of coleopterous insects of the tribe Carabida. Seven species are British.

**ca-lá-ý-ër-ite, s.** [From *Calaveras*, where it is found.]

*Min.*: A new tellurid of gold, from the Stanislaus mine, Calaveras Co., California. It occurs massive without crystalline structure; colour, bronze yellow; streak, yellowish gray; brittle. Compos.: Tellurium 55-53, gold 44-47.

**cál-ca-dís, a.** [Arab.]

*Med.*: A name given by the Arabs to white vitriol or to some white vitriolic mineral.

**cál-caíre, s.** [Fr., as *a* = calcareous, limy; as *s* = a calcareous rock.]

*Geol.*: A word used in this country only in the two subjoined terms.

**calcaire grossier, s.** [Fr. *grossier* = thick, coarse.]

*Geol.*: A rock or stratum consisting of a coarse limestone often passing into sand. It occurs in the Paris basin, and is used as a building stone. It is of Middle Eocene age. It abounds in shells, especially species of Cerithium. In other parts there is Millolite Limestone, consisting of millions of microscopic foraminifera. (*Lyell*.)

**calcaire siliceux, s.** [Fr. *siliceux* = siliceous, flinty.]

*Geol.*: A compact siliceous limestone associated with the Calcaire Grossier, and coeval with it.

**cál-cán'-ê-al, a.** [From Mod. Lat. *calcanemum* (q. v.), and Eng. suffix *-al*.] Pertaining to the calcaneum or bone of the heel.

**cál-cán'-ê-úm, a.** [From Lat. *calx* (genit. *calcis*).]

*Anat.*: The bone of the tarsus which forms the prominence of the heel or the hock. (*Huxley*.)

**cál-car (1), s.** [Lat. *calcaria* = a lime-kiln; *calcarium* = pertaining to lime; *calx* (genit. *calcis*) = lime.]

1. *Glass-making*: A name given to a small furnace in which the first calcination is made of sand and potash, for the formation of a frit, from which glass is made. [FRITTING-FURNACE.] (*Ure*.)

2. *Metal.*: An annealing arch or oven. (*Knight*.)

**cál-car (2), s.** [Lat. *calcar* = a spur; from *calx* (gen. *calcis*) = the heel.]

*Bot.*: A spur, a projecting hollow or solid process, from the base of an organ, as in the flowers of Larkspur and Snapdragon; such flowers are called calcarate, or spurred. (Used also in a similar sense in anatomy.)

**cál-car-âte, a.** [*Calcar* (2); *-ate*.]

*Bot.*: Spurred. For definition see CALCAR (2), s.]

"By the irregular development of one or more sepals the spurred (*calcarate*) calyx of Larkspur and of Indian Cross is produced."—*Ba/four: Botany*, p. 202.

**cál-car'-ê-a, s. pl.** [Lat. *calcaria*, nom. pl. of *a. calcarium* = pertaining to lime.]

*Zool.*: The same as CALCISPONLÆ (q. v.).

**cál-car'-ê-ô, only in compos.** [Eng. *calcareous* (q. v.).]

**calcareo-argillaceous, a.**

*Min.*: Consisting of or containing calcareous and argillaceous earths.

**calcareo-barite, s.**

*Min.*: A white barite from Strontian, in

Argyleshire, containing, probably as mixture, 6-6 per cent. of lime and some silica and alumina.

**calcareo-bituminous, a.**

*Min.*: Consisting of or containing calcareous and bituminous earths.

**calcareo-siliceous, a.**

*Min.*: Consisting of or containing calcareous and siliceous earths.

**calcareo-sulphurous, a.**

*Min.*: Consisting of or containing calcareous and sulphurous earths.

**cál-car'-ê-ous, a.** [Lat. *calcarium* = pertaining to lime; *calx* (genit. *calcis*) = lime.]

1. *Min.*: Consisting of or containing carbonate of lime; of the nature of limestone.

2. *Geol.*: Calcareous rocks are generally of animal origin. They consist of fragments of shells, corals, encrinurites, or of globigerina, and other foraminifera. Even when so wholly crystalline that no traces of old organisms can be detected, there is reason to believe that these previously existed and have been destroyed by metamorphic action.

**calcareous barytes, s.**

*Min.*: A variety of barytes, with an abnormal quantity of carbonate of lime in its composition.

**calcareous earth, s.** [In Fr. *terre calcaire*; Ger. *kalkerde*.] A term commonly applied to lime in any form, but properly to pure lime. It is also frequently applied to marl, and to earths containing a considerable proportion of lime.

**calcareous marl, s.**

*Min.*: A soft, earthy deposit, often hardly at all consolidated with or without distinct fragments of shells; it generally contains much clay, and graduates into a calcareous clay. (*Dana*.)

**calcareous spar, s.**

*Min.*: Calcite, crystallized native carbonate of lime, of which there are many varieties. The usual composition is carbonic acid 44.0, lime 56.0, but it often contains impurities, upon which depend the colours assumed by the crystal. Carbonates of lime are widely distributed in nature, as marbles, chalk, &c. [ICELAND-SPAR, MARBLE.]

**calcareous sponges, s. pl.** An order of sponges—the Calcispongiae (q. v.).

**calcareous tufa, s.**

*Min.*: A term applied to varieties of carbonates of lime, formed by evaporation of water containing that mineral in solution, occurring in fissures and caves in limestone rocks, and near springs, the water of which is impregnated with lime.

**cál-car'-ê-ous-nêss, s.** [Eng. *calcareous*; *-ness*.] The quality of being calcareous, or partaking of the nature of limestone.

**cál-car-ý-ër-ous, a.** [Lat. *calcaria* = a lime-kiln; *fero* = to bear.] Producing lime, calciferous.

**cál-cá-r'ý-form, a.** [Lat. *calcar* = spur; *forma* = form, appearance.]

*Bot.*: Shaped like a calcar, or spur; spur-shaped.

**cál-car-ý-na, s.** [Lat. *calcar* = a spur; neut. pl. adj. suff. *-ina*.] One of the Retaline Foraminifera. It is coated with exogenous shell growth, as granules, spines, &c. Shell thick. Common in several tertiary strata, and living abundantly in the Mediterranean and other warm seas. (*Griffith & Henfrey*.)

**cál-ca-vál'-la, s.** [Port.] A kind of superior sweet wine from Portugal.

\* **cál-qê-á'-têd, a.** [Lat. *calceatus*, ps. par. of *calceo* = to shoe; *calceus* = a shoe.] Furnished with shoes, shod.

**calçêd, a.** [Lat. *calceatus* = shod.]

1. *Gen.*: Wearing shoes or boots, not sandals.  
2. *Spec.*: Pertaining or belonging to that branch of the Carmelite Order, which did not accept the reform of St. Teresa. [DISCALCED.]

"Subject to the Father-General of the *calced* Carmelites."—*Mrs Lockhart: Life of St. Teresa* (Note C).

\* **cál-qê-dôn, s.** [CALCEDONY.] A fowl vein like calcedony in some precious stones. (*Ash*.)

**boil, boy; pôut, jôwl; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, a; expect, çenophon, exist, -ing, -cian, -tian = çhan. -tion, -sion = çhün; -çion, -çion = çhün. -cions, -cions, -sious = çhün. -ble, -dre, &c. = çel, çêr.**

**cál-çê-dôn'-íc, cáł-çê-dô'-ní-ân, a.** [Lat. *calcedonius* = a calcedony.] Pertaining to, or of the nature of, calcedony.

\* **cál-çê-dôn'-ý, a.** [CHALCEDONY.]

**cál-çê-í-form, a.** [Lat. *calceus* = a shoe; *forma* = form, shape.]

*Bot.*: The same as CALCEOLATE (q.v.).

**cál-çê-ô-la, s.** [Lat. *calceolus* = a little shoe or slipper; *calceus* = a shoe.]

*Zool.*: A genus of brachiopod mollusca, of the family Orthida, the bivalve shell of which is somewhat slipper-shaped. It is fossil only, being found in the Devonian rocks.

**cál-çê-ô-lár'-í-a, s.** [Lat. *calceolarius* = a shoemaker, from *calceolus* = a little shoe, a slipper; *calceus* = a shoe.]

1. *Bot. & Hort.*: A well-known and beautiful genus of plants—order Scrophulariaceae. The resemblance to a shoe is in the bilabiate corolla of the best-known species, the elongated lower lip of which is inflated and turned down. The stamens are only two. The species, which are numerous, come from South America, chiefly from the western slope or sides of the Andes. The greater number have yellow flowers, others are purple, whilst in a few the two colours are intermingled. The roots of *Calceolaria arachnoida* are collected in Chili, where they are called *rebus*, and are used for dyeing woollen cloth crimson. Various calceolarias are cultivated in this country.

**cál-çê-ô-láte, a.** [Lat. *calceolus* = a little shoe, a slipper, and Eng. suff. -ate.]

*Bot.*: Having the form of a shoe or slipper. Examples, the petals of the orchid *Cypripedium* and the Calceolaria, or Slipper-plant.

**cál-çêg, cáłx-êg, s. pl.** [CALX.]

**cál-çíc, a.** [From Lat. *calx* (genit. *calcis*) = lime, and Eng. suffix -ic.] Pertaining to or composed in whole or in part of lime, as *calcia carbonate*, *calcia oxide*.

**cál-çíf-êr-ôus, a.** [Lat. *calx* (genit. *calcis*) = lime, chalk; *fero* = to bear.]

*Min.*: Containing or producing calcite or carbonate of lime.

**cál-çíf-íc, a.** [Eng. *calcif*(y); -ic.] Calciferous, calcic. (*Huxley: Physiol.*, ch. 12.)

**cál-çíf-í-cá-tion, s.** [Lat. *calx* (genit. *calcis*) = lime; *facio* = to make.] The process of being converted into a stony substance containing lime.

"... and it seems probable that the solid mass of fully formed bone is formed by the calcification of this tissue."—*Carpenter: Principles of Physiology*, p. 203.

**cál-çíf-íed, pa. par. of a.** [CALCIFY.]

"Calcified teeth are peculiar to the vertebrates, and may be defined as bodies primarily, if not permanently, distinct from the skeleton, consisting of a cellular and tubular basis of animal matter containing earthy particles, a fluid, and a vascular pulp."—*Owen: Anat. of Vertebrates*.

**cál-çíf-form, a.** [Lat. *calx* (genit. *calcis*) = lime; *forma* = form, appearance.] In the form of chalk or lime.

**cál-çíf-fý, v. t.** [Lat. *calx* (genit. *calcis*) = lime; *facio* (pass. *fito*) = to make.] To convert into lime.

"Were this sheath actually dentinal in tissue and united to the jaw-bone, the resemblance to the Lepidosteus would be closer; but it is never calcified, and is shed during the progress of the metamorphosis."—*Owen: Anat. of Vertebrates*.

**cál-çí-mán'-gite, s.** [From Lat. *calcium*; Eng. *mang(anes)*; and suff. -ite (*Min.*) (q.v.).]

*Min.*: The same as SPARTHITE (q.v.).

\* **cál-çí-mine, s.** [Lat. *calx* (genit. *calcis*) = lime.] A superior kind of white or coloured wash for walls. (*Webster*.)

\* **cál-çí-mine, v. t.** [CALCIMINE, s.] To wash over with calcimine; as, "to calcimine walls." (*Hart*.)

**cál-çí-na-ble, a.** [Eng. *calcine*(e); -able.] Capable of being calcined; that may be calcined.

"Not fermenting with acids, and imperfectly calcifiable in a great fire."—*Bull: Fossils of Granite*.

\* **cál-çín-áte, v. t.** [Low Lat. *calcinatus*, pa. par. of *calcino* = to calcine.] To calcine.

"... first, it indurates, then maketh fragile, and lastly it doth calcinate."—*Bacon: Nat. Hist.*

**cál-çín-á-tion, \* cal-ci-na-ci-oun, s.** [Low Lat. *calcinatus*, pa. par. of *calcino* = to calcine.]

1. The operation of expelling from a substance by heat, either water or volatile water combined with it. Thus, the process of burning lime, to expel the carbonic acid, is one of calcination. The result of exposing the carbonate of magnesia to heat, and the removal of its carbonic acid, is the production of calcined magnesia. The term was, by the earlier chemists, applied only when the substance exposed to heat was reduced to a *calx*, or to a friable powder, this being frequently the oxide of a metal. It is now, however, used when any body is subjected even to a process of heating. (*Ure*.) Marble, limestone, and chalk, which are all carbonates of lime, are deprived of their carbonic acid and water by calcination. It also deprives copper and other ores of their sulphur, the sulphurets being oxidized and sulphuric acid being disengaged and volatilised. (*Knight*.)

"Ours fourneys eke of calcinacoun."—*Chaucer: C. T.*, 12,782.

"Aduktion causeth blacknes and calcination whiteness."—*Bacon: Works* (ed. 1755), vol. 1, ch. xi.

2. The operation of reducing a metal to an oxide; oxidation.

\* 3. The result of the process of calcining.

**calcination-pot, s.** A sort of crucible used for preparing animal charcoal.

**cál-çín-na-tór'-ý, s.** [Low Lat. *calcinatorium*.] A vessel or crucible used in calcination.

**cál-çíne, v. t. & f.** [Fr. *calciner*; Low Lat. *calcinat*; Lat. *calx* (genit. *calcis*) = chalk.]

**A. Transitive:**

**I. Literally:**

1. To reduce to a powder.

"Moses, with an actual fire calcined, or burnt the golden calf unto powder."—*Sir T. Browne: Religio Medici*.

"The turf being, as it were, calcined by the scorching hoofs of their diabolical partners."—*Scott: Black Dwarf*, ch. ii.

2. To reduce a metal to an oxide; to oxidize.

\* 3. To utterly consume.

"This earth at last shall be calcined."—*H. More: Enticement Triumph*.

\* **II. Figuratively:** To consume.

"You by a chaste chinkie Art, Calcine trails love to pietie."—*Habington: Cantara*.

**B. Intransitive:** To be reduced to a powder; to become calcined.

"... in a very strong heat, calcining without fusion."—*Newton: Opticks*.

**cál-çíned, pa. par. & a.** [CALCINE, v.]

1. Reduced to a powder.

"Antimony calcined or reduced to ashes."—*Browne: Vulgar Errors*.

2. Oxidized.

"When a decoction of meat is effectually screened from ordinary air, and supplied solely with calcined air, putrefaction never sets in."—*Fyndall: Frag. of Science*, 3rd. ed., xl. 301.

**cál-çí-nêr, s.** [CALCINE.]

1. *Gen.*: One who, or that which, calcines.

2. *Spec.*: A calcining or roasting furnace.

**calcining-furnace, s.** A large reverberatory furnace, having a fire at one end, two chimneys at opposite corners, four doors at which the operation is observed, the rabbles introduced, and the material withdrawn, and hoppers above by which the ore is introduced. (*Knight*.)

**cál-çí-ní-tre, s.** [Lat. *calx* (genit. *calcis*) = lime, and *nitre* (q.v.).]

*Min.*: The same as NITROCALCITE (q.v.).

\* **cál-çín-ize, v. t.** [CALCINE.] To calcine. (*Sylvestre: Du Bartas*.)

**cál-çí-ô-çê-lô's-tite, s.** [Lat. *calculus* = pertaining to lime; *calx* (genit. *calcis*) = lime;

*celestis, celestis* = heavenly, sky-blue; *calcum* = heaven.]

*Min.*: A variety of Celestite (q.v.), containing a large proportion of lime.

**cál-çí-ô-fêr'-rite, s.** [Lat. *calceus* = pertaining to lime; *calx* (gen. *calcis*) = lime; *ferro* (um) = iron; suff. -ite (*Min.*) (q.v.).]

*Min.*: A sulphur, yellow or yellow mineral, from Battenberg in Bavaria. Sp. gr., 2.53–2.59. Compos.: Phosphoric acid, 34.01; sesquioxide of iron, 24.34; alumina, 2.90; magnesia, 2.65; lime, 14.81; hydrogen, 20.56.

**cál-çí-spôn'-gí-ê, s. pl.** [From Lat. *calx* (genit. *calcis*) = lime, and *spongia* = a sponge.] [SPONGE.]

*Zool.*: Calcareous sponges. One of the leading divisions of Spongia (sponges), the others being Keratoda (horny sponges), Silicispongiae (siliceous sponges), and Myxospongiae (sponges with neither a horny nor a siliceous skeleton). The living species of calcareous sponges have a skeleton composed of spicula of lime, and are generally free and independent of each other.

**cál-çí-spôn'-gí-an, s.** [CALCISPONGIÆ.] Any individual of the calcispongiae; a chalk sponge.

**cál-çíte, s.** [Lat. *calx* (genit. *calcis*) = chalk, and suff. -ite (q.v.).] Crystallized carbonate of lime. [ICELAND-SPAR.]

**cál-çí-trá'-pa, s.** [Ital. *calceotrippa* = the star-thistle.] [CALTROP.]

*Bot.*: A name for the Star-thistle, *Centaurea calcitrapa*.

\* **cál-çí-tráte, v. t. & f.** [O. Fr. *calcitrer*; Lat. *calcitro* = to kick, from *calx* (genit. *calcis*) = a heel.] To kick, to spurn. (*Cotgrave & Cockeram*.)

\* **cál-çí-trá-tion, s.** [From Eng. *calcitrare* (q.v.) and suff. -ion.] The act of kicking.

"The birth of the child is caused partly by its calcitration, breaking the membranes in which it lieth."—*Ross: Arcana Microcosmi*, 1632, p. 52.

**cál-çí-úm, s.** [From Lat. *calx* (genit. *calcis*) = lime.]

*Chem.*: A dyad metallic element. Symbol, Ca; atomic weight, 40; sp. gr., 1.57. Obtained by Davy by decomposing the chloride by electricity; also by heating the iodide with sodium in a closed vessel. Calcium is a brass-yellow, ductile, malleable metal, which oxidizes in damp air; it decomposes water, and dissolves easily in dilute acids. Heated in the air, it melts at red heat, and burns with a bright orange light. Calcium occurs in nature chiefly as a carbonate, silicate, and sulphate. Calcium oxide, CaO, called also Lime, is obtained by heating the carbonate of calcium to redness. It is a white, earthy, infusible powder, phosphorescent at high temperatures; it is strongly alkaline, and readily absorbs carbonic anhydride. It unites vigorously with water, throwing out great heat, and forms a hydrate, CaOH<sub>2</sub>O, which is slightly soluble in cold water; it is used in medicine as lime-water. Impure lime mixed with sand forms mortar.

*Calcium sulphate*, CaSO<sub>4</sub>. Found as hydrate as gypsum, CaSO<sub>4</sub>2H<sub>2</sub>O, and selenite and selenite. The water is given off by heating it, and a white powder is left, which dissolves in 500 parts of cold water. Mixed with water, it sets in a hard substance; it is used under the name of plaster of Paris for making casts of medals and statues, &c.

*Calcium carbonate*, CaCO<sub>3</sub>, forms the chief constituent of limestone, marble, chalk, &c. It occurs crystallized as calc-spar and aragonite. Calcium carbonate is insoluble in water, but is dissolved by water containing carbonic acid gas; it is deposited from this solution by boiling, hence boiler deposits.

*Calcium phosphates* occur in the bones of animals and are native in Apatite. [PHOSPHATES.]

*Calcium chloride*, CaCl<sub>2</sub>, is obtained by dissolving the carbonate in hydrochloric acid. It crystallizes in white prismatic crystals; it is very deliquescent. Fused calcium chloride is used to dry gases, &c. It absorbs ammonia gas.

*Calcium fluoride*, CaF<sub>2</sub>, occurs as fluor spar. *Calcium sulphides and phosphides* have been obtained. Salts of calcium are not precipitated

or H<sub>2</sub>S, either in an acid or alkaline solution. Alkaline carbonates and ammonia carbonates give a white precipitate insoluble in excess; oxalate of ammonia gives a white precipitate from a neutral solution; the precipitate is not soluble in acetic acid. A solution of sulphate of calcium gives no precipitate. The chloride gives an orange-red flame with alcohol. The spectrum of calcium gives several characteristic lines, especially an orange-red and a green line. Chloride of lime, or bleaching powder, is a mixture of calcium chloride and calcium hypochlorite.

Calcium Arsenate (Min.) is = Pharmocolite; Calcium Borosilicate = Detholite; Calcium Carbonate = (1) Calcite, (2) Aragonite; Calcium Columbate = (1) Microlite, (2) Azorite; Calcium Phosphate = Apatite; Calcium Silicate = (1) Wollastonite, (2) Okenite; Calcium Sulphate = Selenite; and Calcium Tungstate = Scheelite, all which see.

calcium-light, s. The Drummond or oxyhydrogen light, in which streams of oxygen and hydrogen are directed and inflamed upon a ball of lime whose incandescence gives a very vivid and brilliant light. [DRUMMOND-LIGHT.] (Knight.)

calc-iv-or-ous, a. [From Lat. calx (genit. calcis)=limestone, lime, and voro = to devour.] Bot.: Eating into or corroding a limestone rock. (R. Brown, 1874.)

calc-oo-graph-ic-al, a. [From Eng. calcography; -ical.] Pertaining to calcography (q.v.).

calc-oo-graph-y, s. [Gr. καλός (kallos) = brass, and γραφή (graphē) = a writing, drawing, from γράφω (graphō) = to write.] The art of engraving on brass.

"The histories of refining; of making copperas; of making alum; of calcography; of enamelling;"—Sprat: Hist. of R. Soc., p. 253

calc-our-an-ite, s. [From Ger. calcouranit, kalk-uranit; kalk = chalk, and uranit = uranite (q.v.).] Min.: The same as AUTONITE (q.v.).

calc-sin-tros, s. [Ger. kalk = chalk, and sintler = dross.] The incrustations of carbonate of lime upon the ground; or the pendulous conical pieces, called stalactites, attached to the roofs of caverns, &c. (Ure.)

calc-spar, s. [Ger. kalk = chalk, and Eng. spar (q.v.).] Crystallised carbonate of lime or calcite. [CALCAREOUS-SPAR.]

calc-tuff, s. [Ger. kalk = chalk, and tuff = tufa (q.v.).] A formation of carbonate of lime from the deposits of springs, &c. [CALCAREOUS-TUFA.]

calc-u-la-bil-ity, s. [Eng. calcul(ate); ability.] Possibility or capability of being calculated, estimated, or provided for.

calc-u-la-ble, a. [Fr. calculable.] Capable of being calculated.

"The man, become mature, would at a calculable day diehard."—Browning: Red Coat. N. Cap. Country. "I have made every calculable provision."—W. Taylor: Monthly Mag.

calc-u-lar-y, a. & s. [Lat. calcularius, from calculus = a little stone; calx = (1) lime, chalk; (2) a pebble.]

A. As adj.: Pertaining to or caused by the disease of stone in the bladder.

"Motion was tedious and onerous to him, by reason of his calculary infirmity and corpulency."—Dr. Goussier: Life of Ep. Brownrigg, 1669, p. 218. B. As subst.: A mass of small stony lumps found in the pear and other fruits.

calc-u-lāto, v.t. & i. [Lat. calculatus, pa. par. of calculo = to reckon by means of pebbles; from calculus = a little stone, a pebble; dimin. of calx = (1) lime, chalk; (2) a stone, pebble. In Fr. calculer; Sp. calcular; Ital. calcolare.]

A. Transitive: I. Literally:

1. To compute, to reckon up in number.

"If, in calculating the numbers of the people, we take in the multitudes that emigrate to the plantations."—Goldsmith: Essay 2.

2. To divine or prognosticate by the situation of the planets at a certain time.

"A cunning man did calculate my birth."—Shakspeare: 2 Hen. VI., iv. 1.

"Who were there then in the world, to observe the births of those first men, and calculate their natiuities."—Bentley.

II. Figuratively: To arrange or adjust for a purpose. (Seldom used except in the pa. par.)

"I calculate my remedy for this one individual kingdom of Ireland."—Swift: Modest Proposal.

B. Intransitive:

1. To make calculations; prognosticate.

"Why all these fires, why all these gliding ghosts, Why old men fool and children calculators?"—Shakspeare: Julius Caesar, I. 2.

2. To form one's opinion on; to reckon or depend on; to expect. (Colloquial, and chiefly American.)

Generally used with the prep. on before the matter on which the opinion is formed.

calc-ū-lā-tōd, pa. par. & a. [CALCULATE, v.]

"Cæsar . . . did set forth an excellent and perfect kalendar, more exactly calculated, than any other that was before."—North: Histories, p. 512.

calc-ū-lā-tīng (1), pr. par., a., & s. [CALCULATE, v.]

A. & B. As pr. par. & particip. adj.: In senses corresponding to those of the verb.

"With his cool, calculating disposition, he easily got the better of his ardent rival."—Godwin: St. Leon.

C. As substantive: The act or process of computing, reckoning, or estimating.

calculating engine, s. The same as CALCULATING MACHINE (q.v.).

"Such are the facts which, by a certain adjustment of the calculating engine, would be presented to the observer."—Babbage: Ninth Bridgewater Treatise, ch. II.

calculating machine, s. A machine for making arithmetical calculations with speed and accuracy. The simplest one is the abacus (q.v.). The best known of such machines is that which Babbage was employed by the British Government to construct. He began the work in 1821, and continued it for about twelve years, till 1833, at an expense of £15,000, after which it was abandoned. The part completed is preserved in the library of King's College. A modification of Babbage's invention is now in use at the Albany Observatory.

calc-ū-lā-tīng (2), a. [Lat. calculus = a stone, pebble.] Turning into, or forming into a calculus or stone in the bladder. (Topseil.)

calc-ū-lā-tīng-ly, adv. [Eng. calculating (1); -ly.] In the manner of one calculating; by way of calculation.

calc-ū-lā-tion, s. [Lat. calculus = a small stone, a pebble, because pebbles were of old used in this country, as they still are among some uncivilised tribes, as aids in counting; Eng. suff. -ation.]

I. Literally:

1. The act of calculating, reckoning, or computing in numbers.

"One Bartholomew Sculler . . . hath by calculation found the very day."—Raleigh: Hist. of World, bk. III., ch. 25.

"And, leaving it to others to foretell! By calculation sage, the ebb and flow."—Wordsworth: Excursion, bk. vi.

2. The result of an arithmetical computation or reckoning.

"If we suppose our present calculation, the Phoenix now in nature will be the sixth from the creation."—Browne: Vulgar Errors.

II. Figuratively:

1. The act or process of estimating the force and result of circumstances.

2. The result of such estimation; the opinion formed of circumstances.

"The fate of the Triennial Bill confounded all the calculations of the best informed politicians of that time."—Macaulay: Hist. Eng., ch. xx.

calc-ū-lā-tive, a. [Formed by analogy of other adjectives from an imaginary Lat. calculativus; from calculus = a pebble, stone.] Pertaining to calculation; involving calculation.

"Persons bred in trade have in general a much better idea, by long habits of calculative dealings."—Burke: On the Popery Laws.

calc-ū-lā-tōr, calc-ē-lā-tour, s. [Fr. calculateur; Lat. calculator = one who reckons; calculus = a pebble, stone.]

I. Ordinary Language (of persons):

1. One who reckons or computes by numbers; a computer.

\* 2. One who prognosticates by astrology.

"Select calculators and astronomers."—Wycliffe: Select Works, p. 465.

3. One who estimates the force or effect of causes; one who calculates results.

"Ambition is no exact calculator. Avarice itself does not calculate strictly when it games."—Burke: On Shortening the Duration of Parliaments.

II. Technically (of things):

1. An arithmometer of a certain type. (See Knight: Pract. Dict. Mechan., i. 143, for a description and figure of it.)

2. A kind of orrery (q.v.) invented by Ferguson.

calc-ū-lā-tōr-ŷ, a. [Lat. calculatōrius = pertaining to calculation; calculus = a pebble, stone.] Pertaining to calculation.

"That other calculatory or figure-casting astrology."—Hall: Cases of Conscience.

calc-ū-lē, s. [Lat. calculus = a pebble used in counting.] Reckoning, computation, calculation.

"The general calcule, which was made in the last perambulation, exceeded eight millions."—Howell: Vocal Forest.

calc-ū-lē, calc-en-len, calc-kyll, calc-kill, calc-cle, v.t. [Fr. calculer; Lat. calculus = to calculate, from calculus = a pebble used in counting.] [CALCULATE.] To calculate, compute.

"Fall subtly he calculated all this."—Chaucer: Frankl. Tale.

calc-ū-lēd, calc-kled, calc-kiled, pa. par. of a. [CALCULE, v.]

"Astronomers al so aren of ere whites end Of that was calculated of the contrary they Lyzabeth."—Piers Ploughman, p. 291.

calc-ū-lē, s. pl. [CALCULUS.]

calc-ū-līng, calc-ku-līng, calc-ku-līng, pr. par., a., & s. [CALCULE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive: The act of calculating; calculation.

"When this kalkas knew by calculyngs."—Chaucer: Troilus, i. 71.

calc-ū-lōse, calc-ū-lōus, a. [Lat. calculosus = full of pebbles or stones; calculus = a pebble, a stone.]

1. Ori. Lang.: Full of stones, stony, gritty. "The felde calculose, eke harde and drie."—Palladius, II. 40.

2. Medicine: (1) Affected with stone in the bladder; suffering from calculus.

"I have found, by opening the kidneys of a calculous person, that the stone is formed earlier than I have supposed."—Sharp.

(2) Of the nature of a calculus.

"The volatile salt of urine will coagulate spirits of wine; and thus, perhaps, the stones or calculous concretions in the kidney or bladder, may be produced."—Browne: Vulgar Errors.

calc-ū-lūs, s. [In Fr. calcul; Sp. calculo; Port. calculago = the mathematical calculus; calculo = a calculus (in Med.); Ital. calcolo, or calculo; all from Lat. calculus = (1) a small stone or pebble, (2) a stone in the bladder, (3, 4, &c.) a stone used for voting or one for reckoning, &c.]

1. Among the old Romans: A stone used for voting. At trials white and black stones were thus employed, the white expressing a vote for acquittal and the black for condemnation.

2. Med.: The medical term for what is popularly known as stone. Calculi vary in size from a pin's head to a pigeon's egg, and even larger, and weigh from a few grains to several ounces. They derive their special name and character as well from the organs of the body in which they are found as from the constituents of which they are composed. Thus, for example, a calculus found in the kidney or ureter is called renal, in the bladder vesical, and so on; but, according to its chemical composition, it would also be called either (1) uric (lithic acid calculus, or (2) oxalic (mulberry) calculus, or (3) phosphatic calculus. Calculi derived from the bile are also found in the gall-bladder, and in the biliary and intestinal ducts, where they receive the name of gall-stones, or biliary calculi. Those found in the salivary glands are called salivary calculi.

3. Math.: Any branch of mathematics which may involve or lead to calculation. In this sweeping sense it embraces the whole science, with the exception of pure geometry. Thus there may be a calculus of functions, a calculus of variations, &c., but the leading divisions of the subject are the Differential and the Integral Calculus.

Calculus of functions: The calculus in which

boil, boy; poult, jowl; oat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -tre, &c. = bpl, tēr.

what is sought is the form of a function, and not its value in any particular case, nor the condition under which it may have a particular value.

*Calculus of variations*: A method in which the laws of dependence, binding together variable quantities, are themselves subject to change.

The *Differential Calculus* is a method of investigating mathematical questions by measuring the ratio of certain indefinitely small quantities called differentials. [DIFFERENTIAL.]

*Imaginary Calculus*: A method of investigating the nature of imaginary quantities required to fulfil apparently impossible conditions. The result proves that all absurdities in geometry may be ultimately resolved into attempts to measure a straight line in a direction different from that of its length.

The *Integral Calculus* reverses the process which obtains in the differential calculus, that is, it reasons out from the ratio of the indefinitely small changes of two or more magnitudes, the magnitudes themselves, or, as it is technically stated, from the differential of an algebraic expression it finds the expression itself. [INTEGRAL.]

\* **cald**, *a. & s.* [COLD.] (*O. Eng. & Scotch.*)

"Thy corse in clot not colder keue."  
*Ear. Eng. All. Poems; Pearl, 320.*

**cald-dër-a**, *s.* [Sp.] A Spanish term for the deep caldron-like cavities which occur on the summits of extinct volcanoes. (*Stormonth.*)

**cald-dër-ite**, *s.* [Apparently from the proper name *Calder*, and suff. *-ite* (*Mm.*) (q.v.)]

*Mm.*: A doubtful mineral from Nepal, said by Dana to be nothing but massive garnet. The *British Museum Catalogue*, however, recognises it as a variety of garnet.

"Rhadamantus, who tries the lighter causes below, leaving to his two brethren the heavy calendars . . ."  
*Lamb: Last Days of Elia.*

3. *Astron. & Chron.*: The Roman calendar is said to have been introduced by Romulus about 753 B.C., and modified by Numa Pompilius about 713 B.C. In 46 B.C., Julius Cæsar, giving effect to the calculations of Sosigenes, an Alexandrian mathematician and astronomer, reformed the calendar, and introduced the Julian style, by which the year was made to consist of 365 days, with 366 every fourth or leap year. He commenced it also with January 1st, the adjustment producing one year of confusion which contained 445 days. Had the solar year consisted of 365 days, 6 hours, the Julian calendar would have been perfect; but its real length is 365 days, 5 hours, 48 minutes, 45.4 seconds. The operation of the odd minutes and seconds continued during the next fifteen centuries, having again deranged the calendar ten days. Pope Gregory XIII. made A. D. 1582 consist of 355 days only, and otherwise adjusted the calendar. Roman Catholic countries at once adopted the reform. Protestant states one after another followed the example, whilst Russia and the Greek Church conserved the old Julian arrangement. When the new style was adopted in England by Act of Parliament in 1752, eleven days required to be struck out, the 3rd of October being called the 14th. From this time the difference began between new and old style. To prevent further derangement the Gregorian arrangements provide that only one in four of the years ending centuries shall be leap years; thus the years 1700 and 1800 were not leap years, nor will 1900 be, but 2000 will.

*B. As adjective*: (See the compounds.)

**calendar-clock**, *s.* A clock which indicates not merely the hour and minute of the day, but also the day of the week and month, and in some cases even the year and the phases of the moon. (*Knights.*)

\* **ca-lix-tin** (2), s. [CALIXTINES.]

**Cal-ix-tines**, s. pl. [From Lat. *calix* = a cup, which the sect or party wished restored to the people in the Lord's Supper.]

*Ch. Hist.*: A Christian sect in Bohemia, the more moderate of the two great sections into which the Hussites were divided in 1420. Unlike the Tabornites—the other and extreme section—they did not seek to subvert the constitution and government of the Church of Rome, but demanded (1) the restoration of the cup to the people in the celebration of the Supper; (2) the preaching of the Gospel in primitive simplicity and purity; (3) the separation of the priests from secular, and their entire devotion to spiritual, concerns; and (4) the prevention or punishment, by lawful authority, of "mortal" sins, *ag.*, alimony, dabachery, &c. The council of Basel, in 1433, to end the disastrous Bohemian war, invited envoys from the Hussites. Procopius Raza—their leader since the death of the famous John Ziska in 1424—and others appeared, but the effort failed. Afterwards the council sent Aeneas Sylvius into Bohemia. He, by conceding the use of the cup to the Calixtines, reconciled them to the Church of Rome. [*Hosert*.]

cal'-lour, a. [CALLER, a.]

cal'-lou's, a. [Fr. *calloux* = thick or hard-skinned; Lat. *callousus*, from *callus*, *callum* = a hard skin; *calleo* = to have a hard or thick skin.]

1. Lit.: Having the skin or outer covering hardened; indurated.

"In progress of time, the ulcers became sinuous and callous, with induration of the glands."—*Hierman*.

2. Fig.: Unfeeling; hardened in feeling.

"Now crawl from cradle to the grave Slave—nay, the bondman of a slave, And callous, save to crime."—*Byron: The Glouor*.

"... doped into the belief that divine grace had touched the most false and callous of human hearts."—*Macaulay: Hist. Eng.*, ch. vi.

cal'-lou's-ly, adv. [Eng. *callous*; -ly.] In a callous manner. (Lit. & fig.)

cal'-lou's-ness, s. [Eng. *callous*; -ness.]

1. Lit.: The state of having the skin or outer covering hardened; induration of the fibres.

"The oftener we use the organs of touching, the more of these scales are formed, and the skin becomes the thicker, and so a callousness grows upon it."—*Cygnus*.

2. Fig.: The state of being hardened in feeling; insensibility.

"... but there were instances when this seeming callousness struck the observer as being inexpressibly shocking."—*Daily Telegraph*, Jan. 28, 1861.

cal'-low, \*cal-n, \*cal-ugh, \*cal-ewe, \*cal-ouwe, a. [A.S. *calu*; Dut. *kaal*; Sw. *kai*; Ger. *kahl*; Sp., Port., & Ital. *calvo*, all = bald, from Lat. *calvus*.]

1. Bald.

"A man of whose hood heeris fisten awal is calu."—*Wycliffe: Levit.*, xiii. 46. (*Purvey*).

2. Unfedged, destitute of feathers.

"The callow throate lispeth."—*Tennyson: Claribel*.

3. Youthful, immature.

cal'-lu'-na, s. [From Gr. *καλλιύνα* (*kallunō*) = to sweep, to clean, from the fact that the twigs are used for brooms.]

Bot.: A genus of plants, order Ericaceæ (Heaths). *Calluna vulgaris*, sometimes called the Ling, is the Common Heath, or Heather, and the most abundant species of the family in Britain. It is the plant whose flowers render the slopes of most Scottish hills pink in autumn, and the one so abundant in Epping Forest. Ornamental varieties are sometimes grown in gardens, in which it forms an excellent edging for flower-plots. Its twigs are also made into brooms. The plant is astringent, and is employed both by fullers and dyers, and the flowers are very attractive to bees.

cal'-lus, s. [Lat. *callus* = a hard or thickened skin.]

1. Med.: Any unnatural hardening of the skin, arising from friction or pressure.

"A callus extending up the forehead."—*Pennant: Zoology*, ii. 494.

2. Anat.: An osseous formation serving to join the extremities of broken bones.

3. Bot.: A leathery or hardened thickening on a limited portion of an organ.

calm, calme (l silent), a. & s. [Fr. *calme*; Prov. *chauve* = a resting-time for flocks; O. Fr. *chauver* = to be at rest; Low Lat. *cauma* = heat of the sun; Or. *καύμα* (*kauma*) = great heat; *καίω* (*kaio*) = to burn; Sp., Port., & Ital. *calma*; Dut. *kalm*. The radical meaning is thus a rest during the heat of the day.]

A. As adjective:

1. Of the elements: Still, quiet, serene; undisturbed by any wind or other cause.

"As the wide world rage  
Of winds maketh the sea salvage,  
And that was calme bringeth into waive."  
—*Gower: Conf. Amant.*, iii. 230.

"The seas waxed calm."  
—*Shakspeare: Com. of Errors*, I. 1.

2. Of human beings: Quiet in manner or temperament; unexcited in gesture or language.

"And, not dispraising whom we praised [therein  
He was so calm as virtue], he began  
His mistress' picture."  
—*Shakspeare: Cymbeline*, v. 5.

"Tamed are the warrior's pride and strength,  
And he and earth are calm at length."  
—*Byron: A Sicelid in Italy*.

3. Of things: Undisturbing, quieting, soothing, quiet in tone or language.

"All is calm in this eternal sleep."  
—*Pope: Epitaph to Abbotard*, 318.

call, boy; pou't, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.

-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tions, -sions, -cions = shüs. -ble, -die, &c. = bəl, dəl.

"... 'mid the calm, oblivious tendencies  
Of Nature, ..."  
—*Wordsworth: Excursion*, bk. 1.

B. As substantive:

I. Ordinary Language:

1. Of the elements: Stillness, quiet.

"And the wind ceased, and there was a great calm."  
—*Mark*, iv. 35.

"A motion from the river won  
Ridged the smooth level, bearing on  
My shallow thro' the star-strewn calm."  
—*Tennyson: Recol. of the Arabian Nights*.

2. Of human beings: Quietness in temperament or actions, serenity.

"Our bloods are now in calm."  
—*Shakspeare: Troil. & Cress.*, iv. 1.

3. Of things generally: Quietness, peacefulness, freedom from disturbance.

"Thy life a long dead calm of fix'd repose."  
—*Pope: Epitaph to Abbotard*, 251.

II. Meteor. & Hydrol.: In the same sense as B. 1. A part of the Atlantic immediately north of the equator, intermediate between the regions swept by the north-east and south-east trade winds, is called the *Region of Calm*. It varies in extent and position, being affected by the annual course of the sun. The calm within the area is not perpetual; it is disturbed for a brief period every day by a passing squall.

¶ Blair thus discriminates between tranquility, peace, and calm: *Tranquillity* respects a situation free from trouble, considered in itself; *peace*, the same situation with respect to any causes that might interrupt it; *calm* with regard to a disturbed situation going before or following it. A good man enjoys tranquility in himself, peace with others, and calm after the storm. (*Blair: Lect. on Rhetoric and Belles Lettres* (1817), vol. 1, p. 231.)

calm-browed, a. With a brow undisturbed by care or excitement.

Entom.: A genus of coleopterous insects, belonging to the family Staphylinidae. In Sharp's catalogue, five species are enumerated as British.

cal'-ô-drä'-oön, s. [From Gr. *καλός* (*kalos*) = beautiful, and *δράκων* (*drakōn*) = dragon.]

Bot.: A genus of Liliaceæ. *Calodracon Jacquinii*, sometimes called *Dracæna ferrea* and *terminalis*, is often seen in British hot-houses, where it is prized for its bright red leaves. Other species are cultivated for their variegated leaves.

\*cal'-ög'-raph-ÿ, s. [CALIGRAPHY.]

cal'-ô-mël, s. [In Fr. *calomel*; Ger. *kalomel*; said to be from Gr. *καλός* (*kalos*) = good, beautiful, and *μέλας* (*melas*) = black; from the qualities and colour of the Aethiops mineral, or black sulphuret of mercury, to which the name was originally applied.]

1. Pharm.: Mercurous chloride, Hg<sub>2</sub>Cl<sub>2</sub>. For its preparation see *mercury*. It is insoluble in water, and blacked by ammonia. It is used in liver complaints. It should be tested to see if it contains any mercuric chloride (corrosive sublimate), which is soluble in boiling water.

"He repeated lenient purgatives with *calomel*, once in three or four days."—*Wiseman: Surgery*.

2. Min.: A translucent or subtranslucent mineral, consisting of chlorine, 15.1, and mercury, 84.9 = 100. The hardness is 1.2, the sp. gr. 6.43, the lustre adamantine, the colour white grey or brown. It occurs in Germany, Austria, and Spain. (*Dana*.)

ca'-lô'-se, s. [Sumatran.]

Bot. & Comm.: The name given to Sumatran to a nettle, *Urtica tenacissima*, the fibres of which constitute a very stiff cordage. (*Roxburgh*.)

cal'-ô-phÿl'-lüm, s. [From Gr. *καλός* (*kalos*) = beautiful, and *phyllum*, s. Latinized form of

Gr. φύλλον (*phullon*) = a leaf. Named from the shining leaves, marked by fine transverse veins.]

Bot.: A genus of plants belonging to the order Clusiaceæ (Guttifera). Sepals, 2-4; petals, 4; stamina, many; style, 1; stigma, peltate-lobed. Flowers in racemes, sometimes unisexual. About twenty-five species are known, mostly from the eastern hemisphere, though a few are from the western world. *Calophyllum Calaba* is the Calabaria tree of the West Indies and of Brazil. [CALABEA.] *C. inophyllum*, from the East Indian and Malayan regions, is a large tree sometimes 100 feet high. Its timber is used for masts and spars. A greenish-coloured resin from the trunk constitutes a kind of tscanshac. Its seeds furnish a dark-green, thick, sweet-scented oil, used in India to burn and in medicine. *C. tomentosum*, of Ceylon, also furnishes timber and oil. *C. Taosamahoa*, on the Isle of Bourbon and Madagascar, and *C. brasiliense*, in Brazil, also yield resin. The fruits of *C. spurtium*, of Malabar, and *C. edule* and *Madruno*, of South America, are eaten.

**cāl-or-ēs-çençe**, s. [Formed from Lat. *calor* = heat, on analogy of *calorescence*, &c.] The change of invisible into visible heat.

"... for the new phenomena here described I have proposed the term *calorescence*."—Tyndall: *Prog. of Science*, 3rd ed., viii. 3, p. 192.

**cāl-or-īc**, s. & a. [In Fr. *calorique*; Lat. *calor* = warmth, heat, glow; from *calere* = to be warm or hot.]

A. As subst.: The principle of the heat, the natural agency by which heat is produced.

B. As adj.: Pertaining to the principle of heat or the natural agency which produces it.

**caloric engine**, s. The name given by Ericsson to his hot-air engine.

**caloric paradox**, s. The assumption by drops of water, when thrown on a hot metallic surface, of the spheroidal form, each liquid spheroid being surrounded by an atmosphere of its own vapour, which prevents it from being properly in contact with the metal. It is called also *Leidenfrost's phenomenon*.

† **cāl-or-īp-ī-tŷ**, s. [Lat. *calor* (genit. *caloris*) = heat; Eng. suff. -ity.] A faculty in living beings of developing heat to resist external cold. (*Dana*.)

**cāl-or-ī-duct**, s. [Lat. *calor* (genit. *caloris*) = heat; *ductus* = a leading, a duct; *duco* = to lead.] A pipe or passage for conducting heat.

**cāl-ō-rie**, **cāl-ō-ry**, s. A practical unit of heat, corresponding to the quantity of heat required to raise one degree centigrade the temperature of a given volume of water (one kilogram, in the case of the great or kilogram calorie, and a gram, in that of the small or gram calorie).

**cāl-or-īf-ic**, \* **cāl-or-īf-ick**, a. & s. [In Fr. *calorifique*; from Lat. *calorificus*; from *calor* (genit. *caloris*) = heat, *facio* (pass. *facto*) = to make, cause.]

A. As adj.: Having the property or quality of producing heat; heating.

"A calorific principle is either excited within the heated body, or transferred to it, through any medium, from some other."—*Quere*.

"... the sun pours forth a multitude of other rays more powerfully calorific than the luminous ones, but entirely unsuited to the purposes of vision."—Tyndall: *Prog. of Science*, 3rd ed., viii. 1, p. 174.

B. As subst.: An apparatus for conveying or conducting heat in houses, &c.; a hot-water apparatus.

\* **cāl-or-īf-ī-cal**, a. [Eng. *calorific*; -al.] Calorific.

"This I find concerning dew, as it is of a calorific nature."—Swan: *Specimen Mundi*, p. 147. (*Latham*.)

† **cāl-or-īf-ī-cā-tion**, s. [Eng. *calorific*; -ation.] The production of heat, especially animal heat, in bodies.

**cāl-or-īf-ī-çent**, s. [Lat. *calor* (genit. *caloris*) = heat; *faciens* (genit. *facientis*), pr. par. of *facio* = to make.] Having the power or property of causing or producing heat; heating.

**cāl-or-īf-īcs**, s. [CALORIFIC.] The science which treats of appliances for producing or communicating heat.

**cāl-ōr-īm-ē-tēr**, s. [Fr. *calorimètre*; from Lat. *calor* = warmth, heat, and Gr. μέτρον (*metron*) = a measure.] An instrument for measuring the quantity of heat which a body parts with or absorbs when its temperature sinks or rises through a certain number of

MERCURY CALORIMETER.

degrees, or when it changes its condition. An ice-calorimeter was invented by Lavoisier and Laplace. It is now superseded by the mercury-calorimeter of Favre and Silbermann, which is a very delicate instrument. It is essentially a thermometer with a very large bulb and a capillary tube. (See *Atkinson's Gannet's Physics*; *Heat*, ch. ix.)

**cāl-ōr-ī-mēt-ric**, a. [Eng. *calorimetry*]; -ic.] Of or pertaining to calorimetry.

**cāl-ōr-īm-ēt-rŷ**, s. [Lat. *calor* = warmth, heat, and Gr. μέτρον (*metron*) = a measure.] The measurement of *caloric* in the way described under *Calorimeter* (q.v.). (See *Atkinson's Gannet's Physics*; *On Heat*, ch. ix. *Calorimetry*.)

**cāl-ōr-ī-mō-tōr**, s. [Lat. *calor* (genit. *caloris*) = heat, and *motor* = a mover; *moveo* = to move.] A galvanic instrument for evolving caloric.

\* **cā-lōr mor-dic-ans**, s. [Lat. *calor* = heat; *mordicans* = biting; *mordico* = to bite.]

Med.: An old term for the almost burning heat of the skin in acute fevers, which causes an unpleasant sensation on the fingers after touching the patient. (*Hooper*.)

**cāl-ō-sō-ma**, s. [Gr. καλός (*kalos*) = beautiful, *σώμα* (*sōma*) = a body.]

Entom.: A genus of coleopterous insects of the family Carminora and tribe Carabidae. Two species are British, *C. cyphophanta* and *C. inquisitor*.

\* **cāl-ō-stig-ma**, s. [Gr. καλός (*kalos*) = beautiful; *στίγμα* (*stigma*) = a stigma.]

Bot.: A genus of Aeclepiadaceæ, consisting of three species of climbing shrubs, natives of Brazil. The calyx is five-parted, corolla bell-shaped, and the elongated projecting stigma has a prominent apex.

**cāl-ō-thām-nūs**, s. [From Gr. καλός (*kalos*) = beautiful, and θάμνος (*thamnos*) = a bush, a shrub.]

Bot.: A genus of Myrtaceæ. Various beautiful species grow in Australia.

**cāl-ō-thrix**, s. [Gr. καλός (*kalos*) = beautiful; *θρίξ* (*thrix*) = hair.]

Bot.: A genus of Oscillatorie (Confervoid Algae), growing in tufts, the filaments forming a branched frond, by lying in opposition. *C. mirabilis* is a rare freshwater species in England, found on mosses in small streams, eruginous green, growing blackish. (*Griffith & Henfrey*.)

**cāl-lōt-rōp-is**, s. [Gr. καλός (*kalos*) = beautiful, and *ρόπις* (*ropis*) = a keel, from the shape of the flower.]

Bot.: A genus of Aeclepiads, consisting of three species, which form shrubs or small trees, and are natives of the tropics of Asia and Africa. Their flowers have a somewhat bell-shaped corolla, expanding into five divisions. *Calotropis gigantea*, the largest of the genus, forms a branching shrub or small tree about fifteen feet high, with a short trunk four or five inches in diameter. Its flowers are of a pretty rose-purple colour. Cloth and paper have been made from the silky down of the seeds. The bark of the roots of several of the species furnishes the substance called *madar*, which is used in India as a diaphoretic. The

juice has been found very efficacious in the cure of elephantiasis, in syphilis, and anasarca. From the bark of the plant is made a substance called *Mudarine* (q.v.). The bark of the young branches also yields a valuable fibre. The leaves warmed and moistened with oil are applied as a dry fomentation in pains of the stomach; they are a valuable rubefacient. The root, reduced to powder, is given in India to hoarses. An intoxicating liquor, called *Bar*, is made from the *madar* by the hillmen about Mahabuleswar, in the Western Ghats.

**ca-lō'tte**, **ca-lō'te**, \* **cāl-lō't**, s. [Fr. *calotta* = a cap.]

I. Ordinary Language:  
1. The plain round skull-cap worn by Roman ecclesiastics to cover the tonsure.

"Wa  
That tread the path of public businesses  
Know what a tacit shrug is, or a shrink,  
The wearing the *calot*, the politic hood,  
And twenty other parerga."  
B. Jonson: *Magn. Lady*, l.

\* 2. Anything shaped like a cap; the hilt of a sword.

II. Technically:  
1. Arch.: A concavity, in the form of a cap or niche, lathed and plastered, serving to diminish the height of a chapel, alcove, or cabinet, which otherwise would appear too high for the breadth. (*Gullit*.)

A. Intransitive :

1. Lit. : To bring forth a calf; to bear young. (Said of a cow.)

"Their bull gendereth, and felleth not; their cow calveth, and calveth not her calf."—Job xxi. 10.

¶ Applied also to other animals.

"Knowest thou the time when the wild goats of the rock bring forth or calveth thou mark when the hinds do calve?"—Job xxix. 1.

\* 2. Figuratively :

(1) To bring forth, bear. (Applied even to inanimates things.)

"The grassy cleads now calv'd; now half appear'd The lawnly flow, paving to get free His hinder parts."—Milton: P. L., bk. vii.

(2) Of icebergs : To break off from a glacier which has reached deep water.

\* B. Trans. : To bear; to bring forth. (Applied contemptuously or reproachfully to human beings.)

"I would they were barbarians, as they are, Though in Rome litter'd; not Romans, as they are not, Though calv'd in the porch o' th' capital."—Shakespeare: Coriol., III. I.

calv-ër (l silent), s. [Eng. calve, v.; and suff. -er.] A cow with calf. (Scotch.)

cal-vër-ed, pa. par. or a. [CALVER, v.] Sliced and pickled.

¶ Calver'd salmon is a dainty celebrated by all our old dramatists. "May's Accomplish'd Cook," if that be sufficient authority, gives an ample receipt for preparing it. It is to be cut in slices, and scalded with wine and water and salt, then boiled up in white-wine vinegar, and set by to cool; and so kept, to be eaten hot or cold. (p. 354.) It now means, in the fish trade, only crimped salmon. (Nares.)

"Great lords, sometimes, For a change leave calver'd salmon, and eat sprats."—Massinger: Guardian, IV. 2.

"... but even Prince George, who cared so much for the dignity of his birth as he was capable of caring for any thing but cloret and calver'd salmon, submitted to be Mr. Morley."—Macaulay: Hist. Eng., ch. xv.

C. As substantive :

1. Ord. Lang. : The act of giving birth to a calf.

"I heard of late of a cow in Warwickshire, which in six years had sixteen calves; that is, four at once in three calvings, and twice twins."—Hotinehd: Descript. of Engl., bk. III, ch. 1.

2. Naut. :

Of icebergs : The act of breaking or the state of being broken off a glacier when the latter reaches deep water. Glaciers tend to form on mountain tops when the temperature is low enough for the purpose. Then they gradually descend, new glacial material behind pressing them down. On reaching the ocean they are pushed into it, and finally they calve or give birth to icebergs, which have an independent existence of their own.

Cal-vín-ísm, s. [Fr. calvinisme. From John Calvin, the celebrated reformer, born at Noyon, in Picardy, July 10th, 1509; died May 27th, 1564. For further details see definition.]

1. Theol. : The tenets of the above-mentioned John Calvin. Sometimes the term Calvinism comprehends his views regarding both theological doctrine and ecclesiastical polity; at

ból, bóy; póút, jówí; cat, çell, chorus, çhin, beugh; go, gem; thin, thís; sin, aç; expect, çenophon, exist. -íng. -cian, -tian = shán. -tion, -sion = shún; -tion, -çion = zhún. -tious, -çious, -çious = shús. -ble, -dle, &c. = bël, ðel.

others it is limited to the former, and specially to his views on the doctrines of grace. These are sometimes called the five points of Calvinism, or, more briefly, the five points; but this latter curt appellation is not sufficiently specific, for the rival system of Arminianism was also presented by the Remonstrants at the Synod of Dort in five points. Those of Calvinism are the following:—(1) Particular election. (2) Particular redemption. (3) Moral inability in a fallen state. (4) Irresistible grace. (5) Final perseverance. (For the rival Arminian five points see ARMINIAN.) Augustine, Bishop of Hippo, who was born in 354, and died in 430, held theological views essentially the same as those afterwards promulgated by Calvin. In addition to what may be called the doctrine of grace, Calvin held the spiritual presence of Christ in the Holy Eucharist, but not the doctrine of consubstantiation. He was thus essentially Zwinglian, and not Lutheran.

2. *Koles.*: Calvin's views of Church government were essentially what are now called Presbyterian. He held also that the Church should be spiritually independent of the State, but was willing that the discipline of the Church should be carried out by the civil power. This last opinion, followed to its logical conclusion, involved him in heavy responsibility for the death of his Socinian antagonist Servetus, the capital punishment of whom for alleged heresy was approved of not merely by Calvin, but by the other reformers, not excepting the gentle Melancthon. No one in those days seems to have clearly understood religious liberty.

3. *Ch. Hist.*: The work which first made this system known to the world was *Calvin's Institutes of the Christian Religion*, published in 1536. In August of the same year he visited Geneva, and, at the earnest request of Farel, its leading reformer, made it his residence. In 1538 both were expelled from the city, when Calvin, going to Strasburg, originated the French church there on the model which he deemed scriptural. In 1541 he was invited back to Geneva, and returning to it was the leading spirit there till his death, in 1564. Various Protestant churches adopted Calvin's theological views with his ecclesiastical polity; thus Knox carried both of these to Scotland, where the first Presbyterian General Assembly was held in 1560.

Bishop Burnet states that the 17th article of the Church of England is framed according to St. Augustine's doctrine, which, as stated, is essentially Calvinistic. The early reformers of the English Church mostly held his views of the doctrine of grace, which prevailed to the end of Queen Elizabeth's reign. Afterwards they imperceptibly declined. When the rival system of Arminius was brought to trial at the Synod of Dort, in Holland, in 1618, the English clerical representatives gave Calvinistic votes, notwithstanding which Arminianism took deep root in the English as in various other churches. Archbishop Laud was its warm friend and advocate, as were the High Church party generally, while Low Churchmen continued Calvinistic, a generalisation which still remains correct. The ecclesiastical polity of Calvin was embraced by the Puritan party, but never had a majority of the English people in its favour, and an attempt in the early days of the Long Parliament to set it up, though under the control of the civil government, was successful only to a limited extent, and for a brief period of time. Most of the clergymen whom the passing of the Act of Uniformity, in 1662, disavowed from the Church, were Calvinists.

Of the two great English revivalists of the eighteenth century, Whitfield was Calvinistic [CALVINISTIC METHODISTS], and Wesley Arminian, [WESLEYAN.] The majority of the English Baptists are Calvinistic. All along, since the Reformation, the theological tenets and the ecclesiastical polity of Calvin have nearly always been dominant in Scotland, though the sterner features of both have almost imperceptibly been softened down.

"The delights arising from these objects were to be sacrificed to the cold and philosophical spirit of Calvinism, which furnished no pleasures to the imagination."—*Warton: Note on Milton's II. Penseroso.*

**cál'-vin-ist**, s. [Fr. *calviniste*.] A follower of Calvin; one who adopts the theological teaching of Calvinism.

"The Calvinist is tempted to a false security, and sloth; and the Arminian may be tempted to trust too much to himself, and too little to God."—*Warton on the Articles, Art. 17.*

**cál'-vin-is'tic**, \* **cál'-vin-is'tick**, \* **cál'-vin-is'ti-cal**, a. [Eng. *calvinist*; -ic, -ical.] Pertaining to Calvin or Calvinism.

"... the petty states and republics abroad, where the Calvinistic discipline was adopted."—*Warton: Hist. of Eng. Poetry, II. 458.*

**Calvinistic Baptists**, s. pl.

*Ch. Hist. & Ecclesiol.*: A sect of Baptists having registered places of worship in England.

**Calvinistic Methodists**, s. pl.

*Ch. Hist. & Ecclesiol.*: A section of the Methodists, distinguished by their Calvinistic sentiments from the ordinary Wesleyans, who are Arminian. Wesley and Whitfield, the colleagues in the great evangelistic movement which did so much spiritually and morally to regenerate England in the 18th century, differed with regard to the doctrines of grace, Wesley being Arminian, and Whitfield Calvinistic; the latter revival preacher may be looked on as the father and founder of Calvinistic Methodism. Other names, and specially that of Mr. Howell Harris, of Trevecca, should be mentioned in connection with it. In its distinctive form it dates from 1735, but did not completely sever its connection with the English Church till 1810. In government it is now Presbyterian. Its great seat is Wales.

\* **cál'-vin-ize**, v. t. [Eng. *calvin*; -ize.] To convert to Calvinism.

**cál'-vish** (l silent), a. [Eng. *calv*; -ish.]

selves up into a ball, as some recent allied genera do, for the purpose either of safety or of concealment. *Calymene Blumenbachii* is the well-known Dudley Trilobite.

**cal-ý-mén-ý-dæ, s. pl.** [From Mod. Lat. *calymene* (q.v.), and pl. suff. -*idæ*.]

**Palæont.**: A family of Trilobites. [CALYMENE.]

**cal-ý-ðn, s.** [CALION.]

\* 1. **Ord. Lang.**: A hard, round stone. (*Prompt. Parv.*)

2. **Masonry**: Flint or pebble stone used in building walls.

**cal-ý-phý-ðm-ý, s.** [From Gr. *κάλυξ* (*kalux*), genit. *κάλυκος* (*kalukos*) = a calyx, and *φω* (*phō*) = to bring forth, to produce.]

**Bot.**: Abnormal adhesion of the calyx to the corolla. (R. Brown, 1874.)

**cal-ýp-sò, Cal-ýp-sò, s.** [Gr. *καλύψις* (*kalypsís*) = a covering, *καλύπτω* (*kaluptō*) = to cover, conceal.]

1. **Mythol.**: The goddess of silence, daughter of Oceanus and Tethys, and Queen of Ogyia, who tried by every art to detain Ulysses on his way home from Troy.

2. **Astron.**: An asteroid, the fifty-third found. It was discovered by the astronomer Luther, on the 4th April, 1858.

3. **Bot.**: A genus of Orchidee, found in North America. *Calypso borealis* is the most beautiful of northern orchids. It is a tuberous terrestrial plant, with one leaf and one flower only. The rose-coloured flower appears at the end of a slender sheathed stem. The leaf is thin, many nerved, either ovate or cordate. (*Treas. of Bot.*)

**cal-ýp-tër, s.** [CALYPTRA.]

**cal-ýp-tò-blàs-tíc, a.** [From Gr. *καλυπτός* (*kaluptos*) = covered, and *βλαστός* (*blastos*) = a sprout, shoot, or sucker.]

**Zool.**: Nothing or pertaining to those Hydrozoa in which the nutritive or generative buds are provided with an external protective receptacle. (*Altman*.)

**calyptoblastic hydroids, s. pl.**

**Zool.**: The hydroids above described. It comprehends the Sertularians and the Campanularians.

**cal-ýp-tò-líte, s.** [Gr. *καλύπτω* (*kaluptō*) = to hide, conceal; suff. -*líte* (*lín*) = Gr. *λίθος* (*lithos*) = a stone.]

**Min.**: The same as ZIRCON (q.v.).

**cal-ýp-tò-rhýn'-chús, s.** [Gr. *καλύπτω* (*kaluptō*) = to hide; *ρήγος* (*rhynchos*) = a beak, or snout.]

**Ornith.**: A genus of birds of the Psittacidae or Parrot family.

**cal-ýp-tra, s.** [Gr. *καλύπτρα* (*kaluptra*); from *καλύπτω* (*kaluptō*) = to hide, cover.]

**Botany**:

1. **Gen.**: A hood-like body connected in some plants with the organs of fructification.

It exists in some flowering plants and in mosses. Used specially for—

(1) A number of bracts united to cover the flower. Example, *Pilea*.

(2) A lid or operculum to the stamens. It may be made of consolidated sepals or petals. Examples: *Eucalyptus*, *Eudemia*.

2. **Spec.**: The hood of an urn-moss, covering the top of the theca like a cup.

**cal-ýp-træ'-a, s.** [Lat. *calyptra*; Gr. *καλύπτρα* (*kaluptra*) = a hood, covering.]

**Zool.**: A genus of Gasteropods, furnished with a patelliform shell, to the cavity of which a smaller conical one adheres, like a cup in a saucer. It is the typical genus of the family Calyptraeidae. The species are called Cup-and-Saucer Limpets. Tate estimates the known recent species at fifty and the fossil at thirty-one, the latter from the chalk, if not from the carboniferous formation on till now. They are called Bonnet Limpets.

**cal-ýp-træ'-ý-dæ, s. pl.** [From *calyptra* (a), and fem. pl. suff. -*idæ*.]

**Zool.**: A family of Gasteropods comprising, among other genera, Calyptrae and Crepidula of Lamarck.

**cal-ýp-trân'-thēs, s.** [From Gr. *καλύπτρα* (*kaluptra*) = a cover, as of a quiver (?), a woman's veil, and *άνθος* (*anthos*) = a flower.]

**Bot.**: A genus of Myrtaceae. The species are from America. The flowers of *Calyptranthes aromatica* might be used for clove.

**cal-ýp-trâte, a.** [Lat. *calyptra*; Gr. *καλύπτρα* (*kaluptra*); and Eng. suff. -*atē*.]

**Botany**:

1. **Gen.**: Having a veil or covering like a calyptra or hood.

"Such a calyx is operculate or calyptrate."—*Balfour Botany*, p. 184.

2. **Of a calyx**: Bursting on one side at the period of falling. Example, *Eschscholtzia*. (*Lindley*.)

**cal-ýp-trí-form, a.** [Lat. *calyptra* = a hood; *forma* = form.]

**Bot.**: Having the form or appearance of a calyptra or hood.

**cal-ý-sác'-qí-ðn, s.** [From Gr. *κάλυξ* (*kalux*) = a calyx, and *σακκίον* (*sakkion*) = a small bag.]

**Bot.**: A genus of plants, order Clusiaceae (Guttifers). Only known species, *Calysaccion longifolium*. It is from India and China. The flower buds are very fragrant. They are used in India for dyeing silk yellow and orange.

**cal-ýs-tò-ǵí'-a, s.** [Gr. *κάλυξ* (*kalux*) = a calyx, and *στέγη* (*stegē*) = a covering.]

**Bot.**: A genus of plants of the order Convolvulaceae, containing about twelve or fourteen species, of which two are British—*Calystegia sepium* and *C. soldanella*, the former of which is the common Bindweed.

**cal-ýx, s.** [Gr. *κάλυξ* (*kalux*) strictly = any covering, but used only of flowers and fruits, i.e. (1) a husk or shell, (2) the calyx or cup of a flower (Lat. *calix* = a cup), from *καλύπτω* (*kaluptō*) = to cover, to conceal.]

CALYX (1) FOXGLOVE, (2) PRIMROSE.

1. **Bot.**: The most outerly integument of a flower, consisting of several verticillate leaves, either united by their margins or distinct, usually of a green colour and of a ruder and less delicate texture than the corolla. (*Link. Lindley, &c.*) When only one series of floral integuments is present, that single one is considered as a calyx, and not as a corolla. The divisions of a calyx are called *sepals*. A *superior* or *adherent* calyx is one not able to

be separated from the ovary; an *inferior* or *free* one is actually separate. A *calyculate calyx* is one surrounded at the base by a ring of bracts. The term *calyculate* (q.v.) may be used of a calyx as well as of a complete flower. A calyx is not the same as a *perianth*, the latter being a calyx and corolla combined, as in a tulip or an orchid, and not a solitary calyx. A common calyx is called an *involute* (q.v.).

2. **Zool.**: The cup-shaped body of a Crinoid or that of a Torticella.

\* **cal'-zõng, \* cal'-sõunds, s. pl.** [O. Fr. *calcons*; Ff. *calegon*, *calegons*; Ital. *calconi*; Sp. *calzones*, augment. of Ital. *calzo*; Sp. *calzas*; Fr. *chausse* = hose, stockings, from Lat. *calceus* = a shoe, *calx* = a heel.] Drawers. (*Sir T. Herbert*). (*Webster*.)

"The next that they wear is a smock of callico, with ample sleeves, much longer than their arms; under this, a pair of calcons of the same, which reach to their ancles."—*Sandys Travels*, p. 63.

**cám, \* kám, \* kamme, a, adv. & s.** [Gael. Ir., & Wel. *cam* = crooked.] [CAMBER.]

**A. As adjective**:

1. **Lit.**: Crooked, curved.

2. **Fig.**: Crooked in temper, perverse, cross, peevish. (*Provincial*.)

\* **B. As adv.**: Wrong, out of the right course.

"This is clean *kam*—

Merely awry."

*Shakesp. Coriolanus*, III. 1.

"Against the wool, the wrong way, cloase contrary, quite *kamme*."—*Copland*.

**C. As substantive**:

1. The projecting part of a wheel or curved plate, so shaped as to cause an eccentric or alternating motion of any required velocity or direction in another piece pressing against it.

2. A ridge or mound of earth. (*Provincial*.) (*Wright*.)

**cam-ball, s. & a.**

¶ **Cam-ball valve**: A valve acted upon by a cam on the axis of a ball-lever, so that, as the float in a cistern, the cam may press against the stem of the valve and close it, preventing the ingress of water.

**cam-gear, s. & a.**

¶ **Cam-gear wheeling**:

**Mach.**: A certain arrangement of gearing.

**cam-shaft, s.**

**Mach.**: A shaft having cams or wipers for raising the pebbles of stamping-mills. It is called also a *tumbling-shaft* or *wallower*. (*Knight*.)

**cam-wheel, s.**

**Mach.**: A wheel so constructed as to move eccentrically, and cause an alternating or reciprocating motion in another part of the machine.

\* **cám, pret. of v.** [COME.] (*O. Eng. & Scotch*.) Came.

1. **Old English**:

"The cam the thrille dala lgt." *Story of Gen. & Exod.*, 114.

2. **Scotch**:

"The poor Highland body, Dugald Mahoney, cam here a while syne."—*Scott: Waverley*, ch. lxviii.

\* **cám'-a-ca, s.** [Low Lat. *camoca*, *camaca*; O. Fr. *camocas*; Mod. Gr. *καμουχάς* (*kamouchas*).] A kind of fine cloth.

"Your curtaines of *camoca*." *Squire of Low Degree*, 888.

\* **ca-máil', s.** [Ital. *camaglio*.]

\* **I. Ord. Lang.**: A camel.

**II. Technically**:

1. **Fabric**: A capuchin, or short cloak, sometimes made of fur, but probably originally of camel's hair.

2. **Mil. (Ancient Armour)**: A neck guard of chain-mail which was added to the basinet, or headpiece, in the time of Edward III.

**Cam-ál-dũ-lên'-sí-ans, s. pl.** [From Camaldoli or Campo Maldini, a desert spot on the lofty heights of the Apennine chain of mountains.]

**Ch. Hist.**: A monastic fraternity founded in 1023 by Romuald, an Italian, at the place described in the etymology. It still flourishes, especially in Italy. Some are comobites and others eremitas.

**cám-ar-a** (1), s. [From Gr. *καμάρα* (*kamara*) = anything with an arched cover, a vaulted chamber.]

- 1. Bot. : A carpel.
- 2. Comm. : The hard, durable timber of *Dipteryx odorata*, a leguminous plant, a native of Guiana. (*Treas. of Bot.*)

**cám-ar-a** (2), s. [Native Guiana name.] The same as Ackawar Nutmeg. It is produced by *Acroclitidium camara*, a species of the Laurel order. It is considered in Guiana to be one of the most efficacious remedies in colic, diarrhoea, and dysentery. (*Lindley*.)

\* **cám-a-ril-la**, s. [Sp. *camarilla* = a little room, dim. of *camara* = a chamber.]

- 1. The audience chamber or private room of a king.
- 2. A band or company of conspirators; a cabal, a cliqué. (*Wright*.)

**cám-ar-lên-go**, s. [Sp. *camarlenço* = a chamberlain (q.v.).] A high functionary chosen when the decease of a Pope is expected not to be far distant, to govern the Church during the interregnum, and to see that irregular practices and all foreign or personal influence shall be excluded from the election.

"If the *Camarlenço* has only moderate abilities, he is greater than the Pope, for he can make the Pope."—*Times*, Sept. 23, 1877.

**ca-más-si-a**, s. [From North American Indian *quamash*, the name of the plant.]

Bot. : A genus of plants, order Liliaceae. The bulbs of *Camassia esculenta* are eaten by the North American Indians.

**cam-a-yeú**, **cam-a-í-cú**, s. [CAMBO.]

- 1. [CAMBO.]
- 2. *Painting* : A term used where there is only one colour, and where the lights and shadows are of gold, wrought on a golden or azure ground. This kind of work is chiefly used to represent basso relievo. (*Chambers*.)

**camb** (1), s. [COMB.]

**camb** (2), s. [CAMBIUM.]

**cám-báyea**, s. pl. [From Cambay, formerly an important seaport, on the gulf of the same name in India, lat. 22° 21' N., long. 72° 48' E.]

*Fabrics* : Cotton cloth made in Bengal, Madras, and other parts of India. (*Knight*.)

**cám-bér** (1), s. [O.Fr. *cambré* = crooked. Cf. *cam*, s.]

- 1. (See the example.)
- "Camber, a piece of timber cut arching, so as a weight considerable being set upon it, it may in length of time be induced to a straight."—*Acc.* : *Mech. Disc.*
- 2. Arch. : An arch on the top of an aperture or on the top of a beam.
- 3. Nautical :

- (1) The curve of a ship's plank.
- (2) The part of a dockyard where cambering is performed.
- (3) A small dock in the royal yards, for the convenience of loading and discharging timber.

**camber-beam**, s.  
Arch. : That which forms a curved line on each side from the middle of its length. All beams should, to some degree, be cambered, if possible; but the cambered beam is used in flats and church platforms, wherein, after being covered with boards, these are covered with lead, for the purpose of discharging the rain-water. (*Gwilt*.)

**camber-keeled**, a. Having the keel slightly arched upwards in the middle of the length, but not actually hogged.

**camber-slip**, s.  
*Bricklaying* : A strip of wood with one edge curved equal to a rise of one inch in six feet. It is used for sinking the soffit lines of straight arches to give them a slight rise that they may settle straight. (*Knight*.)

\* **cám-bér** (2), s. [CHAMBER.]

\* **camber-maid**, s. A chambermaid.

**cám-bér**, v. t. & i. [CAMBER, s.]

- 1. *Trans.* : To make a beam camberwise or arching.
- 2. *Intrans.* : To bend or curve camberwise.

**cám-béred**, pa. par. & a. [CAMBER, s.] Arched, curved. (*Totten*.)

**cám-bér-ing**, pr. par., a., & s. [CAMBER, v.] A. & B. *As pr. par. & particip. adj.* : (See the verb.)

C. *As subst.* : The act of making a beam cambered or arched. (*Wcale*.)

**cám-bí-ál**, a. [Low Lat. *camibialis*; from *camio* = to exchange.] Pertaining or relating to exchange.

**cám-bí-form**, a. [From Lat. *camibium* (CAMA), and *forma* = form, shape.]

¶ *Cambiform tissue* :  
Bot. *Physiol.* : Narrow, thin-walled, elongated succulent cells often found in connection with sieve tubes in the structure of plants. They are called also permanent cambium. (*Thomé*.)

† **cám-bíst**, s. [Fr. *cambiste*; Sp. & Ital. *cambista*; from Lat. *cambio* = to exchange.] One skilled in the science of exchange; a bill-holder; a money-changer.

"... *cambit* is not only a word of legitimate derivation, but is also a term much wanted in the English language, as there is none other to express the same meaning except *Exchange*, which seems too general and indefinite."—*Key* : *Universal Cambist* (pref. 1831).

\* **cám-bis-trý**, s. [Eng. *cambit*; -ry.] The science of exchange of money, &c.

**cám-bí-üm**, s. [Lat. *camibium* = exchange, bartering; from *camio* = to exchange, barter.]

Bot. : The viscid substance which appears, in the spring, between the wood and bark of exogenous trees when the new wood is forming, and again disappears as soon as the wood is completely formed. It reappears whenever the plant is again called into growth, as at Midsummer, in those species which shoot twice a year.

**cambiu-m-sheath**, s.  
Bot. *Physiol.* : An annular layer of formative tissue separating the very young cortex of a plant from the subjacent tissue. (*Thomé*.)

\* **cám-blét**, s. [CAMLET.]

**cám-bó-gé**, s. [GAMBOGE.]

**cám-bó-gí-a**, s. [Cambodia, or Cambodia, in the Eastern Peninsula, from which much of the gamboge of commerce is obtained.]

Bot. : An old genus of plants, order Clusiaceae (Guttifera). It is now merged in *Garcinia* (q.v.).

\* **cám-bók**, s. [CAMMOCK.]

**cám-bó'se**, s. [CAMBOOSE.]

\* **cám-brá-sine**, s. [CAMBRIC.] A sort of fine linen resembling cambric, made in Egypt.

**Cám-brá-y**, & **Cám-brá-i**, s. & a. [Altered from *Cameracum*, the Roman name of the city.]

A. *As subst.* : A city of France, department of the Nord, lat. 50° 10' N. and long. 3° 14' E.

B. *As adj.* : Brought from or in any other way pertaining to the city described under A.

**Cambray stone**, s.  
Min. : A name for Moss Agate, or Mocha-stone.

**cám-brél**, \* **cám-mér-ell**, s. [CAMBER.] A piece of bent wood, by which huthera hang up carcasses of slaughtered animals.

**Cám-bri-an**, a. & s. [Lat. *Cambria* = Wales.]

A. *As adjective* :  
I. *Ord. Lang.* : Of or belonging to Wales.  
"Him answer'd then his loving mate and true,  
But more discreet than he, a *Cambrian* sue."  
Cooper : *The Red Rover* (dram.)

II. *Geol.* : Of or belonging to the series of rocks described under B. II. (See the terms *Cambrian formation, group, or system*.)

B. *As substantive* :  
\* I. *Ord. Lang.* : A native of Wales.

II. *Geology* :  
1. Formerly : In 1835 Sedgwick gave this name to some much-disturbed and apparently fossiliferous old strata, until then known as "Granwacke," which he had traced out in Cumberland and North Wales. Just previously, Murchison had fixed the term "Silurian" to a series of fossiliferous deposits in Shropshire and Wales, known by him after-

wards as the Ludlow, Wenlock, Llandovery, Cardoc, Llandeilo, and Lingula groups. These were all regarded as younger than, and lying above, Sedgwick's "Cambrian" series; the position, however, of the Bala limestone (equivalent to the "Caradoc Sandstone" of Shropshire) was mistaken, and consequently the boundary-line provisionally fixed by the two observers was misplaced. Fossils characteristic of the "Silurian" were afterwards found in strata thus placed in the "Cambrian" series, and hence the latter name became limited to the lowest beds. This nomenclature was generally adopted, until Sedgwick, renewing his work, criticised it. A better knowledge of the fossils has of late modified the classification, as given below.

2. *Now* : As defined by Hicks and others, the Cambrian is a thick series of slates, schists, sandstones, and conglomerates, with both intruded and intercalated igneous rocks, linked by similarity of fossils, and older than the Silurian series. They occur in Wales and elsewhere, contain many Trilobites and Brachiopoda, with other fossils, and are known as—1. Tremadoc Slates (uppermost); 2. Lingule-flag; 3. Menevian-beds; and 4. Longmynd group, consisting of Harlech grits and Llanberis slates. The Geological Surveyors (following Murchison) limit the term to the Longmynd Group; but others (after Sedgwick) include all Murchison's "Lower Silurian" (Bala and Llandeilo groups) in the "Cambrian."

**Cambrian formation** :  
Geol. : The series of rocks described under B. II.

**Cambrian group** :  
Geol. : Lyell's name for the Cambrian rocks belonging to what is more commonly termed the Cambrian formation, the word group in this sense now tending to obsolescence.

**Cambrian system** : The same as *Cambrian formation and Cambrian group* (q.v.).

**cám-bríc**, \* **cám-bríck** (1), s. & a. [In Dut. *kamerlijk*; Ger. *kammerlich*; Fr. *toile de Cambrai*; from *Cambrai*, a town in France, where it was originally made.]

- A. *As substantive* :  
1. A kind of very fine white linen cloth.  
"He hath ribbons of all the colours of the rainbow; inkles, audines, *cambricks*, and lawns."—*Shakspeare* : *Winter's Tale* (act. 3.)
- 2. A kind of fabric made of hard-spun cotton yarn, of different colours, in imitation of fineu cambric. (*Webster*.)

B. *As adj.* : Pertaining to or made of the material described in A. I.  
"And *cambric* handkerchiefs toward the song." *Goa*.

\* **cám-bríck** (2), s. [CAMMOCK.]

**cám-bür-á**, **chám-bür-y**, s. [Brazilian *chamburu*.]

Bot. : A plant, *Carica digitata*, order Papayaceae (Papayads). It is regarded, where it grows, as a deadly poison.

**cám-buý**, s. [A Brazilian word (?).] The native name of a fruit derived from a species of *Eugenia*. It is said by Von Martius to be excellent for desserts.

**Cám-dén-í-an**, a. [From William Camden, founder, in 1622, of the Professorship mentioned in the example.] Founded by Camden.

"He was *Camdenian* Professor of Ancient History in the University of Oxford."—*Macaulay* : *Hist. Eng.*, ch. xiv.

**cám-dú-i**, s. [From Gael. *cam* = crooked, and *dubh* = black.] A kind of trout. (*Sootick*.) (*Jamieson*.)

**cáme**, pret. of *v*. [COME.]

**cáme** (1), s. [COMB.] (*Scotch & N. Eng.*)

**cáme** (2), s. [CAMELS.]

**cám-él**, \* **cam-sil**, \* **cam-ail**, \* **cham-ayle**, \* **cham-el**, \* **cham-ail**, \* **cham-elle**, \* **cam-elle**, \* **kam-el**, s. & a. [O. Fr. *chamel*, *camel*; Sp. & Ital. *camelo*; Gael. *camhal*; Lat. *camelus*; Gr. *κάμηλος* (*kamēlos*); from Heb. *גמל* (*gamál*); Arab. *jamel*.]

A. *As substantive* :  
I. *Ord. Lang.* : The name given to two animals, the *Camelus dromedarius* and *C. bactrianus* [CAMELUS], the former generally called the Arabian Camel, or simply the Camel, and the latter the Bactrian Camel.

fáte, fát, fáre, amidst, whát, fáll, father; wê, wét, hère, camel, hêr, thére; pine, pítt, síre, sír, marine; gó, pót, or, wóre, wólf, wórk, whó, sôn; müte, cüb, cüre, unite, óür, rúle, fúll; try, Sýrian. æ, œ = é. ey = ä. qu = kw.

1. The Arabian species, which has but one hump on its back. Of this there are two varieties: Variety 1 is large and full of flesh, and able on an emergency to carry burdens of 1,000 lbs. weight, though 500 or 600, or at most 800 lbs., are a more appropriate load. The soft-enlashed foot is admirably adapted to support the animal in traversing the desert, and its stomach can be converted into water-tanks, from which a supply of the precious fluid can be obtained when the animal has no other method of slaking its thirst. So admirably is it adapted for the arid wastes, that it has been called the ship of the desert. Variety 2 is leaner and of a smaller size. It is often called the Dromedary (from Gr. *δρωμας* (*dromas*) = running), the name being given because of its swiftness. It is used to bear heavy burdens, but will go one hundred miles a day. It is generally used for riding by men of quality.

2. The Bactrian species, which is stouter and more muscular than the Arabian Camel, from which it differs in having two humps on its back.

"Him and his men and hire camel."  
Story of Gen. and Exod., 1, 308.

"Camelle or chamelle."—Prompt. Parv.  
"Camels have large solid feet, but not herd. Camels will continue ten or twelve days without eating or drinking, and keep water a long time in their stomach, for their refreshment."—Caimet.

II. Technically:

1. *Naut.* (Pl.): Hollow cases of wood, constructed in two halves, so as to embrace the keel, and lay hold of the hull of a ship on both sides. They are first filled with water and sunk, in order to be fixed on. The water is then pumped out, when the vessel gradually rises, and the process is continued until the ship is enabled to pass over a shoal or sill. Similar camels were used at Rotterdam about 1690.

2. *Stocking frames*: A bar mounted upon four wheels, and capable of being drawn forward and backward through a small space. Upon it are mounted the jacks with their springs, and the slur-bar upon which traverses the slur by which the jacks are actuated successively. (*Knights*.)

B. *As adjective*: (See the compounds).

† Compounds of obvious signification: Camel-backed, camel-hide.

camel-bird, s. A name given to the ostrich.

camel-insects, s. pl. A name sometimes given to the insects of the genus *Mantia* (q.v.).

camel-locusts, s. pl. The same as CAMEL-INSECTS (q.v.).

camel's-hair, camel-hair, \* camel-hare, s. & a.

\* A. *As substantive*:

1. *Ord. Lang.*: The hair of a camel.

2. *Fabric*: A rough fabric made of the hair of a camel.

"Wit camel-hare was he cleide."—*Metrical Homilies*, p. 10.

B. *As adj.*: Made of the hair of a camel.

"Bees will act like a camel-hair pencil."—*Darwin's Origin of Species* (ed. 1859), ch. iv., p. 97.

camel's-hay, s.

*Bot.*: A kind of sweet-smelling rush—the *Andropogon schenanthus*—growing in Eastern countries.

camel's-thorn, s.

*Bot.*: A plant, *Alhagi Camelorum*.

ca-mē-lē-ōn, s. [CHAMELEON.]

cameleon-mineral, s. [CHAMELEON-MINERAL.]

cām-ēl-ī-dā, s. pl. [From Lat. *camelus* (q.v.), and fem. pl. suffix *-idae*.]

1. *Zool.*: A family of Ruminants, containing the Camels and Llamas. The dentition differs from that of the typical Ruminantia. In the upper jaw there are three teeth on each side in front separated by slight intervals. There are a conical incisor, a canine, and a premolar. Then after a gap the rest of the molars follow. There are no horns. The lower surface of the foot is applied to the ground. There are two toes enclosed in skin, and the hoofs are reduced almost to the size of nails. There are two recent genera—*Camelus* in the eastern hemisphere, *Auchenia* in the western.

2. *Paleont.*: Various extinct genera of Camelidae have been found in the Lower Miocene and in the Pliocene of North America. In the eastern world no species has been found earlier than the Upper Miocene (?) of the Swalk hills on the flanks of the Himalayas. It is a genuine *Camelus*, *C. stivalensis*.

cām-ēl-ī-na, s. [Lat. From Gr. *χαμαί* (*chamai*) = on the ground, and *λίον* (*lion*) = flux.]

*Bot.*: A small genus of cruciferous plants (Brassicaceae), containing two or three European and North American species. They are dwarf annual or perennial herbaceous plants, with stem-clasping leaves, and terminal racemes of yellow flowers. The most interesting species is the *Camelina sativa*, a doubtful inhabitant of Britain, and sometimes called Gold of Pleasure. It is cultivated in some parts of the Continent for the fibre and oil obtainable from its seeds, which are sometimes imported into this country under the name of Dodder-seed. By pressure they yield a clear yellow-coloured oil, something like linseed-oil, and the residual cake has been recommended as food for cattle. The fibre is used in many parts for making brooms.

cām-ē-line, a. & s. [O. Fr. *cameline*; Fr. *camelin*; Ital. *camellino*; Low Lat. *camelinus* = pertaining to a camel; *camelus* = a camel.]

† A. *As adj.*: Pertaining to or of the nature of a camel.

\* B. *As subst.*: A coarse fabric, made originally of camel's-hair. [CAMLET.]

"Dame Abstinence steyned, toke on a robe of camelina."—*Hom. of Rose*, 7, 366.

cām-ēl-ī-nē-ō, s. pl. [From Mod. Lat. *camelina*, and fem. pl. suffix *-ea*.] The same as *Camelinidae* (q.v.). (*Hooker & Arnott*.)

cām-ēl-ī-nī-dā, s. pl. [From Mod. Lat. *camelina*, and fem. pl. suffix *-idae*.]

*Bot.*: A family, sub-tribe, or sub-section of the Brassicaceae or Cruciferae (Crucifers), and the tribe or section *Notorhizae*. [CAMELINEÆ.]

\* ca-me-li-on, s. [Eng. *camel*, and *lion*.] Apparently used for CAMELOPARD (q.v.).

"Camelion, that is a beast lyk a camelle in the heed, in the bodi to a paard."—*Wicliffe's Dent.* xiv. 6.

ca-mēl-lī-a, s. [From Camelli, a Jesuit, by whom the flower was introduced from the East.]

*Bot.*: A genus of plants, order Ternstroemiaceae (Theads). It is very near akin to *Thea*, which contains the tea plant; indeed, some botanists combine the two genera into one. The native countries of the *Camellias* are the eastern side of the Himalaya mountains, Cochín-China, China, Japan, and the Eastern Islands. *Camellia japonica*, said to have been introduced into Britain by Robert James, Lord Petre, is the original whence have been derived all the numerous varieties now cultivated in Britain. It has broad shining leaves and red flowers. *C. multiflora*, the Apple-blossomed *Camellia*, may be a variety of the last-named plant. *C. reticulata*, a very fine species, has flowers of a deep rose colour, sometimes six inches across. The seeds of the Chinese *C. oleifera* yield a valuable oil.

ca-mēl-ō-pard, cām-ēl-ō-pard, s. [From Lat. *camelus* = a camel; and *pardus* = a panther. He is so named because he has a neck and head like a camel; he is spotted like a pard, but his spots are white upon a red ground. (*Trevoux*.) Cf. *leo-pard*.]

*Zool.*: A name sometimes given to the Giraffe, *Camelopardalis Giraffa*. [CAMELOPARDALIS, GIRAFFE.]

cām-ēl-ō-par-dā-līs, cām-ēl-ō-par-dā-lūs, s. [CAMELOPARD.]

1. *Zool.* (of the form *camelopardalis*): The typical genus of the family *Camelopardalidae* (q.v.).

2. *Astron.* (of the form *camelopardals*): The Camelopard, a northern constellation, first so named by Hevelius. A straight line, drawn from Capella to the pole-star, passes through its centre.

cām-ēl-ō-par-dēl, s. [From Eng. *camelopard*, and suffix *-el*.]

*Her.*: An imaginary animal, being a Camelopard with two straight horns, more prominent than those which the divinely-made Camelopard (the Giraffe) possesses.

cām-ēl-ō-par-dī-dā, cām-ēl-ō-par-dā-l-ī-dā, s. pl. [From Mod. Lat. *camelopardalis* (q.v.), and fem. pl. suff. *-idae*.]

1. *Zool.*: A family of Ruminants, containing only one known species, the *Camelopardalis Giraffa*. The dentition is the same as in the Deer. [CAMELOPARDALIS.]

2. *Paleont.*: Some species of the *Camelopardalis* have been found in Miocene rocks in the Old World.

cām-ē-lot, e. [CAMLET.]

cām-el-rŷ, s. [Eng. *camel*; *-ry*.]

1. A place where camels come to receive, or be relieved of, their burdens.

2. Troops mounted on camels.

ca-mē-lūs, s. [Lat.]

1. *Zool.*: A genus of mammals, type of the family *Camelidae* (q.v.). The species differ from those of *Auchenia* (q.v.) in having the toes separate, and in possessing one or two humps on its back. There are two species, *Camelus dromedarius*, the Dromedary or Arabian Camel, and *C. bactrianus*. [CAMEL.]

2. *Paleont.* [CAMELIDÆ.]

A. *As substantive*:

1. *Ordinary Language*:

I. A precious stone carved in relief, such as the onyx or agate. The stone used should have two or more layers of different colours, and the art consists in cutting away portions of the stone so as to expose these different colours in the various parts of the work to which they are appropriate. Shells, especially the strombus or stromb shell, a genus of wing shells, are frequently used for the same purpose.

"... we will call the attention of our readers to the two forms of engraving entitled *cammeo* and *intaglio*. ... We refer our readers to Winkelmann's interesting account of the celebrated *cammeos* which are handed down to us. ..."  
—*Foreign Quarterly Review*, No. 1.

† The accent is rarely on the second syllable.

"Each nicer mould a softer feature drinks,  
The bold cameo speaks, the soft intaglio thinks."  
—*Darwin: in Botanic Garden*.

\* 2. Any carved work in low relief.

II. *Painting*. [CAMATEU (2)]

B. *As adj.*: Salient as opposed to intaglio.

cameo-incrustation, s. A bas relief cast of a bust or of a medal inclosed within a coating of white flint-glass. It was first introduced by the Bohemians.

cām-ē-ō-tŷpe, s. [Eng. *cameo*; *type*.]

*Phot.*: A small vignette daguerreotype for mounting in a jewel case like a cameo.

cām-ēr-a (1), a. [Ital. *camera* = a chamber; Lat. *camera* = a vault; Gr. *καμάρα* (*camara*), anything with an arched cover, ... a vaulted chamber.] [CHAMBER.]

1. *Ord. Lang.*: Any instrument having a dark chamber, and especially the camera-obscura and the camera-lucida (q.v.).

2. *Law*: The judge's chamber in Sergeants' Inn.

† To hear a cause *in camera*: To hear a cause privately in the judge's own room instead of in open court.

3. *Naut.*: A kind of ship used in the Black Sea.

camera-lucida, s. [In Ger. *kamera lucida*; from Lat. *camera* (q.v.), and *lucida* = containing light, full of light, bright; opposed to *obscura* = dark.] An instrument invented by Dr. Woolston in 1804 or 1807, and subsequently improved by Professor Amici of Modena. Its design is to produce on a plane surface such a representation of a landscape, an object of natural history, or other visible thing, as may enable one to delineate it with accuracy. In Dr. Woolston's instrument there is a glass prism of such a form that its base or its apex (it is the same with both) has the following angles: 90°, 67½, 135°, and 67½. An object placed at a proper distance, in a horizontal direction, from one of the planes enclosing the right angle, will send forth rays, which in their passage through the prism will be twice totally reflected, and finally reaching the observer's eye, placed near one of the acute angles and looking downwards, will enable it

to see the object of which it is in quest depicted on a surface placed in proper focus beneath. It is difficult for the eye, however, to take in both the figure and the point of the pencil at the same moment. In Professor Amici's instrument, designed to cure this defect, there is a rectangular glass prism (A C B) with one of the perpendicular faces (A B) turned, as in the former case, to the object (o) which is designed to be depicted, whilst the other (A C) is at right angles to an inclined plane of glass (I N). The rays o n proceeding from the object o are slightly

AMICI'S CAMERA LUCIDA.

refracted at D, totally reflected at F, again refracted at G, and partially reflected at K; finally reaching the eye at E, &c., making it see the image at o'. The point of the pencil is seen at the same time quite distinctly through the inclined glass plate, and there is thus every facility for tracing the picture correctly.

**camera obscura, s.** [In. Ger. *kamera obskura*; Fr. *chambre obscure*; Ital. *camera oscura*. From Lat. *camera* (q.v.), and *obscura, f. adj.* = obscure, dark.] An instrument of which, as the name imports, the essential feature is a dark chamber. It was invented, according to some, by Friar Bacon, about the 13th century; but is generally attributed to Baptista Porta, who published a work at Antwerp in 1500 in which it was described. If in the window of a chamber from which light is everywhere rigidly excluded a hole is made, about an inch in diameter, the rays streaming in will depict on the opposite wall a rude picture of the moving panorama seen in the street, or any other objects which may rest or pass before it. The delineation is, however, very shadowy, but may be made better defined by placing a double convex lens in the aperture and a sheet of paper in proper focus for the picture. The lens will reverse the figures, which may be put right again by making the rays fall on a mirror at an angle of 45°. Brewster discovered that the images became very bright by receiving them on the silvered back of a mirror. In the room now described are all the essentials of a *camera obscura*, and all

CAMERA OBSCURA.

that is needful is to imitate the procedure now described in an artificial "camera" or "room" made small enough to be portable. For the walls may be substituted a rectangular wooden box, formed of two parts sliding in each other, like the joints of a telescope, so as to adjust the focus to bodies more or less distant. A tube with a lens is fixed in one side of it, and is turned to the object to be represented. The rays entering fall on a mirror sloped at an angle of 45°, which reflect them upwards to the observer's eye. It is convenient that they may be made to pass through a horizontal plate of glass, on which tracing paper may be placed so as to enable one to draw the figure if he be so disposed, but now this is generally done not

by the hand but by photography (q.v.). A lid to the box is of use in ridding the observer of superfluous light.

There are other forms of camera. One with a triangular prism which acts both as condensing lens and mirror, and casts downwards on a table or screen a representation of the surrounding scene or landscape. Such an instrument placed on a hill in a city, and so adjusted that more or less distant objects may be brought into focus, presents a beautiful panorama of the streets with their moving population.

**camera-stand, s.**

**Phot.**: A frame on which the camera rests, and which is adjustable to vary the height, horizontal presentation, or inclination of the optic axis as may be required. (*Knight*.)

\* **cám-ěr-áde, \*cám-ěr-á-dó, s.** [Fr. *camerade*; Ital. & Sp. *camerada*, from *camera* = a chamber.] [CAMERADE.] One who occupies the same chamber; hence, a companion, an associate, especially in arms.

"*Camérades with him, and confederates in his design.*"—*Kymer*.

\* **cám-ěr-al-je-tic, a.** [Fr. *cameralistique*; Ger. *cameralistik*, from Low Lat. *cameralista* = a money-changer, financier, from Low Lat. *camera* = a vault, treasury; Lat. *camera* = a chamber.] Pertaining to finance or the public revenue.

\* **cám-ěr-al-je-tics, s. pl.** [CAMERALISTIC.] The science of public finance, or the raising and disposition of taxes and public revenue.

**cám-ěr-ár-ya, s.** [Named after J. Camerarius, a botanist of Nuremberg, who died in 1721.]

**Bot.**: A genus of handsome flowering shrubs, order Apocynaceae. *Cameraria latifolia* is the Bastard Manchineel-tree. It is so called from possessing properties like those of the True Manchineel (*Hippomane Manchinella*), which is of the Euphorbiaceae order.

**cám-ěr-áte, v.t.** [Lat. *cameratus*, pa. par. of *camero* = to vault; *camera* = a vault, chamber.]

\* 1. **Arch.**: To build in the form of a vault, to arch over or cell.

**cám-ěr-á-tǐng, pr. par., a., & s.** [CAMERATE, v.]

**A. & B. As pr. par. & particip. adj.**: (See the verb.)

\* **C. As subst.**: The act of building in the form of a vault, or of arching over and ceiling a compartment.

\* **cám-ěr-á-tion, s.** [Lat. *cameratio*, from *camero* = to arch.] A vaulting or arching over, the constructing of a vault or arch.

"We have shewed the use where two arches intersect, which is the strongest manner of *cameration*."—*Evelyn*: *On Architecture*.

\* **cam-er-elle, s.** [Low Lat. *camerella*, dim. of *camera* = a chamber.] A little chamber, a closet.

"A *camerella*; *camerella*."—*Cathol. Anglicum*.

**cám-ěr-ō-ni-an, a. & s.** [Called after the Rev. Richard Cameron, a noted Scotch Presbyterian Covenanter and field preacher, who, entering the little town of Sanquhar, in Dumfriesshire, on the 22nd June, 1680, boldly issued a proclamation renouncing his allegiance to Charles II., and declaring him deposed for breach of covenants, tyranny, and other alleged crimes. Mr. Cameron was killed in a conflict with the military at Airdsmoas, in Kyle, and those with him slain, taken, or dispersed. His followers became a separate denomination soon after the revolution of 1688, and developed into the Reformed Presbyterianism. [REFORMED PRESBYTERIANS.]

**A. As adj.**: Pertaining to or in any way connected with the above-mentioned Richard Cameron or his followers.

† **Cameronian regiment**: The 26th of the British army. [B.]

"The Earl of Angus was able to raise a body of infantry, which is still, after the lapse of more than a hundred and sixty years, known by the name of the *Cameronian Regiment*."—*Macaulay*: *Hist. Eng.*, ch. xlii.

**B. As substantive**:

**Ch. Hist.**: A follower of the Rev. Richard Cameron. At the time of his death, his adherents had not separated from their Presbyterian brethren. They did so, however, after the Revolution of 1688, and became a distinct denomination. Though in certain respects they disapproved of the settlement then made, yet they considered it a vast improvement on that of the preceding Stuart dynasty, and gave it active support. The government of William and Mary, in consequence, when in some danger from the Jacobites, raised two regiments from the Cameronians, one of which (that mentioned above) still remains part of the British army. [CAMERONIAN REGIMENT.] For the subsequent history of the Cameronians see *Reformed Presbyterians*.

† **cám-ěr-ý, s.** [Etym. unknown.]

**Farriery**: The frounce, a disease in horses.

**camés, s.** [Etym. doubtful; perhaps from *calmés*, s. pl. (q.v.).] Small slender rods of cast lead in glazing; twelve or fourteen inches long, of which, when drawn separately through a species of vice, forming a groove on each side of the lead, the glaziers make the patterns for receiving the glass of cementa, and for stained-glass windows. **camp**, s. [A.S. *camp*; Fr. *camp*; Ital. & Sp. *campo*; Lat. *campus* = a field.]

I. *Ordinary Language*:

1. *Literally*:  
(1) A field, a plain, a level surface.  
(2) The same as II. 1.  
" . . . shall one carry forth without the camp."—*Lev. xvi. 27.*

"Beyond the limits of his camps and fortresses he could scarcely be said to have a party."—*Macculay: Hist. Eng.*, ch. I.

(3) A division of a settlement.

"And the children of Israel shall pitch their tents, every man by his own camp . . ."—*Numb. I. 52.*

2. *Figuratively*:

(1) Applied to any level surface, even to the sea, as a plain.

"To search all corners of the watery camp."  
*Sylvester: Du Bartas*.

(2) The army or number of persons encamped together in tents or other temporary lodgings.

"Both camps approach, their bloody rage doth rise."  
*Miltoe: Mass. at Paris*, II. 5.

(3) An army in the field.

" . . . and in this situation, erryryng; more show than real force with it, the camp arrived at Bernice."  
—*Burns: History of England*, v. 219.

(4) Military service, "the field."

(5) A multitude, a host.

II. *Technically*:

1. *Mil.*: The space occupied by an army halted with tents pitched.

(1) *Old British Camp*: A camp not angular

occurring in England is, as a rule, of British origin; one with angles is presumably Roman.

(2) *Old Roman Camp*: A Roman encampment was, as a rule, a square, each side of it 2,150 Roman or 2,077½ English feet. Each of

the sides had a gate. The *principia*, or principal street, ran from side to side, not quite bisecting each of them. In the rear of it was another one parallel to the first. Behind this, part of the allied forces were encamped. In the centre, between the two streets, were the quarters of the prætor commanding and his staff. Between the *principia* and the front of the camp the body of the troops were en-

camped. A street called *quintana* ran parallel to the others through the centre of this main part of the camp, and five streets crossed it at right angles.

(3) *Modern Field Camp*: If not near the enemy, infantry are distributed on dry ground, the cavalry near water, the artillery near good roads, the hospital and transport in rear. If near the enemy, they are arranged in order of battle. Sloping, grassy land, with no brush-wood, affords the best site, which is selected by the quarter-master general's department. *Infantry*: frontage, that of the battalion in line, or half that space; tents in lines at right angles to front, one row for each company. *Cavalry*: four rows of tents, horse-lines between the rows. *Artillery*: guns in line in front, then horse-lines, wagons, and men's tents. In each case kitchens, officers' tents, and regimental baggage in rear of all.

(4) *Camp of Instruction*: A camp, either temporary or permanent, for the purpose of hardening soldiers and accustoming them to field duty.

(5) *Intrrenched camp*: A space of ground large enough to contain an army, and protected by a chain of permanent or temporary detached works.

2. *Agric.*: A mound of earth under which potatoes and other vegetables are stored, as a protection against frost.

† Compounds of obvious signification: *Camp-bedstead*, *camp-boy*, *camp-stre*, and *camp-followers*.

**camp-bed**, s. A small light cot or bedstead, generally of iron, for the use of military men or travellers.

**camp-ceiling**, s.

*Arch.*: A ceiling in which the marginal portion is sloping, following the line of the rafters, while the mid-portion is level.

**camp-chair**, s. A form of folding chair adapted to be carried by a pedestrian, or packed away in an ambulance or wagon when on the march. [FOLDING-CHAIR.]

**camp-fever**, s.

*Med.*: The name popularly given to all those forms of fever which occur during a campaign, when large bodies of men are camped out and huddled together in a limited space, without a proper regard to the laws of sanitation and to the necessary supply of pure air, water, and food. The fever most likely to occur under such circumstances is typhoid, typhus, malignant and common typhoid, intermittent (ague), dysentery, diarrhoea, &c.

\* **camp-fight**, s. The decision of any dispute by combat; a trial by arms.

"For their trial by *camp-fight*, the accuser was, with the peril of his own body, to prove the accused guilty."  
—*Hakewill*.

To serve in the field with an army.

"... the officers who *campaigned* in the late rebellion."—*Sir R. Musgrave's History of the Irish Rebellion*, p. vi.

**camp-paign-ër** (*g* silent), *s.* [Eng. *campaigner*; -ër.] One who serves in a campaign, a soldier.

"Both horse and rider were old *campaigners*."—*Smollett's Expedition of Humphrey Clinker*.

**camp-paign-îng** (*g* silent), *pr. par.* & *s.* [CHAMPAIGN, *v.*]

**A. As pr. par.** (See the verb.)

**B. As subst.**: The act of serving with an army in the field.

\* **camp-pä-na**, *s.* [Low Lat. *campana* = a bell. In Sp. & Ital. the flower is also called *campana*, from the shape of the flowers.]

1. *Ord. Lang.*: A bell, especially one for a church.

2. *Bot.*: The pasque flower.

"*Campana* here he crops, accoutred wondrous good."

*Drayton's Polyol.*, s. 13.

**camp-pa-nal**, *a. & s.* [From Low Lat. *campana* = a bell; and suff. -al.]

**A. As adjective**:

*Bot.*: Pertaining to the genus *Campanula*, as "the Campanal alliance."

**B. As subst.** (*Pl. Campanals*): The English name given by Lindley to his alliance *Campanales* (q.v.).

**camp-pan-ä-lëg**, *s. pl.* [From Low Lat. *campana* = s bell; and pl. m. or f. suff. -ales.]

*Bot.*: *Campanals*, an alliance of plants, ephlygnous Exogens, containing dichlamydeous monopetalous flowers and an embryo with little or no albumen. Lindley places in it the orders *Campanulaceæ*, *Lobeliaceæ*, *Goodeniaceæ*, *Stylidiaceæ*, *Valslerianaceæ*, *Dipsacaceæ*, and *Asteraceæ* (q.v.).

† **camp-pä-ne**, *s.* [Lat. *campana* = a bell.]

*Her.*: A bell, or bell-shaped vessel borne on coat-armour.

† **camp-pä-ned**, *a.* [Lat. *campana* = a bell.]

*Her.*: Furnished with or bearing bells.

**camp-pan-ê-rô**, *s.* [Sp.]

*Zool.*: The Bell-bird, a native of Brazil.

† **camp-pän-ÿ-form**, *a.* [Lat. *campana* = a bell; *forma* = form, shape.]

*Bot.*: Bell-shaped: an epithet applied to flowers which resemble a bell in shape.

**camp-pän-i-lë**, *s.* [Ital. & Low Lat. *campanile* = a bell-tower, steeple; *campana* = a bell.]

A tower for the reception of bells, principally used for church purposes, but now sometimes for domestic edifices. The campanile at Cremona is very celebrated, being 395 feet high. That at Florence, by Giotto, is 267 feet high, and 45 feet square. The most remarkable of the campaniles is that at Pisa, commonly called the "Leaning Tower." It is cylindrical in form, and surrounded by eight stories of columns, placed over one another, each having its entablature. The height is about 150 feet to the platform, whence a plumb-line lowered falls on the leaning side nearly thirteen feet outside the base of the building. (*Swilt*.)

\* **camp-pan-ll-ÿ-form**, *a.* [Ital. *campanilla* = a little bell; dimin. of Lat. *campana* = a bell; *forma* = shape, form.] Bell-shaped.

**camp-pan-öl-ö-gÿst**, *s.* [Eng. *campanology* (y) -ist.] One skilled in the science of campanology or bell-ringing.

**camp-pan-öl-ö-gÿ**, *s.* [Lat. *campana* = a bell, and Gr. *lógos* (*logos*) = a treatise, discourse.] The science of bell-ringing; a treatise on bell-ringing.

**camp-pan-ÿ-lä**, *s.* [Low Lat. *campanula* = a little bell, dim. of *campana* = a bell.]

*Bot.*: The Bell-flower, so called from the shape of its flowers. An extensive genus of herbaceous plants, giving the name to the order *Campanulaceæ*. *Campanula rapunculus*, Rampion, is much cultivated for the roots, which are boiled tender and eaten hot with sauce, or cold with vinegar and pepper. Of the British species *C. latifolia* is the finest; the flowers are large and blue, or (in the Scottish woods) sometimes white. The best known species is *C. rotundifolia*, the Harebell, or Blue-bell of Scotland. All the foregoing species are British. A foreign one, *Campanula glauca*, is said by the Japanese to be a tonic.

**camp-pan-ÿ-lä-çö-ö**, *s. pl.* [Lat. *campanula*, and fem. pl. suff. -aceæ.]

*Bot.*: A natural order of plants, chiefly natives of the north of Asia, Europe, and North America. More than 200 species of this family are known, of which more than 80 are indigenous or cultivated in Britain.

**camp-pan-ÿ-lär-ÿ-a**, *s.* [Low Lat. *campanula* = a little bell.]

*Zool.*: The type genus of the family *Campanulidae*, in which the cup-shaped hydrotheca are borne at the end of rigid stalks. The polypites bear a circle of tentacles below the conical proboscis.

**camp-pän-ÿ-lä-r-ÿ-dä**, *s. pl.* [From Mod. Lat. *campanularia*; fem. pl. suff. -idæ.]

*Zool.*: A family of calyptoblastic Hydrozoa.

**camp-pän-ÿ-lär-ÿ-dä**, *s. pl.* [From Mod. Lat. *campanularia*, (q.v.), & neut. pl. suff. -idæ.]

*Zool.*: An order of hydroid Zoophytes. They are closely allied to the Sertularids, but their hydrotheca, with their containing polypites, are supported on conspicuous stalks, and are terminal, while those of the Sertularida are sessile or subsessile and placed laterally.

**camp-pän-ÿ-läte**, *a.* [Low Lat. *campanulatus*, from *campanula* = a little bell, dim. of *campana* = a bell.]

*Bot. &c.*: Having the shape or form of a bell, bell-shaped.

**camp-pän-ÿ-lä-r-ÿ-nä**, *s.* [Low Lat. *campanula* = a little bell; neut. pl. suff. -ina.]

*Zool.*: A genus of calyptoblastic Hydrozoa, the typical one of the family *Campanulinidae*. There are three species. Stem simple or branched rooted; cells pointed above; polypes cylindrical, with webbed tentacles. Reproduction by free medusa webs, single in each capsule. (*Griff. & Henfrey*.)

**camp-pän-ÿ-lin-ÿ-dä**, *s. pl.* [From Mod. Lat. *campanulina*, the type; and fem. pl. suff. -idæ.]

*Zool.*: A family of sertularian or calyptoblastic Hydrozoa, with ovatoconic cells, stalked; polypes long, cylindrical, with a small conical proboscis.

\* **cam-par**, *s.* [CAMPER (2).]

**Camp'-bell-ite** (*p* silent), *s.* [From the name of a denomination founded by two Baptist ministers of Kentucky, Thomas and Alexander Campbell. The Campbellites style themselves Disciples of Christ, and are also called New Lights.]

**camp-cöil-ÿng**, *s.* [Mid. Eng. *cam* = crooked, curved, and *ceiling*.]

*Arch.*: A ceiling whose form is convex inwardly.

**Cäm-pë-a-çhÿ**, **cäm-pë-a-çhÿ**, *s. & a.* [From the Gulf of Campechy, in Mexico, whence the wood is imported.]

**campechy-wood**, **campeche-wood**, *s.* The red dye-wood better known by the name of Logwood, obtained from the *Hæmatarylon Campechianum*.

**camp-pë-phag-a**, *s.* [Gr. *κάμψη* (*kampê*) = a caterpillar; *φαγεῖν* (*phagein*) = to eat.]

*Ornith.*: A genus of birds belonging to the Laniidae or Shrike family. It is the typical one of the sub-family *Campephaginae* (q.v.).

**camp-pë-pha-çÿ-næ**, *s. pl.* [From Mod. Lat. (from Gr.) *campephaga* (q.v.), and Lat. fem. pl. suff. -inæ.]

*Ornith.*: A sub-family of Ampelidæ (Chstreters). They are found chiefly in the warmer parts of the Old World. None are British.

† **camp-ër** (1), *s.* [CAMP (1), *v.*] One who encamps or lodges in a tent in the field.

**camp-ër** (2), \* **cam-par**, *s.* [CAMP (2), *v.*] A football-player.

\* **cam-pës-träl**, \* **cam-pës-tri-an**, *a.* [O. Fr. *campestre*; Fr. *campestre*; from Lat. *campestris* = pertaining to the field; *campus* = the field.] Growing in the fields or country, wild.

\*căm-phêr-ê, s. [COMFREY.]

căm-phíc, a. [Eng. *camphor*; -ic.] Pertaining to camphor.

camphic acid, s.

Chem.:  $C_{10}H_{16}O_2$ . Obtained by heating camphor with alcoholic soda solution in sealed tubes to  $170^{\circ}$ – $180^{\circ}$  along with camphol. The solution is neutralised with  $H_2SO_4$ , dissolving out the sodium camphate with alcohol, evaporating and adding  $H_2SO_4$  which precipitates the camphic acid, which is insoluble in water but soluble in alcohol. Its salts are called camphates.

căm-phín'e, s. [CAMPHENE.]

căm-phô-gên, s. [From Eng. *camphor*; Mod. Lat. *camphora*; and Gr. *γεννάω* (*gennáo*) = to produce.]

Chem.: The same as CAMPHENE (q.v.).

căm-phô-l, s. [From Low Lat. *camphora* = camphor, and *oleum* = oil.]

Chem.:  $C_{10}H_{17}(OH)$ . A monatomic alcohol; there are several modifications, distinguished by their action on polarised light, as Borneo camphor or Borneol, obtained from *Dryobalanops camphora*, dextro 33'4". Another dextro, 44'90", is formed together with camphic acid by the action of alcohol potash on common camphor. A third dextro, 45', by distilling amber with potash. A fourth, called *levo-camphol levo*, 33'40", is found in the alcohol obtained by the fermentation of madder-root sugar. Dextro-rotary camphol forms small transparent colourless hexagonal prisms, which melt at  $198^{\circ}$  and distil at  $212^{\circ}$ ; soluble in alcohol and ether, insoluble in water. *Levo-rotary camphol* forms a crystalline white powder slightly soluble in water. Camphol distilled with  $P_2O_5$  gives a hydro-carbon,  $C_{10}H_{16}$ . Boiled with nitric acid it is reduced to common camphor, giving off two atoms of H.

căm-phô-l-ête, s. [From Eng. &c. *camphol*, and suffix -ate (Chem.) (q.v.).]

Chem.: Camphor fused with potash unites directly with it and forms potassium campholate,  $C_{10}H_{17}KO_2$ .

căm-phôr, \*căm-phîre, s. & a. [In Sw. & Dut. *kamfer*; Dan. *kampfer*; Ger. *kampfer*; Wel. *camphyr*; Fr. *camphire*; Sp. *camfor*, *camfora*, *alcamor*; Port. *alcamor*, *camphora*; Ital. & Low Lat. *camphora*; O. Ital. *cafura*; Gr. (from Arab.) *káphourá* (*kaphoura*). Cf. also *karpion* (*karpion*) = an Indian tree; Arab. & Pers. *káfrá*; Malay *kápár*; Hindust. *kápura*; Sansc. *karpára*.]

A. As substantive:

1. Ordinary Language: The substance described under II.

"Yet the country is exceeding good, abounding with all commodities, as *Beach*, *corn*, *rice*, *silver*, *gold*, *wood of aloes*, *camphire*, and many other things."—*Hackluyt's Voyages*, II. 54.

II. Technically:

1. Bot.: [See 2 Chem.]

¶ *Borneo- or Sumatra Camphor*: A kind of camphor made from *Dryobalanops aromatica*, or *Dryobalanops camphora*, s. genus of the order Diptera or Dipterida. It differs from ordinary camphor in having six-sided crystals. It is valuable, but rarely obtained here.

2. Chem.:  $C_{10}H_{16}O$ . It is called also Laurel Camphor. Camphor is obtained by distilling with the leaves and wood of the camphor-tree, *Camphora officinarum*, formerly called *Laurus camphora*. It is a solid white volatile crystalline mass, tough and difficult to powder, has a peculiar odour; thrown on water it revolves and is slightly soluble. It is very soluble in alcohol, ether, and strong acetic acid. It has a dextro-rotary action on polarised light. Many essential oils deposit an inactive variety. [STEARPTENSE.]

3. Comm.: Most of the camphor imported into this country comes from Formosa *via* Singapore. It is used to preserve natural history collections and clothes in drawers from the ravages of insects.

4. Pharm.: A powerful diffusible stimulant and antispasmodic, very useful, combined with extract of henbane, in genito-urinary irritation. It enters into union with opium, as a sedative, under the name of compound tincture of camphor or paregoric. It is useful in adynamic fevers, and has been employed in the treatment of hysteria, epilepsy, chorea, and whooping-cough and ex-

ternally, as a stimulant to stiff and painful parts, as a liniment. Official preparations: Aqua camphoræ, linimentum C., linim. C. comp., spiritus camphoræ, and tinctura camphoræ composita. Camphor is a poison to the lowest forms of animals and plants. It is antiseptic. In large doses it lowers the pulse and temperature, and produces headache, sickness, coldness of extremities, feeble circulation, unconsciousness, and even death. Undiluted it is a powerful irritant to mucous membranes and raw surfaces. "An artificial camphor can be made by passing hydrochloric acid gas through volatile oil of turpentina" (*Garrod*). The virtue imputed to it of preventing infectious diseases is not founded on correct observation.

B. As adjective: (See the compounds).

camphor-gland, s.

Bot.: The gland in the camphor-tree which secretes the substance after which it is named.

camphor-oil, s. An aromatic oil obtained from the *Dryobalanops* mentioned above. It has been used for scenting soap.

camphor-tree, s. A tree belonging to the order Lauraceæ, which furnishes camphor. It is the *Camphora officinarum*. It has ribbed

BRANCH OF THE CAMPHOR TREE.

leaves, nine stamens, and four-celled anthers. It grows in Formosa. The chopped branches of the tree are boiled in water, the camphor being deposited after a time and then sublimated in order to remove its impurities. There are two sorts of this tree: one is a native of the island of Borneo, from which the best camphor is taken, which is supposed to be a natural exudation from the tree, produced in such places where the bark of the tree has been wounded or cut. The other sort is a native of Japan, which Dr. Kamper describes to be a kind of hay, bearing black or purple berries, from whence the inhabitants prepare their camphor, by making a simple decoction of the root and wood of this tree, cut into small pieces; but this sort of camphor is, in value, eighty or a hundred times less than the true Bornean camphor. (*Miller*.)

†căm-phôr, \*căm-phîre, v.t. [CAMPHORA, s.] To impregnate or combine with camphor, to wash with camphor.

"Does every proud and self-affected dame Camphire her face for this?"

Tourneur: *The Revenger's Tragedy*.  
"Wash-balls perfumed, camphired, and plain, shall restore complexion."—*Trotter*, No. 101.

căm-phôr-a, s. [CAMPHOR.]

Bot.: A genus of plants, order Lauraceæ. *Camphora officinarum* is the Camphor-tree or Camphor Laurel. [CAMPHOR-TREE.]

căm-phôr-ã-ô-nũr, a. [Eng. *camphor*; -aceous.] Of the nature of or containing camphor.

căm-phôr-âte, v.t. [CAMPHORATE, a.] To impregnate, combine, or wash with camphor.

\*căm-phôr-âte, a. & s. [Eng. *camphor*; and suff. -ate (q.v.).] In Sp. *alcamorado*.  
A. As adjective: Impregnated or saturated with camphor, camphorated.

"By shaking the saline and camphorated liquors together, we easily conformed them into one high-coloured liquor."—*Boyle*.

B. As substantive: [CAMPHORIC ACID.]

căm-phôr-ã-têd, \*căm-phîr-ã-têd, pa. par. or a. [CAMPHORATE, v.] Impregnated or combined with camphor.

căm-phôr-íc, a. [From Eng. &c. *camphor*; and suff. -ic.] Pertaining to camphor; occurring in or derived from camphor.

camphoric acid, s.

Chem.:  $C_{10}H_{16}O_4$ . Formed by the action of hot nitric acid on camphor. Camphoric acid is slightly soluble in cold water; it crystallises in small colourless needles. By distillation it yields a colourless crystalline substance, camphoric anhydride or oxide,  $C_{10}H_{14}O_2$ . Calcium camphorate, by dry distillation, yields a ketone volatile oil called *Phorone*,  $C_8H_{14}O$ .

căm-phôr-ôs-mã, s. [From Mod. Lat. *camphora*, and Gr. *ὀσμή* (*osmê*) = smell.]

Bot.: A genus of Chenopodiaceæ, the plants of which have a smell like that of camphor. All are found in Asia, except one on the Mediterranean.

căm-phyl, s. [Eng. *camphor*, and suffix -yl; from Gr. *ψῆλ* (*hulê*) = . . . matter, as a principle of being.]

Chem.: A monad radical ( $C_{10}H_{17}$ ). [BONEOL.]

camphyl chloride, s.

Chem.:  $C_{10}H_{16}HCl$ . A crystalline levo-rotary substance, isomeric with the hydrochloride of turpentine oil. It is prepared by heating camphol in a sealed tube with HCl.

"In our island, the exhibition of those manly sports in vogue among country people is called *camping*."—*Dryden: Anc. Mythology*.

căm-phî-ôn, \*căm-phî-ôn, \*căm-phî-ôn, \*căm-phî-ôn, s. [CHAMPION.]

1. *Ord. Lang.*: A champion.

"Quen dangel occurrit, thay refusit na manner of beesnes nor labour that myght pertene to forsy champion."—*Beilend: Descr. Alb.*, c. 14.

2. Botany:

(1) A book-name for various species of *Lychnis*. Prior thinks the name was given because the plant was used in chapleta with which champions at the public games were crowned.

(2) A name for various species of *Silene*.  
(3) A name for the *Cucubalus baccler*, a silenaceous plant.

¶ *Lychnis chalcædonicæ* is the Champion of Constantinople; *L. Gilthago* is the Corn Champion; *L. Flos-cuculi*, the Meadow Champion; *Silene acutis*, the Moss Champion; *Lychnis diurna*, the Red Champion; *L. coronaria*, the Rose Champion, and *L. vespertina*, the White Champion.

căm-phô-dê-a, s. [From Gr. *κάμπη* (*kampê*) = a caterpillar; and *εἶδος* (*eidos*) = form, from their elongated shape.]

Entom.: A genus of Thysanura. The insects, like their allies the Lepismae, live under stones and in other dark places. Sir John Lubbock thinks it a modern representative of an ancient type form from which the higher insects originally took their rise. (*Nicholson: Zool.*)

căm-phô-rũ-ly, a. [CAMP (2), v.] Contentious, quarrelsome. (*Scotch.*)

căm-phô-gêr-cũs, s. [Gr. *καμπτός* (*kampotos*) = bent, curved; & *κέκος* (*kekos*) = a tail.]

Zool.: A genus of Entomostraca, of the order Cladocera, and family Lynceidæ. There is only one species, *Campocercus macrourus*. Carapace striated longitudinally, slightly sinuated and ciliated on the anterior margin; beak rather blunt. It is aquatic. (*Griff. & Hervey.*)

căm-phô-tê-rô-pal, a. [Gr. *καμπτός* (*kampotos*) = curved, bent, and *τροπή* (*tropê*) = a turning, a turn.]

Bot.: For definition and example see CAM-PULTRIPROUS.

bôn, bôn; pôt, jôw; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, exist. -îng. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tions, -sious = shüs. -ble, -dle, &c. = hpl, dpl.

**camp-tŭ-lī-cōn, s.** [Formed from Gr. *καμπτός* (*kampōtos*) = flexible, from Gr. *κάμπτω* (*kampō*) = to bend, curve; and *ὄλος* (*oulos*) = woolly, curled.] It is merely a trade name.  
**Fabrics:** A compound used as a substitute for carpet or oil-cloth. It is made by a combination of powdered cork and the poorer qualities of india-rubber, and is painted or ornamented on the surface like oil-cloth. It is not suitable for chambers, as being a good conductor of heat, and feeling as cold to the bare feet as wood or oil-cloth. It may be employed for cleaning knives, which is done by covering a strip of wood with it; then sprinkling the surface with the cleaning powder, and rubbing on the knife. The surface does not wear away, and the result is very satisfactory.

**camp-ŭ-lit'-rō-poūs, cām-pŷ-lit'-rō-pal, cām-pŷ-lōt'-rō-poūs, a.** [Gr. *καμπύλος* (*kampylos*) = curved, and *τροπή* (*tropē*) = a turning.]

**Bot.:** Having the ovule so bent or curved that the micropyle, chalazs, and hilum are near each other.

"Such ovules are called *campyloptropal* or *campylo-tropous*, when the portions either side of the line of curvature are unequal, or *campitropal* when they are equal."—*Balfour: Botany*, p. 256.

**camp'-ŷ, a.** [CAMP (2), v.] (*Scotch.*)

1. Brave, heroic.
2. Ill-natured, quarrelsome.

**camp'-ŷl-ite, s.** [Gr. *καμπύλος* (*kampylos*) = bent, crooked, curved, and Eng. suff. *-ite* (*Mfin.*) (q.v.).]

**Mfn.:** A variety of Mimetite or Mimetesite. Dana places it under his third variety, i.e., that containing much phosphoric acid. It is found at Drygill, in Cumberland.

**camp'-ŷl-ō-dīs-ōūs, s.** [Gr. *καμπύλος* (*kampylos*) = curved, bent; *δίσκος* (*diskos*) = a disk.]

**Bot.:** A genus of Diatomaceae, with frustules single, free, disk-shaped; the disk curved or twisted (saddle-shaped); furnished with mostly radiate markings, frequently interrupted. They are aquatic and marine. Smith describes nine species. (*Griff & Henfrey.*)

**camp'-ŷl-ōp-tēr-ŷs, s.** [Gr. *καμπύλος* (*kampylos*) = curved; *πτερόν* (*pteron*) = a wing.]

A. As substantive:
Geog.: A widely-extended region on the north or left bank of the St. Lawrence River and its great lakes. The country is said to have been discovered by Giovanni and Sebastian Cabot in 1497. The French assumed nominal possession of it in 1525, but did not establish the first permanent settlements in it till 1608. In 1759, Quebec, the capital of Canada (Lower Canada), was taken by General Wolfe, and in 1763 the whole territory was formally ceded to the English by the Treaty of Paris. In 1867, Upper and Lower Canada (Ontario and Quebec), with Nova Scotia and New Brunswick, were united into a Dominion.

B. As adjectives: (See the compounds).

Canada-balsam, s. A pale balsam, resin, or oleo-resin, obtained by incision from a Canadian tree, the American Silver-fir, sometimes called the Balm of Gilead Fir (Abies balsamea). Canada-balsam is of the consistence of thin honey, drying slowly by exposure to the air into a transparent adhesive varnish. It is used to mount objects for the microscope and for other optical purposes. Thus, when it is sought to cut thin a piece of fossil wood, or anything similar, so as to subject it in favourable circumstances to microscopic examination, it is affixed to a more massive body by Canada-balsam.

Canada-rice, s. A grass, Zizania aquatica.

\* 2. Any channel or means of communication.

II. Technically:
1. Hydraulic Engineering: In the same sense as I. 1.

2. Hist.: The Egyptians very early made a canal connecting the Nile and the Red Sea. It was reopened by Pharaoh Necho about 605 B.C., and at intervals by others after him. Most of the ancient nations had canals. The great canal of China was constructed partly in the seventh and partly in the ninth century, A.D.; it is 825 miles long. The first known English canal was cut by the Romans at Caerdike. The Trent and the Witham were joined in 1134, and the Bridgewater canal was commenced in 1759. The Caledonian canal was projected in 1808, but not opened till 1822. The Erie canal was begun in 1817 and completed in 1825. The Suez canal, connecting the Mediterranean and the Red Sea, was opened on the 17th November, 1869. The attempted canal across the Isthmus of Darien proved a failure. One is projected, from the Atlantic to the Pacific through Nicaragua. It is proposed that this canal shall be controlled and operated by our own people, to whom it will give convenient and speedy communication between Atlantic and Pacific ports; providing also great strategic advantage in case of war with a foreign power. The great Kiel canal, constructed by the German government for strategic purposes, connects the waters of the Baltic and North Seas. It was formally opened on June 20, 1896.

Tropic of Cancer: [TROPIC.]

4. Med.: A malignant growth which is found in different parts of the human body, having a tendency to spread more or less rapidly and ultimately to terminate in death. Cancer is an inherited disease, and its growth is in all probability due to some peculiar morbid material separated from the blood, and which is constantly being renewed. Two kinds of cancer are usually described, viz., schirrus or hard cancer, and medullary or soft cancer; but there are several varieties of the latter. Hard cancer occurs most frequently in the female breast, axilla, parotid gland in the neck, and in the rectum. Soft cancer affects for the most part the internal organs, as the liver, spleen, kidneys, stomach, &c.; but there is scarcely any organ or tissue of the body which may not become the seat of this form of the disease. Hard cancer rarely occurs until after forty years of age, and is usually slow in its progress. Soft cancer, on the other hand, is most common in early life, and generally runs a very rapid course. Cancers may, under certain circumstances, be removed by surgical operation, but they are almost certain to return.

"Cancer, sakenessa. Cancer."—Praxip. Pars.

"The word of him creepth as a cancer."—Wicliffe: 2 Tim., II, 17.

\* can-el (2), \* chan-elle, s. [CANAL.]

"Canel or chanella. Canalla."—Prompt. Parv.

\* canel-bone, \* canelboon, s. [CANAL-BONE.]

ca-nêl'-la, s. [Lat. dim. of canna = a reed, from the shape of the rolled-up bark.]

Bot.: A genus of plants, belonging to the order Guttifera, but of which the affinities are so doubtful that it has been made the type of a distinct order, Canellaceæ (q.v.). They are ornamental shrubs or trees. Canella alba is a common West Indian aromatic evergreen shrub. It is called also Wild Cinnamon.

canella alba, s.

Bot. & Com.: The botanical and commercial name of a cheap aromatic bark, chiefly obtained from the Bahamas. (Craig.)

canella-bark, s.

Bot.: The bark of Canella alba. [CANELLA.] It is called in the Bahamas White-wood Bark, from the colour of the trees from which it has been stripped. It yields by distillation a warm aromatic oil, which is carminative and stomachic. In the West Indies it is often mixed with oil of cloves. (Lindley, &c.)

canella de chevro, s. The Brazilian name for an oil distilled from the fruit of Orodaphne opifera, a lauraceous tree growing abundantly in South America between the Oronoko and the Parime rivers. The oil is limpid and volatile, of a yellow wine colour, an aromatic acrid taste, and a smell as if old oil of orange-peel had been mingled with that of rosemary. An oil which gushes copiously from the tree itself when incisions are made into it, is considered to be a powerful discutient.

cân-êl-lâ'-cê-ô-s, s. pl. [From Mod. Lat. canella (q.v.), and fem. pl. suff. -acœs.]

Bot.: A family of plants established by Von Martius, though not universally accepted by other botanists. Calyx leathery, of three imbricated sepals; petals five, twisted in ætivation; stamens about twenty, united into a column, with the anthers sessile on the outside; ovary one-celled, with two or three ovules. Of doubtful affinity. Probably akin to Bixacœæ. (Lindley, &c.) [CANELLA.]

cân-êl-lâ'-cê-ô-s, a. [Lat. canella; Eng. adj. suff. -acœus.]

Bot.: Pertaining to the order of plants of which Canella is the type. (Craig.)

câ-nês, s. pl. [Lat. canis = a dog.]

canes venatici, s. pl. [Lat. canes = dogs; venatici = pertaining to hunting; venor = to hunt.]

Astron.: The Greyhounds, the name of two northern constellations, in which Hevelius, by whom it was formed, reckoned twenty-five stars, but the British Catalogue only ten.

ca-nês'-çent, a. [Lat. canescens; pr. par. of canesco = to become white, caneo = to be white.] Become white in colour, assuming a white colour.

\* câ-n'-ê-vâs, s. [CANVASS.]

"On the floor y-caut a canvassa." Chaucer; C. T., 13, 866.

câng, s. [Chinese.] A wooden collar, generally of fifty to sixty lbs. weight, worn round the neck as a legal punishment in China. It is called also kea. (Sir George Staunton, J. F. Davis, &c.)

cân'-gân, s. [Chinese.]

Fabrics: Chinese coarse cotton cloth. It is in pieces six yards long, nineteen inches wide, and has a fixed currency value. (Knight.)

câng-lêr, s. [Cang(e)-er.] A jangler. (Scotch.)

câng-ling, pr. par. & s. [CANOLE, v.] (Scotch.)

A. As pr. par.: Jangling.

"At last all cometh to this, that we are in end found to have beene neither in mood nor figure, but only jangling and cangling."—Z. Boyd: Last Battell, p. 530.

B. As subst.: Altercation.

can-îo'-u-lâ, cân-îo'-ûle, s. [Lat. canicula; dim. of canis = a dog.]

Astron.: The constellation known as the Dog-star, the principal star in which, Sirius, rises heliacally between the 15th of July and 20th of August.

"Among all these inconveniences, the greatest I suffer is from your departure, which is more afflicting to me than the canicula."—Addison: Letter in the Student, ii. 68.

can-îo'-u-lar, a. [Fr. caniculaire; Lat. canicularis; from canicula = a little dog; dimin. of canis = a dog.] Of or pertaining to Canicula, or the Dog-star.

canicular days, s. pl. The dog-days—the period during which the dog-star rises and sets with the sun, viz., July to August. In old, and indeed till comparatively recent times, the great heat, and the consequent diseases which are prevalent at this time of the year, were popularly ascribed to the influence of this star.

"In regard to different latitudes, unto some the canicular days are in the winter, as unto such as are under the equinoctial line; for unto them the dog-star ariseth when the sun is about the tropick of Cancer, which season unto them is winter."—Browne: Vulgar Errors.

canicular year, s. The Egyptian year, computed from one heliacal rising of the dog-star to another.

cân-î-dôs, s. pl. [From Lat. canis = a dog, and fem. pl. suff. -idæ.]

1. Zool.: A family of mammals belonging to the order Carnivora and the section Digitigrada. The muzzle is pointed, the tongue smooth, and the claws non-retractile, the last-named character distinguishing it from the Felidæ. The fore feet have five toes each and the hind ones four. Molar teeth, 2/1 and 1/1. The carnassial has a heel or process. It contains the Dogs, Wolves, Foxes, and Jackals. It is akin to the Hyænidæ (q.v.).

2. *Paleont.*: Canids have been found in the Eocene, but this may not have been the first appearance of the family in geological time. There are fossil as well as recent genera known.

**can-ye, cān-nie, a.** [CANNY.] Gentle, mild; dexterous. (Scott.)

"Tha cannie, in some cooie place,

**II. Technically:**  
1. **Mil.:** A conical tube of iron, brass, or steel for discharging projectiles. Its external parts are called caseable, first re-inforce, second re-inforce, chase, muzzle. It is supported on carriages by short arms on each side, forming part of the gun, called trunnions. The bore may be cylindrical or chambered, smooth or rifled. It may be loaded at breech or muzzle. It was first introduced in Europe in the fourteenth century; made of longitudinal iron bars hooped with rings; charge contained in a separate chamber placed in a socket in the breech; shot of lead, iron, or stone. Used by Edward III., at Calais, 1346; in the field at Cressy, 1346; by Venetians, at Choggia, 1366; at Bruges, by the Gantois, 1382; and at Constantinople, by Turka, in 1394. Brass guns, introduced in the fifteenth century, as the "Messenger," at Aberystwith, throwing a 80lb shot; the "King's Daughter," at Harlech, one of 43lbs. Mons Meg, at Edinburgh, calibre twenty inches; the Great Gun of Ghent, twenty-six inches; the English guns at Mont S. Michel, fifteen inches and nineteen inches, are bombards of this period. Designations of guns: Cannon Royal, Bastard Cannon, Half Cartham, Culverine, Bemy-Culverine, Bestliak, Serpentine, Aspik, Dragon, Syren, Myneys, Rabinet, Falcon, Falconet, and Sakor; the last three for field service. Sixteenth century: hollow bronze and iron guns first cast in England (1521 and 1547); made very long and charged with meal-powder; portable "hand-cannon" and small breech-loaders, as the "Pateras," still used; sledge-guns threw 700lb. shot. Seventeenth century: lighter field-guns and cartridges invented; Gustavus Adolphus employed copper guns covered with leather or rope. Eighteenth century: guns cast solid and then bored; carronades introduced. Nineteenth century: Rifled field-guns first employed, in 1859; since then rifling and later breech-loading applied to all calibres. [GUV.]

"The six stars are so remote from the earth, that if a cannon-bullet should come from one of the six stars with as swift a motion as it hath when it is shot out of the mouth of a cannon, it would be 700,000 years in coming to the earth."—Locke: *Elements of Natural Philosophy*, c. 2.

#### cannon-casting, a. & s.

**A. As adj.**: Casting or designed to cast cannon.

**B. As subst.**: The art or operation of casting a cannon. The moulds for brass cannon are formed by wrapping a long taper rod of wood with a peculiar soft rope, over which is spilled a coating of loam, which, as the work proceeds, is dried over a long fire, a template being applied to form the proper outline. This model is made about one-third longer than the gun is to be. It is next, when dry, black-washed, and covered with a shell of loam not less than three inches thick, secured by iron bands, which is also carefully dried. The model is next removed by withdrawing the taper rod and the rope, and extracting the pieces of loam. The parts for the cascabel and trunnions are formed upon wooden models, and then attached to the exterior of the shell; handles, dolphins, or ornamental figures, are modelled in wax, and placed on the clay model previous to moulding the shell, from which they are melted out before casting. The melted metal is then admitted to the bottom of the mould through two gates, one on each side, or in some similar way. Cannons are made solid, and are then bored by being made to revolve around a drill. (*Knight, &c.*)

#### cannon-clock, s.

**ca-nõc, \*ca-noa, \*can-now, \*can-nowe, s. & a.** [*Sp. canoa*, probably a West Indian or Caribbean word.]

**A. As substantive**:

1. *Originally*: A kind of boat in use among uncivilised nations. It is made either of the trunk of a tree hollowed out, or of pieces of bark or hide joined together. Some of the larger size carry sails, but they are generally propelled with paddles. The North American Indian makes his canoe of cedar-wood covered with sheets of the bark of the white birch sewn together. The Indians of the plains used buffalo-hide. In the wooded regions devoid of birch the canoe was a shaped and hollowed log, which was probably the primeval form throughout the world. The canoes of the Feejees are double, of unequal size, the smaller serving as an outrigger. Large ones are 100 feet in length. Captain Cook estimated the naval force of the Society Islands at 1,700 war-canoes, manned by 68,000 men. (*Knight, &c.*)

"In a war against Semlrams they had four thousand monoxyls or canoes of one piece of timber."—*Ars Rerum*: *On Coins*.

2. *Now*: A very little boat, narrow in the beam, propelled by paddles. It is generally of wood, but may be of galvanised iron, can-

wide, 12 inches deep, and has a "comber" of two inches. The opening in the deck in which the voyager places himself is 4 feet long and 1 foot 8 inches wide. A canoe for two persons, sitting face to face, should be about two-thirds larger. The late Mr. John McGregor travelled many thousand miles, chiefly in Eastern waters, in his famous canoe named the Rob Roy. The Royal Canoe Club was founded in 1866.

**B. As adj.:** (See the compounds).

**canoe-birch, canoe birch, s.** A kind of birch—*Betula papyracea*.

**canoe-wood, canoe wood, s.** A magnolaceous plant—the Tulip-tree (*Liriodendron tulipifera*).

**A. As pr. par.:** In the same sense as the verb.

**B. As subst.:** The act or science of rowing or paddling a canoe.

**ca-nôe-îst, s.** [Eng. canoe, and suff. -ist (q.v.).] One who rows or paddles in a canoe. (American.)

**\*can-ôis, a.** [CANOIS.]

**cân-ôn (1), s. & a.** [Lat. canon; Gr. κανών (kanōn)] = (1) a straight rod or bar, (2) a rod used in weaving, (3) a rule or level used by masons in building. Metaphorically a rule as for the guide of conduct. In the ecclesiastical writers the books received as the rule of faith and practice; κανὴν (kanē) or κανὴν (kanne) = a rule or cane. [CANON.]

**A. As substantiv:**

**I. Ordinary Language:**

**1. A rule, a regulation, a law.**

"What is it, for example, that constitutes the difference between a fiction which observes all the canons of probability . . . and a true narrative?"—*Lewis: Credibility of the Early Roman History* (1866), ch. xiv.

(1) **Gen.:** In the foregoing sense.

(2) **Spec.:** A rule in ecclesiastical matters.

2. That which is established by rule. [II. (1) 1 (1).]

3. A person bound by rule. [II. (1) 2 (1).]

**II. Technically:**

(1) **Ecclesiast., Ch. Hist., &c.:**

**1. Of things:**

(1) The ordinances made by ecclesiastical councils for the regulation of religious matters. [CANON-LAW.]

(a) **Gen.:** In the foregoing sense.

"By an ancient canon, those who ministered at the altar of God were forbidden to take any part in the infliction of capital punishment."—*Maccanly: Hist. Eng.*, ch. xxii.

(b) **Spec.:** The rules and regulations laid down as the rule of life for those clergy who reside in community.

(2) The list or catalogue of saints.

(3) **Of the mass:**

That part of the Mass which begins after the Sanctus with the prayer *Te igitur*, and ends, according to some, just before the *Pater noster*, according to others, just before the consumption of the elements. The name canon is given to this part of the Mass because it contains the fixed rule according to which the sacrifice of the New Testament is to be offered. (*Addis & Arnold.*)

**2. Of persons:**

(a) In the same sense as (2).

(1) **In the Church of Rome:** (b) A member of an order of religious persons intermediate between the regular monks and the secular clergy. The canons lived together, ate at the same table, joined in united prayer at stated hours, but did not take vows like those of the monks, besides which they officiated in certain churches. Chrodegang, Bishop of Metz, about the middle of the eighth century, is said to have instituted the order. At first the members were called *Fratres Domini* (the Lord's brethren), but afterwards canons. Lewis the Meek caused rules to be drawn up for their guidance by the Council of Aix-la-Chapelle, A.D. 817, and instituted an order of canons. Having become corrupt, efforts for their reformation were made by Nicolaus II. in the Council at Rome, A.D. 1059. About the same time, some canons

influenced by Ivo, afterwards Bishop of Chartres, renounced private property, and became virtual monks. Hence arose the distinction between *secular* and *regular* canons, the former obeying the rule of Nicolaus II. and the latter following that of Ivo. Ivo's rule being almost the same that St. Augustine had before introduced in his see, the regular canons were often called Canons under the rule of St. Augustine, or simply Canons of St. Augustine. In the twelfth century mutual jealousy created a long and bitter controversy between the monks and the canons. An effort was made in the 17th century to restore the monastic and semi-monastic orders to their pristine purity, and the Reformed Canons regular of St. Augustine arose. Three other regular orders were abolished in 1668 by Pope Clement IX. (*Mosheim.*)

(2) **In the Church of England:** A certain dignity in cathedral churches; a residential member of a cathedral chapter.

"Swift much admires the place and air,  
And longs to be a canon there.  
A canon that's a place too mean;  
No, doctor, you shall be a dean.  
Two dozen canons round your stall,  
And you the tyrant o'er them all." *Swift.*

¶ The name *Canon* Street in London, having reference to the cathedral chapter of St. Paul's, is an indication of the identity of the two words *canon* and *canon*.

(11) **Biblical Criticism & Church History:** Those books of Scripture which are received as inspired and canonical, as distinguished from the apocrypha. [II. 1.]

"Canon also denotes those books of Scripture, which are received as inspired and canonical, to distinguish them from either profane, apocryphal, or disputed books. Thus we say, that *Genesis* is part of the sacred canon of the Scripture."—*Asifife: Parerpon Juris Canonici.*

¶ It is also applied to any one of the canonical epistles (q.v.).

**1. Old Testament Canon:** The ancient canon of the Old Testament is ordinarily attributed, on the authority of Jewish Talmudic tradition, to Ezra (Esdras of the Apocrypha), and the most modern research admits that he at least took the first step in the work by lending strong public sanction to the Pentateuch, and giving it increased currency (Ezra vii. 6, 10, 11; Neh. viii. 1-8, 13-18; 1 Esdr. viii. 3, 7, 9, 19, 23; ix. 89, 40, 42, 45, 46; 2 Esdr. xiv. 21, 22, 25, 26).

A great addition to this first canon seems to have been made by Nehemiah, of whom it is said in 2 Macc. ii. 13, "The same things also were reported in the writings and commentaries of Neemias, and how he, founding a library, gathered together the acts of the kings and the prophets, and of David, and the epistles of the kings concerning the holy gifts." By these designations probably were meant the books from Joshua to 2 Kings inclusive, the four greater and most of the minor prophets, with some of the Psalms.

A third canon seems hinted at in 2 Macc. ii. 14: "In like manner also Judas gathered together all those things that were lost by reason of the war we had, and they remain with us." By Judas is meant Judas Maccabæus. His canon seems to have added Proverbs, the Song of Solomon, Daniel, some of the Psalms, &c., or, speaking broadly, the books called Kethubim in Hebrew, or in Greek Hagiographa. Doubts about the canonicity of parts of Ezekiel, and the whole of Ecclesiastes, Canticles, Esther, and Proverbs, were not set at rest till a decision in their favour was obtained from the Jewish Synod of Jabneh, or Jamnia, about A.D. 90. Josephus soon afterwards arbitrarily fixed the Old Testament books at twenty-two, to make them agree in number with the letters of the Hebrew alphabet, and the Talmud at twenty-four, because that is the number of the Greek alphabet. All the thirty-nine books in our modern Bibles found a place, separate or combined, in those enumerations. Jerome also, like Josephus, made twenty-two, a number which the Council of Carthage, A.D. 397, much enlarged by taking in the Apocrypha. [APOCRYPHA.]

**2. New Testament Canon:** The germ of what afterwards became the New Testament canon was in existence when the Second Epistle of Peter was written (2 Pet. iii. 15, 16). About A.D. 144 the "heretic" Marcion came from Pontus to Rome, bringing with him a collection of sacred books, viz., the Gospel of St. Luke and ten Pauline epistles, those of Timothy and Titus being omitted. According to Dr. Samuel Davidson, the idea of an inspired New Testament canon and of a Catholic church

came into existence together about 170 A.D. The canon which then grew up consisted of two parts, the Gospel [τὸ εὐαγγέλιον (to euangelion)] and the Apostle [ὁ ἀπόστολος (ho apostolos)], the former containing the four gospels, the latter the Acts of the Apostles, thirteen epistles of St. Paul, one of St. Peter, one of St. John, and the Revelation. The canon of Muratori, about the same date, differs in omitting 1 Peter and including 2 and 3 John, as also Jude. Irenæus, Clement of Alexandria, and Tertullian, had all their separate canons. Origen, about A.D. 254, recognised three classes of books—those generally admitted, those not authentic, and those doubtful. Similarly Eusebius, A.D. 340, divided the sacred writings into three classes—those generally received [ὁμολογούμενα (homologoumena)], those controverted [ἀντιλεγόμενα (antilegomena)], and those heretical. The canon of the New Testament, in the form in which we now have it, except that the Apocalypse was ignored, was settled by the Council of Laodicea, A.D. 367, and confirmed by the 14th Council of Carthage, A.D. 397, one of the members present at which being the celebrated Augustine. (*Dr. Samuel Davidson: Canon, &c.*) [BIBLE.]

(111) **Law:**

**1. Eccles. Law:** [CANON LAW.]

**2. English Civil Law:** A rule. Used especially in the expression *Canons of inheritance*, which are the rules regulating the descent of real property when the owner or "purchaser" dies intestate. The Act of Parliament determining such cases is 3 and 4, Wm. IV., c. 106. (*Wharton.*)

(1v) **Music:** A species of musical composition, written according to strict rule (hence the term), in which the different voices take up the same melody, one after another, either at the same or at a different pitch.

"A canon at the union becomes a round, if the antecedent has a cadence before the entry of the consequent."—*Stainer & Barrett.*

(v) **Printing:** A size of type equal to 4-lines

His stubborn steed with canon bit . . ."  
*Spenser: F. Q. I. vi. 27.*

**Canon-law, s.** The body of ecclesiastical law as laid down by the canons.

"This is mere moral babbie, and direct  
Against the canon-law of our foundation."  
*Milton: Comus, 808.*

**History of the Canon Law:**

(1) **Before the Reformation:** A community, civil or religious, no sooner comes into existence than it requires rules for its government, and those first formed require to be modified and developed and added to during the whole period that the community exists. Hence the first germ of the canon law are to be sought for in apostolic times, whilst its complete development took place at the period when the power of the Papacy reached its height. The oldest canons are called *Apostolic canons* (q.v.). The canons of the Councils of Nice (A.D. 325), Constantinople (A.D. 381), Ephesus (A.D. 431), and Chalcedon (A.D. 451) obtained civil sanction by decree of Justinian. Till the twelfth century the canon law consisted mainly of these canons collected, together with the capitularies of Charlemagne and the decrees of the Pope, from Sirleins, A.D. 398, to Atha-

oasius IV., A.D. 1154. In A.D. 1114 Ivo, Bishop of Chartres, commenced to collect the decrees made by popes and the cardinals; Gratian, a Benedictine monk, methodised the collection, and published it in 1150. There followed the Decretals of Gregory IX., in A.D. 1234. [DECRETA.] Next came the "Sext" of Boniface VIII., A.D. 1298 (SEXT), the Clementines or Constitutions of Clement V., A.D. 1303 (CLEMENSINE), and the Extravagants of John XXII., A.D. 1317. [EXTRAVAGANT.] These, with some more recent "Extravagants," constitute the "Corpus Juris Canonici" (The Body of Canon Law). Some lawyers graduated in canon and others in civil law, while not a few did so in both. As the fully-developed canon law greatly exalted the ecclesiastical over the civil power, it was never very cordially accepted by the English Parliament, and there was a national canon law composed of legatine and provincial constitutions.

(2) Since the Reformation: By 25 Hen. VIII., c. 19, repealed by 1 Phil. and Mary, c. 8, but re-enacted by 1 Eliz., c. 1, a revision of canon law was ordered, and only those parts of it were left binding which were not repugnant to the common or statute law. In the 27th year of Henry VIII., degrees in canon law were abolished, not however by Parliament, but by mandate. In 1603, under James I., certain ordinances analogous to canons were enacted by the clergy, but never received the sanction of Parliament. It has therefore been adjudged that where they introduce anything new they are not binding on the laity.

**canon-lawyer, s.** One skilled in or practising canon-law.

**canon-type, s.** [CANON, II. v.]

**\* canon-wise, a.** One learned in ecclesiastical law.

"... reviled and ruffed by an insulting and only canon-wise prelate..."—*Milton: Of Reformation in England*, bk. 1.

*Langland: P. Plowman*, 4, 798.

**cǎn-ôn-iz-á-tion, cǎn-ôn-iz-á-tion, s.** [Fr. *canonisation*; Ital. *canonizzazione*; from Low Lat. *canonizo* = to canonize.]

1. The act of canonizing or enrolling any person in the canon or list of saints. In the Roman Catholic Church this is preceded by *beatification*. The practice of giving saintly honours to deceased Christians arose among the common people. In the 9th century some restraint was put upon it by the ecclesiastical councils. The first instance of the enrolment by the Roman bishop of a deceased person among the saints was that of Udalrich, Bishop of Augsburg, by John XV., in A.D. 933. In the third Lateran Council, A.D. 1179, the right of conferring such honour was limited to the Pope.

"It is very suspicious, that the interests of particular families, or churches, have too great a sway in *canonizations*."—*Johnson*.

"Even at the *canonization* of a saint. . ."  
*Mil: Liberty*, ch. II.

2. The state of being canonized.

**cǎn-ôn-ize, cǎn-ôn-ize, v. t.** [Fr. *canoniser*; Sp. *canonizar*; Ital. *canonizzare*; Low Lat. *canonizo* = to enrol in a canon or list; *canon* = a list, register.]

**cān-zō-nā, cān-zō-nē (z ae tz), s.** [Ital.]

1. A short song, in which the music is of much more importance than the words. It is one of the ancient forms of measured melody, and when the older writers employed it, it was usually made the vehicle for the display of skill and contrivance in the treatment of the phrases in fugal imitation. A secondary meaning of the word, *scoffing* or *banter*, perhaps accounts for the use of a *form* in which a musical imitation or *mocking* was shown.

2. In the early part of the last century the word was used to describe an instrumental composition, similar to the sonata as then known. (*Stainer & Barrett*.)

**cān-zōn-ēt, s.** [Ital. *canzonetta*, dim. of *canzone*, *canzona* (q.v.).]

**Chem.**: C<sub>10</sub>H<sub>16</sub>. An aromatic hydrocarbon, boiling at 171°, obtained by the destructive distillation of india-rubber.

**caout'-chōno, s.** [American-Indian word.]

1. **Bot.**: India-rubber, so called because its primary use was, and is, the removal of pencil marks from paper. It is an elastic, gummy substance, consisting of the inspissated juice of various morns or less milky species of plants. The greater part of the caoutchouc of commerce is the product of four euphorbiaceous trees, *Siphonia elastica*, from French Guiana, *S. brasiliensis*, *lutea*, and *brevifolia* from Brazil; the caoutchouc of the last three species comes to this country through the port of Para. It is furnished also by *Ficus elastica*, sometimes called by way of pre-eminence from some arctocarpae, specially *Castilloa elastica*, and some Apocynaceae, notably *Urceola elastica*. It exists to a certain extent in most milky plants.

2. **Comm., manuif., &c.**: Caoutchouc was first brought to Europe early in the eighteenth century. Dr. Priestly pointed out that it might be used to rub out pencil marks, crumb of bread having been previously employed for the purpose. In 1791 Samuel Piat obtained a patent for making waterproof fabrics by caoutchouc dissolved in spirits of turpentine. Hancock, in 1823, and Macintosh followed in the same direction. Mr. Chas. Goodyear invented the vulcanising process, which by compounding with it a small amount of sulphur renders it as hard as horn, and well adapted for various purposes to the arts.

¶ **Mineral Caoutchouc:**  
Mtn.: A name for Elaterite (q.v.).

**caout'-chōn-çin (a silent), s.** [From Eng., &c. *caoutchouc*, and suff. -in (*Chem.*.)]

**cāp-il-lār-ŷ-tŷ**, s. [*Fr. capillarté*, from *Lat. capillaris* = pertaining to the hair; *capillus* = a hair.] In the theory of capillarity, the mean curvature of a surface at a given point is the arithmetical mean of the curvatures of any two normal sections normal to each other. If 4 stands for length, then its dimensions are  $\frac{1}{4}$ . (*Everett: The C. G. S. System of Units*, ed. 1875, ch. i., p. 7.)

**cāp-il-lar-ŷ**, **cā-pil-lar-ŷ**, a. & s. [*In Fr. capillaire*, from *Lat. capillaris* = pertaining to the hair; *capillus* = a hair.]

**A. As adjective**:

1. Ordinary Language:  
\* 1. Pertaining to or resembling hair.  
2. Pertaining to capillary tubes or vessels.

**II. Technically**:

1. **Bot.**: Resembling hair, hair-like, having

the form of a hair. Strictly, the twelfth part of a line broad.

† Capillary implies greater fineness and delicacy than filiform (q.v.).

"Capillary or capillaceous plants, are such as have no woody stalk or stem, but grow to the ground, as hairs on the head."  
*Quincy.*

"The filament . . . sometimes is very delicate and capillary or hair-like."  
*Walton: Botany*, p. 300.

2. **Anat.**: Very fine, or minute as hair; applied to the minute vessels by which the arteries and veins communicate with each other.

"The capillary arteries in some parts of the body, as in the brain, are not equal to one hair; and the smallest ext lymphatic vessels are an hundred times smaller than the smallest capillary artery."  
*Arbuth. on Art. Ven.*

3. **Surg.**: Applied to a linear fracture of the skull, unattended with any separation of the parts of the injured bones.

**B. As substantive**:

" . . . entering the minutest capillaries, and discharging obstructions."  
*Bishop Berkeley: Further Thoughts on Tar-Water.*

2. **Bot.**: The Maiden-hair Fern, *Adiantum capillus-veneris*.

"The hyssop may tolerably be taken for some kind of inferior capillary, which best makes out the antithesis with the cedar."  
*Sir T. Browne: On the Plants in Scripture*, p. 2.

**capillary attraction**, s.

**Not. Phil.**: The molecular attraction or repulsion, specially the former, which takes place when one end of a tube of slender bore is immersed in a fluid. In the case supposed the fluid ascends to a considerable height. Capillary attraction aids the passage upwards of sap in the vessels of plants. It may be gravity acting at minute distances.

**capillary-filter**, s. A simple mode of freeing water of its larger impurities by means of a cord of loose fibre, such as cotton candle-wick. (*Knight.*)

**capillary-multifid**, a.

**Bot.**: The same as CAPILLACEOUSLY-MULTIFID (q.v.).

**capillary system**, s.

**Anat.**: The system or series of minute tubes described under capillary vessels (q.v.).

**capillary vessels**, s. pl.

**Anat.**: Vessels of hair-like minuteness, into which both the arteries and the veins divide, thus giving rise to the distinction of arterial and venous capillaries. The arteries which afford a channel to the blood immediately on its departure from the heart are large in breadth and capacity, but they divide again and again, as a tree does into branches, till they terminate in minute tubes of  $\frac{1}{1000}$ th of an inch in diameter. Fitting most closely to the mouth of these are the venous capillaries, which unite into larger and larger veins, as streamlets do to constitute a river. The action of the capillaries can be well seen under a powerful microscope in the partly transparent foot of a frog.

**\* cāp-il-lā-tion**, s. [*Lat. capillatio*; from *capillus* = hair.] A hair-like filament or tube; a capillary-vessel.

"We writeh capital letters with reed colour . . ."—Trevisa, l. 129.

"The first is written in capital letters, without chapters or verses."—Grew: Cosmologia Sacra.

II. Figuratively:

1. Of or pertaining to the head or chief town of a country or kingdom; metropolitan, chief.

"This had been Perhaps thy capital seat, from whence had spread All generations."—Milton: P. L., xl. 343.

2. Applied to circumstances of any kind involving or affecting life.

"In capital cases, wherein but one man's life is in question, the evidence ought to be clear; much more in a judgment upon a war which is capital to thousands."—Bacon.

3. Important in the highest degree; chief, principal, essential.

"For radeboddy, both replestion and superfluous slepe be capital enemies to studye as they are scemably to health of body and soule."—Sir T. Elyot: Governour, bk. 1, ch. 11.

4. Excellent; good or fine in the highest degree.

4. Printing (Capital letters). [CAPITAL, s., A. I. 3.]

capital offence, s. Crime involving capital punishment.

capital punishment, s. The penalty of death.

cap'-i-tal, \*cap-i-tale, \*cap-i-tel, s. [O. Fr. chapitel, capitel; Sp. & Port. capitel; Lat. capitulum = a little head; dimin. of caput = a head.]

A. Ordinary Language:

1. Literally:

1. In the same sense as B. I. (q. v.).

2. The head or chief city of any country or kingdom; the metropolis. [II. 2.]

"Pandemonium, the high capital Of Satan."—Milton: P. L., l. 764.

3. A letter of a larger size than, and of a different form from, those ordinarily used; a capital letter. [B. 6.]

4. A heading or chapter of a book; a section. [CAPITL.]

"Holy St. Bernard hath said in his 60th capitul . . ."—Scott: Waverler.

II. Figuratively:

1. Applied to the political views or opinions, which form, as it were, the capital on which a politician trades.

2. The inhabitants of the chief city of any country.

"The general opinion, at least of the capital, seems to have been that Burnet was cruelly treated."—Macaulay: Hist. Eng., ch. xix.

B. Technically:

1. Arch.: The head or upper portion of a column.

CAPITALS.

2. Fortif.: An imaginary line bisecting the salient angle, formed by the intersection of two projecting lines of parapet, of a fortification.

3. Polit. Econ.: The surplus of individual or national wealth which remains after current necessities have been met. It consists of what are popularly called savings. It is available for the employment of new labour, and if this be done judiciously, it will produce a further surplus, or, in other words the capital will increase. In every well-ordered community it tends to do so indefinitely. Capital and labour mutually require each other, and are not natural foes but natural friends.

¶ Certain economists regard capital as "the sum of all wealth resulting from labor, less the actual cost of the laborers' subsistence"; and thence argue that justice would indicate an equitable distribution of such surplus amongst the actual producers thereof, rather than its absorption by the employing class designated as "capitalists."

4. Commerce, &c.:

(1) The stock or fund employed in any trade or manufacture.

"This accumulated stock of the product of former labour is termed capital."—J. S. Mill: Principles of Political Economy, bk. 1, ch. iv., § 1.

**ca-pôn-ét, s.** [Eng. *capon*, and dim. suffix *-et*.] A young capon.

**ca-pôn-i-ère, ca-pôn-ni-ère, s.** [Fr. *caponnière*; Sp. *caponera*; It. *capponiera*. Perhaps allied to Fr. *caponner* = to dismulate in order to succeed. (Mahn.)]

**Fortif.:** A covered lodgment, of about four or five feet broad, encompassed with a little parapet of about two feet high, serving to support planks laden with earth. This lodgment contains fifteen or twenty soldiers, and is usually placed at the extremity of the counterscarp, having little embrasures made in them, through which they fire. (Harris.)

† Certain differences in construction give rise to the following names: *Covered*, or *assailed caponiere*; *open caponiere*; *single, simple*, or *half caponiere*; *palisade caponiere*. (Knight.)

**ca-pôn-ize, v. t.** [Eng. *capon*, and suffix *-ize* (q. v.).] To castrate, as a capon.

"... an operator who castrated a young blackbird of about six weeks old."—Barrington: *On the Singing of Birds*.

**cap-or-çi-an-ite, s.** [From Moutz Caporiano, in Lunacy, where it is found; suff. *-ite*.]

**Min.:** A variety of *Lawsonite* (q. v.). It occurs in pearly monoclinic crystals of a flesh-red colour; sp. gr., 2.47; hardness, 2.5—3.5; comp.; silica, 53.0; alumina, 22.7; lime, 12.4; water, 11.9.

**ca-pôt, s.** [Fr. *capot*, être *capot* = to be balked; *faire capot* = to capot; Ger. *caput* = ruined, broken; probably abbreviated from Lat. *caput mortuum* = a dead person or body.] When one player wins all the tricks of cards at the game of piquet he has effected a *capot*.

**ca-pôt, v. t.** [CAPOT, s.] To effect a capot on one's antagonists in piquet.

"That last game I had with my sweet cousin, I capotted her."—Lamb: *Essays of Elia*; Mrs. B. et al's *Opin. on Whist*.

CAPOTE.

**ca-pôte, s.** [Fr. & Sp. *capote*; from Lat. *capa* = a cloak.]

1. **Ord. Lang.:** A long cloak or mantle reaching to the feet, worn by women.

2. **Mil.:** A coat with a hood, worn by soldiers, sailors, &c.

"The cloak of white, the thin capots That docks the wandering Candlers."—Byron: *The Bride of Abydos*, ll. 9.

**ca-pouch, ca-poch, s** [CAPOCH.] "He [the youth, Dorothy] wore a little brown capouch, gilt very near to his body with a white towel."—Shelton: *Don Quixote*, bk. iv., ch. 1.

**cap-pa-dine, s.** [Etymology doubtful.] A sort of silk flock or waste obtained from the cocoon after the silk has been reeled off, and used for shag in making rugs. (Simmonds.)

**Cap-pa-dô-çi-ô, cap-er-dôch-y, s.** [A corruption of *capadocia*. (Nares.)] An old slang term for a prison.

"How, captain, idle? My old aunt's son, my dear kinsman in *Capadocia*."—Puritan. (Nares.)

**Cap-pagh, s. & a.** [From Cappagh, near Cork, in Ireland.]

**cappagh-brown, s.** Manganese brown. There are two shades of it, light and dark cappagh brown. (Ogilvie.)

**cap-pan-üs, s.** [Etymology unknown.] A kind of worru, very hurtful to ships' bottoms, to which it adheres.

**cap-pär-ë-æ, s. pl.** [Lat. *capparis*], fem. pl. adj. suff. *-æ*.]

**Bot.:** A sub-order of the Capparidææ, comprising those species in which the fruit is a berry.

**cap-pär-id, s.** [Lat. *capparis* (genit. *capparis*),]

**Bot.:** The English form of the name of the Capparidææ.

"Capparids are chiefly tropical plants."—Baifour: *Botans*, p. 402.

**cap-pär-i-dä-çë-æ, s. pl.** [Lat. *capparis* (genit. *capparis*), and fem. pl. suffix *-æccæ*.]

**Bot.:** A natural order of thalamifloral dicotyledons, placed by Lindley in his Clatal alliance. They are herbs, shrubs, or trees with alternate leaves and solitary or clustered flowers. The ovary is generally stalked, with parietal placentas and reniform seeds. They are akin to Crucifere. The order is divided into two sub-orders—1. Clomeæ, with dry, dehiscent fruit; 2. Cappareæ, the fruit of which is a berry. The plants are principally tropical, and have pungent and stimulant qualities. The flower-buds of *C. spinosa* constitute capers. [CAPER (4), s.] There are thirty-three known genera and 355 species.

**cap-par-is, s.** [Latin, from Gr. *κάρπαις* (*kapparis*).] [CAPER (4), s.]

**Bot.:** A genus of plants, the typical one of the order Capparidææ. It consists of shrubs having simple leaves, frequently with two little spines at their base, and showy flowers with a four-parted calyx, four petals, and numerous stamens. The most generally-known species is the *Capparis spinosa*, the Common *Caper* (q. v.), which grows on walls, &c., in the south of Europe and Mediterranean regions. Its mode of growth resembles a bramble. It is a stimulant, antiscorbatic, and aperient. So also are *C. rupestris*, a native of Greece; *C. Fontanesii*, from Barbary; and *C. ægyptiaca*, from Egypt. The bark of the root of *C. cynophallophora*, *amgdalina*, and *ferruginea* bilaters like cantharides. (Lindley, &c.) *C. Sodaia* is one of the characteristic features of the vegetation of Africa, from the Desert to the Nile. The small berries, which have a pungent taste, form an important article of food, and the roots, when burnt, supply salt. It has a narcotic odour, and its acrid stimulating fruits are employed by women to produce fecundity.

**cappe, s.** [CAP.] "A vernicle hadde he sowed on his cappe. His walet lay byfor him in his lappe."—Chaucer: *The Prologue*, l. 687-8.

**capped, cap-pyd, pa, par, & a.** [CAP, v.] "Cappyd; cappatus."—Cathol. Anglieum.

**capped quartz, s.** **Min.:** A variety of Quartz. (Brit. Mus. Catal.)

**capped rail, s.** **Railroad Engineering:** A railroad rail which has a steel cap attached to an iron body. It is generally made by so disposing the steel in a fagot as to form the edge of that metal, in rolling. It is otherwise known as a *steel-topped* or *steel-headed rail*. (Knight.) [RAIL.]

**cap-pél, s.** [From Eng. *cap* (?).] The iron at the ends and middle of a horse-tree, whipple-tree, or cross-bar, used in ploughing or harrowing, into which the hooks of the traces are placed. (Halliwell.)

**cap-pél-ine, s.** [CAPPEYNE.] A small iron skull-cap worn by archers in the middle ages. (Ogilvie.)

**cap-për (1), s.** [CAP (2), s.] Apparently cap-bearer; a person in the list of the king's household servants. (Pisotie, ed. 1768, p. 204; in ed. 1814, *Coppers*.) [COPPER.]

**cap-për (2), cap-par, s.** [Eng. *cap*, and suffix *-er*.] One who makes or sells caps. "Cappar, bonnetier."—Palsgrava.

**cap-për (3), s.** [Apparently from *coppe*, the last portion of A.S. *atorcoppe* = a spider.] A spider. (Scotch.)

**cap-për-nôit-ÿ, cap-për-nôit-ed, a.** [CAPERNOITIE.]

**cap-pie, s.** [From Eng. & Scotch *cap*, and dimin. suff. *-ie*.]

1. A little cap.

2. A kind of beer between table-beer and ale, formerly drunk by the middle classes, which seems to have been thus denominated, because it was customary to hand it round in a little cap or quisk. It is called also *cap-ale*. (Scotch.)

**cap-pil-ow, v. t.** [A softened form of Dan. *kaplober* = to run with emulsion, to contest. (Jamieson.)] To distance another in reaping. In Roxburghshire, one who gets a considerable

way before his companions on a ridge is said to *capplow* them. In an old game the following phrase is used, "Kings, Queens, *Capplow*."

**cap-pîng (1), pr. par., a., & s.** [CAP (1), v.] **A. & B. As pr. par. & particip. adj.:** (See the verb.)

**C. As subst.:** The act of presenting with *cape*, in sign of a degree having been taken.

"The 'capping' of the medical students of Glasgow University took place on Tuesday."—*Weekly Scotsman*, Aug. 4, 1877.

**capping-off, s.** **Glass-making:** The mode of detaching the closed end of a blown cylinder by drawing a circle around it, bringing it into the shape of an open-ended cylinder ready for splitting longitudinally. (Knight.)

**capping-plane, s.** [CAP, v.] **Joinery:** A plane used for working the upper portion of staircase-rails.

**cap-pîng (2), a.** [Corrupted from or perhaps rather an early form of *caping* (q. v.).]

**capping-brick, s.** A coping-brick.

**cap-pit, a.** [Icel. *kappa* = to quarrel, to contend.] Crabbed, ill-humoured, peevish. (Scotch.)

"Quha ever saw, in all their life, Twa cappit calicris mak six ane stryke!"—*Philotus, & P. R.*, III. 87

**ca-pra, s.** [Lat. *capra* = a she-goat; *caper* (genit. *capri*) = a he-goat.]

**Zool.:** A genus of ruminant mammalia containing the true goats. There are horns in both sexes, and lachrymal sinuses are absent. There is a beard or long hair on the throat in both sexes, or in some species in the males only. *Capra hircus* is the domestic goat. It is thought to be a descendant of *C. ægagrus* of Persia and the Caucasus. *C. Ibez* is the Ibez of the Alps, and *C. pyrenaica* that of the Pyrenees. [GOAT.]

**Palæont.:** Capra has not been found earlier than the Post-Pliocene beds.

**cap-râte, s.** [From Eng. *capric*], and suff. *-ate*.] [CAPRIC ACID.]

**cap-rél, s.** [A dimin. of *caper* (q. v.).] A caper.

"gik a mirthless musk their ministrals did make, While ky cast caprels behind their heels."—*Potswart Flying*; Watson's *Col.*, III. 22.

**ca-prél-lâ, s.** [Latin dimin. of *caper* = a goat.]

**Zool.:** A genus of crustaceans, the typical one of the family Caprellidæ (q. v.). *Caprella Phasma* is the best known species. Phasma is a genus of Mantide, to which these crustaceans present a superficial resemblance, but no real affinity.

**ca-prél-lÿ-dæ, s. pl.** [From Lat. *caprella*, and fem. pl. suff. *-idæ*.]

**Zool.:** A family of crustaceans, order Læmodipoda.

**ca-prê-ê-lâte, a.** [In Mod. Lat. *capreolatus*, from Class. Lat. *capreolus* = a tendril.]

**Bot.:** Winding and clasping with tendrils, cirruous.

"Sneb plants as turn, wind, and creep along the ground, by means of their tendrils, as gourds, melons, and cucumbers, are termed, in botany, *capreolate plants*."—Harris.

**ca-prê-ô-ll, v. t.** [CAPER, v.] To caper, to skip like a roe. (*Sir Philip Sydney*.)

**ca-prê-ô-lüs, ca-pras-ô-lüs, s.** [Lat. *capreolus* = a kind of wild goat, chamois, or roebuck.]

1. **Zool.:** A genus of mammals, family Cervidæ. *Capreolus caprea* is the Roebuck (q. v.).

2. **Palæont.:** There is in the Pliocene an extinct fossil species allied to the roebuck.

3. **Bot.:** A tendril.

**cap-rêt, s.** [Ital. *capretto*; dimin. of *cappero* = a goat.] A young goat, a kid.

"As capret and hart thou shalt eate."—*Wycliffe*; *Deut.*, XII. 15.

**cap-ric, a.** [From Lat. *capra* = a she-goat; *caper* = a he-goat.]

acid which exists as a glyceride in butter and cocoa-nut oil, in fusel oil, and is formed by the oxidation of oleic acid and of oil of rue. It is a colourless crystalline body, having a slight odour of the goat. It melts at 28°. It is insoluble in cold water, soluble in alcohol and ether. It forms crystalline salts called caprates or rutates, sparingly soluble in cold water.

**ca-prīc-ī-ō** (gc as teh), s. [Ital. *capriccio*.] [CAPRICE.]

1. *Ord. Lang.*: A caprice.  
2. *Music*: A name which has been given at different times to different kinds of musical compositions. Now it is generally applied to a piece composed on original subjects, or to a brilliant transcription of one or more subjects by other composers. (*Grove*.)

"Will this capriccio hold in thee, art sure?" *Shakspeare: All's Well that Ends Well*, II. a

**ca-prīc-ī-ō-sō** (gc as teh), adv. [Ital. *capriccioso* = capriciously, humourously.]

*Music*: In a whimsical, humorous manner; after the style of a capriccio.

**ca-prī'ce**, \* **ca-prī'ch**, \* **ca-prī'ch-ī-ō** (oh as sh), \* **ca-prīc-ī-ō**, s. [Fr. *caprice*; Sp. and Port. *capricho*; Ital. *capriccio* = shaking in a fever; whim, fancy.]

1. A whim adopted by a sudden change of opinion, and probably to be cast off in a little for some new one; a freak, a fancy.

"Not that the Form of us all, in this / Or aught He does, is governed by caprice." *Cooper: Truth*, 316.

2. Capricious habit or disposition; capriciousness.

"The folly . . . and caprice of the present age."—*Spencer*, No. 485.

3. The same as *capriccio* (2) (q.v.).

¶ For the difference between *caprios* and *humour* see HUMOUR.

\* **cap-rich**, s. [CAPRICE.]

\* **cap-ri-çī-ō**, \* **cap-ri-çhī-ō**, s. [Ital. *capriccio*.] A freak, fancy, caprice.

"To have visited the stark stark naked, watched her loose in her frisks, her gambols, her capriccios."—*Stearns: Trist. Shanágh*, ch. xxiii.

**cap-ri-cious**, s. [Fr. *capricieux*; Ital. *capriccioso*, from *caprice* (q.v.).] Subject to, or full of caprice; whimsical, fanciful.

"The lower animals are, as we shall hereafter see, capricious in their affections, aversions, and sense of beauty."—*Darwin: Descent of Man*, vol. I. [1871], pt. I, ch. II, p. 65.

¶ For the difference between *capricious* and *fanciful* see FANCIFUL.

**cap-ri-clous-ly**, adv. [Eng. *capriciously*; *ly*.] In a capricious manner; in caprice; whimsically, fancifully.

"But on the same continent the species often range widely and almost capriciously."—*Darwin: Origin of Species* (ed. 1859), ch. xii., p. 384.

**cap-ri-clous-nēss**, s. [Eng. *capriciously*; *-ness*.] The quality of being capricious, or full of caprice.

"A subject ought to suppose that there are reasons, although he is not apprised of them; otherwise, he must tax his prince of capriciousness, inconsistency, or ill design."—*Swift*.

**Cā-prī-corn**, **Cāp-ri-cor-nūs**, s. [Lat. *capricornus*; from *caper* = a goat, and *cornu* = a horn.]

*Astronomy*:

1. The tenth of the twelve signs of the zodiac, represented on globes in the form of a goat. It is the first of the winter and fourth of the summer signs.

2. The term is applied also to the part of the ecliptic between 270 and 300 E. long. The sun enters it about the 21st of December, at the winter solstice.

"Let the longest night in *Capricorn* be of fifteen hours, the day consequently must be nine."—*Notes to Creech's Manilius*.

"And what was ominous, that very morn / The sun was entered into *Capricorn*." *Dryden: Hind & Panther*, III. 593.

*Tropic of Capricorn*: [TROPIC.]

\* **cap-rid**, a. [Lat. *caper* = a wild goat.] Of or pertaining to the goat tribe.

**cap-ri-dæ**, s. pl. [Lat. *caper* (genit. *capri*); fem. pl. suffix *-idæ*.]

*Zool.*: A family of ruminant mammals, of which the genus *Capra*, or goat, is the type.

**ca-prif-ī-cāte**, v. t. [Lat. *caprifico*; from *caprificus* = the wild fig; *caper* = a wild goat; *ficus* = fig.]

*Bot.*: To fertilise by the operation known as caprification.

**cap-ri-f-ī-cā-tion**, s. [Lat. *caprificatio*; from *caprificus* = a wild fig; *caper* = a wild goat; *ficus* = a fig.] A process of fertilizing or accelerating the production of fruit, practised in the Levant, particularly with the wild fig. It consists in suspending on the cultivated fig branches of the wild fig, which bring with them a small insect which penetrates the female flowers, carrying the pollen of the male flower on its body, or punctures the fruit in order to lay its eggs, which hastens the ripening, and may be the only effect. The Egyptians pretend to obtain the same result by puncturing the eye of the fruit with a needle dipped in oil. (*Dana in Webster*.)

"The process of caprification being unknown to these savages, the figs come to nothing."—*Brucis: Travele*, lib. 74.

**ca-prif-ī-cūs**, s. [Latin, from *caper* = a wild goat; *ficus* = a fig.]

*Bot.*: A plant—the Wild Fig—which, according to Theophrastus and Pliny, is a tree of a wild kind which never ripens its fruit, but has the power of conferring on other trees the virtue which it does not possess itself. [CAPRIFICATION.]

\* **cap-ri-fōle**, \* **cap-ri-fō-ly-ūm**, s. [O. Fr. *caprifole*; Low Lat. *caprifolium*; from *caper* = a wild goat, and *folium* = a leaf.]

*Bot.*: The Woodbine, or Honeysuckle (*Lonicera Periclymenum*), a climbing shrub, the typical genus of the order Caprifoliaceæ, noted for the very fragrant clusters of trumpet-shaped, cream-coloured flowers. [HONEY-SUCKLE, WOODBINE.]

"And Egleantine and *Caprifole* among, / Fashioned above with their lushest part." *Spenser: F. Q.*, III. vi. 44.

**cap-ri-fō-ly-ā-çé-æ**, s. pl. [Low Lat. *caprifoli-um*]; fem. pl. suffix *-æceæ*.]

*Bot.*: A natural order of plants, the Honeysuckle family. They are gamopetalous calycifloral dicotyledons, and are classed by Lindley in his Cinchonal alliance. They are shrubs or trees, generally climbing, and are natives of the northern parts of Europe, Asia, and America. The best-known species is the Common Honeysuckle (*Lonicera Periclymenum*). The Elder, the Guelder Rose, the Laurustinus, and the Snowberry belong to this family, in which there are sixteen genera and 230 species known.

\* **cap-ri-form**, a. [Lat. *caper* = a wild goat; *forma* = form, shape.] Goat-shaped, resembling a goat in shape or appearance.

\* **ca-prig-ēn-ūs**, a. [Lat. *caper* = a wild goat; *gigno* (pa. ten. *genui*) = to beget, produce.] Begotten by a goat.

**cap-ri-mūl-gid-æ**, s. pl. [Lat. *caprimulgus*; fem. pl. suffix *-idæ*.]

*Ornith.*: The Goatsuckers, or Night-jars, a family of birds akin to the Swallows (*Hirundinidae*) and the Swifts (*Cypselidae*), and constituting with them the typical section of the tribe *Fissirostre*. They have large eyes and soft plumage; the bill is short, depressed, and very broad, with an extremely wide gape. The ears are very large, the wings long and pointed, the legs short. The species are widely spread over the world. There are three sub-families, *Caprimulgineæ*, *Podagrineæ*, and *Steatorninae* (q.v.). [CAPRIMULGUS.]

**cap-ri-mūl-gī-næ**, s. pl. [From Lat. *caprimulgus* (q.v.), and fem. pl. suff. *-inæ*.]

*Ornith.*: The typical sub-family of the family *Caprimulgidae* (q.v.). They have a very short and weak bill, and the middle claw pectinistid; the precise use of the pectination is matter of dispute. For *Caprimulgus europæus* see *Caprimulgus*. C. or *Antrostomus vociferus* is the Whip-poor-Will of North America, and C. *carolinensis* the Chuck-Will's-widow, the names being initiated from their notes.

**cap-ri-mūl-gūs**, s. [Lat. *caper* = a wild goat; *mulgeo* = to milk.]

*Ornith.*: A genus of birds, the typical one of the family *Caprimulgidae*, and the sub-family *Caprimulgineæ*. One species, *Caprimulgus europæus*, is found in Britain. It is called the

Goatsucker, from the old and erroneous belief that it sucks goats. Another name given to it is Night-jar, from a jarring noise, like that of a rapidly-revolving spinning-wheel, made by the birds when sitting on trees; their note is a different one when flying about in search of droning-beetles and moths, on which they prey principally by night, and which they catch on the wing. They hunt about by night, and the wheel-sound, which strikes up punctually at sunset, is one of the most notable ornithological phenomena presented in Epping Forest on summer evenings. There the bird is called a Night-hawk, as resembling a hawk, or, still better, a gigantic hawk-moth, as it hovers on the wing. Elsewhere it is termed also the Night-churn or Fern Owl.

\* **cap-rine**, a. [Lat. *caprinus* = pertaining to a goat; *caper* = a wild goat.] Of or pertaining to goats; goat-like.

"Their phylogony is canine, vulpine, caprine."—*Bishop Gauden: Life of Bishop Brownrigg*, p. 238 (1656).

**cap-ri-ōle**, s. [Fr. *capriole*.]

*Horsemanship*: A leap in the air without advancing, but in which the animal jerks out its hinder feet.

¶ A capriole is akin to a croupade and a ballotade, but in the former of these movements the horse does not show his shoes, which he does in a capriole, and in the latter of them he does not jerk out his hinder feet.

† **cap-ri-pēd**, a. [Lat. *capra* = a goat; *pes* (genit. *pedis*) = a foot.] Having feet like a goat, goat-footed.

**cap-rō-āte**, s. [From Eng. *caproic* (ic), and suff. *-ate*.] [CAPROIC-ACID.]

**ca-prō-īc**, a. [From Lat. *capra* = a she-goat, *caper* = a he-goat, with allusion to *Gr. κάπρος* (*kapros*) = a boar, *spec.* a wild boar.]

**caproic acid**, s.

*Chem.*: C<sub>8</sub>H<sub>16</sub>O<sub>2</sub> = C<sub>6</sub>H<sub>11</sub>.CO.OH. A monatomic, fatty acid, which occurs as a glyceride in the butter of cow's milk, and in cocoa-nut oil; it is produced by the action of alkalies on amylo-cyanide, and as a sodium salt by the action of CO<sub>2</sub> on sodium amylo. It is a clear oil, sp. gr. 0.931 at 15°, boils at 195°, solidifies at -9°. Its salts are called caproates; they are soluble and crystallizable. A strong solution of the potassium salts yields, by electrolysis, diamyl C<sub>10</sub>H<sub>22</sub>.

**cap-rō-mys**, a. [From *Gr. κάπρος* (*kapros*) = a boar, *spec.* the wild boar, and *μῦς* (*mys*) = a mouse.]

*Zool.*: A genus of rodent mammals, family *Psammoryctidae*, or Sand-rats. Some of the species, however, inhabit not sand but the branches of trees. They are found in South America and the West Indies. Some genera have spines mixed with ordinary hairs, and have in consequence been described as porcupines.

**ca-prōs**, s. [From *Gr. κάπρος* (*kapros*) = a boar.]

*Ichthy.*: A genus of spiny-finned fishes, family *Scomberidae*. *Capros aper* is the Boar-fish, sometimes called *Zeus aper*. [BOAR-FISH.]

**ca-pry-lāte**, a. [From Eng. *caprylic* (ic), and suff. *-ate* (*Chem.*) (q.v.).] [CAPRYLIC-ACID.]

**ca-pry-līc**, a. [Lat. *capra* = a she-goat; *Gr. κάπρος* (*kapros*) = a boar, and *λαίη* (*laîē*) = . . . matter as a principle of being.]

**caprylic acid**, s.

*Chem.*: C<sub>8</sub>H<sub>16</sub>O<sub>2</sub> = C<sub>7</sub>H<sub>15</sub>.CO.OH. A monatomic, fatty acid, which occurs as a glyceride in butter and in cocoa-nut oil, also in fusel oil. It is prepared by the saponification of cocoa-nut oil; its baryta salt is less soluble than that of caproic acid. Caprylic acid is an unpleasant liquid which solidifies at 12°. It boils at 235°. Its salts are called *Caprylates*.

**cap-sa**, s. [Lat. = a case.]

*Zool.*: A genus of *Mollusca*, pieced by Cuvier between *Venus* and *Petricoles*, having two teeth on the one hinge, and a single but bifid one on the other; lunula wanting, shell convex, and the fold indicative of the retractor of the foot considerable.

**cap-sel-la**, s. [Lat. *capsella* = a small box or coffer.]

*Capella Bursa pastoris* is the Shepherd's Purse so common at roadsides in this country.

**cap-si-cine, s.** [Lat. *capsicum*], and suff. -ine (Chem.)]

**Chem.**: The active principle extracted from the capsules of cayenne pepper. It has a resinous appearance, and a hot, acrid taste, so pungent that if half a grain of it be volatilized in a large room, it will cause all who respire the contained air to sneeze and cough.

**cap-si-cūm, s.** [Lat. *capsa* = a case; so named from the seed-poda.]

**I. Botany:**

1. A genus of plants of the order Solanaceæ, consisting of annual or biennial plants, bearing membranous pods containing several seeds, noted for their hot, pungent qualities. *Capsicum annuum*, a native of South America, furnishes the fruits known as chillies. These, as well as the fruits of *C. frutescens* and other species, are used to form cayenne pepper. For this purpose the ripe fruits are dried in the sun or in an oven, and then ground to powder, which is mixed with a large quantity of wheat flour. The mixed powder is then turned into cakes with leaven; these are baked till they become as hard as biscuit, and are then ground and sifted. Cayenne pepper is largely adulterated with red lead and other substances. [CAYENNE.] (*Treas. of Bot.*, &c.)

2. The fruit-pods of the plants described in I.

**II. Pharm.**: *Capisti Fructus*, the dried ripe fruit of *Capsicum fastigiatum*, imported from Zanzibar. It is a small, oblong, scarlet, membranous pod, divided internally into two or three cells containing numerous flat white reniform seeds. It has no odour; its taste is hot and acrid. Capsicem fruits are used medicinally, in powder or as a tincture, externally, or as a gargle in cases of malignant sore throat, and internally as a stimulant in cases of impaired digestion.

**cap-size, v.t. & i.** [Etymology unknown. *Mahn* suggests from *cap* = head, and *seize*, because it is properly to move a hoghead or other vessel forwards by turning it alternately on the head. Skeat suggests that it is a nautical corruption of Sp. *cabeçar* = to nod one's head in sleep; from *cabeza* = the head; from Low Lat. *capitium* = a cowl, hood; Lat. *caput* = the head. Cf. Sp. *capuzar un dazel* = to sink a ship by the head.]

**A. Transitive:**

1. To upset or overturn any vessel. (Said especially of ships.)

"It is a pleasant voyage perhaps to float,  
Like Lyrrho, on a sea of speculation;  
But what if carrying sail *capsizes* the boat?"  
*Byron: Don Juan*, ix. 18.

2. To upset, overturn any thing or person.

**B. Intrans.:** To be upset or overturned.

**cap-sized, pa. par. or a.** [CAPSIZE.]

**cap-siz-ing, pr. par., a., & s.** [CAPSIZE.]

**A. & B. As pr. par. & particip. adj.:** (See the verb.)

**C. As subst.:** The act of overturning or upsetting; the state of being overturned or upset.

"... having reference to the loss of the *Ellen Southern* and the capsizing of the Liverpool Lifeboat."  
... *Times*, Nov. 6, 1874. (Adv.)

**cap-stan, s.** [O. Fr. *cabestan*; Sp. *cabrestante*, *cabestrante* = a capstan; *cabestrar* = to tie with a halter; Lat. *capistrum* = to halter, tie, pa. par. *capistrans*; *capistrum* = a halter; *capio* = to hold, seize.]

**Naut.:** A strong, massive apparatus of wood

CAPSTANS.

made to revolve, and shaped like a truncated cone, and having the upper part provided with

holes for the reception of bars or levers with which to cause it to revolve, and thus raise a heavy weight by winding a rope round it. It is especially used on shipboard for weighing the anchor. Capstans are single or double, according as they have one or two barrels upon the same spindle. The double capstan is revolved by two sets of men on two decks. They are known as "fore" or "aft" capstans, according to position. The fore capstan stands about midway between the fore and main masts. The aft capstan about the same distance abaft the mainmast. The drum capstan, for weighing heavy anchors, was invented by Sir Samuel Morland about 1661.

"The weighing of anchors by the capstan is also new."—*Edinburgh Essays*.

¶ 1. To man the capstan: To cause the men to stand in readiness to the capstan.

2. To rig the capstan: To fix the capstan-bars in their holes in the capstan.

3. To paul the capstan: To drop all the pauls into their sockets to prevent the capstan from recoiling during any pause of heaving. (Smyth.)

4. To surge the capstan: To slacken the rope which is wound round the barrel while heaving to prevent it from riding or fouling. (Smyth.)

**capstan-bar, s.** A long piece of wood, of the best ash or hickory, one end of which is thrust into one of the square holes of the drumhead of the capstan, like the spokes of a wheel. They are used to heave the capstan round, by the men setting their hands and chests against them and walking round.

**capstan-bar pin, s.** A little iron pin or bolt, inserted through the ends of the capstan-bars to prevent their unshipping.

**capstan-barrel, s.**  
**Naut.:** The main post of the capstan.

**capstan-swifter, s.**  
**Naut.:** A rope passed horizontally through notches in the outer ends of the bars, and drawn very tight. The intent is to steady the men as they walk round when the ship rolls, and to give room for a greater number to assist, by manning the swifters both within and without. (Smyth.)

**cap-stone, s.** [Eng. *cap* (I), *s.*, and *stone*.]  
¶ 1. **Arch.:** A coping-stone or coping. [COPE-STONE.]

**II. Technically:**

1. **Milit.:** An officer in command of a company of infantry, a troop of cavalry, a battery of artillery, or a field company of the engineer corps; or an officer who has, by seniority or otherwise, attained the third step in promotion, the others being second or sub-lieutenant, and lieutenant. With non-combatant branches the rank is generally relative. He pays, has power of minor punishment over, and is responsible for the comfort and well-being of his company, and for its equipments. Rank designated in the United States by two gold embroidered bars at each end of the shoulder strap, the corps being indicated by the color of the strap. [COMPANY.]

"A captain! these villains will make the name of captain as odious as the word occupy; therefore captains had need look to it."  
... *Shakspeare: Henry IV.*, ii. 4.

2. **Naval:** Until 1862 the rank of captain was the highest commissioned office in the United States Navy. The commodores before that period were so by courtesy only. The cap-

tain ranked with a lieutenant-colonel, colonel, or brigadier-general according to seniority. At that time the ranks of commodore and admiral were added, and the rank of captain became equivalent to colonel. Title applied by courtesy to commanders of vessels of a lower rate. In war-ships petty officers are distinguished as captains of the tops, after-guards, &c.

**cāp'tious, a.** [Fr. *captieux*; Lat. *captiosus* = ready to seize or catch; *capto* = to seize, catch.]

1. Ensnaring, insidious, captivating, alluring.

"She taught him likewise how to avoid sundry captious and tempting questions which were like to be asked of him."—*Bacon.*

"Away with despair, no longer forbear  
To fly from the captious coquette."  
*Byron: Hours of Idleness; Reply to some Verses.*

2. Cavilling, fault-finding, censorious; peevish, perverse.

"A captious question, sir (and yours is one),  
Deserves an answer similar, or none."  
*Cowper: Firocinium*, 908.

† Crabb thus discriminates between *captious*, *cross*, *peevish*, *freeful*, and *petulant*:—

"*Captious* marks a readiness to be offended; *cross* indicates a readiness to offend; *peevish* expresses a strong degree of crossness; *freeful* a complaining impatience; *petulant* a quick or sudden impatience. *Captiousness* is the consequence of misplaced pride; *crossness* of ill-humour; *peevishness* and *freefulness* of a painful irritability; *petulance* is the result either of a naturally hasty temper or of a sudden irritability. Adults are most prone to be *captious*; . . . spoiled children are most apt to be *peevish*; . . . sickly children are most liable to *freefulness*; . . . the young and ignorant are most apt to be *petulant* when contradicted."

"The great sagacity, and many artifices, used by birds in the investigation and capture of their prey." Darwin.

2. The thing captured or seized; a prize.

"As a member of a good English house of business he would be a valuable capture." Times, Nov. 11, 1876.

II. International Law: The arrest or seizure of a person or of ships by an enemy during war. [MARQUE, PRIVATEERING.]

"Crabb thus distinguishes between capture, seizure, and prize." Capture and seizure differ in the mode; a capture is made by force of arms, a seizure by direct and personal violence.

The capture of a town or an island requires an army; the seizure of property is effected by the exertions of one individual. . . . A capture may be made on an unresisting object; a seizure supposes much eagerness for possession on the one hand, and reluctance to yield on the other. . . . A capture is general, it respects the act of taking; a prize is particular, it regards the object taken and its value to the captor; many captures are made by sea which never become prizes." (Crabb: Eng. Synon.)

\*cāp-ture, v.t. [In Fr. capturer; from capture, s.] To seize, or make captive.

\*cāp-ū-ghin, s. [Fr. capucin = a monk who wears a cowl or hood; capuce, capuchon = a hood, a cowl.]

I. Ordinary Language:

1. A female garment, consisting of a cloak and hood, made in imitation of the dress of capuchin monks, whence its name is derived.

"The moment we were seated, my aunt pulled off my uncle's shoes, and carefully wrapped his poor feet in her capuchin." Smollett: Expedition of Humphry Clinker.

2. One of the order of monks described in II.

II. Technically:

1. Ch. Hist.: A branch of the Franciscan order of monks, so called from their peculiar capuche or cowl—a pointed hood attached to the ordinary Franciscan coat, and said to have been worn by St. Francis himself. This branch was founded by Matthew de Baschi, an Italian, but with him may be named the famous Lewis de Fossembrun.

The Capuchina sought to restore the original rigour of the institute of St. Francis, which Pope Innocent IV. had relaxed by granting the right to possess property to the members of the Franciscan order. In 1525 they received the solemn sanction of Pope Clement VII. Because of their severe austerity, and especially for the innovation of the capuche, they were much persecuted by the other Franciscans. Bernardo Ochino—their first Vicar-General—became a Protestant, as, afterwards, did also their third. Eventually, however, they spread in great numbers over Italy, Germany, France, and Spain. In the seventeenth century they showed much zeal in prosecuting missions to Africa. (Mosheim: Ch. Hist., cent. 16, 17.) [FRANCISCANS.]

"To Capuchins, Carthusians, Cordeliers Leave penance, meagre abstinence, and prayers." Oldham: Satires upon the Jesuits.

car-at, \* car-act, s. [Fr. carat; from Arab. qirrat = a carat, the twenty-fourth part of an ounce; from Gr. κεράριον (kerarion) = the fruit of the locust-tree; Ital. carato; O. Port. qurate.]

I. Literally:

\* 1. The fruit of the Carob-tree, also called carot.

2. Weights and Measures:

(1) A weight of 3½ grains.

(2) The twenty-fourth part of an ounce. It is used by jewellers to express the fineness of gold, the whole mass being supposed to be divided into twenty-four parts and said to be so many carats fine, according to the number of twenty-four parts of pure gold contained in it. Twenty-four carat means all gold, eighteen carat three-quarters gold. Fine gold consists of twenty-two carats of pure gold and two of alloy. The gold coins of the United States are 21½ carats fine. A dollar weighs 0.13 ounce, an eagle 1.29 ounces. From this, the proportion of gold in each can be calculated.

"A mark, being an ounce Troy, is divided into twenty-four equal parts, called carats, and each carat into four grains; by this weight is distinguished the finest fineness of their gold; for if to the finest of gold be put two carats of alloy, both making, when cold, but an ounce, or twenty-four carats, these two gold is said to be twenty-two carats fine."—Cocker.

(3) A weight used by jewellers in weighing diamonds and other precious stones. It is the 150th part of an ounce Troy.

II. Fig.: Fineness, purity.

"Thou best of gold, art worst of gold; Other, less fine in carat, is more precious." Shakespeare: 2 Hen. IV., iv. 4.

car-a-toe, s. [A native word.]

Bot.: A West Indian name for Agave americana.

car-a-van, s. [Fr. caravane; Sp. & Ital. caravana; from Arab. qarawan; Pers. karwan, qirwan = a caravan.]

I. Literally:

1. A number of travellers, pilgrims, or merchants traversing the deserts of Arabia, Africa, or other countries, in company for purposes of safety and convenience.

"When Joseph, and the Blessed Virgin Mother, had lost their most holy Son, they sought him in the retinue of their kindred, and the caravans of the Galilean pilgrims."—Taylor.

2. A large covered cart or waggon, such as those used by gypsies, and for the conveyance of beasts of a menagerie; also a similar vehicle employed for moving furniture. A train or number of such waggons.

\* 3. A fleet of ships or boats, such as those used in Russia for conveying hemp, &c. (Webster.)

caravan-boiler, s. A waggon-shaped boiler.

\* car-a-van-er, s. [Eng. caravan; suff. -er = er.] The driver or conductor of a caravan.

car-a-van'-ser-y, car-a-van'-scr-a, car-a-van'-scr-al, s. [Fr. caravanésrail or caravanésrai; from Pers. karwan-sarai; from karwan = a caravan; sarai = a palace, large house, or inn.] A kind of inn in Eastern countries, where caravans put up for the night.

"For the spacious mansion, like a Turkish Caravan-serai, entertaine the vagabonds."—Pope: Letter to Janes (1716).

"The furniture of this Caravan-serai consisted of a large Iron Pot, two oaken Tables, two Benches, two Chairs, and a Bothen Noggin."—Cortyle: Sartor Resartus, bk. iii, ch. 2.

A. As substantive:

1. An umbelliferous plant, Carum carvi, a biennial belonging to the parsley family. It has a taper root like a parsnip, and is cultivated principally in Holland and Lincolnshire.

"Caraway, herbe. Carvey sic scribitur in campoforum."—Prompt. Pars.

2. The seeds of the plant described in 1. They are strongly aromatic, and have a warm, pungent taste. They are much used in confectionery, and in medicine. [CARAWAY-FRUIT.]

\* 3. A kind of sweetmeat containing caraway-seeds.

"... we are wont to eat carawayes or biscuits, or some other kind of conife or seedes together with apples, thereby to breake winde indred by them; and surely it is a very good way for atodents."—Cogan: Haven of Health (1566).

"Nay, you shall see mine orchard, where, in an hour, we will eat a last year's pippin of my own grafting, with a dish of caraways, and so forth . . ."—Shakespeare: 2 Hen. IV., v. 8

B. As adjective: (See the compounds).

caraway-comfit, s. A comfit or sweet containing caraway-seed.

caraway-fruit, s.

**caraway-seeds**, *s. pl.* [CARAWAY, 2.]

**cār-a-wāys**, *s. pl.* [CARAWAY, 2.]

\* **car-ayn**, *s.* [CARRION.]

**carb**, *prefix*.

*Chem.*: Having carbon in its composition. Many compounds occur with this prefix. Only the important substances are here given; for the others see *Watt's Dictionary of Chemistry*.

**carb, car-a-bin**, *s.* [CARP, *v.*] A raw-boned, loquacious woman. (*Jamieson*.)

**carb, car-ble**, *v. i.* [Either a variant of Eng. *carp* (q.v.), or from Icel. *karp* = bregging; *karpa* = to brag, boast.] To cavil, to carp. (*Jamieson*.)

**car-bal-lyl-āte**, *s.* [Eng., &c. *carballylic* (ic); -ate (*Chem.*) (q.v.).] [CABBALYLIC ACID.]

**car-bal-lyl-ic**, *a.* [From Eng., &c. *carb* (on); *allyl*; -ic.]

*Chem.*: A term used chiefly or exclusively in the compound which follows.

**carballylic acid**, *s.*

*Chem.*: Tricarballic acid,  $C_6H_5O_6$  =  $(C_6H_5)(COOH)_3$ . A triatomic, tribasic, fatty acid, formed by the action of nascent hydrogen on acetic acid, or by the action of alcoholic potash on propenyl tricyanide. It forms colourless trimetric crystals, soluble in water and alcohol. Its alkaline salts, called carballylates, are soluble in water. Its melting point is 158°.

**car-ba-māte**, *s.* [From Eng., &c. *carbamic* (ic); and -ate (*Chem.*) (q.v.).]

*Chem.*:  $(CO)(NH_2)(ONH_4)$ . Ammonium carbamate is formed by passing a mixture of perfectly dry carbon dioxide and ammonia gas into cold absolute alcohol, and heating the crystalline deposit with absolute alcohol in a sealed tube to 100°. The liquid, on cooling, deposits ammonium carbamate in crystalline laminae, which, when heated in a sealed tube to 140°, split into ammonium carbonate and urea. Ammonium carbamate is converted by water into acid ammonium carbonate. It can be distinguished by its precipitating calcium very slowly from a solution of  $CaCl_2$  and ammonia.

**car-bām-īo**, *a.* [From Eng., &c. *carb* (on); and *amic* (q.v.).]

*Chem.*: A term used chiefly or exclusively in the compound which follows.

**carbamic ethers**, *s. pl.*

*Chem.*: Both acid and neutral ethers are known.

(1) *Acid Ethers*: The ethylammonium salt of ethylcarbamic acid.  $(CO)(NH_2)(C_2H_5)ONH_2(C_2H_5)$ , a snow-white powder, is obtained by passing  $CO_2$  into anhydrous ethylamine cooled by a freezing mixture.

(2) *Neutral Ethers* (called also *Urethanes*): Ethyl carbamate  $(CO)(NH_2)OC_2H_5$ . It is formed by the action of ammonia on alcohol saturated with carbonyl chloride, also by aqueous ammonia and ethyl carbonate. It forms colourless crystals soluble in water.

**car-ba-mide**, *s.* [From Eng., &c. *carb* (on); and *amide* (q.v.).] [UREA.]

*Chem.*:  $CN_2H_4O = N_2(CO)H_4$ . It is produced by the action of ammonia gas on carbonyl chloride, or upon ethyl carbonate, also by the decomposition of oxamide at red heat. Carbamide is decomposed by soluble hypobromites and hypochlorites with evolution of nitrogen, as  $CN_2H_4O + O_3 = CO_2 + H_2O + N_2$ .

**car-ba-mine**, *s.* [From Eng., &c. *carb* (on); and *amine*.] [AMINE, *s.*]

*Chem.*: Isocyanide. These compounds are obtained by distilling a mixture of an alcoholic ammonia base and chloroform with alcoholic potash. They are oily, stinking liquids. The isocyanides of plemyl, ethyl, and amyl are known.

**cār-bā-sō-sā**, *s.* [Lat. *carbasus*; Or. *καρβασος* (*karbasos*) = flax, linen, a sail.]

*Zool.*: A partial synonym of the Chelostomatous genus, *Finsira* (q.v.). *Finsira carbasosa*, formerly *Carbasus papyræ*, the Lawn Sea-nat of Ellis, is a delicate Northern form living on shells and stones in rather deep water. The cells are in many rows on one side only, and the polypide has about twenty tentacles. It may often be found on the shore.

**car-ba-zō-tāte**, *s.* [From Eng., &c. *carb* (on); *azot* (ic); and suff. -ate.]

*Chem.*: A salt of carbazotic acid.

**car-ba-zōt-īc**, *a.* [From Eng., &c. *carb* (on); and *azotic* (q.v.).]

*Chem.*: A term used chiefly or exclusively in the compound which follows.

**carbazoitic acid**, *s.* [Carbon, azote = nitrogen.]

*Chem.*: Trinitrophenol, Nitrophenetic acid, Picric acid, *μικρός* (*mikros*) = bitter,  $C_6H_3N_3O_7 = C_6H_2(NO_2)_3(OH)$ . Prepared from the impure nitrophenetic acid. It is also obtained by the action of nitric acid and lidigo, silk, wool, resin, &c. It crystallises in yellow crystals, soluble in water, has a very bitter taste, and dyes silk and wool yellow, but does not dye cotton, hemp, and flax. Its salts are called *picrates*. Potassium picrate is very slightly soluble in water; when heated it explodes with great energy. Carbazotic acid is a nitro-substitution compound of phenol.

**car-bide**, *s.* [From Eng., &c. *carb* (on); and suff. -ide (*Chem.*) (q.v.).]

*Chem.*: A compound formed by the union of carbon with an element, as iron or hydrogen.

**car-bin, cair-ban**, \* **car-fin**, *s.* [Scotch.] [Gael. *cairbean*.] The basking-shark, *Squalus maximus*, L.

**car-bine, car-bīne**, \* **cār-a-bīne**, *s. & a.* [O. Fr. *carabin*; Fr. *carabine*; Ital. *carabino* = a little gun, corrupted from O. Fr. *calabrien*, *calabrin* = a light-armed soldier; O. Fr. *calabre*, *caable* = an engine of war; from Low Lat. *chadabula* = a catapult; Gr. *καρβόλη* (*karabolē*) = a throwing down, destruction; *κατά* (*kata*) = down; *βολή* (*bolē*) = a throwing; *βάλλω* (*ballō*) = to throw.]

**Military:**

\* 1. A musketeer, a carbineer.

"When he was taken, all the rest they fled,  
And our carbines pursued them to the death."  
*Kyd: Spanish Tragedy.*

2. A short fire-arm, used by cavalry, artillery, in the navy, &c., similar in bore and nature to, and carrying the same ammunition as, the infantry rifle. Except with cavalry, furnished with a sword-bayonet to increase its length as an offensive weapon. It is in general use by United States cavalry, which

are all of light equipment, and adapted to serve as infantry on occasion. In such cases the carbine proves a highly useful arm. Colt's, Sharpe's, and other makes of carbines are used.

"... continued to fly on foot, throwing away carbines, swords, and even coats as incumbrances."—*Maloulay: Hist. Eng.*, ch. xli.

**B. As adj.**: (See the compounds.)

**carbine-lock**, *s.* The lock of a carbine.

"Sling on thy hughle—see that free from rust  
My carbine-lock springs worthy of my trust."  
*Byron: The Corsair*, l. 7.

**carbine-thimble**, *s.* A stiff leathern socket, secured to a D-ring on the off-side of the saddle by a strap and buckle. It receives the muzzle of the horseman's carbine.

**car-bin-ēr**, **cār-a-bin-ēr**, *s.* [Fr. *carabinier*.]

*Mil.*: Formerly applied to mounted infantry armed with a short carbine, and intended to fight on foot. Name still retained in England by the 6th Dragon Guards.

**car-bīn-īl**, *s.* [From Lat. *carbo* (genit. *carbōnis*) (?), and Eng., &c. (*alcohol*).]

*Chem.*: A name given to methyl alcohol,  $C(OH)H_3$ , by Kolbe, and the alcohols formed from it, by substitution of methyl, ethyl, &c., for an atom of hydrogen, are named according to the radicals which they contain, as Trimethyl carbinol, or Tertiary Quartyl alcohol,  $C(OH)(CH_3)_3$ .

**car-bīn-īl**, *s.* [From Eng., &c. *carbin* (ol), and -yl.]

*Chem.*: The name given to the alcohol radicals of the corresponding carbinols, as Dimethyl carbinol  $C(CH_3)_2H.OH$  contains the radical Dimethyl-carbinyli  $C(CH_3)_2H$ .

\* **car-bō**, *s.* [Lat. = coal, from the jet-black colour of its wings.]

*Ornith.*: An old synonym of *Phalacrocorax* (q.v.).

**car-bō-çēr-ite**, *s.* [Eng. *carbo* (n), and *cerite* (q.v.).]

*Min.*: Carbonate of cerium, also called *Lanthanite* (q.v.). It consists of oxide of cerium, 75.7; carbonic acid, 10.3; water, 13.5. Sp. gr. 2.605—2.666. Hardness, 2.5—3. It occurs at Bastuås, in Sweden, and also in Silurian limestone in Saucou Valley, Leileigh Co., Pennsylvania.

**car-bōl-īc**, *a.* [From Eng., &c. *carbo* (n), (*alcohol*); and Eng. suff. -ic.]

*Chem.*: Pertaining to, or derived from, carbon.

**carbolic-acid**, *s.*

*Chem.*:  $C_6H_5.OH$  = Phenyl Alcohol, Phenol, Phenic Acid, Coal-tar Cresate. Phenol is not technically an acid, but a secondary monatomic aromatic alcohol, obtained by the dry distillation of salicylic acid, and formed by the dry distillation of coal, in the coal-tar oil. When pure it forms white deliquescent crystals melting at 35° to an oily liquid, which boils at 184°. It has a penetrating odour and burning taste; it is neutral; it coagulates albumen and has powerful antiseptic properties. It is used as a disinfectant, and to preserve meat, &c. It dissolves in alkalies, forming compounds called *phenates*. Potassium phenate crystallises in white needles; when it is heated with iodide of ethyl, methyl, &c., carbolic ethers are formed, as methyl-phenate  $C_6H_5OCH_3$ . Chlorine, bromine iodine, and nitric acid form with it substitution compounds. [CHLOROPHENESIC ACID, CARBAZOIC ACID.] Phenol is benzene with one molecule of (OH) substituted for one atom of H.

**car-bō-lize**, *v. l.* [Eng. *carbolic* (ic); -ize.] To impregnate with carbolic acid.

**car-bōn**, *s.* [Fr. *carbone*; from Lat. *carbo* = a coal.]

*Chem.*: A tetrad non-metallic element, symbol C. Atomic weight, 12. Carbon occurs in three allotropic forms—two crystalline (diamond and graphite), and one amorphous (charcoal). Diamond crystallises in forms belonging to the regular system. It is transparent, either colourless, or yellow, pink, blue, or green. The hardest substance known, refracts light strongly, is infusible, but is burnt into  $CO_2$  in oxygen gas at white heat. Sp. gr. 3.5. It is a non-conductor of electricity. It is found in gravel in India, Brazil, &c. [DIAMOND.] Graphite crystallises in six-sided prisms. Sp. gr. 2.3. It is grey-black, with a metallic lustre. It is a good conductor of electricity. Graphite often separates in scales from molten iron; it is used for lead pencils; it is often called black-lead. [GRAPHITE.] Amorphous carbon occurs more or less pure in lampblack, wood charcoal, coal, coke, and animal charcoal. Sp. gr. from 1.6 to 2. It is porous, absorbs gases, removes colour from organic liquids, is used as a disinfectant, and burns in the air at red heat, forming  $CO_2$ . When boiled with  $H_2SO_4$  it is oxidised to  $CO$ , and  $EO_2$  is also formed, which escape in gas used as a reducing agent. Carbon forms two oxides with oxygen,  $CO$  and  $CO_2$ , carbonic oxide and carbonic anhydride.

**carbon-battery**, *s.*

*Elect.*: [BUNSEN-BATTERY.]

**carbon chlorides**, *s. pl.*

*Chem.*: Carbon monochloride. This compound has been discovered to be hexa-chlorobenzene  $C_6Cl_6$  by determination of its vapour

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sire, sir, marine; gō, pēt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quīte, cūr, rūle, fūll; try, Sŷrian. æ, œ = ē. ey = ā. qu = kw.

density. It is obtained by passing the vapour of chloroform through a red-hot tube. It forms white silky needles, melting at 226°, and boiling at 331°.

analogous to ethene, obtained by passing the vapour of carbon-trichloride through a red-hot tube. It is a colourless liquid. Sp. gr., 1.6. It boils at 117°.

to ethane, obtained by placing ethene chloride into a glass vessel containing Cl and exposing it to sunshine. A white crystalline aromatic substance melting at 160°, and boiling at 182°.

A colourless liquid, sp. gr. 1.56, and boiling at 77°; obtained by passing the vapour of Cl and  $CS_2$  through a red-hot tube, and distilling the liquid formed with potash. Also formed by the action of Cl on  $CH_4$  in direct sunlight. By the action of sodium amalgam on its alcoholic solution the atoms of Cl are replaced by atoms of hydrogen.

**carbon dioxide, s.**

*Chem.*: Carbonic acid gas, Carbonic anhydride, Carbonic oxide (of some chemists) =  $CO_2$ . Carbon dioxide is a colourless gas 1.524 times as heavy as air, and 22 times as heavy as hydrogen. It is evolved in large quantities from fissures in active and extinct volcanic districts. It is given off in the process of fermentation, from decaying animal and vegetable matter and by animals during respiration, and it contaminates crowded rooms. It accumulates also in the bottom of pits and wells, and forms a great part of the afterdamp or choke-damp of coal mines. It is also contained in most waters from springs, and water charged with it has the power of dissolving carbonates of calcium, magnesium, and iron. It is always produced when carbonaceous matter is burnt in excess of air or oxygen. It has an agreeable pungent odour, but it cannot be respired, as it produces insensibility and death. It extinguishes the flame of a lighted taper. At the pressure of 33.5 atmospheres at 0° it is converted into a colourless limpid liquid insoluble in water, but soluble in ether and alcohol; it solidifies, on exposure to the air, into a snow-white mass, which is a bad conductor of heat; when mixed with ether it is used as a freezing mixture. Carbon dioxide exists in the air, and is decomposed by the green leaves of plants, which retain the carbon and liberate oxygen in sunlight. About four volumes of  $CO_2$  are contained in 10,000 volumes air. The total quantity is estimated at about three billions of tons. Cold water dissolves about its own volume of carbon dioxide, whatever be the density of the gas with which it is in contact, the solution reddens blue litmus paper, and converts oxides of the alkaline and alkaline earth metals into carbonates (q.v.). Carbon dioxide is contained in aerated waters and in sparkling wines. Carbon dioxide can be obtained by burning carbon in excess of oxygen; but by passing  $CO_2$  over red-hot charcoal it is converted into carbon monoxide. Carbon dioxide is usually prepared by decomposing a carbonate with one of the stronger acids, as by the action of hydrochloric acid on marble, which gives calcium chloride, water, and  $CO_2$ . Carbon dioxide can be distinguished by its giving a white precipitate when passed into a solution of lime or baryta water, by its quick absorption by caustic alkalies, and by its extinguishing the flame of a lighted taper. [CARBONATE.] Carbon dioxide is decomposed by heating potassium in it, forming an oxide and liberating carbon.

**carbon disulphide, s.** [BISULPHIDE OF CARBON.]

**carbon-holders, s. pl.**

*Elec.*: Clamps for holding the carbons in electric arc lights.

**carbon-light, s.**

*Elec.*: The light produced between and upon two carbon points, between which passes

a current of electricity. [ELECTRIC LIGHT.]

**carbon monoxide, s.**

*Chem.*: Carbonous oxide, Carbonic oxide, Carbonyl =  $CO$ . Carbon monoxide is a colourless, inodorous, tasteless gas, insoluble in water, sp. gr. 0.967. It burns with a light-blue flame, forming  $CO_2$ . It is intensely poisonous, even when mixed with large quantities of air, producing faintness, insensibility, and death. It is formed when  $CO_2$  is passed over red-hot charcoal, also by heating oxalic acid  $C_2H_2O_4$ , with sulphuric acid, which decomposes it into  $H_2O$ ,  $CO_2$ , and  $CO$ . The  $CO_2$  is removed by passing the gas through limewater. It unites with  $KHO$  at high temperatures, forming formate of potassium. It unites with Cl when exposed to sunlight, forming phosgene gas  $COCl_2$ . Carbon monoxide can also be formed by heating powdered ferrocyanide of potassium with ten times its weight of concentrated sulphuric acid. Carbon monoxide (Carbonyl) in organic chemistry acts as a diazonic radical.

**carbon oxychloride, s.**

*Chem.*: Phosgene gas, Carbonyl chloride,  $COCl_2$ . Obtained by exposing dry  $CO$  and  $Cl_2$  to direct sunlight, also by passing carbon monoxide into boiling antimony pentachloride, and by the oxidation of chloroform. It is collected over mercury. It condenses into a liquid at 0°. It is decomposed by water forming carbon dioxide and hydrochloric acid. Treated with dry ammonia gas  $NH_3$ , it forms urea  $CO(NH_2)_2$  and ammonium chloride.

**carbon-paper, s.** Paper coated on one side with a substance which, under pressure, adheres to a blank sheet placed next to it. Used for manifolding on a typewriter or otherwise.

**carbon-printing, s.**

*Photog.*: A photographic process introduced by Poitvin in 1855. It is as follows: Paper is coated with a compound of bichromate of potassa, gelatine, and lamp-black, in cold distilled water; this is allowed to dry in a dark room, subsequently exposed between a negative for a few minutes, according to the character of the solution and of the light, then dissolving off with hot water the parts not affected by the actinic action of the light. The picture resulting from this treatment is a positive print in black and white, of which the shades are produced by the carbon of the lamp-black. Poitvin also introduced various colours into the same process. Poitvin, later, introduced another process for carbon-printing under a positive. The paper is floated in a bath of gelatine dissolved in lukewarm water and coloured with lamp-black. Such paper is sensitized in a dark room by immersion in a solution of aescuichloride of iron and tartaric acid. This renders the gelatine insoluble, even in boiling water. The sheets are dried and exposed under transparent positives in the printing-frames. The parts of the film acted upon by light become soluble in hot water, the iron salts, under the influence of light, being reduced by the tartaric acid, restoring the organic matter to its natural solubility. The sheet is then washed in hot water, which removes the ferruginous compound and develops the picture. Improvements were subsequently introduced by Swann, of Newcastle-upon-Tyne, in 1861, and others.

**carbon sulphochloride, s.**

*Chem.*:  $CSCl_2$ , a yellow, irritating liquid, decomposed by potash into  $K_2S$ ,  $K_2CO_3$ , and  $CCl_4$ . It is not acted upon by water. It is obtained by the action of dry chlorine on carbon disulphide.

**carbon tool-point, s.** An application of the diamond to mechanical purposes. These points are used to point, edge, or face tools for drilling, reaming, sawing, planing, turning, shaping, carving, engraving, and dressing flint, grindstones, whet-stones, emery, corundum, tanite, or tripoli wheels, iridium, nickel, enamel, crystals, glass, porcelain, china, steel, hardened or otherwise, chilled iron, copper, or other metals. Twenty-eight forms of it are figured in *Knight's Practical Dictionary of Mechanics*.

**car-bō-nā'-cē-ōūs, a.** [From Lat. *carbo* (genit. *carbōnis*) = charcoal, and Eng. suffix *-aceous*, from Lat. suffix *-aceus*.]

*Min. & Geol.*: Consisting mainly of carbon, the simple element of charcoal.

¶ In geology the term is applied to strata wholly or in large part formed by the accumulation of such vegetable material as sunken forests, massed drift-wood, turf, and moss-bogs. Coal, lignite, and peat have hydrogen as well as carbon in their composition, and often mineral impurities. Anthracite and graphite (metamorphosed coal) consist of nearly pure carbon. Diamond is pure carbon. Bituminous shales, fossil pitch, petroleum, and naphtha are some other of the carbonaceous materials found in the earth. In exceptional cases the carbon of carbonaceous rocks may be of animal origin, thus the oily matter with which the bituminous shales of Caithness are impregnated seems to have been derived from the decomposition of fossil fishes rather than of plants.

\* **car-bō-nā'de, \*car-bō-nā'-dō, s.** [Fr. *carbonnade*; from O. Fr. *carbon*; Lat. *carbo* (genit. *carbōnis*) = charcoal.] A piece of fish, flesh, or fowl, cut in slices, seasoned, and broiled.

"If I come in his way willingly, let him make a carbonado of me."—*Shakesp.*: 1 *Henry IV.*, v. 2.

**car-bō-nā'r-īsm, s.** [*Carbonari*(i); *-ism*.] The principles of the Carbonari.

**car-bō-nā'-ro (pl. carbonari), s.** [Ital. *carbonaro* = a collier.] A member of a secret association established in Italy in the beginning of the present century, with the object of setting up a republic. The Carbonari took charcoal [Ital. *carbone*] as their symbol of purification, and adopted as their motto, "Revenge on the wolves who devour the lambs." The origin of the society is uncertain.

**car-bōn-ā'te, s.** [From Eng. *carbonic*; and suff. *-ate* (*Chem.*) (q.v.)]

*Chem.*: Carbonates are salts. The corresponding acid,  $H_2CO_3$ , is not known in a free state; it may be formed when  $CO_2$  is dissolved in water; it is dibasic; the carbonates of the alkaline metals are soluble in water, and are either acid or neutral salts according as one or both atoms of H are replaced, as  $KHCO_3$  and  $K_2CO_3$ . The acid salts are often called bicarbonates. The carbonates of the other metals are insoluble. Basic carbonates are mixtures of carbonates and oxides. Carbonates liberate  $CO_2$  when treated with an acid, which may be recognised by passing it into a solution of baryta water, in which it throws down a white precipitate of  $BaCO_3$ , soluble in HCl. Carbonic acid may be theoretically considered to have this formula and belong to the lactic acid series—

**car-bōn-ā-tēd, a.** [CARBONATE.]

*Chem.*: Combined or impregnated with carbonic acid. Carbonated water is either pure or holding various saline matters in solution, impregnated with carbonic acid gas. For general sale in this country the water contains a little soda, which being charged with the gas is called soda-water. (*Urs*: *Dictionary of Arts, Manufactures, and Mines*.)

**car-bōn'-ic, \*car-bōn'-ick, a.** [Eng. *carbon*; *-ic*.] Containing carbon, pertaining to carbon.

carbonic acid, s.

1. Chem. & Ord. Lang.: The old but still well-known name for what is called by modern chemists carbon dioxide (q.v.).

2. Physiol.: Air exhaled from the lungs is saturated with moisture, and, moreover, contains about 4/35 per cent. of carbonic acid. The amount is increased by active exercise. By breathing the same air again and again, it is possible to increase the carbonic acid to about 10 per cent., but with very deleterious effects. Air in which animals had been suffocated was found by Mr. Courthope to contain 12.75 per cent. of carbonic acid, but less than half that amount (5 to 6 per cent.) will endanger life.

Carbonic acid engine:

1. An engine driven by the expansive power of condensed carbonic acid gas.

2. A machine for impregnating water with carbonic acid gas as a beverage.

3. A form of fire-engine, in which water is ejected by the pressure due to the evolution of carbonic acid in a closed chamber over water, or in which carbonic acid is ejected with the water, to assist in extinguishing the fire by the exclusion of oxygen from it.

carbonic oxide, s. The old name for carbon monoxide (q.v.).

car-bôn-if-ër-ôüs, a. [Lat. *carbo* (genit. *carbónis*) = coal; *fero* = to bear, produce, and Eng. *snif-ous*.]

Geol.: A term applied to the extensive and thick series of strata with which seams of paleozoic coal are more or less immediately associated. It is applied as well to that great system of formations which yield our main supply of coal as to some divisions of that system, such as the Carboniferous Limestone and the Carboniferous Slates (of Ireland). It is also applied to the fossils found in any stratum belonging to the system.

carboniferous system or formation, s.

Geol.: The Carboniferous succeeds the Old Red Sandstone or some other member of the Devonian system, and passes upwards into the Permian series. Its constituent groups vary much in the thicknesses of their sandstones, clays, limestones, and coals in different parts of the country, according to their conditions of deposition in continuous seas, estuaries, and lagoons.

The Carboniferous System attains a great development in the United States, the strata being divided into two groups, the lower or sub-Carboniferous, and the Carboniferous, comprising the millstone grit and the coal measures. According to Professor Dana the coal-bearing area of North America is approximately as follows:

Table with 2 columns: Area, Sq. miles. Rows include Rhode Island area (560), Alleghany area (59,000), Michigan area (6,700), Illinois, Indiana, West Kentucky (47,000), Missouri, Iowa, Kansas, Arkansas, Texas (78,000), Nova Scotia and New Brunswick (38,000).

The Carboniferous System is strongly developed in England and Ireland and parts of Europe. China possesses extensive deposits.

Carboniferous fossils comprise labyrinthodont and other amphibia; heterocerous fishes of many forms; numerous insects, myriapods, and arachnids; crustaceans (including the last of the trilobites and the eurypterids) of all orders except the highest decapods; molluscs of all the known orders; polyzoa; corals of the "rugose" kind; foraminifera; and some plants of the conifer and cycad groups, but far more of the fern, equisetum, and lycopod orders.

The Carboniferous Limestone consists of the corals, encrinurids, shells, and foraminifera of a great sea, with muds, sands, and coalbeds on its margins, both at first (Thebian), and afterwards (Yoredale). These constitute the coal-measures of Russia, Styria, Itzly, Corsica, the Boulonnais, &c., and the Lower Coal-measures of Scotland.

The Millstone Grit next formed, in shallow water, of widespread sheets of sand and shingle, has a few scattered fossil plants and shells, and thin seams of coal. "Measures" is a mining term for strata, retained for the coal-measures, which consist of numerous successive groups of (1) clay, (2) coal, (3) shale, and (4) sandstone, each varying from a few inches to some feet in thickness. These originated as maritime flats with luxuriant jungles, subjected to inundations of fresh and

brackish waters, with mud and sand, and sometimes of sea-water, leaving a limestone of sea-shells.

The thick forests of gigantic lycopods, equisetes, and ferns covered their floors with accumulated exuvie, and thick layers of each season's spore-dust. Storms tore down the clustered trunks, and covered them with the mud and sand of inundations. [COAL.]

The "underclay," or "seat-earth," under each coal-seam was the soil in which the trees (Sigillaria, Lepidodendron, and Calamites) grew, and is a pure clay used for fire-bricks, encaustic tiles, &c.

The "root-shale" over the coal, forming a tough roof to the galleries in mining, was brought by floods, together with its water-logged fern-fronds and trunks and branches of the larger plants. This and other shales ("bat," &c.) contain some beds of Anthracosia and other aquatic molluscs, also a few land shells, numerous entomostraca, and some higher crustacea, a few arachnids, insects, and myriapods, with occasional amphibia, and abundant remains of heterocerous fishes. These fossils are often imbedded in ironstone, concreted in the shales.

Thick sand-drifts, of frequent occurrence, formed the sandstones ("post," &c.), containing scattered plant-remains. (Prof. T. R. Jones, F.R.S.)

car-bôn-i-zā-tion, car-bôn-î-zā-tion, s. [Eng. *carbonize*(e); *-ation*.] The act or process of carbonizing, or converting into carbon. (Ure.)

car-bôn-ize, car-bôn-î-ze, v.t. [Eng. *carbon*; *-ize*.] To convert into carbon by the action of fire or acids.

car-bôn-ized, car-bôn-î-zed, pa. par. or a. [CARBONIZE.]

car-bôn-iz-ër, s. [Eng. *carbonize*; *-er*.] A tank or vessel containing benzole or other suitable liquid hydrocarbon, and through which air or gas is passed, in order to carry off an inflammable vapour. [CARBURETOR.]

car-bôn-iz-îng, car-bôn-î-îng, pr. par., a., & s. [CARBONIZE.]

A & B. As pr. par. & particip. adj.: (See the verb.)

C. As substn.: The act or process of converting into carbon; carbonization.

carbonizing-furnace, s. An apparatus for carbonizing wood, disintegrating rocks, &c. It is composed of a furnace or fire-chamber, movable upon a stationary frame, both vertically and horizontally, and provided with a nozzle by which the flame is directed upon the object.

car-bôn-ôm-ë-tër, s. [Eng. *carbon*, a con-nective, and *meter*.] An instrument for detecting the presence of an excess of carbonic acid by its action on lime-water. (Webster.)

car-bôn-ôüs, a. [Eng. *carbon*; *-ous*.] The same as CARBONIC (q.v.).

car-bôn-ÿl, s. & a. [From Lat., &c. *carbon* = charcoal, and Gr. *ύλη* (*hulê*) = . . . matter as a principle of being.] A diatomic radical having the formula CO.

carbonyl chloride, s. [CARBON OXY-CHLORIDE.]

car-bô-trî-a-mine, s. [From Eng. *carbo*(n); Lat. prefix *tri* = three, and Eng. *aminæ*.] [AMINES.]

Chem.: Guanidine, CH<sub>5</sub>N<sub>3</sub> or Cl<sub>3</sub> { NH<sub>2</sub> / NH<sub>2</sub> / NH<sub>2</sub> } An organic base produced by the action of ammonia on chloropicrin, also by heating cyanamide, CH<sub>2</sub>N<sub>2</sub>, in alcoholic solution with ammonium chloride. Also by oxidizing guanine with HCl and KClO<sub>3</sub>. Guanidine forms colourless crystals, forming an alkaline solution with water, which absorbs CO<sub>2</sub>. Guanidine boiled with baryta water yields ammonia and urea. Methyl, phenyl, &c. guanidines are known. (See Watts: *Dict. of Chemistry*.)

car-bôv-in-âte, s. [From Eng. *carbovin*(ic), and suff. *-ate* (Chem.).] A salt of carbovinic acid.

car-bô-vin-ic, a. [From Eng. *carbo*(n), and *vinic* (q.v.).]

carbovinic acid, s. The same as ETHYL CARBONIC ACID (q.v.).

car-bôy, s. [Corrupted from Pers. *garbhah* = a large flagon.] A large globular glass vessel, protected with wicker-work, and used for containing sulphuric acid and other corrosive liquids.

"Boil the whole . . . set it aside in a coked carboy before it be bottled. Stir it well, and set it aside in carboys."—Ure: *K.V. Liquours*.

car-bûn-cle, \* car-bôn-cle, char-bôn-cle, \* char-buc-le, \* char-boc-le, \* char-buk-elle, \* char-hok-ull, s. [Fr. *carbuncle*; Ital. *carbuncolo*; Sp. *carbunclo*; Ger. *karbunkel*; all from Lat. *carbunculus* = a little coal, dimin. of *carbo* = a coal.]

1. Min.: A precious stone, a variety of garnet, of a deep-red colour, found in the East Indies. When held up to the sun its deep tinge becomes exactly the colour of a burning coal. In the Middle Ages it was popularly supposed to have the power of giving out light. It is cut in a form called concave cabochon.

"The stous noblest of alle The which that iuen carbuncle calle" Gower: *G. A.* l. 57.

"And they set in it four rows of stones; the first row was a sardius, a topaz, and a carbuncle . . ."—Exod. xxxix. 10.

2. Script.: The carbuncle of Exod. xxxix. 10, Heb. *בַּרְבַּקֶּת* (*baraketh*), and that of Ezek. xxxviii. 13, Heb. *בַּרְבַּקֶּת* (*baraketh*), is probably the emerald; that of Is. liv. 12, Heb. *בַּרְבַּקֶּת* (*elkadakh*), is an unidentified flashing gem.

3. Med.: A malignant boil or niger, forming a hard round tumour, and differing from an ordinary boil in having no core.

\* car-bûn-clêd, a. [CARBUNCLE.]

1. Set with carbuncles. "An armour all of gold; it was a king's—He has deserved it; were it carbuncled Like holy Phoenix car."—Shakespeare: *Ant. & Cleop.* iv. 2.

2. Affected or marked with carbuncles; suffering from a carbuncle.

car-bûn-cu-lar, a. [Eng. *carbuncle*; *-ar*.] Of or pertaining to a carbuncle; of the nature of a carbuncle. (Johnson.)

\* car-bûn-cu-lâte, a. [Lat. *carbunculus*, pa. par. of *carbunculo* = (1) to suffer from carbuncles; (2) (of plants) = to be blasted.]

O. Bot.: Blasted by excessive heat or cold.

\* car-bûn-cu-lâ-tion, s. [Lat. *carbunculatio*, from *carbunculo* = (1) to suffer from carbuncles, (2) (of plants) = to be blasted.] The blasting of the young buds of trees or plants, either by excessive heat or excessive cold. (Harris.)

\* car-bûn-cu-lyne, a. [Lat. *carbunculus*(us); Eng. suff. *-yne* = *-ine*.] Full of red pebbles or clods.

"Black earth is apt, and londe carbunclygne."—Palladius, xli. 20.

\* car-bû-rêt, s. [From Eng., &c. *carbo*(n), and suff. *-uret* (Chem.) (q.v.).]

Chem.: A compound formed by the combination of carbon with another substance.

car-bû-rêt-têd, a. [Eng. *carburet*; *-ed*.]

Chem.: Combined with carbon, or holding carbon in solution. The gas known among miners as *fire-damp* is pure carbureted hydrogen.

car-bû-rêt-tôr, car-bû-rêt-ôr, s. [Eng. *carburet*; *-or*.]

Chem.: An apparatus for making carburets, through which coal-gas, hydrogen, or air is passed through or over a liquid hydrocarbon, to increase or confer the illuminating power. They may be said to be of two kinds, though the purpose differs rather than the construction: (1) for enriching gas, (2) for carbureting air. The former of the two was the primary idea; the latter was suggested as the matter was developed.

car-bû-rî-zâ-tion, s. [From Eng. *carburet*; *-is*; and *-ation*.]

Of iron: The act of combining it with carbon with the view of converting it into steel.

car-bÿl, s. [From Eng. *carb*(on), and Gr. *ύλη* (*hulê*) = . . . matter as a principle of being.] (See compound.)

carbyl-sulphate, s. [ETHIONIC OXIDE.]

car-ca-jou (j as zh), s. [N. Amer. Indian.] Zoology: 1. The Glutton (*Canis lucus*).

âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôb, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, quîte, cûr, rûle, rûll; trÿ, Sÿrian. s, œ = ô; ey = â. qu = kw.

- 2. The American Badger *Meles labradorica*.
- 3. Wrongly applied to the Canadian Lynx.

**car-ca-net** (*Eng.*) \* **car-cant** (*Scotch*), *s.*  
[A diminutive of Fr. *carcan* = a chain or collar; Dut. *kerkant*; Low Lat. *carcanum*; cf. Icel. *kerk* (in comp. *kerka*) = the throat.]

1. A jeweled chain or collar.  
"Round thy neck in subtle ring  
Make a carcanet of toys."  
*Temnyson: Adeline, s.*

A pendant ornament of the head.  
"Upon their forebrows they did bear  
Tigrets and tablets of trim works,  
Pendants and carcanets shining clear."  
*Watson's Coll., ll. 10.*

**car-cass**, \* **car-cais**, \* **car-cays**, \* **car-caso**, \* **car-koys**, \* **car-kasse**, \* **car-kas**, *s. & a.* [O. Fr. *carcasse* = "a carcasse or dead corpse" (*Colgrave*); Fr. *carcas*; Ital. *carcasso* = a bomb, a shell; *carcasso* = a quiver, hulk; Sp. *carcasa*; Low Lat. *carcasus* = a quiver; Pers. *tarkash* = a quiver.]

A. As substantive:

1. Ordinary Language:

(1) Literally:

† (1) A body.

"Lovely her face; was ne'er so fair a creature,  
For earthly carcass had a heavenly feature."  
*Oldham: Poems.*

(2) A dead body, a corpse.

"*Carkys. Corpus, eadaer.*"—*Prompt. Parv.*  
"Could I myself the bloody banquet join!  
No—to the dogs that carcass I resign."  
*Pope: Homer's Iliad, bk. xxii. 473-8.*

¶ Now only used in contempt.

(3) The body of a slaughtered animal, after the head, limbs, and offal have been removed

2. Figuratively:

(1) The decayed or ruined remains of anything.  
"A rotten carcass of a boat, not rig'd,  
Nor tackle, sail, nor mast."  
*Shakesp.: Tempest, l. 2*

(2) Any rotten or corrupt body.

"Society," says he, "is not dead: that Carcass,  
which you call dead Society, is but her mortal coil  
which she has shuffled-off, to assume a nobler..."—  
*Carlyle: Sartor Resartus, bk. iii., ch. v.*

(3) The unfinished framework or skeleton of anything; thus, the carcass of a horse = the walls; the carcass of a ship = the ribs, with keel, stern, and stern-post, after the planks are stripped off.

II. *Mil.*: A cast-iron, thick-metalled, spherical shell, having three fire-holes. Filled with a composition of saltpetre, sulphur, rosin,

CARCASS.

sulphide of antimony, tallow, and Venice turpentine, which burns about twelve minutes. Fired from smooth-bore guns, howitzers and mortars. Used to ignite combustible materials.

¶ For the distinction between carcass and body, see *Body*.

B. As adj.: (See the compounds).

**carcass-flooring, s.**

*Carpent.*: That which supports the hoarding, or floor-boards above, and the ceiling below, being a grated frame of timber, varying in many particulars. (*Gwilt*.)

**carcass-roofing, s.**

*Carpent.*: The grated frame of timber-work which spans the building, and carries the boarding and other covering. (*Gwilt*.)

**carcass-saw, s.** A kind of tenon-saw. The blade is strengthened by a metallic backing, which is bent over and closed upon it with a hammer. (*Knight*.)

\* **car-cat**, \* **car-kat**, **car-ke**, **car-cant**, *s.*  
4. [CARCANET.]

1. A necklace. (*Scotch*.)

"Their collars, carcats, and hals helds."  
*Wauland Poems, p. 377.*

2. A pendant ornament of the head. (*Watson: Coll.*)

3. A garland of flowers worn as a necklace. (*Discipline.*) (*Jamieson*.)

\* **car-geir**, \* **car-pér**, *v.t.* [Low Lat. *carceris*, *CARCER*, *s.*] To imprison.

"This Felton had belu tyuse carcerid by the Duke  
[of Buckingham] . . ."—(*Gordon: Hist. Earls of Sutherl., p. 208.*)

**car-çel**, *s.* [The name of the inventor.]

**carcel-lamp, s.** A French lamp, in which the oil is raised to the wick by clock-work. It was invented early in the 19th cent., and is used in some lighthouses.

\* **car-çel-âge**, *s.* [Sp. *carcelage*; Low Lat. *carcelagium*, *carceragium* = a prison fee; from *carcel* = a prison.] Prison fees.

**car-çer**, *s.* [Lat. *carcer* = a goal, a prison.] A prison; a starting-post or goal.

\* **car-çer-äl**, *a.* [Lat. *carceralis* = belonging to a prison; *carcer* = a prison.] Pertaining to, or of the nature of a prison.

"Notwithstanding through favour they were contented,  
that he should be released from his carceräl  
indurance . . ."—*Pope: Martyrs: Ben. VI., l.*

**car-çer-y-lar**, *a.* [From Eng. *carcerule* (q.v.), and suff. *-ar*.]

*Bot.*: Of or belonging to a carcerule. (*Lindley*.)

**car-çer-üle**, *s.* [A duin. from Lat. *carcer*.]

*Bot.*: An indehiscent many-celled, superior fruit, such as that of the linden. Also employed among fungals to denote their sporocæ. (*Treas. of Bot.*)

**car-chär-y-äs**, *s.* [Gr. *καρχαρίας* (*karcharias*) = a kind of shark.]

*Ichthy.*: A genus of sharks, the typical one of the family Carcharidae. *Carcharias vulgaris* is the White Shark. *C. vulpes* the Fox Shark, *C. glaucus* the Blue Shark.

**car-chär-y-dæ**, *s. pl.* [From Gr. *καρχαρίας* (*karcharias*) = a kind of shark, and Lat. fem. pl. suff. *-idæ*.]

*Ichthy.*: The most typical family of Sharks, placed under the fish-order Selachia and the sub-order Plagiostomata. They have large triangular sharp teeth, two dorsal fins, both without spines, a head of the ordinary form (not hammer-shaped as in the allied family Zygenidae), and no spiracles. [CARCHARIAS.]

**car-chär-ö-dön**, *s.* [Gr. *κάρχαρος* (*karcharos*) = jagged, pointed; *καρχαρίας* (*karcharias*) = a kind of shark; *ὀδών* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

*Palæont.*: Various fossil sharks known by their teeth, which have been found in the Eocene of Sheppey, as well as in the cretaceous rocks, whilst some dredged up by the "Challenger" expedition are believed to be Miocene.

**car-chär-öp-sis**, *s.* [Gr. *κάρχαρος* (*karcharos*) = jagged, pointed; *καρχαρίας* (*karcharias*) = a kind of shark, and *ὀψις* (*opsis*) = a face.]

*Geol.*: A genus of carboniferous shark-like fishes. (*Stormouth*.)

**car-çin-ö-dæg**, *s.* [Gr. *καρκινώδης* (*karkhinodês*) = cancerous.]

*Bot.*: A term applied to what is commonly called canker in trees, which may in general be characterized as a slow decay inducing deformity. The appearances are very different in different plants, and the same plant, as the apple, may even exhibit three or four different varieties.

\* **car-çin-ö-lög-y-cal**, *a.* [Eng. *carcinology* (y); *-ical*.] Pertaining to carcinology.

\* **car-çin-öl-ö-çy**, *a.* [Gr. *καρκίνος* (*karkinos*) = a crab; *λόγος* (*logos*) = a treatise, discourse.] The science which treats of the crab and other crustaceans.

**car-çin-ö-ma**, *s.* [Lat. *carcinoma*; from Gr. *καρκίνωμα* (*karkinôma*); from *καρκίνος* (*karkinos*) = a crab, a cancer.]

1. *Med.*: A name given to cancer, owing to

a certain resemblance which some forms of the disease present to a crab. [CANCER.]

"When this process commences it is in that stage which has been denominated *carcinoma*, or cancer."—*Copland: Dictionary of Practical Medicine.*

2. *Bot.*: A disease in trees when the bark separates; an acrid sap exuding and ulcerating the surrounding parts.

**car-çin-öm-a-toüs**, *a.* [Lat. *carcinoma*; Gr. *καρκίνωμα* (*karkinôma*), genit. *καρκινώματος* (*karkinômatos*); and Eng. suff. *-ous*.] Of or pertaining to carcinoma or cancer. (*Ash, &c.*)

**car-çin-üs**, *s.* [Gr. *καρκίνος* (*karkinos*) = a crab, a cancer.]

1. *Pathol.*: A cancer.

2. *Zool.*: A genus of short-tailed Crustacea. *Carcinus Mænas* is a small crab common around the shores of Britain. It is eaten by the poor, but is not equal to the larger crab, *Cancer pagurus* (q.v.).

**card** (1), *s. & a.* [Fr. *carte*; Ital. & Sp. *carta*, Ger. *karte*; Dut. *kaart*; from Lat. *charta*; all = paper.]

A. As substantive:

1. Ordinary Language:

(1) Literally:

(1) *Gen.*: A piece of pasteboard, or material made of several sheets of paper united.

(2) *Specially*:

(a) A small oblong piece of fine pasteboard, on which is printed a person's name and (sometimes) address, to be left by visitors calling at a house.

"Our first cards were to Carabas House. My Lady's are returned by a great big flunky; and I leave you to fancy my poor Betty's discourtesy as the lodging-house maid took in the cards, and Lady St. Michael's drives away, though she actually saw us at the drawing-room window."—*Thackeray: Book of Snobs, ch. xxviii.*

(b) The same as *Postal-card* (q.v.).

(c) The same as II. 1 (q.v.).

(d) The programme of any sports, especially races.

"The card was a pretty good one, and the stands and rings received a fair amount of patronage."—*Daily Telegraph, May 11, 1881.*

¶ On the cards: Possible. (*Colloquial*.)

2. *Fig.*: An indicator or guide.

"On life's vast ocean diversely we sail,  
Reason the card, but passion is the gale."  
*Pope: Essay on Man, ll. 108.*

¶ To speak by the card: To be very exact or careful in one's words.

"How absolute the knife is! we must speak by the card, or equivocation will undo us."—*Shakesp.: Hamlet, v. 1.*

II. *Technically*:

1. *Games*:

(1) One of a number of small oblong pieces of thin pasteboard marked with divers points and figures, and used in games of chance or skill.

"Soon as she spreads her hand, th' aerial guard  
Descend, and sit on each important card."  
*Pope: Rape of the Lock, ll. 32.*

¶ Playing-cards were probably invented in the East. In Italy they originally bore the name of *Nardi*, but they are still, in Spain and Portugal, called *Naipes*, signifying, in the Eastern languages, divination. Cards were first printed by hand. The art of printing cards was discovered in Germany between 1350 and 1360. It has been stated that cards were in use in Spain in 1332. In 1387, John I., king of Castille, prohibited their use. In France card-playing was practised in 1361, and at the end of the fourteenth century we find Charles VI. amusing himself with cards during his sickness. The figures on modern cards are of French origin, and are said to have been invented between 1430 and 1461.

(2) *Pl.*: A game played with such cards.

(3) A piece in the game of dominoes.

(2) *Naut.*: A circular sheet of paper on which the points of the compass are marked.

"The very ports they blow,  
All the quarters that they know,  
I' th' shipman's card."  
*Shakesp.: Macbeth, l. 1.*

B. As adjective: (See the compounds).

¶ Compounds of obvious signification: *Card-basket*, *card-case*, *card-making*, *card-party*, *card-playing*, *card-rack*, *card-table*.

**card-cutter, s.** A machine for reducing cardboard to pieces of uniform and proper size for cards.

**card-grinding, s.** (See the subjoined compound.)

**böl**, **höy**; **pöüt**, **jöwi**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**; **thin**, **this**; **sin**, **aç**; **expect**, **Xenophon**, **exist**. **-ing**.

Card-grinding machine:

Mach.: A machine having a rotary emery-wheel revolving in a central position relatively to flats and card cylinders, which are arranged around it.

card-leaf tree, s.

Bot.: A West Indian name for *Cinchia*.

card-maker (1), \*cardemaker, s. A maker of playing-cards.

\*card-match, cardmatch, s. A match made by dipping pieces of card in melted sulphur.

"Take care that those who make the most noise who have the least to sell; which is very observable in the vendors of cardmatches."—Addison.

card-press, s.

Printing: A small press adapted for printing cards.

card-sharper, s. One who cheats at cards.

card-sharping, a. & s. [Eng. card & sharp, v. (q.v.).]

1. As adj.: Cheating at cards.

2. As subst.: The act or practice of cheating at cards.

card (2), carde, s. & a. [Fr. *carde*; Dut. *kaard*; Ger. *karde*; Dan. *karde*; Sw. *carda*; Sp. *carda*; Ital. *cardo*; all from Low Lat. *cardus*; Lat. *carduus* = a thistle, a tassel.]

A. As substantive:

\*I. Ord. Lang.: The head of the thistle or tassel used for combing wool or flax.

II. Technically:

1. Cotton & Wool Manufacture, &c.:

(1) An instrument for combing wool, flax, or cotton, to disentangle or tear apart the tussocks, and lay the fibres in parallel order that they may be spun. It is a wire-brush in which the teeth are inserted obliquely through a piece of leather, or of cotton, linen, or India-rubber, which is then nailed to a wooden back. (Knight.)

"Cards are instruments which serve to disentangle the fibres of wool, cotton, or other analogous bodies, to arrange them in an orderly lap or fleece, and thereby prepare them to be spun into uniform threads. . . . Cards are formed of a sheet or fillet of leather, pierced with a multitude of small holes; in which are implanted small staples of wire, with bent projecting ends called teeth."—Vre: Dictionary of Arts, Manufactures, and Mines.

"Cards, womans instrument. *Cardus, discipulorum*."—Prompt. Para.

(2) A siver of fibre from a carding-machine.

2. Menage: A currying tool formed of a piece of card-cloth mounted on a back with a handle, and used as a substitute for a curry-comb.

3. Weaving: One of the perforated pasteboards or sheet-metal plates in the Jacquard attachments to looms for weaving figured fabrics.

B. As adj.: (See the compounds).

card-clothing, s. The garniture of a carding-machine.

card-maker (2), s. A maker of a carding instrument.

"Cardmaker. *Cardifactor*."—Prompt. Para.

"Am out I Christopher Sly, by occupation a card-maker."—Shaksp.: *Taming of the Shrew*, Induct.

card-setting, a. (See the subjoined compound.)

Card-setting machine: A machine for setting the bent wire teeth (*dents*) in the bands or fillets of leather, or alternate layers of cotton, linen, and india-rubber, which form the backing of the wire brush of the carding-machine.

\*card (1), v. i. [CARD (1), s.] To play at cards, to gamble.

card (2), \*card-dyn, \*kar-dyn, v. t. [CARD (2), s.]

I. Lit.: To comb, to disentangle, cleanse, and straighten wool or flax with a card.

"Cardyn wolle. *Carpo*."—Prompt. Para.

"The while their wives do sit Beside them, carding wool."—*May*: *Virgil*.

II. Figuratively:

\*1. To clean or clear, to expurgate.

"If it be carded with coverlase."—P. Plowman (1602).

"This book must be carded and purged."—Shelton: *Don Quixote*.

\*2. To mix, mingle.

"It is an excellent drink for a consumption to be drunk either alone, or carded with some other beer."—Bacon: *Natural and Experimental History*.

3. To scold sharply. (Scotch.)

car-dám'-i-nē, s. [Gr. *καρδαμίνη* (*cardaminē*), a dimin. of *καρδαμιν* (*cardamum*) = water cress, from the taste of the leaves.]

Bot.: An extensive genus of herbaceous cruciferous plants, of which four species are British. *Cardamine pratensis*, the Cuckoo-flower or Lady's-smock, is a common but pretty meadow-plant, with large pale lilac flowers. A double variety is sometimes found wild. *C. hirsuta* is a common weed everywhere, varying in size, according to soil, from six to eighteen inches in height. The leaves and flowers of this species form an agreeable salad. This species produces young plants from the leaves, all that is necessary being to place them on a moist grassy or mossy surface. *Cardamine amara* is also not unfrequent.

card'-a-móm, s. [Lat. *cardamomum*; from Gr. *καρδάμωμον* (*cardamómmon*).]

1. Bot.: [AMOMUM.]

2. Comm., &c.: The aromatic tonic seeds of various zingiberaceous plants, as *Eleotaria cardamomum*, and *Amomum cardamomum*, which, besides their medicinal use, form an ingredient in curries, sauces, &c.

"The cardamoms of commerce are produced by the *Alpinia cardamomum*, a plant of the order Zingiberaceae (Ginger-worts). In Eastern Bengal the fruit of the *A. aromatica* is similarly employed."—Lindl.: *Vegt. Kingd.* (1847), p. 166-7.

3. Pharm. (pl. *cardamoms*): Cardamomum is the seed of *Eleotaria cardamomum*, a native of Malabar, an endogenous plant belonging to the order Zingiberaceae. The dark-coloured triangular seeds are contained in oblong triangular capsules of a light-yellow colour. The seeds have a fragrant odour and an aromatic taste. They are used in the form of tincture as an aromatic stimulant and carminative, often given with purgative medicines to prevent griping.

card'-bóard, s. [Eng. card, and board.] Pasteboard paper stiffened by several layers being joined together. Bristol board is all white paper, and is made of two or more sheets according to the thickness required. Other qualities are made by inclosing common thick paper between sheets of white or coloured papers of the required quality.

cardboard-press, s. A press having a pair of rolls adapted to be closed together with great force, and used to smooth and polish sheets of card passed therethrough.

card'-éd, pa. par. & a. [CARD (2), v.]

\*card'-ér (1), s. [CARD (1), v.] One who is addicted to card-playing, a gambler.

"The clothiers all have put off The spinsters, carders, fullers, weavers."—Shaksp.: *Henry VIII.*, l. 2.

B. As adj.: (See the subjoined compound).

carder-bee, s. A social bee, *Bombus muscorum*, found wild in West Europe. It is yellow in colour. It cards or teases out the moss or other material to be used in making its nest comfortable. A file of carder-bees stand out in a line from their nest; the first takes a piece of moss, teases it with its fore legs, then pushing it under the body to the next bee. This second one picks it up and repeats the process. So does the next and the next, till the last of the file pushes the carded moss under its body into the nest. The bee is one of the common British species. One who removes its nest to a box among flowers within his window, and strews moss loosely about, can see the whole carding process carried out before his eye.

car'-dī-nal, \*car-den-alle, \*car-den-ale, a. & s. [Fr. *cardinal*; Lat. *cardinalis*; from *cardo* = a hinge. A letter, professing to have been penned by Pope Anacletus I., in the first century, but in reality forged in the ninth, says:—"Apostolica sedes cardinet capitulum omnium Ecclesiarum a Domino eat constituta; sic sicut cardine ostium regitur, sic hujus S. Sedis auctoritate omnes Ecclesie reguntur."—"The Apostolic chair has been constituted by the Lord the hinge and head of all the Churches; and as a door is controlled by its hinge, so all Churches are governed by this Holy Chair." Pope Leo IX. points out the relation in which the word cardinal stood to the idea of a hinge:—"Glerici sumus Sedis *Cardinales* dicuntur, cardini nique illi quo cetera moventur vinculum adhaerentes."—"The clerics of the supreme Chair are called Cardi-

nals, as undoubtedly adhering more nearly to that hinge by which all things are moved."—(Trench: *On the Study of Words*, 2nd ed., pp. 76, 77.)]

**A. As adjective:**

1. That on which a thing or matter revolves or depends; most important, chief, principal.
2. Of a deep-red colour, less vivid than scarlet. (Used also substantively.)

"... holy men I thought ye,

Upon my soul, two reverend cardinal virtues;  
But cardinal sins, and hollow hearts, I fear ye."

Shakespeare: *Henry VIII.*, iii. l.

**B. As substantive:**

**1. Church Hist.:** The highest dignitary in the Roman Catholic Church under the Pope. They are seventy in number, in allusion to the seventy disciples sent out by our Lord, and have the right of electing the Pope. They include six cardinal bishops, fifty cardinal priests, and fourteen cardinal deacons, who constitute the sacred college, and are chosen by the Pope. The dress of a cardinal is a red cassock, a rochet, a short purple mantle, and a red hat, to show that they should be ready to shed their blood for the Holy See. Before the reign of Nicholas II. in the eleventh century, the Roman pontiffs were elected by the whole clergy of the city of Rome, and by the prominent laity—nay, even by the body of the citizens. This pontiff transferred the election primarily to the cardinals, the other parties signifying their assent, and, finally, Alexander III., in the Third Lateran Council (A. D. 1179), limited the election to the cardinals, two-thirds of whom must vote for the person elected. This is the method of election which still prevails.

A CARDINAL.

"Good father cardinal, cry thou, amen."  
Shakespeare: *King John*, iii. l.

\* **2. Ord. Lang.:** A red cloak worn by women, and so called from its supposed resemblance in form or colour to a cardinal's cap.

**care, \*kare, s. & a.** [A.S. *caru*, *caru*; O.S. & Goth. *kara*; O.H. Ger. *kara*; *chara* = sorrow, lamentation; M.H. Ger. *karn* = to lament.]  
**A. As substantive:**  
 1. Sorrow, grief.  
 "Profit of berthe is sorwe and care in luyngne."—*Previa*, ll. 218.  
 "His reward of hir self ful are  
 And hand for hir sin ilk care."  
*Metricall Homilies*, p. 14.

2. Solitude, anxiety, concern.  
 "I can be calm and free from care  
 On any shore, since God is there."  
*Cooper: A Poetical Epistle to Lady Austen*.  
 3. Cautiousness, heed (especially in the phrases, to have a care, to take care).  
 "My lady prays you to have a care of him."—*Shakesp.: Twelfth Night*, iii. 4.  
 "King Olaf, have a care!"—*Carlyle: Heroes and Hero-worship*, lect. 1.

4. Regard, charge, solicitude for, oversight.  
 "If we believe that there is a God, that takes care of us, . . . —Wotton.  
 ". . . we, and our affairs,  
 Are part of a Jehovah's care."  
*Cooper: A Poetical Epistle to Lady Austen*.

5. The object of one's regard or solicitude.  
 "Flushed were his cheeks, and glowing were his eyes:  
 Is she thy care? Is she thy care?" he cries."  
*Dryden: Virgil: Eccl. x. 33.*  
 "Our fathers live (our first most tender care),  
 Thy good Menesthus breathes the vital air."  
*Pope: Homer: Iliad*, xiv. 19.

6. It is vsgually used in the sense of inclination or desire.  
 "(1) Crabb thus distinguishes between *care*, *solicitude*, and *anxiety*: "These terms express mental pain in different degrees; *care* less than *solicitude*, and less than *anxiety*. *Care* consists of thought and feeling; *solicitude* and *anxiety* of feeling only. *Care* respects the past, present, and future; *solicitude* and *anxiety* regard the present and future. *Care* is directed towards the present and absent, near or at a distance; *solicitude* and *anxiety* are employed

about that which is absent and at a certain distance. We are *careful* about the means; *solicitous* and *anxious* about the end; and we are *solicitous* to obtain a good; and we are *anxious* to avoid an evil. The *cares* of a parent exceed every other in their weight. He has an unceasing *solicitude* for the welfare of his children, and experiences many an *anxious* thought lest all his care should be lost upon them."  
 (2) He thus discriminates between *care*, *concern*, and *regard*:—"Care and concern consist both of thought and feeling, but the latter has less of thought than feeling; regard consists of thought only. We care for a thing which is the object of our exertions; we concern ourselves about a thing when it engages our attention; and we regard for a thing on which we set some value and bestow some reflection. *Care* is altogether an active principle; the careful man leaves no means untried in the pursuit of his object; care actuates him to personal endeavours; it is opposed to negligence. *Concern* is not so active in its nature; the person who is concerned will be contented to see exertions made by others; it is opposed to indifference. *Regard* is only a sentiment of the mind; it may lead to action, but of itself extends no farther than reflection. The business of life is the subject of *care*; religion is the grand object of *concern*; the esteem of others is an object of *regard*."

(3) In his view the following is the difference between *care*, *charge*, and *management*:—"Care will include both *charge* and *management*; but, in the strict sense, it comprehends personal labour; *charge* involves responsibility; *management* includes regulation and order. . . . Care is employed in menial occupations, *charge* in matters of trust and confidence; *management* in matters of business and experience. The servant has *care* of the cattle; an instructor has the *charge* of youth; a clerk has the *management* of a business." (Crabb: *Eng. Synon.*)

(4) For the distinction between *care* and *heed*, see *HEED*.  
**B. As adjective:** (See the compounds).  
 † Compounds of obvious signification:—*Care-crazed*, *care-defying*, *care-encumbered*, *care-killing*, *care-untroubled*, *care-wounded*.

 Than can my care-tuned tongue deliver him."  
*Shakesp.: Rich. II.*, iii. 2.

**care-worn, careworn, a.** Worn out with care; anxious.  
 "At the helm sat a youth, with countenance thoughtful and careworn."  
*Longfellow: Evangeline*, ll. 2

**care (1), \*käre, v.t. & f.** [CARE, a.]  
**A. Intransitive:**  
 1. To be troubled, or grieved; to be in trouble or grief.  
 "For hire love y carke at care."  
*Lyric Poetry*, p. 64.  
 2. To be anxious or solicitous about anything.  
 "Equal in strength; and rather than be less,  
 Care'd not to be at all." *Milton: P. L.*, tl. 48.  
 "Thinking thus of mankind, Charles naturally cared very little what they thought of him."—*Macaulay: Hist. Eng.*, ch. 11.

3. With for:  
 (1) To have a liking, affection, or desire for anything.

"Theh craked the cournales with carefull dnytes."

Alisundra: Nag, 285.

"By him that raised me to this careful height."

Shakesp.: Rich. III., I. 3.

2. Of persons:

\* (1) Full of care, trouble, or concern; anxious, solicitous.

"He cryed hym after with careful stonew."

Bar. Eng. Allit. Poems: Cleanseus, 776.

"God kept the prisoners out of sorwe, for careful they were that day."

Sir Ferumbras, I, 116.

† (2) With of, for, or to: Anxious, studious, concerned.

"Behold, thou hast been careful for us with all this care; what is to be done for thee?"

2 Kings IV, 13.

Dan. III, 16.

(3) Watchful, circumspect (with of).

"It concerns us to be careful of our conversations."

Ray.

(4) Provident, careful, exact, attentive, heedful.

"A careful student he had been Among the woods and hills."

Wordsworth: Oak and the Broom.

† (1) Crabb thus discriminates between careful, cautious, and provident:—"We are careful to avoid mistakes, cautious to avoid danger, provident to avoid straits and difficulties. Care is exercised in saving and retaining what we have; caution must be used in guarding against the evils that may be; providence must be employed in supplying the good or guarding against the contingent evils of the future. Care consists in the use of means, to the exercise of the faculties for the attainment of an end; a careful person omits nothing. Caution consists rather in abstaining from action; a cautious person will not act where he ought not. Providence respects the use of things; it is both care and caution in the management of property; a provident person acts for the future by abstaining from the present." (Crabb: Eng. Synon.)

(2) Careful and attentive are thus distinguished:—"These epithets denote a fixedness of mind: we are attentive in order to understand and improve; we are careful to avoid mistakes. An attentive scholar profits by what is told him in learning his task; a careful scholar performs his exercises correctly. Attentive respects matters of judgment; care relates to mechanical action: we listen attentively; we read or write carefully."

ca-rê-fûl-lÿ, \*care-ful-liche, \*car-ful-ll, adv. [Eng. careful; -ly.]

\* 1. In a manner exhibiting care or anxiety.

"For the inhabitant of Maroth waited carefully for good."

Isa. I, 12.

"Carefull to the king crande she said."

Wul. of Paterne, 4, 347.

2. Attentively, heedfully, cautiously, with exactness and care.

"Sons, let it be your charge, as it is ours, To tend the emperor's person carefully."

Shakesp.: Titus Andronicus, II. 2.

"Some hundreds of athletic youth, carefully selected, were set apart."

Macaulay: Hist. Eng., ch. xxii.

†câr-rêne' (2), s. [Lat. carenum, from Gr. κάρωνον (karonion), κάρωνον (karunon).] A sweet wine boiled down.

\*câr-ên-tâne, s. [QUARANTINE.] A papal indulgence, multiplying the remission of penance by forties.

"In the church of St. Vitus and Modestia, there are, for every day in the year, seven thousand years, and seven thousand carentenas of pardon."—Bp. Taylor: Dissuasive against Popery.

ca-rêss', v. t. [CARESS, s. In Fr. caresser; Ital. carezzare.]

1. Lit.: To fondle, embrace, treat with kindness and affection.

2. Fig.: To court, flatter.

"They whom the world caresses most Have no such privilege to boast."

Cooper: Oney Hymns, xxviii.; Looking upwards in a Storm.

"All political parties esteemed and caressed him."—Macaulay: Hist. Eng., ch. viii.

Crabb thus distinguishes between caress and fondle:—"Both these terms mark a species of endearment. ... We caress by words or actions; we fondle by actions only." (Crabb: Eng. Synon.)

ca-rêss', s. [Fr. carresse = a cheering, cherishing; caresser = to cherish, hug, make much of (Colgrave); Ital. carezza; Low Lat. caritia = dearness, value; carus = dear, valuable. Cf. Fr. cara = a friend; carum = to love.]

1. Lit.: An embrace, a fondling, an act of affection and endearment.

"He, she knew, would intermix Grateful digressions, and solve high disputes With conjugal caresses."

Milton: Par. Lost, VIII. 66.

"The common people crowded to gaze on him wherever he moved, and almost stifled him with rough caresses."—Macaulay: Hist. Eng., ch. xv.

2. Fig.: Flattery, courting.

"... he exerted himself to win by indulgence and caresses the hearts of all who were under his command."—Macaulay: Hist. Eng., ch. xvii.

ca-rêss'ing, pr. par., a., & s. [CARESS, v.]

A & B. As pr. par. & particip. adj.: (See the verb).

"... his caressing manners, his power of insinuation..."—Macaulay: Hist. Eng., ch. xv.

C. As subst.: The act of fondling or embracing; a caress.

ca-rêss'ing-lÿ, adv. [Eng. caressing; -ly.] In a caressing or fond manner; fondly, lovingly.

"It was evidently a case of love at first sight, for she swam about the new-comer caressingly..."—Darwin: Descent of Man (1871), pt. II, ch. xiv., vol. II, p. 115.

câr-êt, s. [Lat. caret; 3rd pers. sing. pres. indic. of careo = to be wanting, or lacking.] A mark [A] used to show that some words omitted in the line, and inserted in the margin or above the line, should be read in that place.

câr-êx (pl. câr-ÿ-cês, used in speaking of individuals of the genus), s. [Lat. carex = a sedge, a rush.]

Bot.: A genus of plants, of the natural order Cyperaceæ (Sedges). It is more numerous in British species than any other genus, nearly seventy figuring in the flora of Great Britain. There are also numerous foreign species in cold, damp climates, the genus Cyperus taking the place of Carex in the tropics. Carexes are inamititious to cattle. Carex arenaria binds together the sand of the seashore. Its rootstock, with those of C. disticha and C. hirta, is used under the name of German carsaparilla in skin diseases and in secondary syphilis, being reputed to be diaphoretic and diuretic. The Laplanders protect their hands and feet against frost-bites by placing the leaves of C. sylvatica in their gloves and shoes. The leaves of some species are used for tying the hops to the peles in English hop-grounds, and in Italy they are placed between the staves of wine casks, are woven over Florence flasks, and sometimes used for making chair bottoms.

\*câr-êy-a, s. [Named after Rev. Dr. W. Carey, of Serampore, an Indian botanist and missionary.]

Bot.: A genus of plants belonging to the order Barringtoniaceæ or Barringtoniada. The species are trees from India and Australia. They have large-stalked, serrate, and obovate leaves, large red or greenish-yellow flowers, in spikes or corymbis. Careya arborea has an eatable fruit, of which, however, the seeds are suspicious. Its bark is made into rough cordage or into slow-matches for firelocks. Its wood, which may be polished like mahogany, is made into boxes, &c. The bark of C. spherica, a Malay species, is also used for cordage.

\*câr-f, \*carfe, v. t. [CARVE, v.]

"Carf him of fet and honda."—Robert of Gloucester, p. 560.

car-fâx, \*câr-fowgh, \*câr-foukes, s. [O. Fr. carrefour, carrefour, quarrefour, from Lat. quadrifurcus = having four forks or spurs. The first form still survives as a place-name in the city of Oxford.]

1. A place where four roads meet.

"No place thei had, neith carfoukes non."

Romance of Partenay, 1829.

2. A place where any number of roads meet.

"Than thei embusshed him ageln e carfowgh of vl weyas."—Merlin, I. II. 373.

carfe, \*carffe, s. [CARVE, s.]

\* 1. A cut, a wound.

"When the carfes was cleve."

Morte ArtAure, 2, 712.

2. A cut in timber, for admitting another piece of wood, or any other substance. (Scotch.)

car-fin, s. [CARBIN.]

car-fud-dle, cur-fuf-fie, v. t. [Of obscure origin.] To disorder, tumble, discompose. (Scotch.)

car-fud-dle, car-fuf-fie, s. [CARFUDDLE, CURFUDDLE, v.] A tremor, alarm, agitation. (Scotch.)

"Weel, Rohu, said his helpmate calmly, 'ye needna put yourself into any carfuffie about the matter; ye shall hae it a' your ain gate.'"

Pottocock Tales, I. 333.

**car-gil-ly-a**, *s.* [Named after Dr. Cargil, of  
 Aberdeen.]

*Bot.*: A genus of the ebony family (Eben-  
 aceæ), native of tropical Eastern Australia.  
 Two species are known; trees with alternate  
 leathery oblong obtuse entire leaves. The  
 fruits are abundant, and are eaten by the  
 natives.

**car-gō**, *s. & a.* [Sp. *cargo*, *carga* = a burden,  
 freight; Fr. *charge*; from Low Lat. *carrico* =  
 to load, from Lat. *carrus* = a car.]

**A.** *As subst.*: A freight; the merchandise  
 or goods loaded into and conveyed in a ship.  
 "Thus going to market, we kindly prepare  
 A pretty black cargo of African ware."  
*Cowper*.

**B.** *As adj.*: (See the compounds).

**car-go-jack**, *s.*  
*Naut.*: An implement like a lifting-jack, but  
 sometimes used upon its side for stowing heavy  
 cargo.

**car-go-port**, *s.*  
*Naut.*: An opening in the side of vessels  
 having two or more decks, through which the  
 lading is received and delivered. It is closed  
 by a shutter, and made watertight before pro-  
 ceeding to sea.

**car-gōose, gar-gōose**, *a.* [Etym. doubt-  
 ful. Gael. & Ir. *cir*, *cior* = a creat, comb;  
 Dr. Murray thinks the first element the same  
 as that in *carr-swallow* (q.v.)]

*Ornith.*: A fowl belonging to the Columby  
 or diver family, the *Podiceps cristatus* or  
 Crested Grebe. It is about the size of a goose.

**car-ī-a-cōu, car'-ja-cōu**, *n.* [See def.]

 South American deer, now used as a popular  
 name for all deer of the genus *Cariacus*.

**ca-ri'-a-cūs**, *s.* [Latinized from *cariacou*  
 (q.v.)]

*Zool.*: An American genus of Cervidæ,  
 of which the mule-deer (q.v.) is the type.

\* **car-ī-āgē**, *s.* [CARRIAGE.]

**car-ī-a'-ma, sār-ī-a'-ma**, *s.* [Port., from the  
 Brazilian *Seriema* or *Cariema*.]

*Ornith.*: A bird, a native of Brazil and  
 Paraguay, the *Palamedea cristata* of Gmelin,  
*Dicholoprus cristatus* of Illiger, and *Cariama*  
*cristata* of some other ornithologists. It is of  
 most retired habits. It is doubtful to what  
 family it belongs, resembling, as it does in  
 various points, the Gallatoreæ, the Struthion-  
 idæ, and the Gallinæ. The head is crested.

\* **car-ī-are, car-y-are**, *s.* [CARRIER.]

\* **car-ī-ā-tēd**, *n.* [Lat. *caries* = a decay or  
 ulceration of a tooth.] Affected with caries;

**Car-īb**, *s.* [Sp. *carib* = a cruel, barbarous  
 man. Probably a corruption of *carina*, *cal-  
 lina*, and *callinago*, the native name of the  
 race described below.]

*Ethnol.*: An American-Indian race formerly  
 inhabiting part of the West Indies, but now  
 nearly extinct.

**Car-ī-bē-an, Cār-īb-bē-an**, *s.* [From Sp. *carib*,  
 and Eng. &c., suff. *-ean*.] Pertaining to  
 the Caribs or the region which they inhabited.

\* **Caribæan bark**: The bark of a plant,  
*Exostemma floribundum*, one of the Cinchon-  
 aceæ. (*Treats*, of Bot.) It is also known as  
 Piton bark.

**car-ī-bōo, cār-ī-bōu**, *s.* [N. Amer. Ind.]

*Zool.*: *Rangifer caribou*, the wild variety of  
 the Reindeer (q.v.). It has never been domesti-  
 cated, but is hunted for its venison.  
 "The *caribou* deer of America, who have to contend  
 still more with deep snow than the reindeer of the  
 continent, have their horns broader and better adapted  
 to the purpose; besides, both varieties, in addition to  
 these natural shovels, have broad feet, not only to  
 maintain them better on the snow, but also to clear it  
 away."—*Swinson*: *Natural History of Quadrupeds*,  
 § 22.

**cār-ī-ca**, *s.* [From Caria, a district of Asia  
 Minor, whence it was supposed to have come.]

*Bot.*: A genus of plants, the typical one of  
 the order of Papayads (Papayaceæ). It con-  
 tains about ten species, all natives of tropical  
 America. They are small trees without  
 branches, and with large, variously-lobed  
 leaves, resembling those of some kinds of  
 palm. They exude an acrid, milky juice when  
 wounded. The most remarkable species is  
 the *Carica Papaya*, the Papaw-tree, a small  
 tree, seldom above twenty feet high, with a  
 stem about a foot in diameter, tapering gradu-  
 ally to the top, where it is about four or five  
 inches. The fruit is of a dingy orange-yellow  
 colour, oblong, about ten inches long by three  
 or four broad. The juice of this tree is be-  
 lieved in the West Indies to have the re-  
 markable property of rendering the toughest  
 meat tender, and even the flesh of pigs or  
 poultry fed on the fruit or leaves is certain to  
 be tender. The ripe fruit is made into sauce  
 or preserved in sugar, and the juice of the  
 unripe fruit is used to remove freckles. The  
 leaves are employed as a substitute for soap.  
*C. digitata*, a tree which grows in Brazil,  
 where it is called *chamburu*, is regarded almost  
 with superstitious awe as a deadly poison.

**cār-ī-ca-tūre, cār-ī-ca-tūr'-a**, *s.* [Ital.  
*caricatura* = a satirical picture, one over-  
 loaded with exaggeration; from *caricare* = to  
 load; Low Lat. *carrico* = to load; *carrus* = a  
 car.]

1. A drawing or picture of a person in which  
 certain points are so exaggerated as to give a  
 ludicrous effect to the whole.

"From all these hands we have such draughts of  
 mankind as are represented in those burlesque pictures  
 which the Italians call *caricaturas*; where the art  
 consists in preserving, amidst distorted proportions  
 and aggravated features, some distinguishing likeness  
 of the person, but in such a manner as to transform  
 the most agreeable beauty into the most odious mon-  
 ster."—*Spectator*, No. 537.

"... a hideous caricature of the most graceful and  
 majestic of princes, was dragged about Westminster  
 in a chariot."—*Macaulay*: *Hist. Eng.*, ch. xvii.

\* 2. A parody of a book.  
 "A new exhibition in English of the French *caricature*  
 of this most valuable biographer. . ."—*Watson*:  
*Hist. of Eng. Poet.*, iii. Diss., p. xi.

**caricature-likeness**, *s.* A representa-  
 tion of a person which is a likeness and yet a  
 caricature. Example, the prominent political  
 personages as represented in the comic papers.

"When on the wing it presents in its manner of  
 flight and general appearance a caricature-likeness of  
 the common swallow."—*Jurinia*: *Toyage round the*  
*World* (ed. 1870), ch. vii., p. 159.

**caricature-plant**, *a.*  
*Bot.*: *Graptophyllum hortense*, an acan-  
 thaceous plant from the Iodian Archipelago.  
 The popular name refers to the fact that the  
 leaf-markings often present grotesque resem-  
 blances to the human profile.

**cār-ī-ca-tū-re**, *v. l.* [CARICATURE, *s.*] To  
 represent in caricature.

"He could draw an ill face, or caricature a good one,  
 with a masterly hand."—*Lord Lyttelton*.

**cār-ī-ca-tū-red**, *pa. par. or a.* [CARICATURE,  
*v.*]

**cār-ī-ca-tūr-īng**, *pr. par. a., & s.* [CARI-  
 CATURE, *v.*]

 the verb.)

**C.** *As subst.*: The act or art of representing  
 in caricature.

**cār-ī-ca-tūr-īst**, *a.* [Eng. *caricature*; *-ist*.]  
 One who caricatures others.

"In this respect at least Cruikshank might claim  
 to be superior to Hogarth, and his inferiority in other  
 respects is not so signal that they may not be named  
 together as the two greatest caricaturists that England  
 has possessed."—*Times*, Feb. 2, 1878.

\* **cār-ī-cōg-raph-ŷ**, *s.* [Lat. *carex* (genit.

**car-mél-ite, s.** [In Fr. *carmélite* = a nun; *carme* = a monk, named from Mount Carmel in the Holy Land, where they were established in the twelfth century; suffix -ite.]

1. *Eccles. Hist.:* An order of mendicant friars, who wear a scapulary, or small woollen habit of a brown colour, thrown over the shoulders. They claim to be in direct succession from

Elijah, but their real founder was Berthold, a Calabrian, who, with a few companions, migrated to Mount Carmel about the middle of the twelfth century, and built a humble cottage with a chapel, where he and his associates led a laborious and solitary life. In 1209, Albert, patriarch of Jerusalem, gave the solitaries a rigid rule, containing sixteen articles, and enjoining the most severe discipline. After their establishment in Europe, their rule was in some respects altered, the first time by Pope Innocent IV., and afterwards by Eugenius IV. and Pius II. The order is divided into two branches, viz., the Carmelites of the ancient observance, called the moderate or mitigated; and those of the strict observance, who are known as the barefooted Carmelites. Some of the Carmelites came to England about 1240, and the order ultimately had about forty houses in this country. It is sometimes called the Order of St. Mary of Mount Carmel.

CARMELITE.

car-niv-er-a, s. pl. [Lat. carnivora, neut. pl. of carnivorus = flesh-devouring; caro (genit. carnis) = flesh; voro = to devour.]

Zool.: A principal division of the Mammalia. The name is given to those animals which, like the feline, canine, and ursine families, have their teeth peculiarly fitted for the mastication of animal matter. The incisors, except in some seals, are generally  $\frac{1}{2}$  the canines generally  $\frac{1}{3}$ . They are, moreover, larger and longer than the incisors. The clavicles are rudimentary, or wanting. They are divided into two great groups, or sub-orders, one terrestrial the other aquatic. The first is the group of the Pinnipedia, or "fin-feet," so called from the fact that their feet are divided into well-marked toes; the second is the group of Pinnipedia, or "fin-feet" (seals, &c.), so called because the toes are bound together by skin-forming flaps or flappers rather than feet. Another classification is into three sections or tribes—(1) Pinnigrada, or Pinnipedia; examples, the Seals and Walrusa. (2) Plantigrada; example, the Bear, and (3) Digitigrada; examples, the Cat and the Dog.

\*car-niv-er-ác-y-tý, s. [Lat. caro (genit. carnis) = flesh; vorax (genit. voracis) = devouring.] A preternatural desire for flesh; greediness, gluttony.

\*3. A song sung as an accompaniment to dancing.

"Alle the damelles to syng carolles and to ga agins hen synginge oute of the town."—Merlin, l. ii. 132.

4. A song of praise sung at Christmas-tide. It originally meant a song accompanied with dancing, in which sense it is frequently used by the old poets. It appears to have been danced by many performers, by taking hands, forming a ring, and singing as they went round. Bishop Taylor says that the oldest carol was that sung by the heavenly host when the birth of the Saviour was announced to the Shepherds on the plains of Bethlehem. It is probable that the practice of

singing carols at Christmas-tide arose in imitation of this, as the majority of the carols declared the good tidings of great joy; and the title of Noels, nowells, or novelles, applied to carols, would seem to bear out this idea. Carol singing is of great antiquity among Christian communities, as the carol by Aurelius Prudentius, of the fourth century, will show. (Stainer & Barrett.)

"Singers of carrolles. . . .—Acts Jas. vi., 1581, c 104

"No night is now with hymn or carol blest." Shakesp.: Midsummer-Night's Dream, li. 2.

¶ The use of rugs is of great antiquity in Egypt, India, China, and Babylon. In the East at present Persia, Asiatic Turkey, and India are great seats of carpet manufacture. Carpets were introduced into England during the Crusades, but long afterwards, indeed even to the time of Queen Elizabeth, the floors of palaces, not to speak of inferior habitations, were strewn with rushes. The practices of hanging the walls of palatial edifices with tapestry and cloth is older than that of carpeting the floors; thus in Hampton Court, built by Cardinal Wolsey, the floors are bare, while the walls are covered with tapestry. The manufacture of carpets was introduced into France from Persia about A.D. 1606, and workmen from France brought the art to England about 1750. A carpet manufactory was established at Axminster in 1755. The carpet industry has become an important one in the United States, particularly in Philadelphia.

Car-pō-crā-tian, s. [Named after their leader.]

Ecclesiastical History: A follower of Caraceras, a heretic in the second century, who revived and added to the errors of Simon Magus, Menander, and other gnostics. He owned, with them, one sole principle and father of all things, whose name as well as nature were unknown. The world, he said, was created by angels, and he opposed the divinity of our Lord, accounting him only as a superior man. (Stanton.)

car-pōd-ē-tūs, s. [Gr. κάρφος (karpfos) = fruit; δέτος (detos) = hound, δέω (deō) = to bind.]

Bot.: A genus of New Zealand shrubs belonging to the order Escalloniaceae. The name is derived from the fruit being girt round by the calyx. Petals five, not overlapping; stigma viscid, fruit leathery and succulent. (Treas. of Bot.)

car-pō-lite, s. [Gr. κάρφος (karpfos) = fruit; λίθος (lithos) = a stone.]

Any fruit which by silification has become converted into stone.

car-pō-lō-bī-a, s. [Gr. κάρφος (karpfos) = fruit; λοβός (lobos) = a capsule or pod.]

Bot.: A genus of shrubs, natives of West Tropical Africa, belonging to the Polygalaceae, or Milkworts. Calyx five-leaved, petals five, one keeled and crested at the apex; stamens eight, five bearing anthers, the others sterile. Ovary two-celled; fruit small, fleshy, somewhat three-angled.

car-pō-lōg-ī-cal, a. [From Eng., &c. car-pology(y); -ical.]

Relating to carpology. (Lindley: Introd. to Bot., bk. i., ch. ii.)

† car-pōl-ō-gīst, s. [Eng. carpology(y); -ist.]

One skilled in carpology.

car-pōl-ō-gy (1), s. [Gr. κάρφος (karpfos) = fruit; λόγος (logos) = a discourse, treatise; λέγω (legō) = to tell, speak.]

Bot.: That branch of the science of botany which treats of the structure of fruits and seeds.

car-pōl-ō-gy (2), a. [CARPHOLOGY.]

car-pō-mā-nī-a, s. [Gr. κάρφος (karpfos) = fruit; μανία (mania) = madness.]

Bot.: A disease in quinces, medlars, pears, &c., called also Phytolithes, in which the fruit becomes full of gritty matter.

car-pō-mī-tra, s. [Gr. κάρφος (karpfos) = fruit; μίτρα (mitra) = a head-band, mitre.]

Bot.: A genus of Sporodinaeae (Fucoid Algae), consisting of a single rare British species, Carpomitra cabreræ, which is remarkable for the peculiar mitre-shaped conceptacle containing the spores. (Griffith & Henfrey.)

car-pō-morph-a, s. [Gr. κάρφος (karpfos) = fruit; μορφή (morphē) = shape, form.]

Bot.: A term applied to those parts in cryptogamic plants which resemble true fruits without being really such; the spores of lichens. (Treas. of Bot.)

car-pōph-a-ga, s. pl. [From Gr. καρποφάγος (karpophagos) = living on fruits; κάρφος (karpfos) = a fruit, and φαγείν (phagein) = to eat.]

Zool.: A section of the sub-class Marsupialia. Type, the Phalangers (q.v.).

car-pōph'-a-gōūs, a. [Gr. καρποφάγος (karpophagos) = living on fruits.]

Zool.: Living on fruits.
The typical group of the carpo-phagous Marsupials is that of the Phalangeridae or Phalangers.—Nicholson: Manual of Zool. (ed. 1873), p. 638.

car-pō-phō-re, s. [Gr. κάρφος (karpfos) = fruit; φέρω (phero) = bearing; φέρω (phero) to bear.]

Bot.: A stalk bearing the pistil, and raising

it above the whorl of the stamens, as in Passiflora. Also applied to the stalk between the achenes of Umbelliferae.

car-pō-ptō-sis, s. [Gr. κάρφος (karpfos) = fruit; πτώσις (ptōsis) = a falling; πίπτω (pipō) = to fall.]

Bot.: A term applied to the sudden falling off of fruit after it has become well-formed and impregnated. It may arise from more fruit being set than the tree is capable of nourishing; or the nourishment may be too great, from want of root-pruning. It is not a case of mere over-ripeness, which can be avoided by early gathering.

† car-pūs, s. [Lat., from Gr. κάρφος (karpfos) = the wrist.]

1. Human Anat.: The wrist, so named by anatomists, which is made up of eight little bones, of different figures and thickness, placed in two ranks, four in each rank. They are strongly tied together by the ligaments which come from the radius, and by the annular ligament. (Quincy.)

"I found one of the bones of the carpus lying loose in the wound."—Wiseman: Surgery.

car-pō-ptō-sis, s. [Gr. κάρφος (karpfos) = fruit; πτώσις (ptōsis) = a falling; πίπτω (pipō) = to fall.]

Bot.: A term applied to the sudden falling off of fruit after it has become well-formed and impregnated. It may arise from more fruit being set than the tree is capable of nourishing; or the nourishment may be too great, from want of root-pruning. It is not a case of mere over-ripeness, which can be avoided by early gathering.

(4) A vehicle for pleasure or passengers.

\* (5) Any means of conveyance.

(6) The cost of carrying or conveying anything.

2. *Figuratively*:

\* (1) Conquest, acquisition, gain.

"Solymas resolved to besiege Vienna, in good hope that, by the carriage away of that, the other cities would, without resistance, be yielded."—*Knoles*: *History of the Turks*.

† (2) Manners, behaviour, deportment.

"Let them have ever so learned lectures of breeding, that which will most influence their carriage will be the company they converse with, and the fashion of those about them."—*Locke*.

† (3) Conduct, practices.

"Yesterday Mr. Steele's affair was decided: I am sorry I can be of no other opinion than yours, as to his whole carriage and writings of late."—*Pope*: *Letter to Congress* (1714-15).

\* (4) Management; manner of carrying out or transacting business.

"The manner of carriage of the business was as if there had been secret inquisition upon him."—*Bacon*: *Henry VII*.

\* (5) Meaning, intent.

"As, by the same covenant,  
And carriage of the article design'd."  
*Shaksp.*: *Hamlet*, I. 1.

II. *Technically*:

1. *Vehicles*: In the senses I. 1 (3) and (4). Carriages of one kind or other have existed from immemorial antiquity. One of the earliest forms was a bullock carriage, of which some specimens of primitive type may yet be seen in India. The simplest is a short plank of wood, which the passenger bestrides, holding on by two upright handles, and inserting his toes between the wheels and the body of the vehicle. The practice of lashing wagons was known to the Romans, and is not a modern discovery, made by the South African Dutch Boers. Horne considers that the making of coaches in England commenced in A. D. 1555. Stage-wagons were introduced into England in 1564, and coaches piled for hire in London in 1625. Up till about 1700 the roads in that country were so bad that they were suitable only for hack and pack horses, but having been improved early in the eighteenth century, stage-coaches commenced to run about 1750, and from 1784 were allowed to carry the mails. In the United States road improvement is advancing, and the use of handsome carriages is steadily increasing. [CAR, CART, COACH.]

† *Horseless carriage*: Vehicles of various types, propelled by small steam engines or electricity, are now being introduced to this country and abroad, with much promise of practical utility for business purposes and pleasure jaunting.

2. *Military*:

(1) The frame on which a gun is mounted and carried. [GUN-CARRIAGE.]

"He commended the great ordinance to be laid upon carriages."—*Knoles*: *History of the Turks*.

\* (2) A sword-belt.

"The carriages, sir, are the hangers."—*Shaksp.*: *Hamlet*, V. 2.

3. *Carp.*: The timber framework on which the steps of a wooden staircase are supported.

† 4. *Drainage*: A channel cut for the conveyance of water to overflow or irrigate ground; a carrier.

5. *Printing*:

(1) The frame on rollers by which the bed, carrying the forme, with the tympan and frisket, is run in and out from under the platen.

(2) The frame which carries the inking-rollers.

6. *Mach.*: A portion of a machine which moves and carries an object; as—

(1) The *log-carriage* of a sawing-machine.

(2) The *bit-carriage* of a boring-machine, which carries the bit and is advanced to the work.

(3) The *carriage* of a mule-spinner, which travels towards and from the creel on which the bobbin are skewered.

(4) Of a *horizontal shaft*: The bearings in which it turns.

† (1) Crabb thus distinguishes between *carriage*, *gait*, and *walk*: *Carriage* is here the most general term: it respects the manner of carrying the body, whether in a state of motion or rest; *gait* is the mode of carrying the limbs and body whenever we move; *walk* is the manner of carrying the body when we move forward to walk. A person's *carriage* is

somewhat natural to him; it is often an indication of character, but admits of great change by education; we may always distinguish a man as high or low, either in mind or station, by his *carriage*; *gait* is artificial; we may contract a certain *gait* by habit; the *gait* is therefore often taken for a bad habit of going, as when a person has a limping *gait*, or an unsteady *gait*; *walk* is less definite than either, as it is applicable to the ordinary movements of men; there is a good, a bad, or an indifferently *walk*; but it is not a matter of indifference which of these kinds of *walk* we have: it is the great art of the dancing-master to give a good *walk*.

(2) For the difference between *carriage* and *behaviour*, see BEHAVIOUR.

**B. As adj.**: (See the compounds).

Compounds of obvious signification: *Carriage-builder*, *carriage-horse*, *carriage-house*.

**carriage-belt**, s. A screw-bolt, with a chamfered head, square neck, and threaded shank, for use in carriage-building.

**carriage-brake**, s. A retarding apparatus, to reduce the speed of a carriage in descending a hill. [BRAKE.]

**carriage-bridge**, s.

*Milit.*: A roller bridge to be moved up a glacis, and form a bridge from counterscarp to scarp, for the passage of the attacking column.

**carriage-coupling**, s.

1. The coupling of a carriage unites the fore and hind carriages. It is called the perch or reach in carriages that possess it, but in many modern carriages is dispensed with, the bed resting on the fore and hind carriages, forming the only coupling. In wagons, the coupling is a pole, whose forward end is held by the king-bolt in the fore-carriage; the hind end passes through an opening between the hind axle and bolster, and the hounds of the hind axle are fastened to the pole by a pin.

2. A means of uniting the bed to the fore-carriage. It usually consists of a king-bolt, which forms the pintle on which the fore-carriage turns, and the fifth wheel, which is bolted to keep the portions from bouncing apart. (*Knight*.)

**carriage-guard**, s. A plate on the bed of a carriage where the fore-wheel rubs in turning short.

**carriage-jack**, s. A lever-jack, designed to raise the axle so as to lift the carriage off the ground for the purpose of removing the wheel from the spindle for repair or greasing. [JACK.]

**carriage-lock**, s. A fastening for a carriage-wheel, to restrain its rotation or impede its freedom of movement in descending a hill.

**carriage-lubricator**, s. A self-acting appliance for lubricating a carriage-wheel box and spindle without removing the wheel from the axle.

**carriage-piece**, s.

*Carp.*: One of the slanting pieces on which the steps of a wooden staircase are imposed; a rough-string. The upper end rests against the apron-piece or pitching-piece, which is secured to the joists of the landing.

**carriage-shackle**, s. The bar which connects the axle-slip to the thill or shaft. (*Knight*.)

**carriage-spring**, s. An elastic device interposed between the bed of a carriage and its running-gears, to lessen the jar incident to inequalities in the road, and the salutary end rolling motion of the bed itself. (*Knight*.)

**carriage-step**, s. A step, usually on a jointed dependent frame, to afford means for mounting into a carriage.

**carriage-top**, s.

1. The cover of a carriage. Permanent in coaches; double calash in barouches and landaus; calash in some gigs, buggies, phaetons, &c.; curtained in ambulances and spring-wagons.

2. A shifting-rail on the back and ends of a buggy-seat, to make a high-back, or, by removal, a low-back buggy.

**carriage-wheel**, s. The wheel of a carriage. This has usually a hub or nave, spokes, felloes, and tire. A box fitted in the hub runs in contact with the spindle or arm of the axle,

fåte, fât, fære, amidst, wât, fâll, father; wê, wêt, hère, camêl, hêr, thére; pine, pît, sîre, sîr, marine; gô, pôtt, or, wöre, wolf, wörk, whô, sôn; müte, cüb, cüre, unite, cür, rûle, füll; trý, Sýrian. æ, œ = é; ey = ä. qu = kw.

and the wheel) is held on the spindle by a lynch-pin, nut, or other device.

2. Passable by carriages. (Barnes.)

**cār-rī-bōo, s.** [CARBOU.]

**cār-rick, \*car-rike, \*car-rack, s. & a.** [CARACK.]

1. A carack.  
"Aad bow hath Sathanas, sayth he, a taylor Broder than a carrike in the sayl."  
Chaucer: *The Sompnoures Prool.*, v. 7720.
2. In Kinross and Perth, the bat of wood driven by clubs, or sticks hooked at the lower end, in the game of shintie. (Jamieson.)
3. The old name, in Fife, for the game of shinty, still used in the eastern part of that county. (Jamieson.)

**carrick-band, carrick-bend, s.**

**Naut.**: A particular kind of knot, used for connecting hawsers and other ropes; a knot formed on a bight by putting the end of a rope over its standing part, so as to form a cross; and reeving the end of the other rope through the bight, up and over the cross and down through the bight again, on the opposite side from the other end.

**carrick-hitta, s.**

**Naut.**: The bits which support the windlass; the vertical posts or cheeks which support the barrel of the windlass.

**\*cār-rick-in', s.** [From Scotch *carrick*.] A meeting among the boys employed as herds, at Lammas, for playing at shinty, on which occasion they have a feast. (Jamieson.)

**cār-rīe, s.** [A dimin. of *car*.] In the Lothians, a two-wheeled barrow. (Jamieson.)  
"Alexander then asked a loan of her *carrīe* (two-wheeled barrow) . . ."  
—*Collec. Merc.*, 20th July, 1820.

**cār-ried (Eng.), cār-rī-it (Scotch), pa. par. or a.** [CARRY, v.]

**I. Gen.**: In sense corresponding to those of the verb.

**II. Specially, in Scotland:**

1. Applied to a person whose mind is so abstracted a state, that he cannot attend to what is said to him, or to the business he is himself engaged in.
2. In a wavering state of mind, not fully possessing recollection, as the effect of fever.
3. Elevated in mind, overjoyed at any event, so as not to seem in full possession of one's mental faculties; as "Jenny's gotten an helmsalp left her, and she's just *carrīyt* about it." Sometimes, *carrīyt* up in the air.
4. Transported, awayed, influenced.  
"Carried with fervent zeal."  
Spenser: *F. Q.*, IV. iv. 84.

**cār-rī-ēr, s.** [Eng. carry; -er.]

**I. Ordinary Language:**

1. **Gen.**: One who or that which carries anything.  
"You must distinguish between the motion of the air, which is but a *vehiculum aquae*, a carrier of the sounds, and the sounds conveyed."  
—Bacon: *Nat. Hist.*
2. **Specially:**
  - (1) One whose trade or occupation it is to carry or convey goods.  
". . . the path was sometimes blocked up during a long time by *carriers*, neither of whom would break the way."  
—Macaulay: *Hist. Eng.*, ch. iii.
  - (2) One who carries a message, a messenger.  
"The welcome news is in the letter found; The carrier's not commissioned to expound; It speaks itself."  
—Dryden: *Religio Laici*, 367.

**II. Technically:**

1. **Law**: A carrier in law is one who undertakes for hire or reward to transport the goods of such as employ him from place to place. Two sorts of these exist, carriers by land and carriers by water. Under the former category are ranked the proprietors of stage-coaches, railway companies, wagoners, parcels delivery companies, &c. Common carriers are generally held liable by law for losses, except these come by act of God (storms, floods, &c.), or are caused by enemies of the United States, or the owner of the property itself. Notice of non-liability is sometimes given by carriers, but does not hold good in law.

2. **Elect.**: A proof plane, used to transmit small charges of electricity. It consists of a small piece of gilt paper, with a non-conducting handle.

3. **Mechanics:**

- (1) A piece fastened by a set screw, or otherwise, to work in a lathe, and connecting it with the face-plate; a dog.
- (2) A distributing roller in a carding-machine.
- (3) A roller between the drum and the feeding rollers of a scribbling-machine for spinning wool.
- (4) A spool or bobbin-holder in a braiding-machine which follows in the curved path which intersects the paths of other bobbins, and thus lays up the threads into a braid. (Knight.)
4. **Drainage**: A small channel for the conveyance of water.
5. **Ornith.**: A carrier-pigeon.

"There are tame and wild pigeons; and of tame there are croppers, *carriers*, runts."—Walton: *Angler*.

**\*carrier-bird, s.** The same as CARRIER-PIGEON.

"As light an *carrier-bird* in air."  
Tennyson: *In Memor.*, xxv. 6.

**carrier-pigeon, s.** A name given to a species of pigeon, from their being used to convey letters from any place to their home.

"Mr. Brent informs me that a friend of his had to give up flying *carrier-pigeons* from France to England, as the hawks on the English coast destroyed so many on their arrival."—Darwin: *Origin of Species* (ed. 1859), ch. xi., p. 362.

**carrier-shells, s.**

**Zool.**: The English name given to the molluscous genus *Phorus*, which is ranked under the family Trochidae. The name is given because the Phori attach foreign substances to their shells, some preferring stones and others shells or corals. Hence collectors call some of them mineralogists and others conchologists. Nine recent species are known (none from Britain), and fifteen fossil, the latter from the Chalk or from the Eocene onward till now. (Woodward: *Mollusca*, ed. Tate.)

**†cār-rī-ēr-ship, s.** [Eng. carrier; -ship.] The office or post of a carrier.

"Messengerships, by which I presume is meant rural *carrierships*."—*Daily News*, Aug. 20, 1880.

**cār-rī-ōn, \*car-ōigne, \*car-ōine, \*car-ōine, \*car-ōine, \*car-ōin, \*car-ōyn, s. & a.** [O. Fr. *caroigne*; Fr. *caroigne*; Ital. *carogna*; Sp. *carroña*; Low Lat. *caronia*, from Lat. *caro* = flesh.]

**A. As substantive:**

**I. Literally:**

1. A dead body, a corpse.  
"The *caroigne* in the hushe with throte yoor."  
Chaucer: *C. T.*, 2,015.  
"They did eat the dead *carriens*, and one another soon after. . ."  
—Spenser: *On Ireland*.
2. A body of a living person. (Used in contempt or depreciation.)  
"A sly little clot for to wrappen in our *careynes*."  
—Maunderie, p. 228.
3. A carcass; the flesh of anything not fit for food.  
"Till, warn'd by frequent ill, the way they found To lodge their loathsome *carriion* ground."  
Dryden.

4. Putrified, rotten flesh.  
"Stynkend als *caroigne*."—*Hampole: Pricks of Conscience*, 792b.

**II. Figuratively:**

1. A worthless person. (Applied in reproach or contempt.)  
"Shall we send that foolish *carriion*, Mrs. Quickly, to him, and excuse his throwing into the water?"  
—Shakespeare: *Merry Wives*, iii. 2.
2. Prey, booty.  
". . . the unclean birds of prey which swarm wherever the scent of *carriion* is strong."  
—Macaulay: *Hist. Eng.*, ch. xli.

**B. As adjective:**

1. Pertaining to carcasses; feeding on carcasses.  
"Match to match I have encounter'd him. And made a prey for *carriion* kites and crows, Ev'n of the bonny beasts he lov'd so well."  
Shakespeare: *2 Hen. VI.*, v. 2.
2. Rotten, putrifying.  
"That this foul deed shall smell above the earth With *carriion* men, groaling for burial."  
Shakespeare: *Julius Caesar*, iii. 1.

**carriion-bird, s.** Any bird feeding on *carriion*.

"And oft the hateful *carriion-bird*, Heavily dapping his clogg'd wing, Which reek'd with that day's banqueting."  
Moore: *Lalla Rookh*; *The Fire Worshippers*

**carriion-crow, s.**

**Ornith.:**

1. *Corvus corone*, a common English crow, which feeds on *carriion*, small animals, young chicks, &c.
2. The urubu (q.v.).

**carriion-feeder, s.** A bird or animal which lives on *carriion*.

"And will not the manner of its descent proclaim throughout the district the whole family of *carriion-feeders*, that their prey is at hand."—Darwin: *Voyage round the World* (ed. 1870), ch. ix., pp. 185-6.

**carriion-flower, s.**

**Bot.**: (1) A garden name for *Stapelia*; (2) *Smilax herbacea*. (American.)

**carriion-hawk, s.** A *carriion-eating hawk*; loosely used for any large bird that feeds on *carriion*.

**carriion-vulture, s.** A *carriion-eating vulture*; any American vulture of the family Cathartidae.

"When an animal is killed in the country, it is well known that the condors, like other *carriion-vultures*, soon gain intelligence of it and congregate in an inexplicable manner."—Darwin: *Voyage round the World* (ed. 1870), ch. ix., p. 184.

**cār-rīs, s.** [Gael. *cathrith*, *cathbrith* = boiled pollard; *cath* = pollard, huska; *brith* = boiled.] Flummery. (Scotch.)

**cār-rītch (sing.), cār-rītch-eş (pl.), s.** [A corruption of Eng. *catechism*.]

1. Catechism. (Scotch.)  
"My Mother gar'd me learn the Stogle *Carritch*, which was a great vex. . ."  
—Scott: *Old Mortality*, ch. xxxvii.
2. Often used in the sense of reproof—  
"I gae him his *carritch*: I reprehended him with severity."

**cār-rōi-lite, s.** [From Carroll County, Maryland, where it is found, and suff. -ite (Min.).]

**Min.**: An isometric massive mineral of a light steel-gray colour, with a faint reddish hue. Hardness, 5.5; sp. gr., 4.85. It is found associated with chalcopyrite and chalcocite. with water, and placed in a tall vessel, nearly full of water, and having a piece of caoutchouc secured tightly over the top. On pressing the caoutchouc the air of the vessel will be compressed: this will compress that within the figure or bulb, so admitting more water by a small aperture, and causing the figure to sink. On removing the pressure the air in the figure or bulb will expand, forcing out some of the water, and causing it to rise. (Francis.) (Webster.) It is called also a cartesian-diver.

**cartesian-diver**, *s.* The same as CARTESIAN-DEVIL (q. v.).

**car-tēs'-i-an-ism**, *s.* [Eng. cartesian; -ism.] The system of philosophy taught by Descartes. René Descartes in his twentieth year resolved as far as possible to eliminate from his mind all that had ever been taught him by books or by instructors, and think out for himself the entire circle of knowledge. His first postulate was "Cogito, ergo sum"—"I think, therefore I exist." Inquiring next into ideas, which he defined as "all that is in our mind when we conceive a thing, in whatever way we conceive it," he regarded clearness and distinctness as the criterion of a true as distinguished from a false idea. Of all ideas in the human mind that of a God is the clearest, therefore there is a God. As in this clear conception of God infinite veracity is attributed to Him, it is impossible that he could make our faculties deceive us in mathematical and metaphysical demonstrations; these sciences, therefore, are trustworthy. The actual existence of the external world is proved by the prior truth, the existence of God. Creation was and is a manifestation of the Divine will.

Descartes revolutionised mathematics, imparting to it a beneficial impulse. He did so likewise to metaphysics. Among his immediate followers in the latter science were Gualinax, Malebranche, and Spinoza. A celebrated opponent was Gassendi. The method of Descartes was adopted by all the philosophers of the rationalistic school who flourished during the latter half of the seventeenth and the whole of the eighteenth centuries. In physics he discovered the law of the refraction of a ray of light through a diaphanous body, but his *a priori* method was not the proper instrument for physical investigation, and his researches in that department were a comparative failure. [VORTEX.]

**cart-fūl**, \* **cart'-fūll**, *s.* [Eng. cart, and ful(l).] The quantity which will fill a cart.

"The king hath licensed certain victuals into the town, and wood upon treaty of the Cardinal Gondil at twenty-five crowns the cart-fūll, and a cow eight."—*Reliquie Watonsianæ*, p. 614.

**car-tha-gin'-i-an**, *s. & a.* [Lat. *carthaginiensis* = pertaining to Carthage; *Carthago* (genit. *Carthaginiis*),]

**A. As subst.**: A native of Carthage.  
**B. As adjective**:

**Geog.**: Of or pertaining to Carthage, a famous city on the north coast of Africa, said to have been founded by Dido about 859 B.C., and for many years the great rival of Rome for the supremacy in the Mediterranean. After a protracted struggle, lasting from 265 B.C. to 147 B.C., it was at last finally conquered and burnt by Scipio in the latter year.

**carthaginian-apple**, *s.*

**Bot.**: *Punica granatum*, the Pomegranate.

**car'-tha-mine**, *s.* [Mod. Lat. *carthamus*, and Eng. suff. -ine (Chem.).]

**Chem.**:  $C_{14}H_{15}O_7$ . A red colouring matter, insoluble in water, but soluble in alcohol, extracted from the flowers of the safflower, *Carthamus tinctorius*.

**car'-tha-mūs**, *s.* [Mod. Lat., from Arab. *qurtum*, *qirtim*, from Heb. *qarthami* = bastard saffron.]

**Bot.**: A small genus of composite flowers, containing two annual species, of which one, the Safflower plant or Bastard Saffron (*Carthamus tinctorius*), is extensively cultivated in India, China, &c., as well as Southern Europe. Under the name of Safflower the flowers of this plant are extensively imported into this country, principally from India, for the sake of the two colouring matters, yellow and red, contained in them, which are used for dyeing silk, &c. Mixed with finely powdered talc it forms the well-known substance known as

rouge. It is also used to adulterate saffron. According to Col. Sykes the seeds of *C. persicus* produce a useful oil, eatable when fresh. The oil-cake formed from it is very nourishing to milch cattle. In times of scarcity these seeds themselves are eaten, while the leaves of the plant are used as greens. (Lindley, &c.)

"*Carthamus*, the flower of which alone is used, is an annual plant cultivated in Spain, Egypt, and the Levant. There are two varieties of it; one which has large leaves, and the other smaller ones. It is the last which is cultivated in Egypt, where it is a considerable article of commerce."—*Brande: Dictionary of Arts, Manufactures, and Mines*.

\* **car-thoun'**, *s.* [CARTOW.]

**Mil.**: An ancient gun, weighing 90 cwt., and throwing a 48 lb. shot; used in the fifteenth century. Also known as the Cannon Royal.

*Arch.*: A single female figure sustaining an antabature.

**ca-rýb'-dō-a, s.** [Lat. *Charýbitis.*]

*Zool.*: A genus of Medusæ, order Acephala, class Simplicia, in which no traces of vessels can be perceived internally.

\* **car-y-en, \* car-yn, v. t.** [CARRY.]

\* **car-ync, s.** [CARRION.]

**cār-y'-ō-car, s.** [Gr. *κάρυον* (*karuon*) = a nut.]

*Bot.*: One of two genera, forming the order Rhizobolaceæ (Rhizobolæ). There are about eight species, all hardwooded trees, and natives of the tropical regions of South America. The most interesting is *Caryocar nuciferum*, which produces the Souari, or Butter-nut, occasionally met with in English fruit-shops. These nuts are shaped something like a kidney, having an exceedingly hard, woody shell, enclosing a large white kernel, which has a pleasant & nutty taste, and yields a bland oil on pressure. The timber also is valuable for ship-building, mill-work, &c.

**cār-y'-ō-cri-ni-tēs, s.** [Gr. *κάρυον* (*karuon*) = a nut; *κρίνον* (*kriwon*) = a lily.]

*Palæont.*: A genus of Crinoidea, or Stenonilites, found in the palæozoic limestones of North America.

**cār-y'-ō-dāph-nē, s.** [Gr. *κάρυον* (*karuon*) = a nut; *δάφνη* (*daphnē*) = a laurel.]

*Bot.*: A genus of Javanese trees, belonging to the Laurel family. The bark of *Caryodaphne densiflora* is bitter in taste; its leaves are aromatic, and used in cases of spasms of the bowels.

**cār-y'-ōi'-ō-phæ, s.** [Gr. *κάρυον* (*karuon*) = a nut; *λοφός* (*lophos*) = a crest.]

*Bot.*: A section of Anchusa, a genus of Boraginaceæ, containing *A. sempervirens*, a plant with a salver-shaped corolla, with very short straight tube, and the ring at the base of the nuts prolonged on the inner side into an appendage. (*Treas. of Bot.*)

**cār-y'-ō-phýl-lā'-cē-sē, s. pl.** [Lat. *caryophýllus*], a lapsed synonym of *Dianthus* (q.v.); fem. pl. adj. suff. *-acēe.*] The name refers to the clove-like smell of the pinks.

*Bot.*: A natural order of thalamifloral dicotyledons, classed by Lindley under his Silenial alliance. There are three sub-orders:—1. Sileneæ, the Pink tribe, with united sepals opposite the stamens, where the latter are of the same number; 2. Alsineæ, the Chick-weed tribe, with separate sepals; 3. Molluginæ, the Carpet-weed tribe, in which the petals are wanting, and the stamens alternate with the sepals when of the same number. They are all natives of cold and temperate regions. The Clove-pink (*Dianthus Caryophyllus*) is the origin of all the cultivated varieties of carnations, pinks, bizarres, flakes, &c. There are about sixty genera and 1,100 species.

**cār-y'-ō-phýl-lā'-cē-ōus, a.** [Lat. *caryophýllus*]; and Eng. adj. suff. *-acēous.*]

*Bot.*: Applied to a corolla whose petals have long distinct claws, as in the clove-pink.

**cār-y'-ō-phýl-lē-sē, a pl.** [Lat. *caryophýllus*]; and fem. pl. adj. suff. *-eēs.*]

*Bot.*: The same as CARYOPHYLLACEÆ (q.v.).

**cār-y'-ō-phýl-lē-ōus, a.** [*Caryophýllus*]; and Eng. adj. suff. *-eūs.*]

*Bot.*: The same as CARYOPHYLLACEOUS (q.v.).

**cār-y'-ō-phýl-li-a, e.** [Lat. *caryophýllus*]; neut. pl. adj. suff. *-ia.*]

*Zool. & Palæont.*: A genus of Madreporæ Polypl, in which the coral is branched, and the stars confined to the end of the branch. At each star is a mouth, surrounded by numerous tentacula. *Caryophyllia cespitosa* is a common Mediterranean coral, and at Galleri, near Vizzini, in Sicily, a bed a foot and a half thick of the same species occurs fossil in Newer Pliocene deposits. The genus ranges from the Chalk to modern times.

**cār-y'-ō-phýl-lic, a.** [Lat. *caryophýllus*]; and Eng. suff. *-ic* (*Chem.*).]

**caryophyllic acid, s.**

*Chem.*: An acid obtained from the oil of cloves by means of alcohol. It is composed of twenty atoms of carbon, twelve of hydrogen, and four of oxygen.

**cār-y'-ō-phýl-līne, s.** [Lat. *caryophýllus*]; and Eng. suff. *-ine* (*Chem.*).]

*Chem.*: C<sub>10</sub>H<sub>16</sub>O. A crystalline substance obtained from cloves by means of alcohol.

**cār-y'-ō-phýl-lōid, a.** [Fr. *caryophyllōite*; Gr. *καρυόφυλλον* (*karuophyllon*), and *εἶδος* (*eidos*) = form, appearance.]

*Bot.*: Resembling the Caryophyllus, or Clove.

**cār-y'-ō-phýl-lūs, s.** [Gr. *κάρυον* (*karuon*) = a nut; *φύλλον* (*phullon*) = a leaf.]

1. *Bot.*: A genus of Myrtaceæ, containing *Caryophyllus aromaticus*, the tree producing the well-known spice called cloves. It is a handsome evergreen, rising from fifteen to twenty feet high. [CLOVE.] It grows in the East Indian Islands. The trees are now extensively cultivated in the West Indies and elsewhere. All parts of the plant are aromatic from the presence of a volatile oil.

2. *Pharm.*: Cloves, the unexpanded flower-bud, dried, of *Caryophyllus aromaticus*, or Clove-tree. The clove has a small tapering, nail-like, reddish-brown body, consisting of a four-toothed calyx, and the unopened corolla.

¶ *Caryophylli oleum*, oil of cloves, the essential oil distilled from cloves. It is of a light yellow colour when fresh, gradually becoming brown-red; sp. gr. 1.055. It consists of a hydrocarbon C<sub>10</sub>H<sub>16</sub>, containing in solution eugenic acid C<sub>10</sub>H<sub>12</sub>O<sub>2</sub>, and a crystalline body caryophyllin (q.v.). Cloves contain tannin. Cloves and the oil are stimulant, aromatic, and carminative, and are employed in atonic dyspepsia, to allay vomiting in pregnancy, and to relieve flatulence; also the oil is used to allay the pain of carious teeth.

**cār-y'-ōp'-sis, s.** [Gr. *κάρυον* (*karuon*) = a nut; *ὄψις* (*opsis*) = appearance.]

*Bot.*: A name applied to dry fruit containing a single seed, which is united by all parts with a thin pericarp. This fruit has the aspect of a seed; such is the fruit (commonly called aced) in the family of grasses. (*Balfour.*)

**cār-y'-ō-ta, s.** [Gr. *καρύωτος φοινίξ* (*karuotos phoinix*) = the date-palm; *κάρυον* (*karuon*) = a nut.]

*Bot.*: A genus of very elegant, lofty palms, with graceful twice pinnate leaves. Nine species are known, all natives of India and the Indian Islands. They have flowers of different sexes borne upon the same spike, or sometimes on different spikes. From the flower-spikes of *C. urens* a large quantity of the juice called toddy or palm-wine is obtained, and this on boiling yields excellent palm-angur and sugar-candy. The aago of commerce is prepared from the central or pithy part of the trunk. The fibre of the leaf-stalk is used for making ropes, brooms, mats, &c., and a woolly kind of scurf scraped off the leaf-stalk for caulking boats.

\* **cas, s.** [CASE.]

† *Mexican Cascarilla*: *Cascarilla Pseudo-China*. It is called by the Spaniards *Quina blanca*.

**cas-car-illa bark** (*Eng.*), **cas-car-ill-ee cortex** (*Lat.*), s.

*Pharm.*: The bark of *Croton Eleuteria*, or *Eleutheria*, a tree belonging to the order Euphorbiaceae. It is a native of the Bahama Islands, being most abundant in Eleutheria, one of that group. The bark occurs in the market as small quilled pieces, about the size of a pencil, fissured in both directions, of a dull, brown colour, spotted white with lichens. It has a spicy smell and a bitter and aromatic taste. It contains a crystalline substance, *Cascarillin*. It is highly esteemed as an aromatic bitter tonic without astringency in cases of indigestion; also as a stimulant expectorant in chronic bronchitis. When burnt it emits a fragrant smell, on which account it has been at times mixed with tobacco.

"*Cascarilla bark* is imported chiefly from Eleutheria, one of the Bahama islands, packed in chests and bales."—*Thomson's London Dispensatory, Croton*.

**cas-ca-ri'-line**, s. [From Sp. &c., *cas-car-illa*; and Eng., &c., suff. *-ine* (*Chem.*) (q.v.).]

**case**(1), \* **caas**(1), \* **cas**(1), \* **casse**, \* **kace**(1), s. & a. [O. Fr. *casse* = box, case, or chest, from Lat. *capio* = to hold, to contain.]

A. *As substantive*:

I. *Ordinary Language*:

1. *Literally*:

(1) That which contains or encloses something else; a box, covering, or sheath.

"Kace or casse for pyunya. *Capella*."—*Prompt. Parv.*

"Other caterpillars produced maggots, that immediately made themselves up in cases."—*Ray: On the Creation*.

(2) A box or chest with its contents.

(3) A couple or set of any article.

(4) The framework or carcass of a house.

"The case of the holy house is nobly designed and executed by great masters."—*Addison: On Italy*.

\* 2. *Figuratively*:

(1) The body, as that which covers or encloses the heart.

"O cleave, my sides!  
Heart, once be stronger than thy continent,  
Creak thy frail case."  
*Shake-sp.: Antony and Cleopatra*, lv. 12.

(2) The skin.

"For generally, as with rich furred coles, their cases are faire better than their bodies, . . ."—*Burton: Anatomy of Melancholy*, p. 474.

II. *Technically*:

1. *Printing*: A frame containing compartments or divisions for type. Each font of type requires two cases, the upper and the lower. The upper case contains the capital letters, small capitals, dotted and accented letters, fractions, and marks of reference; the lower case the small letters, figures, marks of punctuation, quadrats, and spaces. In some continental printing-offices only one case is used.

2. *Bookbinding*: A cover made ready for its contents—the book.

3. *Masonry*: An outside facing of a building, of material superior to that of the backing.

4. *Joinery*:

"The agreement was for the purpose of securing to the plaintiffs a monopoly of the supply of sheep's cases, or the guts of sheep, for covering sausages in New York and Canada."—*Standard*, Sept. 22, 1881.

† For the distinction between *case* (1) and *frame*, see *FRAME*.

B. *As adj.*: (See the compounds).

**case-bays**, s. pl. The joists framed between a pair of girders in naked flooring. (*Gwilt*.)

**case-bottle**, s.

1. A bottle constructed to fit into a case with others.  
"The first thing I did was to fill a large square case-bottle with water; and set it on my table, in reach of my bed."—*De Foe: Life and Adventures of Robinson Crusoe*, p. 98.

2. A bottle protected against breakage by a case or covering of wickerwork.

**case-charr**, s.

*Ichthy.*: A species of Salmon, *Salmo salvelinus*. It is called also the Charr, the Alps Salmon, and the Salvellian Charr. It is a British species.

**case-harden**, v. t. [*Eng. case*, and *harden*.]

1. *Lit.*: To harden the outside or case of an iron tool, thus converting the surface into steel, while the interior still retains the toughness of malleable iron.

"The manner of case-hardening is thus: Take cow horn or hoof, dry it thoroughly in an oven, then beat it to powder; put about the same quantity of bay salt to it, and mingle them together with stale chamberly, or else white wine vinegar. Lay some of this mixture upon loam, and cover your iron all over with it; then wrap the loam about all, and lay it upon the earth of the forge to dry and harden. Put it into the fire, and blow up the coals to it, till the whole lump have just a blood-red heat."—*Mozon's Mechanical Exercises*.

2. *Fig.*: To strengthen oneself, at least outwardly, against any influence.

**case-hardened**, *pa. par.* & *a.* [*CASE-HARDEN*, v.]

1. *Lit.*: Having the outside or surface of an iron tool hardened, so as to be converted into steel.

2. *Fig.*: Strengthened against any external influence.

"Adieu, old fellow, and let me give thee this advice at parting; see get thyself case-hardened; for though the very best steel may snap, yet old iron, you know, will rust."—*Guardian*, No. 95.

**case-hardening**, *pr. par.*, *a.*, & *s.* [*CASE-HARDEN*, v.]

A. & B. *As pr. par. & particip. adj.*: (See the verb).

C. *As substantive*:

1. *Lit.*: The act or process of hardening the outside or surface of iron so as to convert it into steel.

2. *Fig.*: The act of strengthening against external influences.

**case-knife**, s. A large table-knife, usually carried in the olden times in a sheath or case.

"The king always acts with a great case-knife stuck in his girdle, . . ."—*Addison: On Italy*.

**case-mated**, *a.* [*CASEMATED*.]

**case-paper**, s. The outside quires of a ream.

**case-rack**, s.

*Printing*: A wooden frame to receive printers' cases when not in use.

**case-shot**, s. The same as *CANISTER-SHOT*. Common for smooth-bore guns: a cylinder of tin filled with small iron balls packed in sawdust and having a wooden or iron bottom; range 300 yards. For rifled guns: a number of sand-shot or lead and antimony bullets packed, with coal-dust, to a thin iron or tin case. It has a wooden top and a wrought-iron disc at the bottom, on which rest three curved iron plates, forming a living to prevent injury to the bore in firing. For spherical case (diaphragm, shrapnel, and improved shrapnel), see *SHELLS*.

"In each seven small brass and leather guns charged with case-shot."—*Clarendon*.

**case-weed**, \* **casse-weed**, s.

*Bot.*: A cruciferous plant, the Shepherd's Purse (*Capsella Bursa-pastoris*).

**case-winding**, *a.* Wound or intended to be wound up by a case.

† *Case-winding watch*: A watch so constructed that the opening of the cover winds up the works. It cannot be overwound. Theurer, of Switzerland, took out a patent in the United States for a watch of this kind in 1866, and Gulzot for another in 1870.

**case-work**, s.

*Bookbinding*: A book gined on the back and stuck into a cover previously prepared.

**case-worm**, **caseworm**, s. The same as the *Caddis* (q.v.), so called from the case which it constructs for itself.

"*Caddises*, or *caseworms*, are to be found in this nation, in several distinct counties, and in several little brooks."—*Floyer*.

**case**(2), \* **caas**(2), \* **cas**(2), \* **kace**(2), s. & a. [O. Fr. *cas*; Ital. *cas*, Sp. & Port. *caso*; Lat. *casus* = a chance, from *caedo* = to fall.]

A. *As substantive*:

I. *Ordinary Language*:

1. A chance, accident.

"*Kace*, *happe*, *Caas*."—*Prompt. Parv.*  
"Case fell that this kyng . . . was with sickness onslaught."—*Alisanunder: Frag.* (ed. Skeat), 24.

"There he hleude mid is ost, betere cas to shida."—*Robert of Gloucester*, p. 558.

"The bird-catchers assert; that this is invariably the case."—*Darwin: The Descent of Man*, vol. 1, pt. ii., ch. viii., p. 259.

(b) *Of persons*:

"In such case often tymes they be . . ."—*Nuga Poetica*, p. 2.

"If the case of the man be so with his wife, it is not good to marry."—*Matt.*, xix. 10.

\* 3. A condition of the body.

" . . . our slek were many, and in very ill case."—*Bacon*.

4. Questions or matters concerning particular persons or things.

"Well-do I find each man most wise in his own case."—*Sidney*.

5. A question or point to be decided on.

[1. 1.]

" . . . so hard and perplex a case."—*Tillotson* (3rd ed., 1722), vol. 1, ser. ii.

II. *Technically*:

1. *Law*:

(1) The state of facts juridically considered; as, the lawyers cited many cases in their pleas.

"If he be not apt to beat over matters, and to call up one thing to prove and illustrate another, let him study the lawyer's cases . . ."—*Bacon: Essays*.

(2) A statement of the facts of any matter *sub judice*, drawn up for the consideration of a higher court.

(3) A cause appointed for trial.

2. *Medicine*:

(1) The history of a disease.

(2) A particular instance of any disease.

"Chalybeate water seems to be a proper remedy in hypochondriacal cases."—*Arbutnot: On Affections*.

"Blabbing the case of his patient."

Tennyson: *Maud*, II, v. 57.

3. Gram.: The different forms assumed by a word according to its different relations in a sentence. The movable or variable terminations of a noun are called its *case-endings*. In the oldest English there were six cases: Nominative, vocative, accusative, genitive, dative, and instrumental. In modern English only one case, the possessive (the representative of the older genitive), retains a case-ending, but we find traces of others, as in the adverbs *whom, seldom*, where the *m* is the relic of the dative case in old English.

III. In special phrases:

1. In case, \* in cas.

(1) If it should happen that, supposing that, lest.

"For in case it be certain, hard it cannot be for them to show us where we shall find it..." - Hooker.

(2) In a fit condition for anything.

"Thou'st best, most ignorant monster, I am in case to justify a constable." - Shakespeare: *Tempest*, III, 2.

(3) Perhaps.

2. If case (be): If by chance, supposing.

3. \* Of case, of cause: By chance, accidentally.

"Because sic reuerentia may of case be tyrnt." - Acts James III. (an. 1469; ed. 1814), p. 95. (*Of case*, ed. 1866).

4. \* On or upon case, \* on cas: By chance.

5. To put a case, \* putte caas: To suppose or propose an hypothetical instance or illustration of any case.

"I putte case that he ha space Flurth to proceede day by day." - Lydgate.

"What profit it to put An idle case." - Tennyson: *In Mem.* XXX, 18.

6. To set case, \* setth cas: The same as to put case.

"I sette cas that a theke make a hole in a hoar, for to take out good." - *Gesta Romanorum* (ed. Hertel), p. 10.

(1) Crabb thus distinguishes between a case and a cause: "The case is matter of fact; the cause is matter of question: a case involves circumstances and consequences; a cause involves reasons and arguments: a case is something to be learned; a cause is something to be decided. A case needs only to be stated; a cause must be defended; a cause may include cases, but not vice-versa."

(2) For the distinction between case (2) and situation, see SITUATION.

B. As adjective: (See the compounds).

case-book, s. A book in which a medical man enters the particulars and history of each case treated by him.

case-ending, s. The inflections by which the different cases of a noun, &c., are distinguished. [CASE (2), A, II, 3.]

"The second stage is that in which some words have lost their power of being used as nouns or verbs, and can only be employed as particles, in which capacity they are added to nouns to form case-endings, and to verbs to form tense and person endings." - *Basmer: Comp. Gram. Aryan Lang.*, vol. I (1872). Introd., p. 42.

case-putter, s. One who puts forward arguments; a lawyer.

"A battered, worm-eaten case-putter." - *Osway: Soldier's Fortune*, II, 1.

case (1), v. t. [CASE, s.]

I. Literally:

1. To encase, put in a case or covering.

"The friend with ardour and with joy obey'd. He cas'd his limbs in brass..." - Pope: *Horace's Iliad*, bk. xvii, l. 161-2.

"You spur me hence, and he will spur me hither: If I last in this service, you must case me in leather." - Shakespeare: *Comedy of Errors*, II, 1.

2. To cover or envelop as a case.

"Then comes my fit again; I had also been perfect, As broad and general as the casing air." - Shakespeare: *Macbeth*, III, 4.

3. To cover on the outside; to surround with a casing of a material different to that of which the interior is composed.

"Then they began to case their houses with marble." - *Arabian Nights*.

\* 4. To strip off the case or covering; to skin or flay.

"We'll make you some apert with the fox ere we case him." - Shakespeare: *All's Well that Ends Well*, III, 6.

\* II. Fig.: To cover, hide.

"If then wouldst not entomb thyself alive, And case thy reputation in a len." - Shakespeare: *Troil. & Cress.*, III, 2.

case (2), v. i. [CASE, s.] To put cases; to propose or suggest hypothetical instances or cases.

"They fell presently to reasoning and casing upon the matter with him, and saying distinctions before him." - *L'Estrange*.

\* case-a-ble, a. [Eng. case; -able.] Naturally belonging to a particular situation or case.

"Some convulsions he had, where in the opening of his mouth with his own hand, his teeth were somewhat hurt. Of this symptom, very caseable, more did he make by our people than I could have wished..." - *Baillet: Lett.*, I, 185.

case-är-i-a, s. [Named after Caserius, a missionary at Cochim, who assisted Rheede in the *Hortus Malabaricus*.]

Bot.: A genus of plants, order Samydaee (Samyda). In Brazil the leaves of *Casaria ulmifolia* are applied to wounds, and as an antidote to the bite of serpents, while the juice is drunk by the sick. A decoction of the leaves of *C. lingua* is used internally in inflammatory disorders and malignant fevers. *C. astringens* is employed as a poultice or lotion for badly-healed ulcers. The root of *C. esculenta*, an East Indian species, is bitter and purgative; the foliage is eatable. Finally, *C. Amaringa*, also an Indian species, has very diuretic pulp, while the leaves are used in medicated baths.

caséd, pa. par. or a. [CASE, v.]

ca-sé-ÿo, a. [Fr. *casique*, from Lat. *caseus* = cheese.] Pertaining to cheese.

caseic-acid, s.

Chem.: A name given to an acid obtained from cheese, the existence, however, of which has been denied.

ca'-sé-ine, ca'-sé-in, s. [Fr. *caséine*; Lat. *caseus* = cheese.]

Chem.: An albuminoid substance found in milk, soluble in alkali. It is coagulated by animal membranes. It dries into a yellow mass, and contains less nitrogen than albumin. A similar substance, called vegetable casein or legumin, occurs in peas, beans, &c.

"The deficiency of gluten and albumen, as compared with the casein of milk, is supplied by milk itself, by eggs, by meat, fresh or salt, and by the seeds that abound in casein—the pea, the bean, and the lentil." - *Dr. Guy: On Dietetics*.

† Vegetable caseine: A substance essentially the same as animal caseine, of which from twenty to twenty-seven per cent. occurs in the pea and bean, while the seeds of leguminous plants in general contain a considerable proportion of it. (Brown.)

case-mate, \* cas-a-mat, s. [Fr. *casemate*; Sp. & Port. *casamata*; Ital. *casamatta*; from *casa* = a house; and the second element is doubtful. Diez suggests Ital. *matto*, fem. *mattea* = mad, foolish, also dial. = "dummy," and Wedgwood, the Sp. *matar* = to kill.]

1. Fortification:

(1) A kind of bomb-proof vault or arch of stone-work, in that part of the flank of a bastion next the curtain, somewhat retired or drawn back towards the capital of the bastion, serving as a battery to defend the face of the opposite bastion, and the moat or ditch.

**cas-tan-ô-spër-mûm**, s. [Gr. *καστανόν* (*kastanon*) = a chestnut; *σπέρμα* (*sperma*) = a seed.]

**Bot.**: A genus of plants, so named from the fancied resemblance of the seeds to the edible chestnuts of Europe. It comprises only one species, and belongs to the papilionaceæ section of leguminous plants. It is found at Moreton Bay, in Queensland, Australia, where it grows to a height of from forty to fifty feet. The pea-like flowers are produced in racemes, and are of a bright yellow colour. The fruit is a pendulous cylindrical pod, six or eight inches in length, and tapering to both ends. It generally contains four seeds, rather larger than chestnuts, which are roasted and eaten, but are far inferior to the European chestnut, and have an astringent taste.

**\* cas-tayne**, s. [CHESTNUT.]

**caste**, s. [Fr. *caste*; Sp. & Port. *casta* = a race, lineage, from Lat. *castus* = pure, chaste.]

1. **Literally**: An hereditary class of society in India, the members of which are theoretically equal in rank, and, as a rule, follow the same profession or occupation. Formerly it was customary to add "and in Egypt;" but the late Dr. Birch (1818-85), a distinguished Egyptologist, said that the Egyptians, strictly speaking, had not castes, though the son often succeeded to the office of the father. Caste must therefore be viewed in connection with India alone. There it sprung primarily from the distinction of ethnological race and from conquest.

The aborigines of India seem to have been Turanians. In pre-historic times a second influx of Turanians appears to have taken place, the new comers conquering the old inhabitants or driving them to the hills and jungles. Thus were produced two classes, what may be called Turanian caste people and Turanian outcasts. Next, but still at a remote period of antiquity, say 1700 B.C., or even earlier, an Aryan people from central Asia invaded the land, and after a struggle, continued for many centuries, became dominant nearly everywhere. Long before this conquest was effected, three occupations among them had hardened into castes the Brshmans or Priests, the Kshetriyas or Warriors, and the Vaisyas or Merchants. It is worthy of note that in our own time there go out in numbers from England the representatives of these three castes, and of these only—Brshmans (chaplains and missionaries), Kshetriyas (officers and soldiers), and Vaisyas (merchants). Artizans and labourers cannot afford to go, and the

fourth Hindoo caste, that of the Sudras, or Artizans and Labourers, was constituted mainly of the Turanian caste-people, while the Pariahs and other outcasts and the wild tribes of the hills and the jungles are the older Turanian aborigines. When the real origin of the four leading castes and the outcasts beyond the pale had been forgotten, the Brahmans attempted to base the structure of society on what was alleged to be divine revelation. It was gravely asserted that the Brahmans came out of the mouth of the Supreme God to instruct men, the Kshetriyas from his arms to defend them, the Vaisyas from his stomach to feed them, and the Sudras from his feet to serve them.

Buddhism did its best to destroy caste, but after a struggle of about 1,250 years (say from 500 B.C. to 750 A.D.), during 1,000 years of which (from B.C. 250 to A.D. 750) it was victorious, it had to quit the field. [BOODHISM.] For the next 300 years caste was dominant and tyrannical in a high degree. Then the Mussulman conquest began to break its power. Now Anglo-Indian influences, political, religious, and social, are sapping its authority, especially at the Presidency seats. It was an unintentional interference with caste law which produced the Sepoy mutinies and war of 1857 and 1858, though the Moham-medans joined in the outbreak from other motives.

Through the long ages during which Indian caste has existed, the original four castes have split into an immense multitude, and at present in almost any locality from 100 to 200 may be met with. Different castes refuse to eat together or to intermarry, and as a rule they follow hereditary occupations, but nature is often too powerful for artificial and arbitrary restrictions. [ARYAN, BRAHMANISM, EURASIAN, MUTINY, MISSION.]

2. **Fig.**: Any distinct rank or class of society, especially if it shut its ranks against the ingress of strangers.

"Caste and rank are not the same, though in many cases they interpenetrate and support each other. The man of highest rank in India is the Governor-General, who takes precedence even of the highest Hindoo Rajahs (kings); but by caste law he is an outcast, not higher than a Pariah. The relations between white and dark men, specially if the latter be negroes, are essentially caste relations. The generality of Europeans or Americans would never think of legally intermarrying with negroes, regarding them as doomed by their colour to be for ever the inferiors of the white man. The hereditary nobility of Britain are not, strictly speaking, a caste, despite their legislative privileges; one born a commoner can be created a nobleman, but no Sudra can, by any process of creation known to man, be made a Brahman.

"But to be subjected by an inferior caste to a degradation beyond all other degradation..."—*Macaulay: Hist. Eng.*, ch. ix.

"Her manners had not that repose Which stamps the caste of Vere de Vere."—*Tampson: Lady Clara Vere de Vere*.

"Caste Christians": Hindoo converts who have not been required at baptism to surrender their castes. The converts of the great missionary, Christian Frederick Swartz, who laboured in India from 1750 to 1798, and those of many of his successors, were caste Christians; but the great majority of modern Protestant missionaries insist on caste being renounced at baptism; those of the Roman Catholic Church, on the other hand, permit it to be retained.

**II. Technically:**

**1. Metallurgy:**

(1) The act of forming metal in a mould.

¶ It is believed that the art of shaping metal by the hammer, chisel, and graver is older than that of casting it in a melted state in a mould. But casting is of very considerable antiquity, thus the golden calf made by Aaron was first "molten," i. e., melted and then graven (Exod. xxxii. 4, 24), and the brass (copper or bronze) vessels for Solomon's temple were also cast (1 Kings vii. 46, 47). Cast-iron statues are mentioned by Pausanias about A.D. 120, but nothing else of cast-iron is known to have existed in classic times. About A.D. 1709 John Thomas, a Welsh boy, devised an effective method of casting iron, and he and his master successfully carried out the process (which was long kept a secret) at Coalbrookdale. It is now one of the great industries in Britain, and other manufacturing countries possessed of coal and ironstone.

[FOUNDING.]

"After this manner he made the tea bases; all of them had one *casting*, one measure, and one size."—*1 Kings vii. 37.*

"... everything betookes great perfection in the *casting* of metals during the bronze period."—*Kemble: Horna Feralis, p. 54.*

(2) That which is cast in a mould.

2. *Nat. Hist.:*

(1) The act of moulting.

"The *casting* of the skin is, by the anoleto, compared to the breaking of the secundine, or cawl, but not rightly; for that were to make every *casting* of the skin a new birth."—*Bacon: Natural & Experimental History.*

(2) The cast feathers, excrements of hawks, &c.

3. *Bee-keeping:* A swarm. [CAST, s., B. 5.]

4. *Building:* A coating of lime or plaster.

5. *Joinery:* The bending of the surfaces of a piece of wood from their original position, either by weights, or by unequal exposure to the weather.

6. *Sculpture:* The taking casts of impressions of figures, busts, medals, &c.

7. *Pottery:* The set of stamping clay ware. Delicate objects, which cannot be readily moulded by pressing the clay into the mould, are cast by the following process. The plaster mould being closed, the slip or creamy clay is poured in, and the portion nearest to the mould becomes hardened by the absorption of the water by the mould. The fluid portion is then poured out, and the mould partially dried. A second filling of slip yields another coating, and the process is repeated as often as may be necessary to give the required thickness to the casting. (*Knight.*)

8. *Theat.:* The assigning of parts in a play. (*Webster.*)

¶ *Casting* is used in combination with many prepositions, as a *casting away*, a *casting off*, &c., for the meanings of all which see the corresponding uses of the verb.

*Casting of the heart:* A mode of divination used in Orkney.

"They have a charm also whereby they try if persons be in a decay or not, and if they will die thereof; which they call *Casting of the Heart*."—*Brand: Orkn., p. 62.*

" . . . the proportion of males would be somewhat greater at birth than at the age of castration."—Darwin: Descent of Man (1871), Part II., ch. viii., vol. I., p. 204.

2. Fig.: The act of freeing from obscenity; expurgation.

cās-trā-tōr, s. [Low Lat. castrator = one who gelds; Lat. castrō = to geld.]

1. Lit. One who gelds.

2. Fig.: One who cuts out obscene passages from a book; an expurgator.

\*cās-trēl, \*casteril, s. [KESTREL]

\*cās-trēm-sī-nl, a. [Lat. castrensis = belonging to a camp; castra = a camp.] Of or pertaining to a camp.

"Sixty miles, is the measure of three dayes journey, according unto military marches, or castramental manions."—Browne: Cyrus Garden.

\*cās-trēm-sī-nl, a. [Lat. castrensianus = belonging to a camp; castra = a camp.] The same as CASTRENSIAL. (Johnson.)

cās-u-āl, a. & s. [Fr. casuel; Ital. casuale; Lat. casualis = pertaining to chance; casus = chance.]

A. As adjective:

1. Happening by chance, accidental.

"Of the broad vale, casting a casual glance, We saw a throng of people—wherefore met?"—Wordsworth: Excursion, bk. II.

"But each of them, he adds, treated the subjects briefly, and without diligence or accuracy, deriving his information only from casual reports."—Lewis: Cred. Early Roman Hist. (1855), ch. III., § 12, vol. I., p. 94.

2. Dependent on chance; uncertain.

"The revenue of Ireland, both certain and casual, did not rise unto ten thousand pounds."—Dun.: On Ireland.

3. Trivial, commonplace.

"The commissioners entertain themselves by the fire-side in general and casual discourses."—Clarendon.

\* (1) Crabb thus discriminates between accidental, incidental, casual, and contingent. "Accidental is opposed to what is designed or planned; incidental to what is premeditated; casual to what is constant and regular; contingent to what is definite or fixed. A meeting

may be accidental, an expression incidental, a look, expression, &c., casual, an expense of circumstance contingent." (Crabb: Eng. Synon.)

(2) He thus distinguishes between occasional and casual. These are both opposed to what is fixed or stated; but occasional carries with it more the idea of infrequency and casual that of uniformity, or the absence of all design. A minister is termed an occasional preacher who preaches only on certain occasions; his preaching at a particular place on a certain day may be casual." (Crabb: Eng. Synon.)

B. As substantive:

1. A tramp, a vagrant; one who receives relief and shelter for one night in the workhouse of a parish to which he does not belong.

2. A labourer or artisan employed irregularly. (Mayhew.)

casual-ejector, s.

Legal: A nominal defendant in the action of ejectment, who continues such until appearance by or for the tenant in possession.

casual-ward, s. A ward or portion of a workhouse or hospital reserved for the accommodation of casual paupers or patients.

\*cās-u-āl-y-tī, s. [CASUALTY.]

cās-u-āl-ly, adv. [Eng. casual; -ly.] In a casual manner; by chance, fortuitously.

"Go, bid my woman Search for a jewel, that too casually Hath left mine arm."—Shakesp.: Cymbeline, II. 3.

\*cās-u-āl-nēss, s. [Eng. casual; -ness.] The quality or state of being casual; chance.

cās-u-āl-tī, \*cas-u-āl-y-tī, s. [Fr. casualité; Lat. casualis = pertaining to chance; casus = a chance.] I. Ordinary Language:

1. A chance, an accident, a fortune.

"With more patience men endure the losses that befall them by mere casualty, than the damages which they sustain by injustice."—Raleigh: Essays.

" . . . the documents preserved in the Roman archives, even those engraved on brass and other durable materials, were exposed to the casualties which attend such relics of the past."—Lewis: Cred. Early Roman Hist. (1855), ch. v., § 9, vol. I., p. 148.

2. Chance or accident attended with injury or death. (Especially applied to the losses of an army in the field.)

"It is observed in particular nations, that, within the space of two or three hundred years, notwithstanding all casualties, the number of men doubles."—Burrut: Theory of the Earth.

II. Technically:

1. Law (Casualty of wards): The incidental liabilities of land-tenure, especially the mails and duties due to the superiors in ward holdings.

"The feudal casualties were exacted with the most rigorous severity."—Gibbert Stuart: Discourse on hearing Lectures, p. 14.

2. Mining: A term applied among tinners to any strange matter separated from the ore by washing.

cās-u-ār-ī-nā, s. [So named by Rumphius, probably from a fancied resemblance in the foliage to the feathers of the Casowary. (Graham: Flora of Bombay.)]

Bot.: A genus of plants, the typical one of the order Casuarinaceae (q. v.)

cās-u-ār-ī-nā-ōc-ōs, s. pl. [From Mod. Lat. casuarina, and fem. pl. adj. suff. -aceae.]

Bot.: An order of abnormal exogens, alliance Amentales. Only one genus is known, Casuarina. They have a one-celled ovary, one or two ascending ovules, and a superior radicle. There are no leaves, but in place of them short, toothed, ribbed sheaths. They are trees like Giant Equiseta (Horse-tails). They have closer affinities, however, with Myricaceae or with Coniferae. They occur in Australia, New Caledonia, and the Indian Archipelago. They are generally called Beefwoods, their timber being of the colour of raw beef. In Australia they are often termed oaks. In Graham's Flora of Bombay one species is called the Cassarina or Tintian Pine. The heavy war-clubs of the native Australians are of Casuarina. The bark of Casuarina equisetifolia is slightly astringent; that of C. muricata is used as an infusion in India as a tonic. The young cones of C. quadrivalvis, when chewed, yield a pleasant acid, and are useful to those who cannot obtain water.

Cattle also are exceedingly fond of them. About thirty-two species are known.

cās-u-ār-ī-ūs, s. [CASSOWARY.]

Zool.: A genus of birds, family Struthionidae (Ostriches). Casuarina galeatus is the Casowary (q. v.)

cās-u-ist, s. [Fr. casuiste; Lat. casus = a chance.] One who studies and settles cases of conscience.

"Do not flatter yourselves that the ingenuity of lawyers will ever devise an oath which the ingenuity of casuists will not evade."—Macaulay: Hist. Eng., ch. xv.

"One only don't remains: Full oft I've heard, By casuists grave, and deep divines, averr'd."—Pope: January and May, 263-9.

\*cās-u-ist, v.t. [CASUIST, s.] To argue about or decide cases of conscience; to act as a casuist.

"We never leave unblinding and casuisting, . . ."—Milton: Doct. and Div. of Divorce, II. 20.

\*cās-u-ist-īc, cās-u-ist-ī-cal, a. [Eng. casuist; -ic, -ical.] Of or relating to casuistry, or the study of cases of conscience.

" . . . entirely the practical, casuistical, that is, the principal, vital part of their religion savours very little of spirituality."—South.

†cās-u-ist-ī-cal-ly, adv. [Eng. casuistical; -ly.] In a casuistical manner.

" . . . obtained in that house much of that learning, wherewith he was enabled to write casuistically."—Wood: Athens Oxon.

cās-u-ist-rī, s. [Eng. casuist; -ry.] The doctrine, tenets, or method of a casuist.

"This concession would not pass for good casuistry in those ages."—Pope: Odyssey, Notes.

" . . . that immoral casuistry which was the worst part of Jesuitism."—Macaulay: Hist. Eng., ch. xv.

cās-sūs dēl-īl, phrase. [Lat. casus = a chance; and bellī (genit. of bellum) = war.] The cause which produces, and is held by one side at least, to justify war.

"He did not say what was to be the cause belli or the casus armamenti."—Times, Feb. 2, 1873.

ōāt, \*kāt, s. & a. [A.S. cat; Dut. & Dan. kat; Sw. katt; Icel. kött; L. Ger. kattle; O. H. Ger. & Ger. kater; Ger. katze; O. Fr. cat; Fr. chat; Sp. gato; Ital. gatto; Gael. & Ir. cat; Wel. cath; Russ. kot; Turk. kedî; from Low Lat. catulus.]

*Eccles. Arch.*: A chamber or crypt under a church, where relics were kept.

cat-a-brō-ga, s. [From Gr. κατάβρωσις (*katabrōsis*) = an eating up, a devouring. So named from the crose appearance of the glumes.]

Bot.: Whorl-grass. A genus of Gramineæ (Grasses). Tribe, Festuceæ. *Catabrosa aquatica*, the Water Whorl-grass, is a British species, growing on the banks of rivers or floating in pools of water.

cat-a-caus-tic, a. & s. [Fr. *catacaustique*, from Gr. κατακαυστικός (*katakaustikos*), from κατά (*kata*) = down, and καυστικός (*kaustikos*) = burning; καίω (*kaíō*) = to burn.]

A. As adjective:

*Geom. & Optics*: Relating to or of the nature of the curve described in B.

B. As substantive:

*Geom. & Optics*:

1. Sing.: A curve formed by joining the points of concurrence of several reflected rays proceeding from one radiating point.

2. Pl.: The caustic curves formed by the reflection of a curve of light.

cat-a-chrē-sis, s. [Low Lat. *catachrestis*; Gr. κατάχρησις (*katachrēsis*) = a misuse, from κατάχρησθαι (*katachrēsthai*) = to misuse; κατά (*kata*) = back, against, and χρῆσθαι (*chrēsthai*) = to use.]

*Rhet.*: The abuse of a trope, when the words are too far wrested from their native signification; or when one word is abusively put for another, for want of the proper word, as, a voice beautiful to the ear. (*Smith: Rhetoric*.)

cat-a-chrēs-tic, \* cat-a-chrēs-ti-cal, a. [Gr. καταχρηστικός (*katachrēstikos*) = of or pertaining to catachresis.] In the manner of a catachresis, involving a catachresis; improper, far-fetched.

"A *catachrestical* and far derived similitude it holds with men, that is, in a bifurcation."—*Brown: Vulgar Errors*.

† cat-a-chrēs-tic-al-ly, adv. [Eng. *catachrestical*; -ly.] In a catachrestic manner; in a forced or exaggerated manner.

"Where, in divers places of Holy Writ, the denunciation against groves is so express, it is frequently to be taken out *catachrestically*."—*Evelyn*, iv. § 4.

cat-a-clŷm, s. [Fr. *cataclysm*, from Gr. κατακλυσμός (*kataclismos*) = a deluge, from κατά (*kata*) = down, and κλύω (*kluzō*) = to wash over.]

\* I. Ord. Lang.: A deluge, an inundation.

"The opinion that held these *cataclysm* and epnores universal, was such as held that it put a total consumption unto things in this lower world."—*Hale: Origin of Mankind*.

2. Geol.: A sudden or violent rush of water, considered as the efficient cause by which certain phenomena have been produced, rather than by the gradual action of moderate currents, or by that of ice.

cat-a-clŷ-mal, a. [Eng. *cataclysm*; -al.] Of or pertaining to a cataclym; caused by or arising from a cataclysm.

cat-a-cōmb (b silent), s. [Fr. *catacombe*; Ital. *catacomba*; Sp. & Port. *catacumba*, from Low Lat. *catacumba* = a catacomb, from Gr. κατά (*kata*) = down, and κλύβη (*klumbē*) = a hole, a hollow.] Subterraneous cavities for the burial of the dead, supposed to be the caves and cells where the primitive Christians hid and assembled themselves, and where they interred the martyrs; which are accordingly visited with devotion. The most celebrated are those near Rome, but there are many others in various parts of the world. The catacombs of Paris are simply charnel-houses. The word is also occasionally used in the general sense of an excavated burying-place.

"On the side of Naples are the *catacombs*, which must have been full of stench, if the dead bodies that lay in them were left to rot in open niches."—*Adair*.

cat-a-cōus-tics, s. [In Fr. *catacoustique*, from Gr. κατά (*kata*) = against, and ακουστικός (*akoustikos*) = pertaining to hearing; ακούω (*akouō*) = to hear.]

1. Physics: That science which treated of reflected sounds or echoes.

2. Fortific.: Small galleries which communicate with a gallery parallel to the covert-way. (*Crabb*.)

cat-a-di-ōp-tric, cat-a-di-ōp-tri-cal, a. [Fr. *catadioptrique*, from Gr. κατά (*kata*) = against, and διοπτρικός (*dioptrikos*) = pertaining to the διοπτρα (*dioptra*) = a levelling staff, from διά (*dia*) = through, and ὄπτειος (*opteios*), verb. adj. from ὁράω (*horāō*) = to look, to see.] [DIOPTRICS.]

*Optics*: Pertaining to or involving both the reflection and refraction of light, as a catadioptric telescope.

catadioptric-light, s. A mode of illumination for lighthouses in which reflection and refraction are unitedly employed. It was suggested by Allan Stevenson in 1834. From their subjecting the whole of the available light to the corrective action of the instrument, they have been called helophotal lights. (*Knights*.)

cat-a-di-ōp-trics, s. [CATADIOPTRIC.] The science which treats of or is connected with the use of catadioptric instruments.

\* cat-a-drōme, s. [Gr. κατάδρομος (*kata-dromos*), from κατά (*kata*) = down, δρόμος (*dromos*) = a course; δραμεῖν (*dramēin*), 2 aor. inf. of τρέχω (*trechō*) = to run.]

bēl, bōy; pōut, jōwi; cat, cēll, chorns, chin, bench, go, gem; thin, thīs; sin, aš; expect. Xēnophon, exist. -iŋg. -clan, -tian = shan. -tlan, -sion = shūn; -tlan, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

- 1. A race-course.
- 2. A machine for hoisting heavy weights.

**ca-tad'-rô-mous**, a. [CATADROME.] A term applied to certain fish, which descend from fresh water to the sea to spawn. The opposite of anadromous (q.v.).

\* **căt-a-dũpe**, s. [Gr. κατάδουποι (katadoupoi) = falling with a heavy noise—a term applied to the cataracts of the Nile; *katá* (kata) = down, and *δούπος* (doupos) = a dead, heavy sound.]

- 1. A cataract or water-fall, especially one of those of the Nile.
- 2. A person living near the Nile cataracts.

"The Egyptian *catadupes* never heard the roaring of the fall of Nilus, because the noise was so familiar unto them."—*Brewer: Lingua* (1857), III.

**căt-a-fălque** (fălque as fălq), \* **căt-a-făl'-cô**, s. [Ital. *catafalco* = a scaffold, funeral canopy; Sp. *catafalco*; O. Fr. *escada-faud*; Fr. *catafalque* and *échafaud*; from O. Sp. *catar* = to see, to view, and Ital. *falco*, for *palco* = a scaffold, a stage.]

- 1. A temporary bier or structure of carpentry-work, decorated with paintings, &c., and used in funeral solemnities.
- 2. A kind of open hearse or funeral car.

CATAFALQUE.

\* **căt-ag-măt'-ic**, a. & s. [Fr. *catagmatique*, from Gr. *κατάγμα* (katagma) = a fracture, from *κατάγωμι* (katagomi) = to break; *κατά* (kata) = down, *ἀγνυμι* (agnymi) = to break.]

**A. As adjective:**

**Surg.:** Having the property or quality of uniting or consolidating broken parts or fractures.

"I put on a *catagmatic* plaster, and, by the use of a laced glove, scattered the pituitous swelling, and strengthened it."—*Wiseman: Surgery*.

**B. As subst.:** A medicine having such property or quality.

\* **căt-a-grăph**, s. [Gr. *καταγράφη* (katagraphê) = a drawing, a delineation; from *κατά* (kata) = down, and *γράφη* (graphê) = a drawing; *γράφω* (graphô) = to write, describe.] The first draught or outline of a picture; also, a profile.

**căt-a-lan**, a. & s. [Catalonia, a district of Spain.]

**A. As adj.:** Of or pertaining to Catalonia.

**B. As substantive:**

1. **Ord. Lang.:** A native of Catalonia.

2. **Blasting:** A blast-furnace for reducing from ores, extensively used in the north of Spain, particularly in the province of Catalonia. It consists of a four-sided cavity or hearth, which is always placed within a building and separated from the main wall thereof by a thinner interior wall, which in part constitutes one side of the furnace. The blast-pipe comes through the wall, and enters the fire through a tnyere which slants downward. The bottom is formed of a refractory stone, which is renewable. The furnace has no chimneys. The blast is produced by means of a fall of water, usually from 22 to 27 feet high, through a rectangular tube, into a rectangular cistern below, to whose upper part the blast-pipe is connected, the water escaping through a pipe below. This apparatus is exterior to the building, and is said to afford a continuous blast of great regularity; the air, when it passes into the furnace, is, however, saturated with moisture. (*Knicht*.)

**căt-a-lēc-tic**, \* **căt-a-lēc-tick**, a. & s. [Lat. *catellecticus*, from Gr. *καταλήκτικός* (katalēktikos) = stopping short, from *κατά* (kata) = down, and *λήκτικός* (lēktikos) = stopping, from *λήγω* (lēgô) = to stop.]

**A. As adjective:**

**Pros.:** Stopping short; used of a rhythm which is incomplete by reason of its being short by a syllable (or more) of the full measure.

"A stanza of six verses, of which the first, second, fourth, and fifth, were all in the octosyllable metre, and the third and last *catellectick*; that is, wanting a syllable, or even two."—*Tyrwhitt: On Chaucer's Versification*.

**B. As subst.:** A verse which is incomplete, wanting a syllable at the end.

\* **căt-a-lēc-tics**, s. [Gr. *κατάλασσω* (katalassô) = to exchange; from *κατά* (kata) = down, back, and *ἀλλάσσω* (allassô) = to change.] The science of exchanges, now called political economy.

**căt-a-lēp'-sis**, **căt-a-lēp'-sý**, s. [Gr. *κατάληψις* (katalēpsis) = a sudden seizure; from *κατά* (kata) = down, and *λήψις* (lēpsis) = a seizing; from *λαμβάνω* (lambanô) = to take, to seize.]

**Med.:** A form of mental disorder, akin to hysteria, which is characterised by the person affected falling down suddenly in a state of real or apparent unconsciousness, and, save for some occasional muscular twitchings of the face and body, remaining rigid and statue-like for a period of time which varies from one minute to some hours or even days, and then all at once recovering consciousness as if aroused from sleep—as a rule with no bad consequences to follow. Cataplexy almost invariably affects hysterical people only, and it is the prolongation of the unconscious condition to some days in certain extreme cases which has given rise to the fear which some people have of being buried alive under such circumstances. It is needless to say that the evidence of death is unmistakable to the scientist, and cannot be confounded with a state of cataplexy.

"There is a disease called a *cataplexis*, wherein the patient is suddenly seized without sense or motion, and remains in the same posture in which the disease seized him."—*Arbuthnot*.

**căt-a-lēp'-tic**, a. [Gr. *καταληπτικός* (katalēptikos) = liable to cataplexy; *ληπτικός* (lēptikos) = liable to be seized; *λαμβάνω* (lambanô) = to seize.] Pertaining to or of the nature of cataplexy; subject to cataplexy.

\* **căt-ăl'-ô-gize** (or g hard), v. t. [Gr. *καταλογίζομαι* (katalogizomai) = to reckon up, to compute.] To enumerate in a catalogue, to catalogue (q.v.). (*Coles*.)

**căt-a-lôgue** (ue silent), \* **căt-a-log**, \* **căt-log**, s. [Fr. *catalogue*; Lat. *catalogus*, from Gr. *κατάλογος* (katalogos) = a reckoning, a catalogue; *κατά* (kata) = down; *λόγος* (logos) = a telling, an enumerating; *λέγω* (lēgô) = to tell.]

1. **Ord. Lang.:** A list or systematic enumeration of articles generally in alphabetical order.

† In America, Scotland, and formerly in England, applied to persons, as a catalogue of the students of a college, but in England used only of things.

"The catalogue might be increased with several other authors of merit. . . ."—*Goldsmith: On Poetic Learning*, ch. viii.

II. **Astron.:** A list of stars, with materials appended for indicating their latitudes and longitudes, and their declinations and right ascensions.

**catalogue raisonné**, s. A catalogue of books, paintings, &c., classed according to their subjects, with explanatory remarks.

† **căt-a-lôgue** (ue silent), v. t. [CATALOGUE, s.] To enumerate in a catalogue, to make a list or catalogue of.

"He so cancelled, or catalogued, and scattered our books, as from that time to this we could never recover them."—*Harrington: Brief View of the Church*, p. 80.

**căt-a-lôg-uēr**, s. The compiler of a catalogue. (*Notes & Queries*, Aug. 28, 1886, p. 167.)

**căt-a-lôg-uing** (u silent), *pr. par.*, a. & s. [CATALOGUE, v.]

**A. & B. As pr. par. & particip. adj.:** (See the verb)

**C. As subst.:** The act of enumerating or setting down in a list or catalogue.

"This is the task much heavier than the mere cataloguing of scientific achievements."—*Tyndall: Frag. of Science* (3rd ed.), xiii. 880.

**căt-a-lôg-uist**, s. A cataloguer. (*Notes & Queries*, Aug. 28, 1886, p. 166.)

**căt-a-lôg-uize** (u silent), v. t. [CATALOGIZE.]

**căt-ăl'-pa**, s. [From the native Indian name in Carolina, where it was discovered by Catesby in 1726.]

**Bot.:** A genus of Bignoniaceae, comprising four or five species of trees, natives of the West Indies, North America, Japan, and China. They have been introduced into Europe, and are cultivated in France, Germany, and the south of England. The wood is remarkably light, of a greyish-white colour, and fine in texture. It is capable of receiving a brilliant polish, and when properly seasoned is very durable. The bark is reputed tonic, stimulant, and antiseptic, and the honey from its flowers poisonous. (*Treas. of Bot.*, &c.) A decoction of the pods of *Catalpa syriaca* is used in Italy as a remedy for catarrhal dyspnœa and coughs.

\* **căt-ăls**, s. pl. [CATTLE, CHATEL.]

**Law:** Goods and chattels. (*Wharton*.)

**ca-tăl'-y-sis** (pl. **ca-tăl'-y-sēs**), a. [Gr. *κατάλυσις* (katalusis) = a dissolving; *κατάλυω* (kataluô) = to dissolve; *κατά* (kata) = down, *λύω* (luô) = to loosen.]

1. **Physics:** The effect produced by the presence of a substance, which itself undergoes no permanent change, in facilitating a chemical reaction.

2. **Ord. Lang. (Fig.):** A dissolution or ending, decay.

"While they were in thoughts of heart concerning it, the end *catylisis* did come, and swept away eleven hundred thousand of the nation."—*Sp. Taylor*.

**căt-a-lýs'-ô-týpe**, s. [From Gr. *κατάλυσις* (katalusis) = a dissolving, and *τύπος* (typos) = a blow; the impress of a blow; an outline, a type.]

**Photog.:** A calotype process in which the paper is first prepared with a syrup of iodide of iron, instead of the iodide of potassium. The name was given to the process to indicate the supposed fact that the gradual self-development of the picture is the result of a catalytic action. The true chemical reaction is now understood. (*Knicht*.)

**căt-a-lýt'-ic**, a. [Gr. *καταλύτικός* (katalutikos) from *κατάλυω* (kataluô) = to dissolve.]

**Chem.:** Of or pertaining to the action or power called catalysis; having power to dissolve.

**catalytic force**, s.

**Physics:** That modification of the force of chemical affinity which determines catalyses.

"An interesting class of decompositions has of late attracted considerable attention, which, as they cannot be accounted for on the ordinary laws of chemical affinity, have been referred by Berzelius to a new power, or rather new form of the force of chemical affinity, which he has distinguished as the *catalytic force* and the effect of its action as *catalysis*."—*Gram: Elem. of Chemistry*, p. 186.

**căt-a-mar-ăn**, s. [Ceylonese native name *cătô-mărăn* = floating trees. (*Mahn*.)]

1. A kind of boat, vessel, or, more accurately, raft or float used by the Hindoos of Madras, the island of Ceylon, and the parts adjacent. It is formed of three logs of timber, secured together by means of three spreaders and cross lashings through small holes. The central log is much the largest, with a curved surface at the fore-end, which terminates up-

wards in a point. The side logs are very slender in form, but smaller, and with their sides straight; these are fitted to the central log. The length of the whole is from twenty to twenty-five feet. The crew consist of two men. In the monsoons, when a catamaran is able to bear a sail, a small outrigger is placed at the end of two poles as a balance, with a bamboo rmast and yard, and a mat or cotton sail. Frail as such a structure may appear, it can pierce through the surf on the beach at Madras and reach a vessel in the bay when a boat of ordinary construction would be sure to founder. (*Mr. Edge in Journal Royal Asiatic Soc.*, vol. 1., pp. 4. 5.)

"The catamarans used in the Brasils, and which are also common in the East Indies, consist of three logs of wood tapered at one end and lashed together. They are furnished with paddles, and are said to pull as fast as boats, the men being squatted in a kneeling position, and managing them with wonderful dexterity in passing the surf which beats on the shores. Those used in the Brasils also carry sail."—Young: Nautical Dictionary.

2. An incendiary raft. Used specially of those rafts with which on Oct. 2, 1804, Sir Sydney Smith in vain attempted to destroy the Boulogne flotilla designed by Napoleon for the invasion of England.

3. A scolding woman, a termagant. (This sense may be due to some erroneous association with cat.)

"What an infernal . . . catamaran."—Thackeray: Newcomes (ed. 1856), II. 572.

cat-a-mē-nī-a, s. pl. [Lat., from Gr. καταμήνια (katamenia) = menses; κατά (kata) = down, μήν (mēn) = a month.]

Med.: The discharge of a sanguineous fluid from the womb, which, in the case of healthy women, occurs every month. The discharge is due to certain peculiar changes which take place in the Graafian vesicles of the ovaries. It begins at the age of puberty, a period which varies under varying conditions of climate and civilisation, and terminates in what is popularly called the "change or time of life," which occurs usually at about the age of forty-nine. The interval between these two periods is called the "child-bearing period." The term catamenia, though used largely by medical men, is not so well known as another, which has exactly the same meaning, viz., menses.

"Two ancient Hindoo sages are of opinion, that if the marriage is not consummated before the first appearance of the catamenia, the girl becomes degraded in rank."—Dunn: On the Unity of the Human Species.

cat-a-mēn-ī-ā, a. [Lat. catamenia(a); -al.] Of or pertaining to catamenia or the menstrual discharge.

"The only marked exception occurs in the case of the Hindoo females, with whom, on an average, the catamenial flux appears about two years earlier than it does among other nations."—Dunn: On the Unity of the Human Species.

cat-a-mint, s. [CATMINT.]

cat-a-mite, s. [Fr., from Lat. catamitus = a corrupt form of Ganymedes; Gr. Γανυμήδης (Ganymēdēs) = Ganymede, a boy who, for his exceeding beauty, was taken up to heaven by Jupiter's bird, the eagle, and made cup-bearer to the chief of the gods.] A boy kept for unnatural purposes.

"Among the Greeks, it was no disgrace for philosophers themselves to have their catamites."—Gress: Cosmologia Sacra, p. 125.

cat-a-mount-ain, \*kāt-a-mount-ain, cat-a-mount, s. [Eng. cat, and mountain or mount.]

Zoology:

1. The wild cat (Felis catus).

"Would any man of discretion venture such a gristle to the rude claws of such a kat-a-mountain?"—Beaumont and Fletcher: Custom of the Country.

2. The lynx (q.v.). (Amer.)

3. The cougar or puma (q.v.).

¶ Used as separate words.

"As eaters of the mountain, they are spotted with diverse fytile fantasies."—Bale: Discourse on the Revolution, p. 2, sign. d. vi., 1550.

cat-an-ād-rō-mōus, cat-ār-drō-mōus, a. [Gr. κατά (kata) = down, ἀνά (ana) = up, and δρόμος (dromos) = a running.]

Ichthy.: Applied to those fishes which pass once a year from salt water into fresh, and return again from the fresh to the salt.

cat-a-nān-ch-ē, s. [Gr. κατανάχη (katanankē), a strong incentive used by Thessalian women in their incantations; from κατά (kata) = down, and ἀνάχη (anankē) = necessity.]

Bot.: A genus of plants belonging to the chloraceo tribe of compound flowers, distinguished by its scarious involucre and the awned chafy scales which crown its fruit. They are principally natives of the south of Europe, and have white or blue flowers. They are perennials.

cat-a-pāsm, s. [Gr. κατάπασμα (katapasma) = a sprinkling, a powdering; from καταπάσσω (katapassō) = to sprinkle, to powder, from κατά (kata) = down, and πάσσω (passō) = to sprinkle.]

Med.: A dry medicine in powders, used for sprinkling on ulcers, for absorbing perspiration, &c. They were divided into diaspasms, empasms, and sympasms. (See these words.)

cat-a-pēl-tīo, a. & s. [Gr. καταπέλιος (katapelios) = pertaining to a catapult; καταπέλιος (katapelios) = a catapult.] [CATAPULT.]

A. As adj.: Of or pertaining to a catapult.

B. As subst.: A catapult.

cat-a-pēt-al-ōus, a. [Gr. κατά (kata) = down, πέταλον (petalon) = a leaf, and Eng. suff. -ous.]

Bot.: Having the petals slightly united by their inner edge near the base, as in the mallow; a form of polypetalous.

"If the petals adhere to the bases of the stamens so as to form a sort of spurious monopetalous corolla, as in Malva and Camellia, such a corolla has been occasionally called catapetalous, but this term is never used, all such corollas being considered polypetalous."—Lindley: Introduct. to Bot., 3rd ed., p. 167.

cat-a-phōn-ic, a. [Fr. cataphonique; from Gr. κατά (kata) = down, back, and φωνή (phōnē) = a voice.] Of or relating to cataphonia.

cat-a-phōn-ics, s. [Eng. cataphonic.] Math.: The doctrine or science of the reflection of sounds, a branch of acoustics.

cat-a-phrāct, s. [Lat. cataphractes, from Gr. καταφράκτης (kataphraktēs) = a fully-armed soldier, from καταφράσσω (kataphrassō) = to cover; κατά (kata) = down, quite, φράσσω (phrassō) = to enclose, to cover.]

I. Ordinary Language:

1. A horse-soldier in complete armour.

" . . . before him pipes And timbrels; on each side went armed guards, Both horse and foot; before him and behind, Archers, and slingers, cataphracts and spears."—Milton: Samson Agonistes.

2. Armour, defence. (Lit. & Fig.)

"In a battle we fight not in complete armour. Virtue is a cataphract; for in vain we arm our lives, while the other is without defence."—Fletcher: Resolves, II. 8.

II. Technically:

1. Ichthy.: The armour or plate covering some fishes. (Dana.)

2. Mil.: A piece of ancient armour formed of cloth or leather, strengthened with iron scales or links, covering either a part or a whole of the body, and sometimes the warrior's horse as well.

cat-a-phrāc-ta, s. pl. [CATAPHRACT.]

Ichthy.: A name sometimes given to the Triglidae or Gurnard family of fishes. (TRIGLIDE.)

cat-a-phrāc-tēd, a. [Eng. cataphract; -ed.] Zool.: Covered with a cataphract, or armour of plates, scales, &c., or with hard, bony, or horny skin.

cat-a-phryg-ī-ans, s. pl. [In Lat. cataphryges, because their leaders came originally from Phrygia.]

Ch. Hist.: A "heretical" sect which arose in the second century A.D. They are said to have followed the opinions of Montanus. It is said that they forbade marriage, baptised their dead, and mingled the blood of young children with the bread and wine in the Eucharist.

cat-a-phyl-lar-ŷ, a. [Eng. &c., cataphyll(um); -ary.] Of the nature of, or pertaining to, a cataphyllum (q.v.).

cataphyllary-leaves, s. pl. Scale leaves.

cat-a-phyl-lūm, s. [Mod. Lat., from Gr. κατάφυλλος (kataphylos) = leafy.]

Bot.: A rudimentary leaf preceding a stage of growth; e.g. one of the cotyledons of an embryo, one of the scales of a bud, &c.

CATAPETALOUS.

CATAPHRACT.

cat-a-phŷs-ic-al, a. [Gr. κατά (kata) = down, against; and Eng. physical (q.v.).] Opposed to nature.

"Falling under hyper-physical or cata-physical laws."—De Quincey: A Utob. Sketches, I. 357.

cat-a-plāsm (Eng.), oāt-a-plāg-ma (Lat.), s. [Fr. cataplasme; Lat. cataplasma; from Gr. κατάπασμα (kataplasma), from καταπάσσω (kataplassō) = to spread over; κατά (kata) = down, πλάσσω (plassō) = to mould.]

Med.: A soft and moist preparation locally applied as a poultice. The basis is linseed meal, which is sometimes mixed with bread or flour. The most important Cataplasmata are—(1) Cataplasma fermenti (yeast poultice), (2) Cataplasma lini (linseed poultice), and (3) Cataplasma sinapis (mustard poultice). [POULTICE.]

"I bought an uncious of a mountebank. So mortal, that but dip a knife in it, Where it draws blood, no cataplasim so rare, Collected from all simples that have virtue Under the moon, can save the."—Shaksp.: Hamlet, iv. 7.

cat-a-plōc-tic, a. [Gr. καταπληκτικός (kataplekτικός) = striking.] That pertains to or is characteristic of cataplexy.

cat-a-plei-ite, s. [Etym. not apparent.]

Min.: A hexagonal, opaque mineral of a dull, weak, vitreous lustre, and a light yellowish-brown colour. It occurs in the island Larné, near Brsvig, Norway. Hardness, nearly 6½; sp. gr., 2.8. Composition: Silica, 46.85; zirconia, 29.81; alumina, 0.45; soda, 10.85; lime, 3.61; sesquioxide of iron, 0.63; water, 8.66. (Dana.)

cat-a-plōx-ŷ, s. [Fr. cataplexie, from Gr. καταπλήξ (kataplex) = stricken.] [APOPLEX.] A word coined, according to the Proceedings of the Psychological Research Society (Oct. 1886), by Freyer, to denote the dazed condition of heus staring at a chalk line, now used for temporary paralysis caused by nervous shock.

cat-a-pūce, \*cat-a-pūs, s. [Fr. catapuce; Ital. catapuzia, catapuzza; Sp. & Port. catapuzia.]

Bot.: The herb Spurge, Euphorbia lathyris. (Chaucer: Nonnes Prestes Tale.)

cat-a-pūl (Eng.), cat-a-pūl-ta (Lat.), s. [Low Lat. catapulta; from Gr. καταπέλιος (katapelios) = an engine of war for hurling heavy stones; κατά (kata) = down, πάλω (pallō) = to brandish, to hurl.]

I. An ancient military engine for throwing arrows, darts, or stones, consisting of a strong wooden framework supporting a bow of wood or steel, which was bent by means of a windlass, the cord being finally released by a spring. It is said to have been invented in 399 B.C. by Dionysius, the tyrant of Syracuse.

"The ballista violently shot great stones and quarrels, as also the catapult."—Camden: Remains.

2. A toy made of a forked stick and a strong piece of india-rubber, used by boys for shooting small stones.

CATAPULT.

cat-a-pūl-tic, a. [Eng. catapult; -ic.] Pertaining to, or of the nature of, a catapult (q.v.).

cat-a-pūl-tiēr, s. [Eng. catapult; -er.] One who worked a catapult.

"The besiegers . . . sent forward their sappers, pioneers, catapultiers."—Reade: Cloister and Heart, ch. xliii.

cat-ar-āct, \*cat-e-racte, s. & a. [Lat. cataracta; from Gr. καταράκτης (kataraktēs) = waterfall. This is from Gr. καταράσσω (katarassō) = to dash down. (Wedgwood.)]

A. As substantive:

I. Ordinary Language:

1. Lit.: A great stream or rush.

(1) Primarily and specially of water, a great waterfall.

"For folks that wander up and down like you To see an acre's breadth of that wide cliff One roaring cataract."—

(2) Of other things, as fire.

"What if all Her stores were opened, and this firmament Of hell should spout her cataracts of fire?"—Milton: P. L., II. 170.

2. Fig. : A great quantity, especially of a valuable flow of words.

"Catarrhs of declamation thunder here." *Cowper: Task, lv. 73.*

II. Technically:

1. Surg. : An affection of the sight, in which the crystalline lens of the eye is more or less opaque, and objective vision either wholly or partially prevented. Cataract is of two kinds, viz., hard and soft. Hard cataract is most common amongst old people. Soft may occur at any age, but is found most frequently amongst children, and especially amongst those who have been born with this condition; in the latter case it is called congenital cataract. Traumatic cataract is so called when it is the result of a wound of the lens. Cataract is very recognisable in children, in whom it presents a bluish-white appearance like milk-and-water in the pupil of the eye; in aged persons the colour is much darker and less distinct, and therefore more difficult to see, but a careful examination will detect the opacity in the lens.

"Saladine hath a yellow milk, which hath likewit a meek acrimony; for it cleaseth the eyes: it is good also for cataracts."—*Bacon: Nat. Hist.*

2. Mech. : A kind of water-governor for regulating the action of an engine. (*Wheale*.)

"Of this catastrophe there were, according to Dionysius, two accounts."—*Leavis: Greek Early Roman Hist. (1855), ch. xii, pt. II, § 90, vol. II, p. 146.*

II. Geol. : An important event having little or no seeming connection with those preceding it.

"Before the appearance of Lyell's well-known work, the Huttonian philosophy had conspicuously triumphed, but geologists were still prone to account for what appeared to be 'breaks in the succession,' by the hypothesis of vast catastrophes. They conceived the possibility of world-wide destruction of flora and faunas, and the sudden introduction or creation of new forms of life, after the forces of nature had sunk into repose."—*Chamber's Cyclopaedia (1890), v. 148.*

căt-as-troph-ic, a. [Eng. catastrophe(s); -ic.] Of or pertaining to, or of the nature of a catastrophe.

căt-ăs-trō-phism, s. [Eng. catastrophe(s); -ism.]

Geol. : (See extract.)

"By catastrophism I mean any form of geological speculation which, in order to account for the phenomena of geology, supposes the operation of forces, different in their nature, or immeasurably different in power, from those which we at present see in action in the universe."—*Huxley: Lay Sermons, p. 222.*

căt-ăs-trōph-ist, s. [Eng. catastrophe(s); -ist.]

Geol. : One who holds the view that the geological changes of the world and the formation of rocks have been produced by the action of catastrophes or violent physical changes. In France, the distinguished geologist, Elie de Beaumont, was a great advocate of this theory, and had many followers.

**II. Technically:**  
1. Music: A part-song, also called a round (q.v.), where each singer in turn catches up, as it were, the words from his predecessor, the second singer beginning to sing the first line as soon as the first has finished it, the third beginning after the second has finished it, and so on. Originally the words were simple; subsequently it was contrived that by the singers catching at each other's words they should completely alter the meaning. Ludicrous effects were aimed at, and in the time of Charles II. most of the catches were indelicate. At present the difference between the catch and the round seems to be the humorous or fantastic character of the former.  
"He joined in their ribald talk, sang catches with them, and, when his head grew hot, hugged and kissed them in an ecstasy of drunken fondness."  
*Maccaulay: Hist. Eng.*, ch. IV.

**catch-y**, **catch-ye**, *a.* [Eng. *catch*; and *y*.]  
 1. Disposed to take the advantage of another.  
 2. Merry, playful.  
 3. Difficult, not easy to learn or to execute. (*Colloquial*)  
**cat-clúke**, *s.* [From Eng. *cat*, and Scotch *cluk* = to catch as by a hook, or Eng. *clutch*, from the fanciful resemblance which the papilionaceous flowers have to a cat's claws.]  
*Bot.*: A plant, the Bird's-foot Trefoil (*Lotus corniculatus*).

\* **câte**, *s.* [Shortened from Mid. Eng. *acat*, *achat*; from O. Fr. *acat*; Fr. *achat* = a purchase; from Low Lat. *accaplatum*, from *accaplo* = to purchase; *ad* = to, *caplo*, frequent, form of *capio* = to take.] [ACATE.] A delicacy, food. (Seldom used except in the plural).  
 ". . . even the Christmas-pye, which in its very nature is a kind of consecrated *cate*, and a badge of distinction, is often forbidden to the druid of the family."—*Taylor: No. 555*.  
 "The plentiful board high-beap'd with *cates* divine, And o'er the foaming bowl the laughing wine!"  
*Pope: Homer's Odyssey*, bk. ix, 9, 10.

† **cat-ê-chêt-ic**, **cat-ê-chêt-i-cal**, \* **cat-ê-chêt-ick**, *a.* [Gr. *κατηχητικός* (*katechêtikos*) = an instructor; *κατηχέω* (*katechêô*) = to din into one's ear, to instruct; *κατά* (*kata*) = down, and *ἴχος* (*êchos*) = a sound, a ringing in the ear.] Consisting of question and answer, pertaining to the catechism.  
 "Socrates introduced a *catechetical* method of arguing; he would ask his adversary question upon question, till he convinced him, out of his own mouth, that his opinions were wrong."—*Addison: Spectator*.  
 ". . . the *catechetical* institution of the youth of his parish."—*Fell: Life of Hammond*, § 1.

**cat-ê-chêt-i-cal-ly**, *adv.* [Eng. *catechetical*; and *-ly*.] In a catechetical manner; by way of question and answer.  
 † **cat-ê-chêt-ics**, *s.* [CATECHETIC.] The science or practice of instructing catechetically, or by way of question and answer.

**cat-ê-chine**, *s.* [Eng. *catech*(u), and suff. *-ine* (Chem.) (q.v.).]  
*Chem.*: C<sub>9</sub>H<sub>10</sub>O<sub>4</sub>. A weak acid extracted from catechu by hot water. It crystallises in colourless needles. When heated it yields pyrocatechin, C<sub>6</sub>H<sub>6</sub>O<sub>2</sub>. It gives a green colour with ferric salts; does not form insoluble compounds with gelatine.

\* **cat-ê-chis**, *s.* [CATECHISM.]  
 "And of their wells of grace ye have large declaration maid to yow in the third part of this *catechis*, quhilk intraitis of the seuin sacramentis."—*Abp. Hamilton: Catechisme* (1651), fol. 76, b.

\* **cat-ê-chi-gā-tion**, \* **cat-ê-chi-zā-tion**, *s.* [Low Lat. *catechizatio*; from *catechizo*.] The act or practice of catechizing.  
 ". . . the *catechization* of young chaplains in the rudiments of our faith."—*Burnet: Records*, pt. II, bk. I, No. 53. *Opiethorff's Submission*.

**cat-ê-chise**, **cat-ê-chize**, *v.t.* [From Low Lat. *catechizo* = to catechize; from Gr. *κατηχίζω* (*katechizô*) = to catechize, instruct; from *κατηχέω* (*katechêô*) = to din into one's ears; *κατά* (*kata*) = down, and *ἴχος* (*êchos*) = a ringing in one's ears.]  
 1. *Lit.*: To instruct by means of question and answer.  
 "And because Providence would see how Christians had brought up her children, she asked leave of her to *catechise* them."—*Bunyan: The Pilgrim's Progress*, pt. II.  
 ". . . his memory was long cherished with exceeding love and reverence by those whom he had exhorted and *catechized*."—*Macaulay: Hist. Eng.*, ch. v.  
 2. *Figuratively*:  
 (1) To question closely, to examine.  
 "I'm stopp'd by all the fools I meet, And *catechiz'd* in ev'ry street." *Swift*.  
 (2) To chastise, to reprove.  
 "And as it were in *catechising* sort, To make me mindful of my mortal sins."  
*Marlowe: Jew of Malta*, II, 2.

\* **cat-ê-chise**, *s.* [CATECHISE, *v.*] A catechism.  
 "The Articles, Creeds, Homilies, *Catechise* and Liturgy."—*Gauden: Tears of the Church*, p. 55.  
**cat-ê-chised**, **cat-ê-chized**, *pa. par. or a.* [CATECHISE, *v.*]  
 "This is an admirable way of teaching, wherein the *catechised* will at length find delight, and by which the catechiser, if he once get the skill of it, will draw out of ignorance and silly souls even the dark and deep points of religion."—*G. Herbert: Country Parson*, ch. xxi.

**cat-ê-chis-er**, **cat-ê-chi-zër**, *a.* [Eng. *catechis*(e); and *-er*.] One who catechizes.  
 "In 1550 he [Jewell] was admitted to the reading of the sentences, and during the reign of King Edward VI. became a zealous promoter of reformation and a preacher and *catechiser* at Sunningwell, near to Arington, in Berks."—*Wood: Athene Oxon.*, vol. I, p. 169.

**cat-ê-chis-ing**, **cat-ê-chiz-ing**, *pr. par., a., & s.* [CATECHISE, *v.*]  
**A. & B.** *As pr. par. & particip. adj.*: In senses corresponding to those of the verb.  
**C.** *As subst.*: The act or process of instructing or examining by way of question and answer.

"O God defend me! how an I beset!  
 What kind of *catechising* call you this?"  
*Shakespeare: Much Ado*, iv, 1.  
 "About two months of every summer he passed to preaching, *catechising*, and confirming daily from church to church."—*Macaulay: Hist. Eng.*, ch. xi.

**cat-ê-chism**, *s.* [Low Lat. *catechismus*; from *catechizo*.] [CATECHISE.]  
 I. *Ordinary Language*:  
 1. *Literally*:  
 (1) A form of instruction, *viâ* voce, by means of question and answer, especially in the principles of religion; the act of so instructing or being instructed.  
 ". . . for the first introduction of youth to the knowledge of God, the Jews even till this day have their *catechisms*."—*Hooker*.  
 (2) An elementary book in which the principles of religion are familiarly explained by way of question and answer.  
 "To say, ay, and no, to these particular, is more than to answer in a *catechism*."—*Shakespeare: As You Like It*, III, 2.  
 (3) Any primer or elementary book of instruction in any branch of art or science by way of question and answer.  
 \* 2. *Fig.*: Anything which affords instruction.

"He had no *catechism* but the creation, needed no study but reflection, and read no book but the volume of the world."—*South*.  
 II. *Ecclesiast. & Ch. Hist.*: In the same sense as I. (2) (q.v.). The first germ whence the idea of a Christian "catechism," formally so called, grew, was furnished by St. Paul, when, in 1 Cor. xiv, 19, he said "ἴνα καὶ ἄλλους κατηχῶ" (*ina kat alous katechêô*). Authorised Version, "that by my voice I might teach others also" (literally, might catechise others also). The first Christian catechisms are said to have been composed in the eighth or ninth century. Luther published a short catechism in 1520, and his larger and smaller ones in 1529. The Geneva Catechism was sent forth in 1536. The Church of England Catechism was first published in 1549 or 1551, but in a shorter form than now; the additions which enlarged it to its present dimensions being made by James I.'s bishops by his order in 1604, and the work issued in its complete form in 1612. The catechism of the "orthodox" Greek Church was published in 1542. In 1566 the Council of Trent produced a catechism, of course Roman Catholic in its teaching; the Rakovian Catechism, which is Socinian, was put forth in 1574, and the shorter and larger catechisms of the Westminster Assembly of Divines, now used in the Church of Scotland and other Presbyterian churches, appeared, the former in 1647, and the latter in 1648.

**cat-ê-chist**, *s.* [Gr. *κατηχιστής* (*katechistês*).] One who instructs others, *viâ* voce, by way of question and answer, in the rudiments of religious knowledge.  
 "None of years and knowledge was admitted, who had not been instructed by the *catechist* in this foundation, which the *catechist* received from the bishop."—*Hammond: Fundamentals*.  
 \* **cat-ê-chis-tic**, \* **cat-ê-chis-ti-cal**, *a.* [Eng. *catechist*; and *-ic, -ial*.] Of or pertaining to the office of a catechist, or to the act of instructing by way of question and answer.  
 "S. Cyril was the author of those *catechetical sermons* or *institutions* which are mentioned by S. Jerome."—*Bp. Cosin: Canon of Scripture*, § 58.

\* **cat-ê-chis-ti-cal-ly**, *adv.* [Eng. *catechistical*; and *-ly*.] Catechetically; by way of question and answer.  
 "The principles of Christianity, briefly and *catechistically* taught them, is enough to save their souls."—*South: Serms.* vii, 100.

**cat-ê-chù**, *s.* [Fr. *cachou*; Ger. *katechu*; Mod. Lat. *catechu*; from the Cochinchinese *caycau*.]  
 1. A gum furnished by the *Acacia catechu*. It is called also *Terra Japonica*. In the west of India it obtains the name of *Kvit*, and is collected by a tribe of people called Kuttoorees. (*Proceed. of Bomb. Geog. Society*, May, 1838.)  
 2. *Phar.*: *Catechu pallidum*, or Pale Catechu, is an extract from the leaves and young shoots of *Uncaria gambir*; it is prepared at Singapore. It occurs in cubical, yellowish-brown, porous pieces, with a dull, earthy fracture and a bitter astringent taste; sp. gr., 1.4. It is soluble in alcohol. It consists chiefly of catechia, a white powder melting at 217°, formula C<sub>20</sub>H<sub>16</sub>O<sub>8</sub>; and of catechu-tannic acid, a yellow porous substance, C<sub>12</sub>H<sub>10</sub>O<sub>5</sub>. It is soluble in water; on exposure to the air the solution turns red. Catechu has been used to

fâte, fât, fâre, amidst, what, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pô, or, wôre, wêlf, wôrck, whô, sôn: mûte, cûb, cîre, unite, cûr, rûle, fûll; try, Sýrian. æ, œ = é. ey = ä. qu = kw.

prevent the formation of boiler incrustations. Catechu is a very powerful astringent; it is used in diarrhoea and in cases of hæmorrhage and mucous discharge. It is chewed, and the juice gradually swallowed in relaxed conditions of the uvula, palate, &c.

Catechu, absurdly called Terra Japonica, . . . is prepared by boiling the slices of the interior of the wood in water, evaporating the solution to the consistence of syrup over the fire, and then exposing it to the sun to harden. It occurs in flat rough cakes, and under two forms. The first, as Bombay, is of uniform texture, and of specific gravity 1.38. The second is more friable and less solid. It has a chocolate colour, and is marked inside with red streaks. Arcaea nuts are also found to contain catechu. —Vre: Dictionary of Arts, Manufactures, and Mines.

catechu-tannic, a. An expression used chiefly or exclusively in the subjoined compound.

Catechu-tannic acid: [CATECHU, Pharm.]

căt-e-chû-îc, a. [Catechu; -ic.] Of or pertaining to catechu.

catechulo acid, s. [CATECHINE.]

căt-ê-chû-mên, s. [Gr. κατηχούμενος (katêchoumenos) = one who is orally instructed; from κατηχέω (katêcheô) = to din in; kata (kata) = down, and ηχή (êchê) = a noise, a din.] One who is still under instruction in the principles of the Christian religion; a neophyte.

"The prayers of the church did not begin in St. Austin's time, till the catechumens were dismissed." —Billingslee.

¶ In the first century, according to Mosheim, all who professed faith in Christ were immediately baptized; but in the second century the practice arose of requiring applicants for baptism to submit for a time to be instructed as catechumens before the initiatory rite was administered to them. What they continued in this preparatory state they were regarded as the lowest order of Christians. They were distinguished from the fideles (or faithful), not only by name, but also by their place in the church, where they sat in the gallery. They were not allowed to assist at the celebration of the Holy Communion, but were dismissed after the sermon with the words, "Ite, catechumeni, missa est." Nor were they allowed to vote at meetings of the church. The instructions given them varied according to the mental capacity which they severally displayed.

căt-ê-chû-mên-îto, s. [Eng. catechumen; -ate.] The state or condition of a catechumen.

căt-ê-chû-mên-î-cal, a. [Eng. catechumen; -ical.] Of or pertaining to catechumena.

căt-ê-chû-mên-îst, s. [Eng. catechumen; -ist.] A catechumen.

" . . . those catechumenists spoken of, . . ." —Bishop Morton: Catholic Appeal, p. 248.

căt-ê-cu-mel-yng, s. [Eng. catechumen(n); dim. suff. -ling.] A young catechumen.

"To baptize Barnes that ben catecumelynges." —Langland: P. Plowman, 3728.

căt-ê-gôr-êm, s. [Gr. κατηγόρημα (katêgorêma)] Categorematic word.

"Similarly, names are called categorematic words, or kategorema, because they can be predicated independently of any other word. Some logicians would exclude adjective names from the class of kategorema, and reduce the latter to substantive names only. . . . As a proof of this, they say that an adjective cannot stand as subject of a proposition unless accompanied by the definite article, and in the plural number." —Shedd: Elements of Logic, ch. 11.

căt-ê-gôr-ê-mât-îc, a. [Or. κατηγόρημα (katêgorêma) = a predicate.] [CATEGORV.]

Logic: Capable of being used as a term (used of a word).

†căt-ê-gôr-ê-mât-î-cal, a. [Eng. kategorematic; -al.] The same as CATEGOREMATIC (q.v.).

"Can there possibly be two kategorematic, that is, positive substantial infinities?" —Jeremy Taylor: Real Presence, sec. 11, § 14.

†căt-ê-gôr-ê-mât-î-cal-îly, adv. [Eng. kategorematic; -ly.] In a kategorematic manner.

"By this rule it is necessary (against Aristotle's great grounds) that some quantitative bodies should not be in a place, or else that quantitative bodies were kategorematically infinite." —Jeremy Taylor: Real Presence, sec. 11, § 29.

căt-ê-gôr-î-cal, a. [Eng. categor(y); -ical.]

1. Of or pertaining to a category.

"A simple proposition, which is also categorial, may be divided again into simple and complex." —Watts: Logic.

2. Absolute, positive; not admitting of conditions or exceptions.

"They could never obtain a categorial answer." —Clarendon.

căt-ê-gôr-î-cal-îly, adv. [Eng. categorial; -ly.] In a categorial manner; absolutely, positively, expressly.

"I dare affirm, and that categorically, in all parts wherever trade is great, and continues so, that trade must be nationally profitable." —Child: Discourse of Trade.

căt-ê-gôr-î-cal-ness, s. [Eng. categorial; -ness.] The quality of being categorial, or positive.

"The word of Mr. Bayes's that he has made notorious is categorialness. . . ." —Marvell: Works, vol. 11, p. 126.

căt-ê-gôr-îze, v.t. [Eng. categor(y); -ize.] To insert in a category or list; to class.

căt-ê-gôr-îy, s. [Lat. categoria; Gr. κατηγορία (kategoria) = an accusation, a speech; κατηγορία (kategoria) = to accuse, to affirm, to predicate; kata (kata) = against, and ἀγορεύω (agoreuô) = to harangue, to assert; ἀγορά (agora) = an assembly.]

1. Logic: One of the predicaments or classes to which the objects of thought or knowledge can be reduced, and by which they can be arranged according to a system.

"The absolute infinitude, in a manner, quite changes the nature of beings, and exalts them into a different category." —Chyene.

¶ Aristotle made ten categories, viz., substance, quantity, quality, relation, action, passion, time, place, situation, and habit. For the categories of Kant, see KANTIAN-PHILOSOPHY.

2. A condition, state, class, or predicament. "Twelve categories were framed, some of which were so extensive as to include tens of thousands of delinquents; and the House resolved that, under every one of these categories, some exceptions should be made." —Macrosay: Hist. Eng. ch. xlv.

3. Used to denote a list or a class of persons accused.

"The noblemen and others should get no pardon, whether forfeited or not, —by and at our prices and noblemen in England set down in the same category." —Spalding, li. 261.

căt-ê-lêc-trôde, s. [Gr. κατά (kata) = down, against, and Eng. electrode (q.v.).]

Electro-chem.: The negative electrode or pole of a galvanic battery. [CATHODE.]

ca-tê-na, s. [Lat. catena = a chain.] A chain or series of things connected with each other.

" . . . an undoubtedly logical catena of proposals. . ." —Daily Telegraph, March 14, 1877.

Catena di trilli: [Itai.]

Music: A chain, or succession, of short vocal or instrumental shkas. (Stainer & Barrett.)

catenæ patrum.

Ch. Hist.: Lit., chains of the Fathers. A series of extracts from commentaries by the Fathers on particular portions of Scripture. From about the sixth to at least the ninth century these almost wholly superseded personal effort on the part of professed expositors.

căt-ê-nâr-î-an, a. [Lat. catenarius = of or belonging to a chain; catena = a chain.] Of the nature of or resembling a chain.

catenarian-arch, s.

Arch.: A form of arch, the reverse of the curve taken by a chain or heavy rope when suspended between two points. (Cassell's Technical Educator, vol. 1, p. 197.)

CATENARIAN ARCH.

catenarian-curve, s.

Geom.: A curve formed by a chain or rope of uniform density, hanging freely from any two points not in the same vertical line. It is of two kinds, the common, which is formed by a chain equally thick or equally heavy in all its points; or uncommon, formed by a thread unequally thick, that is, which in all its points is unequally heavy and in some ratio of the ordinates of a given curve. The catenarian curve, or catenary, was first observed by Galileo, who proposed it as the proper figure for an arch of equilibrium. He imagined it to be the same as the parabola. Its properties were first investigated by John Bernoulli, Huygens, and Leibnitz. It is now

universally adopted in suspension-bridges. Each wire assumes its own catenary curve, and the cable is formed of bunches of aggregated strands.

"The back is bent after the manner of the catenarian curve, by which it obtains that curvature that is safest for the included marrow." —Chyene: Philosoph. Prin.

căt-ê-nâr-îy, a. & s. [Lat. catenarius = of or pertaining to a chain; catena = a chain.]

A. As adj.: Of the nature of or resembling a chain.

B. As subst.: A catenarian-curve (q.v.).

căt-ê-nâte, v.t. [Lat. catenatus, pa. par. of cateno = to connect by a chain; catena = a chain; O. H. Ger. kêtina, châtina; M. H. Ger. kêtene.] To connect by a chain; to join into a continuous series. (Bailey.)

căt-ê-nâ-têd, pa. par. or a. [CATENATE, v.] Connected by a chain; made into a series.

căt-ê-nâ-tîng, pr. par., a., & s. [CATENATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act of joining by a chain, or of forming into a continuous series.

căt-ê-nâ-tîon, s. [Lat. catenatio, from cateno = to chain; catena = a chain.] The act of joining into a continuous series; a regular or connected series.

"Which catenation, or conserving union, whenever his pleasures shall divide, let go, or separate, they shall fall." —Brown: Vulgar Errors, bk. v., ch. 8.

căt-ên-î-lâte, a. [Lat. catenula = a little chain, dimin. of catena = a chain.]

I. Ord. Lang.: Consisting of little links, as in a chain.

II. Technically:

1. Nat. Hist.: Having on the surface a series of oblong tubercles resembling the links of a chain.

2. Bot.: Formed of parts united end to end like the links of a chain.

că-têr (1), v.i. [CATER (1), s.] To purchase provisions; to supply food.

"He that doth the ravens feed, Yea providently caters for the sparrow, Be comfort to my age." —Shakespeare: As You Like It, li. 8.

că-têr (2), v. ca-tre, v.t. [CATER (2), s.] To cut diagonally.

căt-têr (1), v. ka-ter, ca-tour, s. [O. Fr. acatour, achatour; Fr. acheter; Dut. kater = one who buys; Low Lat. accipiator, from accipio = to purchase.]

1. Lit.: One who buys or provides food; a caterer.

"I am our catour and bere our aller pur." —Tale of Gamstyn, 317.

"Catour of a gentylmans house, desperier!" —Palgrave.

2. Fig.: Anything which provides for another.

"The oysters dredged in this Lyner, find a welcome acceptance, where the taste is cater for the stomach, than those of the Tamar." —Carew: Survey of Cornwall.

I. *Literally*:

• I. *Gen.*: Universal or general.

2. *Specially*:

(1) Pertaining to or recognised by the whole Christian Church. [CATHOLIC EPISTLES.]

(2) Orthodox, not heretical or schismatic.

(3) Pertaining or belonging to the Roman Catholic Church or its members.

† II. *Fig.*: Liberal, not narrow-minded.

B. *As substantive*:

1. A member of the Christian Church.

2. Now generally applied to a member of the Roman Catholic branch of the Christian Church.

**Catholic Church, s.**

I. *Ecclesiol.*: (For definition see example.)

"The 1st and largest sense of the term *Catholic Church*, is that which appears to be the most obvious and literal meaning of the words in the text (Hab. xii. 23). The general assembly and church of the first-born which are written in heaven; that is, the whole number of those who shall finally attain unto salvation."

2ndly, The *Catholic* or *Universal Church*, signifies in the next place, and indeed more frequently, the Christian Church only; the Christian Church, as distinguished from that of the Jews and patriarchs of old; the Church of Christ, as distinguished from our Saviour's days over all the world; in contradistinction to the Jewish Church, which was particularly confined to one nation or people—3rdly, The *Catholic Church* signifies very frequently, in a still more particular and restrained sense, that part of the *Universal Church of Christ*, which in the present age is now living upon earth; as distinguished from those which have been before and shall come after—4thly and lastly, The term *Catholic Church* signifies in the last place, and most frequently of all, that part of the *Universal Church of Christ*, which in the present generation is visible upon earth, in an outward profession of the belief of the *Creeds*, and in a visible external communion of the word and sacraments.—The Church of Rome pretends herself to be—this *Whole Catholic Church*, exclusive of all other societies of Christians.—*Clarke*, vol. 1, Ser. 62.

2. *Church History*:

(1) *Previous to the Reformation*: Like most other words used in ecclesiology, the term *Catholic* was borrowed at first from this New Testament. It occurs in some editions of the Greek original—including that issued in connection with the recent revision,—in the titles prefixed to the Epistles of James, 1 & 2 Peter, 1 John, and Jude [CATHOLIC EPISTLES], and is the word translated "general" in The Authorised Version of the Bible. The first to apply it to the Church was the Apostolic Father, Ignatius. When he and his successors used it they meant to indicate that the church of which they constituted a part comprised the main body of believers, and was designed, as it was entitled, to be universal. In this sense the Church was opposed to the sects and separate bodies of "heretics" who had separated themselves from it and were now outside its pale. This is the fourth sense given in the example under No. 1.

When, in the eighth century, the separation between the Eastern and Western Churches took place, the latter retained as one of its appellations the term "Catholic," the Eastern Church being contented with the word "Orthodox," still used by the Russian emperors

in their politico-ecclesiastical manifestoes. [ORTHODOX.] The history of this earlier portion of the Catholic Church will be best treated of in the article Christianity (q.v.). (See also Greek, Latin, Eastern, and Western.)

(2) Subsequently to the Reformation: When the Protestant churches separated from their communion with Rome in the sixteenth century, those whom they had left naturally regarded them as outside the Catholic pals. They, on the other hand, declined to admit that this was the case, and the term "Catholic Church" is used in the English Liturgy apparently in the sense of all persons making a Christian profession. "Mora especially we pray Thee for the good estate of the Catholic Church . . . that all who profess and call themselves Christians . . ." (For the history of the Church of Rome, see ROMAN CATHOLICS.)

Catholic Emancipation Act:

"An evil fortune attended all our attempts at re-establishing a cattery."—*Southey: The Doctor*, p. 684.

† **căt-tish**, a. [Eog. *cat*; *-ish*.] Feline, catlike.

**căt-tle**, **\*ca-tel**, s. & a. [A different form of the word *chattel*. In the pastoral age in England, as in other countries, the wealth of any man of substance was naturally estimated by the number of cattle that he possessed. Hence the word *cattle* came to mean what we now should call a man's *chattels*; on the same principle as the Latin word *pecunia* = money, from *pecus* = cattle.]

*A. As substantive*:

1. *Literally*:

\* 1. Property, wealth, goods.

"A woman that hadde a flux of blood twelve year and hadde spended all hir catel [Gr. *βιον* (*bion*) = life, or living; Vulgate: *omnem substantiam suam*; Auth. Eng. Vers.: all her living] in leeches."—*Wycliffe: Luke* viii. 43, 44.

\* 2. Property consisting of live stock, as distinguished from goods.

"The first distinction made of live stock from other property was to call the former *quick cattle*."—*Str. J. Harrington: Epigrams*, I. 91. (*Trench: Select Glossary*, pp. 30, 31.)

¶ Afterwards the word *chattel* was introduced for property without life.

3. Beasts of pasture, both wild and domestic.

¶ The word *cattle* is generally limited to the varieties of the ox and its congeners. These are sometimes called black cattle, though not all black, and horned cattle though some are hornless; hence the term "neat cattle" has been suggested for them. For the different species of ox, see *BOV*, *BOVIDÆ*. The chief breeds are distinguished, among other characteristics, by the length of their horns. The chief long-horned cattle are the Dishley breed, so called from Dishley Farm, in Leicestershire, where Robert Bakewell reared them; they have now become degenerate, and short-horns are in repute. Beside these, the Devon, Suasex, and Hereford breeds are worth mention. In the United States no new breeds of cattle of special worth have been produced, but there have been large importations of improved breeds from Europe, particularly of the short horns, which are highly valued. The Jersey and Guernsey breeds are much esteemed here. The Hereford, Ayrshire, Holstein, and other breeds have been introduced.

"And God made the beast of the earth after his kind, and *cattle* after their kind, and every thing that creepeth upon the earth after his kind."—*Gen.* I. 25.

II. *Fig.*: Used in a slighting sense of human beings.

"Boys and women are for the most part *cattle* of this colour."—*Shakep.: As You Like It*, III. 2.

*B. As adjective*: (See the compounds.)

Obvious compounds: *Cattle-breeding*, *cattle-dealer*, *cattle-lifter*, *cattle-market*, *cattle-pen*, *cattle-show*, *cattle-stealer*, *cattle-tie*.

**cattle-feeder**, s. An arrangement in a

cattle-stable for supplying the feed in regulated quantities to the rack or manger.

**cattle-gate**, s. Common for one beast (*Wharton*.)

**cattle-leader**, s. A nose-ring or grip-ring for the aptum of the nose, whereby dangerous cattle may be fastened or led. (*Knights*.)

**cattle-plague**, s.

1. *Gen.*: Any plague by which large numbers of cattle are destroyed. Such plagues have existed at intervals, more or less, in all countries and in all ages. Among the severest visitations in centuries preceding the nineteenth may be mentioned a great plague which arose in Hungary in 1711, whence it spread to other countries, destroying in the next three years about one and a half millions of cattle. A second visitation, which affected England and the West of Europe between 1745 and 1756, caused the death of about three millions of cattle.

2. *Spec.*: The disease above referred to failed to reach the United States, but the herds of this country have been seriously affected by a later disease, which is supposed to have originated in Central Europe, and spread thence all over the world. This disorder, known as Pleuro-pneumonia, cannot be traced back further than 1769, when it was known in Eastern France as *Murie*. It appeared in Germany in 1802, Russia in 1824, Great Britain and Ireland in 1841, the United States in 1843, Australia in 1858, and New Zealand in 1864. It is contagious in character, and so far has only been checked by the slaughter of infected cattle, though inoculation has proved somewhat successful, particularly in Australia. Great numbers of cattle have died from this disease, and strenuous measures are being adopted for its eradication. [FOOT-AND-MOUTH DISEASE, PLEURO-PNEUMONIA.]

**cattle-pump**, s. A pump which is operated by the cattle coming to drink, either by their weight upon a platform or by pressing against a bar which gives way before them, they following it around in a circular track and operating the piston. (*Knights*.)

**cattle-raik**, s. A common, or extensive pasture, where cattle feed at large. (*Scotch*.)

**cattle-range**, s. Any open space over which cattle may range or feed.

**cattle-stall**, s. A means for fastening cattle by their mangers or racks other than by halter or tie. It usually consists of a pair of parallel vertical stanchions, at such distance apart as to admit the neck of the animal. One stanchion is movable to allow the head of the animal to pass, and is then replaced and held by a latch or pin. (*Knights*.)

**căt-tê-ya**, s. [Named by Lindley after William Cattley, Esq.]

*Bot.*: An extensive genus of orchids, natives of Central America and Brazil, where they are found on the bark of trees and on rocks. The species bear two or more flowers, generally rose-coloured, but occasionally yellow.

And in hir bosom brace."  
*Douglas: Virgil, 102, 98.*

**\*cau-clon, \*caw'-clon, s.** [CAUTION.]

**cau-cūs, s.** [A corruption of *calker's-house* = a calker's shed. (*Chambers' Encyc.*, i. 206.) On March 2, 1770, a quarrel occurred in Boston between the soldiers and some ropemakers, in which the latter were overpowered and beaten. The people were greatly exasperated at this, and sought opportunities for retaliation. On the 5th of the same month, in a similar affray, the soldiers fired upon the people of the town, killing and wounding several. This induced the ropemakers and calkers, whose occupations brought them into contact, to form a society, at the meetings of which inflammatory addresses were delivered, and the most violent resolutions passed against the British government and its agents and instruments in America. The Tories in derision called these assemblies calker's meetings, and the term was at length corrupted to *caucus*. (*Knickerbocker Mag.*) But its origin has been shown to be of earlier date, and the *Cent. Dict.* suggests Mod. Lat. *caucus*, Mod. Gr. *καῦκος* (*kaikos*) = a cup. A private meeting of the representatives of any political party previous to an election, for the purpose of selecting candidates and making other arrangements for the promotion of party interests. A system bearing the name, but essentially different, has been introduced into Great Britain, having been first adopted in Birmingham.

**cau-dal, a.** [Lat. *cauda* = a tail.] Pertaining to or of the nature of a tail; tail-like.

"Thus one second and a tenth would elapse before an impression made upon its *caudal* nerves could be responded to by a whale fifty feet long."  
*Tyndall: Frag of Science* (3rd ed.), xiv. 422.

"The male widow-bird, remarkable for his *caudal* plumes, certainly seems to be a polygamist."

"Thus the most respectable Protestants, with Elizabeth at their head, were forced to make common cause with the Papists."—Masson's Hist. Eng., ch. II.

† (1) Crabb thus distinguishes between cause, reason, and motive: "Cause respects the order and connection of things; reason the movements and operations of the mind; motives the movements of the mind and body. Cause is properly generic, reason and motive are specific; every reason or motive is a cause, but every cause is not a reason or motive. Cause is said of all inanimate objects; reason and motive of rational agents. Whatever happens in the world happens from some cause, mediate or immediate; the primary or first cause of all is God. Whatever opinions men hold they ought to be able to assign a substantial reason for them, and for whatever they do they ought to have a sufficient motive. As the cause gives birth to the effect, so does the reason give birth to the conclusion, and the motive give birth to the action." (Crabb: Eng. Synon.)

(2) For the difference between cause, s., and case, s., see CASE, s.

cause-list, s.

Law: A printed roll of actions to be tried in the order in which they are entered, and with the names of the attorneys engaged for each litigant.

cause, v.t. & i. [CAUSE, a.]

A. Transitive:

1. To act as an agent in producing, to effect, to bring into existence.

"He apologized to those who had stood round him all night for the trouble which he had caused."—Macaulay: Hist. Eng., ch. IV.

2. To produce an effect, to make (with an infinitive following).

"Will thou judge to know, son of man, wilt thou judge them? cause them to see the abominations of their fathers."—Ezek. xx. 4.

B. Intrans.:

To show cause or reason. "But he, to shifte their curious request, Oan causes why she could not come in place."—Spenser: F. Q., III. ix. 38.

† Crabb thus discriminates between to cause, to occasion, and to create: "What is caused seems to follow naturally; what is occasioned follows incidentally; what is created receives its existence arbitrarily. A wound causes pain, accidents occasion delay, but bodies create mischief. The misfortunes of the children cause great affliction to the parents; business occasions a person's late attendance at a place; disputes and misunderstandings create animosity and illwill." (Crabb: Eng. Synon.)

caused, pa. par. or a. [CAUSE, v.]

\* cause-fūl, a. [Eng. cause; -full.] Having a sufficient cause, reason, or excuse.

A. As adjective (of all the forms):

1. Lit.: Burning, hot, corrosive. Applied to a medicine or substance which destroys the tissue of the animal parts to which it is applied, changing it into a substance like burnt flesh, which in a little time, with detergent dressing, falls off, and leaves a vacancy in the part.

"Air too hot, cold, and moist, abounding perhaps with caustic, astringent, and coagulating particles."—Arbuthnot.

"If extirpation be safe the best way will be by caustic medicines or escharotics."—Wiseman: Surgery.

2. Fig.: Sharp, bitter, cutting. Applied to language full of bitter satire or sarcasm.

"... and mirth he has a particular knack in extracting from his guests, let their humour be never so caustic or refractory."—Smollett: Expedition of Humphry Clinker.

B. As substantive (of the first two forms only):

1. Med.: Any substance which, on being applied to the flesh, destroys the animal tissue. Specially, a term applied to the Nitrus argent, or nitrate of silver, commonly called Lunar Caustic, which is stimulant and sedative in its action rather than destructive, except on the mere surface to which it is directly applied. The stronger caustics produce an eschar, and are therefore called escharotics. They act either by their intense affinity for water, or by forming compounds with the albuminous substances, as sulphuric acid, caustic potash, bromine, chromic acid, arsenic, nitric acid, hydrochloric acid, carbonic acid, glacial acetic acid, chloride of zinc, chloride of antimony, nitrate of silver, red oxide of mercury, sulphate of copper. Caustics are employed (1) To destroy poisonous bites of serpents, and rabid animals, and syphilitic growths; (2) To remove exuberant and morbid growths, as excessive granulations, polyp, cancerous deposits, warts, and to improve the character of ulcerated surfaces; (3) To act on healthy skin, so as to form issues, and to open abscesses.

"... retired to his own lodgings, where he applied caustic to the wart."—Smollett: Expedition of Humphry Clinker.

2. Optics: A caustic curve.

caustic-curve, s.

Geom. & Optics: A curve to which the rays of light, reflected or refracted by another curve, are tangents. [CATACAUSTIC CURVE, DIACAUSTIC CURVE.]

caustic potash, s.

Surg.: The act of burning or searing morbid flesh with cauterants, or caustic substances. "They require, after cauterization, no such bandage, as that thereby you need to fear interception of the spirits."—Wiseman.

câu-têr-ize, v.t. [Fr. cauteriser; Sp. & Port. cauterizar; It. cauterizzare; Lat. cauterizo; from Gr. καυτήριον (kautērion) = to burn with a branding-iron; καυτήρ (kautēr) = a branding-iron; καυτήρ (kautēr) = a burner; καίω (kaío) = to burn.]

1. Lit.: To burn or sear with cauterants. \*2. Fig.: Of the heart or conscience, as if "seared with a hot iron," and so rendered insensible to any influence. "The more habitual our sins are, the more cauterized our conscience is, the less is the force of hell."—Jeremy Taylor: Rules and Exercises of Holy Living, l. 603.

câu-têr-ized, pa. par. or a. [CAUTERIZE.]

câu-têr-iz-ing, pr. par., a., & s. [CAUTERIZE.]

A. & B. As pr. par. & partic. adj.: In senses corresponding to those of the verb. "No marvel though cantharides have such a corrosive and cauterizing quality..."—Bacon: Natural and Experimental History.

C. As substantive: 1. Lit.: The act of burning with caustic. 2. Fig.: A burning to the heart.

"For each true word a blister! and each false Be as a cauterizing to the root of the tongue, Consuming it with speaking."—Shakespeare: Timon of Athens, v. 2.

† The first folio reads cauterizing.

câu-têr-y, v.t. [Gr. καυτήριον (kautērion) = a branding-iron, from καίω (kaío) = to burn, to brand.] 1. An instrument for burning or searing the flesh, either with a hot iron, or with caustic medicines.

"In heat of fight it will be necessary to have your actual cautery always ready..."—Wiseman: Surgery. 2. The act of cauterizing. "Cautery is either actual or potential; the first is burning by a hot iron, and the latter with caustic medicines. The actual cautery is generally used to stop mortification, by burning the dead parts to the quick, or to stop the effusion of blood, by searing up the vessels."—Quincy.

câu-thêo, s. [A word from one of the Hindoo languages.] Fabrics: A coarse East India cotton cloth.

câu-ting, a. [Shortened from cauterizing (q.v.).] cauting-iron, s. Farriery: An iron used for cauterizing the flesh of horses.

câu-tion, \*cau-ci-on, \*kau-cy-on, \*cau-ci-on, s. [Fr. caution; Sp. caucion; It. cauzione, from Lat. cautio = a taking care, from cautus = careful, cautious, from caeco to take care, to be cautious.]

1. Security, pledge, guarantee. "Kaucyon they nolde give, or bidde."—K. Alisaunder, 2811. "He that objects any crime, ought to give caution, by the means of sureties, that he will persevere in the prosecution of such crimes."—Wycliffe: Parergon.

† In this sense the word only survives in Scots law, and at the Universities. [CAUTION-MONEY.] \*2. A bill, an account. "Take thy cautions, and sitte soone and write ftill."—Wycliffe: Duke xvi. 2.

*Mil.*: An ancient cannon five feet long, throwing a 1-lb. ball, with a charge of 1 lb.; range, 900 paces.

\* **cāv-al-rŷ**, \* **cāv-vāl-lēr-ŷo**, s. [O. Fr. *cavalerie*; Fr. *cavalerie*; Sp. *caballeria*; Ital. & Port. *cavalleria*.] [CAVALIER.]

*Mil.*: Mounted soldiers organized in troops (an administrative unit, commanded by a captain and two lieutenants), squadrons (a tactical unit of two troops, led by the senior captain), and regiments (composed of four squadrons, commanded by a lieutenant-colonel and a major). Divided in Europe into Heavy (Cuirassiers, and some Dragoons or Dragon Guards), Medium (Lancers and Dragoons), and Light (Hussars). Attached by single regiments to the infantry divisions. In the United States the cavalry are of light equipment and known only by the equestrian name of cavalry. They are separate from infantry, being organized into distinct corps and under separate commanders. During the Civil War, cavalry proved to be a highly effective branch of the army. They are formed into brigades or divisions (commanded by a brigadier or lieutenant-general), for independent action in advance of and covering an army on the march, when horse-artillery batteries are attached to them. Light cavalry are chiefly employed for reconnaissance and foraging, heavy and medium for battle, but these duties are interchangeable. Formations for march are columns of troops, fours, sections, and half-sections; for fighting, always in line, frequently in echelon or regiments or squadrons, and with a reserve. Its action is essentially offensive, and its real power lies in the charge, which should be sudden and rapid. Its best opportunity is when the enemy is on the march, in disorder from fighting, or changing formation. The best ground for cavalry is that which gives cover from view till near enough to charge, and then it should be free from obstacles, so as to get full benefit from the shock which depends on unbroken speed. Rate of march—walk, four miles; trot, eight miles an hour.

"If a state run most to gentlemen, and the husbandmen and plowmen be but as their workfolke, you may have a good cavalry, but never good stable lands of look."—*Bacon: Hen*, VII.  
† Originally *cavalry* and *chivalry* were but two different ways of spelling the same word. (*Trench: Eng. Past and Present*, p. 65.)

*Arch.*: The hollowing or underdigging of the earth for cellars or foundations; according to Vitruvius it should be the sixth part of the height of the whole building.

**cāve** (1), \* **kāve**, s. & a. [Fr. *cave*; Sp. & Ital. *cava* = a hollow place; from Lat. *cavea*, from *cavus* = hollow.]

A. *As substantive*:  
I. *Ordinary Languages*:  
1. A hollow place or cavern under the earth; a subterraneous habitation.  
"Thor he bigged in a cave, the was thor in roche graven."  
*Story of Gen. & Exod.*, 1.137.  
"Thou magic lyre, w hose fascinating sound Seduced the savage monsters from their cave."  
*Cowper: Ode on the Marriage of a Friend*.

\* 2. Any hollow place or part.  
"The object of slight doth strike upon the pupil of the eye directly, whereas the case of the ear doth hold off the sound a little."—*Bacon: Natural History*.

II. *Technically*:  
1. *Geol.*: Caves in many cases are scooped out by the sea or by the action of inland streams. They are most numerous in limestone countries, and are of great interest geologically. [CAVE-DEPOSITS.]  
2. *Glass Manufacture*: The ash-pit of a glass furnace.

B. *As adj.*: (See the compounds).  
† Obvious compound: *Cave-keeper*.

\* **cave-bear**, s.  
*Palaont.*: *Ursus spelæus*, a fossil bear, more gigantic than any now known to exist. It is found in Britain and elsewhere, in Post-Pliocene cave-deposits.

\* **cave-breccia**, s.  
*Geol.*: A breccia, generally of marine origin, frequently met with in caverns at the base of sea-cliffs. It often contains organic remains. [CAVE-DEPOSITS.]

\* **cave-deposit**, s. pl.  
*Geol.*: Deposits made in sea-caves. Water washed in some of the materials which were afterwards fixed in their place by the formation of stalactite pendulous from the roof, and stalagmite rising in irregular columns from the floor. According to the celebrated chemist Liebig, the vegetable soil above the limestone rock, when acted on by moisture and air, evolves carbonic acid (carbon dioxide). Falling rain, becoming impregnated with this chemical compound, is capable of dissolving the limestone, and subsequently losing by evaporation a portion of the carbonic acid, parts with the calcareous matter, which it leaves in the form of stalactite. The dropping of water impregnated with carbonate of lime from the tips of the pendulous stalactites, generates the stalagmites, and hermetically seals the aqueous deposits beneath for geological examination. It is remarkable that, tested by these organic remains, caverns do not, as might be anticipated, range over a succession of formations; they seem to be all but limited to the Newer-Pliocene and Post-Pliocene periods.

The first cave which attracted much geological notice was that of Kirkcaldy, about twenty-five miles N. N. E. of York city. In it were detected the remains of about 300 hyenas and the animals on whose bones they had preyed. (For details see *Buckland's Reliquiæ Diluvianæ*.) Many caves throughout the world have since been examined. Prof. Owen some years ago enumerated thirty-seven species of mammals—about eighteen of them extinct, the rest recent—in the caves of the British Isles. When the question of the alleged "antiquity of man" came from France to Britain in 1858, the examination of caves here and elsewhere received a new impulse. First the Brixham cavern, on the coast of Devonshire, was exhaustively examined, and then Kent's cavern, near Torquay, in the same county, became the scene of very elaborate exploratory diggings. Mr. Pengeley, F.R.S., acting under the auspices of the British Association and the Royal Society of London, being the chief agent in the work. Deposits of some interest have been found in the caves of the United States and of Brazil, but no particular description of them seems necessary, as they yield no indications of ancient man similar to those of Europe. They contain bones of many of the former animals of the country, though usually of less interest than those of the European caves.

\* **cave-dwellers**, s. pl. [TROGLODYTE, A. I. 1.]

\* **cave-earth**, s.  
*Geol.*: A stratum of earth constituting the

old floor of a cave, previous to the deposition of the stalagmite which now covers it.

"Cave-earth is not stratified, and contains many fallen fragments of rock, rounded stones, and broken pieces of stalagmite."—*Dawson: Earth and Man*, ch. XIII.

\* **cave-guarded**, a. Guarded or protected in a cave.

\* **cave-hyena**, **cave-hyæna**, s.  
*Palaont.*: *Hyæna spelæa*, an old British hyena akin to *H. crouta* of South Africa, of which it may be only a variety.

"The cave-hyæna and cave-tiger are found associated with the *Ursus spelæus* in the caverns."—*Lubbock: Prehistoric Times*, p. 238.

\* **cave-keeping**, a. Secret, retired from light, as though hidden in a cave.  
"In men, as in a rough-grown grove, remain Cave-keeping evils that obscurely sleep."  
*Shakspeare: Lucrece*, 1249-51.

\* **cave-lion**, s.  
*Palaont.*: A fossil lion, *Felis spelæa*, akin to if not even identical with the *F. leo* of modern times.

\* **cave-pika**, s.  
*Palaont.*: A species of Lagomys found in Post-Pliocene deposits in British caves.

\* **cāve** (2), s. [CAVE (2), v.]

fate, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, oūr, rāle, fūll; trý, Sýrian. s, ce = ē. ey = a. qu = kw.

Crabb thus discriminates between to cease, leave off, and discontinue:—"To cease is neuter; to leave off and discontinue are active; we cease from doing a thing; we leave off or discontinue a thing. Cease is used either for particular actions or general habits; leave off more usually and properly for particular actions; discontinue for general habits. A restless spoiled child never ceases crying until it has obtained what it wants; it is a mark of impatience not to cease lamenting when one is in pain. A labourer leaves off his work at any given hour. A delicate person discontinues his visits when they are found not to be agreeable. It should be our first endeavour to cease to do evil. It is never good to leave off working while there is any thing to do, and time to do it in. The discontinuing a good practice without adequate grounds evinces great instability of character." (Crabb: Eng. Synon.)

\* **cease**, s. [CEASE, v.] The end, extinction or failure.

**ced-*d*-ar**, \* **ced-*d*-ir**, \* **ced-*d*-re**, \* **ced-*d*-yr**, s. & a. [A.S. *ceder-beam*, *ceder-treow*; Sw. *ceder*, *ceder-tråd*; Dan. *ceder træ*; Dut. *ceder boom*; Ger. *ceder*; Gael. *seudar*; Wel. *cedr*; Fr. *cedre*; Prov. *cedre*, *cedre*; Sp. & Port. *cedro*; Ital. *cedra*; Lat. *cedrus*; Gr. *κεδρος* (*kedros*) = (1) the cedar of Lebanon, (2) a kind of juniper.]

A. As substantive:  
I. *Scip. & Bot.*: A tree or trees called in Heb. *עֵרֶז* (*erez*), from *אָרָז* (*araz*), the root of *אָרָז* (*aruz*) = colled, compressed. In Sept. Gr. it is *κεδρος* (*kedros*). *Erez* still continues in the Arab. *arz*, and seems to be a generic word, almost like the English *cedar*, but limited apparently to species of the pine family, of which several are on Lebanon, the three most notable being "the cedar of Lebanon," pre-eminently so called [II. I], the Deodar [II. I, and Deodar], and the Scotch fir (*Pinus sylvestris*). The nasta for ships spoken in Ezek. xxvii. 5 were probably from the Scotch fir; whilst the tree, of which

it is said that "his boughs were multiplied and his branches became long," is plainly the typical "Cedar of Lebanon." The wood of that species is soft, and not specially valuable; and, contrary to the received opinion, the *erez* which furnished the beams, &c., of Solomon's temple, may have been from another species of Lebanon pine.

II. *Ord. Lang. & Bot.*: The English name given to various trees, chiefly of the orders Pinaceæ (Conifers) and Cedrelaceæ (Cedrelads).

1. (Of the order Pinaceæ):

(1) The Cedar of Lebanon (*Abies cedrus*, often called *Cedrus Libani*). From the allusion to it in Scripture it has, for many centuries, been an object of interest, and more than one hundred years ago Miller thus described it:—"It is evergreen; the leaves are much narrower than those of the pine-tree, and many of them produced out of one tubercle, resembling a painter's pencil; it has male flowers, or katkins, produced at remote distances from the fruit on the same tree. The seeds are produced in large cones, squamose and turbinate. The extension of the branches is very regular in cedar trees; the ends of the shoots declining and thereby showing their upper surface, which is constantly clothed with green leaves so regularly as to appear at a distance like a green carpet, and, in waving about, make an agreeable prospect. The wood of this famous tree is accounted proof against the putrefaction of animal bodies. The sawdust is thought to be one of the secrets used by the mountebanks who pretend to have the embalming mystery. This wood is also said to yield an oil, which is famous for preserving books and writings; and the wood is thought by Bacon to continue above a thousand years sound." Many people suppose that to witness the cedar one must climb to the celebrated grove on Mount Lebanon, about 6,400 feet above the sea level, and 3,000 below the summit of the mountain, but there are more specimens of the tree in the gardens around London than in that grove. Here, of course, it is planted, but it is indigenous from Mount Taurus to the Himalayas, growing along with the Deodar, from which it may not be specifically distinct.

(2) Various junipers: *Spec.* (a) the Virginian Cedar (*Juniperus virginiana*), commonly called "the red cedar," from the colour of its wood, (b) the Bermuda Cedar (*J. bermudiana*), and (c) the Barbadoes Cedar (*J. barbadensis*), &c.

2. (Of the order Cedrelaceæ (Cedrelads): Various trees. *Spec.*, Bastard cedar = any species of the genus *Cedrela*; Bastard Barbadoes Cedar (*C. odorata*); Cedar of Anstralia (*C. australensis*).

3. Of other orders: Various trees belonging to the Meliaceæ, Byttneriaceæ, &c.

B. As adj.: Pertaining to or made of the tree described under A.

**cedar-bird**, s.

Ornith.: A species of Chatterer, *Ampelis carolinensis*, also called the American Waxwing. It derives its name from its partiality to cedars.

**cedar-wood**, s.

I. Gen.: The wood of any of the ordinary cedars.

2. *Spec.*: A name given in Gambia to an easily worked and very aromatic wood, called also *Curana*, *Samaria*, *Acuyari*, and *Mara*.

**ced-*d*-ared**, a. [CEDAR.] Covered with or full of cedars. (Milton.)

† **ced-*d*-arn**, a. [Eng. cedar, with adj. suff. -*arn*.] Made or consisting of cedar, cedrine.

"Right to the carven cedarn doors."  
Tennyson: *Royal of the Arabian Nights*.

**cede**, v. t. & i. [Lat. *cedo* = to yield, give way; Fr. *ceder*.]

I. Transitive:

1. To give up, surrender, yield.  
"By the peace of Paris in 1763, it [Dominion] was ceded in express terms to the English."—*Geography*.

2. To acknowledge as due, to ascribe.  
"That honour was entirely ceded to the Parthian royal race."—*Drummond: Travels*, p. 256 (1754).

† II. Intrans.: To give way, to yield, to pass over to.

"This fertile glebe, this fair domain,

**çed'-drá'-tí**, *s.* [From Gr. *κέδρος* (*kedros*) = the cedar-tree.] A perfume derived from a variety of the aurantiaceae Lime, *Citrus acida*.

**çed'-dré'-lá**, *s.* [A dimn. from Lat. *cedrus* = a cedar.]

*Bot.*: A genus of plants, the typical one of the order Cedrelaceae. *Cedrela odorata*, or Barbadoes Bastard-cedar, a native of South America, has wood of a brown colour, very fragrant, and is imported under the name of Honduras, or Jamaica Cedar. *C. Toona*, a native of Bengal, furnishes timber much like mahogany. The bark is very astringent, and has been found valuable in fevers, dysentery, &c. The flowers are used for producing a red dye. The bark of *C. febrifuga* is used against the intermittent fevers of Java.

**çed'-drél'-á'-çed'-sø**, *s. pl.* [Mod. Lat. *cedrel(a)*; and fem. pl. suff. *-æces*.]

*Bot.*: A natural order of thalamifloral dicotyledons, placed by Lindley in his Rotal alliance. There are two sub-orders: 1. Swieteniaceæ; 2. Cedreleæ. They are natives of the tropics of America and India, and, very rarely, of Africa. They are generally very fragrant, aromatic, and tonic. Many supply compact and beautifully veined timber, such as the mahogany of tropical America (*Swietenia mahagoni*); the Satin-wood of India (*Chloroxylon Swietenia*); the Yellow-wood of New South Wales (*Ocotelea xanthoxyla*); the Red-wood of Coromandel (*Soymatia febrifuga*), &c. The berks of *Cedrela febrifuga* and others are used as remedies in intermittent fevers and dyspeptic complaints. There are nine known genera and twenty-five species. (*Treas. of Botany*, &c.)

**çed'-dré'-lé'-sø**, *s. pl.* [Mod. Lat. *cedrel(a)*; and fem. pl. suff. *-æces*.]

II. Spec.: To say Mass or administer the Holy Communion according to the Anglican rite.

¶ Crabb thus distinguishes between to celebrate and to commemorate:—"Every thing is celebrated which is distinguished by any marks of attention, without regard to the time of the event, whether present or past; but nothing is commemorated but what has been past. A marriage or a birthday is celebrated; the anniversary of any national event is commemorated. . . . Celebrating is a festive as well as social act; it may be sometimes serious, but it is mostly mingled with more or less of gaiety and mirth: commemorating is a solemn act; it may be sometimes festive and social, but it is always mingled with what is serious and may be altogether solitary. . . . The Jews celebrate their feast of the Passover; as Christians, we commemorate the sufferings and death of our Saviour, by partaking of the Lord's Supper." (Crabb: Eng. Synon.)

- 1. Lit.: Of things. "Three things concur to make a percussion great; the bigness, the density, and the celerity of the body moved."—Digby.
2. Fig.: Of the mind, thought, &c. "He carried his point with characteristic audacity and celerity."—Macaulay: Hist. Eng., ch. xxiv.

\***cēl'-ēr-ŷ**, s. [Fr. *celéri*, from Prov. Ital. *selerti*, from Lat. *selinon*; Gr. *σέλινον* (*selinon*) = parsley.]

Bot.: The common English name of *Apium graveolens*, an umbelliferous plant widely diffused throughout Europe. The bisched leaf-stalk of the cultivated varieties is used extensively as a vegetable. In its native state the seeds and whole plant are acrid and poisonous.

\***cē-léste**, a. [Fr. *bleu celeste*.] Ceramics: Sky-blue (also attrib.).

\***cē-lés-ti-al**, \***cē-lés-ti-all**, a., s., & adv. [O. Fr. *celestiel*, from Lat. *celestis* = pertaining to heaven; *celum* = heaven.]

A. As adjective:

I. Literally:

1. Pertaining to the spiritual heaven. "Against a solemn day, harnessed at hand, Celestial equipage."—Milton: P. L., vii. 200.

2. Pertaining to the heavens. "There stay, until the twelve celestial signs Have brought about their annual reckoning."—Shakspeare: Love's Labour's Lost, v. 2.

II. Figuratively:

1. Surpassing earthly things in excellence, angelic, divine. "Their fortitude and wisdom were a flame Celestial, though they knew not whence it came."—Cooper: Truth, 632.

2. Inspired.

"Such the bard's prophetic words, Fragrant with celestial fire."—Cooper: Boadicea.

B. As substantive:

1. Gen.: An inhabitant of heaven. "For who can tell (and sure I fear it ill) But that shee is some power celestial?"—Spenser: F. Q., II. iii. 44.

"Thus affable and mild the prince proceeds, And to the dome th' unknown celestials leads."—Pope: Homer: Odyssey l. 104.

2. Spec.: A native of China. \***C. As adverb**: In a celestial manner; divinely.

"In his face Youth smiled celestial, and to every limb Suitable grace diffused."—Milton: P. L., III. 688.

¶ Crabb thus discriminates between *celestial* and *heavenly*: ". . . *Celestial* is applied mostly in the natural sense of the heavens; *heavenly* is employed more commonly in a spiritual sense. Hence we speak of the *celestial* globe, as distinguished from the *terrestrial*, of the *celestial* bodies, of Olympus as the *celestial* abode of Jupiter, of the *celestial* deities; but on the other hand, of the *heavenly* habitations, of *heavenly* joys or bliss, of *heavenly* spirits and the like. There are doubtless many cases in which *celestial* may be used for *heavenly* in the moral sense, but there are cases in which *heavenly* cannot so properly be substituted for *celestial*." (Crabb: Eng. Synon.)

† **cē-lés-ti-al-ize**, v.t. [Eng. *celestial*, and suff. -ize (q.v).] To make celestial or heavenly. (Quar. Rev.)

\***cē-lés-ti-al-ized**, pa. par. & a. [CELESTIALIZE.]

†**cē-lés-ti-al-lŷ**, adv. [Eng. *celestial*; -ly.] In a celestial or heavenly manner; divinely.

\***cē-lés-ti-al-nēss**, s. [Eng. *celestial*; -ness.] The quality or state of being celestial or heavenly.

\***cē-lés-ti-fied**, pa. par. & a. [CELESTIFY.]

\***cē-lés-ti-fŷ**, v.t. [Lat. *celestis* = heavenly, and *facio* = to be made, *facio* = to make.] To celestialize or convert into a heaven. "Heaven but earth terrestrial, and earth but heaven celestified."—Browne: Vulg. Err., bk. IV., ch. xiii.

\***cē-lés-ti-fŷ-īng**, pr. par., a., & s. [CELESTIFY.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act of making celestial.

\***cē-lés-tin**, \***cē-lés-tine** (1), s. [CELESTINE.] One of the order of monks known as Celestines (q.v.).

\***cē-lés-tine** (2), s. [From Lat. *celestis* = (1) heavenly, (2) sky-blue; Fr. *celestine*; Ger. *celestin*.]

Mfn.: Native sulphate of strontia, SrO.SrO<sub>2</sub>. It occurs in prismatic or tabular crystals, belonging to the rhombic system. Sp. gr., 4. Its name refers to the sky-blue colour sometimes presented by it. It is pretty widely distributed. By the action of nitric acid it is converted into nitrate of strontia, which is used for red-fire in theatres, fireworks, &c. It is called also Celestite.

\***Cē-lés-tines**, s. [From Pope Celestine V.] Eccles. Hist.: A monastic order instituted about 1254 by Pietro di Morone, afterwards Pope Celestine V. Their first convent was at Morone, in the Apennines of Abruzzo. The

order was a reform of that of St. Bernard. It became a very rich order both in France and Italy. In 1776-8 it was suppressed by Pope Pius VI.

**çĕl'ĕs-tĭte, s.** [From Lat. *celestis* (= heavenly, and Eng., &c. suff. -ite (Min.)) (q.v.).] Min.: The same as Celestine (q.v.).

**çĕ-lĕs-tō-bār-ĭte, s.** [First called *baryto-celestine*. Then the relative position of the two words were reversed. From *celestine*, o connective, and Eng. *barite* (q.v.).] Min.: A variety of barite containing much sulphate of strontian. Found in Switzerland.

**çĕ-lĭ-ăc, cœ-li-ăc, \*çĕ-lĭ-ăck, a.** [Lat. *celiacus*, from Gr. *κοιλιακός* (*koilos*) = hollow.] Relating to the abdomen, ventricular. In an anatomy applied to the arteries and nerves thereof.

"The blood moving slowly through the *celiac* and mesenteric arteries, produces complaints."—*Arbutnotus: On Alimenta*.

**çĕl'ĭ-baq-ŷ, s.** [Lat. *celibatus*, from *celēbs* = an unmarried man, single.] The state of being unmarried, single life. (*Atterbury*.)

\* **çĕl'ĭ-bat-āire, s.** [Fr.] A bachelor.

"The despairing *celibat*re descanted on his whole course of love."—*Godwin: Mandeville*, II, 203.

\* **çĕl'ĭ-bat-ār'ĭ-an, s.** [Eng. *celibat*(e), and suff. -arian.] A celibate.

**çĕl'ĭ-bate, s. & a.** [Lat. *celibatus*. **CELLIBACY.**]

**A. As substantive:**

\* 1. Single life, celibacy.

"If any persons, convict of this unchastity, are in the state of *celibate*, they are only chastised with scourges."—*L. Addison: Description of West Barbary*, p. 172.

\* 2. One who devotes himself to a single life, a bachelor.

**B. As adj.:** Unmarried, single.

\* **çĕl'ĭ-bate, v. i.** [**CELLIBATE, s.**] To lead a life of celibacy.

"The males oblige themselves to *celibate*, and their multiplication is hindered."—*Graunt*.

\* **çĕl'ĭ-bat-ist, s.** [Eng. *celebat*(e); -ist.] A celibate. (*For. Quar. Rev.*)

\* **çĕl'ĭ-bite, s.** [Lat. *celēbs* (genit. *celēbis*) = single, unmarried.] The same as **CELLIBATE, s.**

**çĕl'ĭ-call, a.** [Lat. *celiculus* = heavenly; from *caelum* = heaven.] Heavenly, celestial.

"Furth of his palace hall lachit Phebus.—  
Defouandant from his sege otherhall  
Glade influant aspects *celicall*."  
*Douglas: Virgil*, Prol., 899, 97.

**çĕl'ĭ-dōg-raph-ŷ, s.** [Fr. *céliographie*, from Gr. *κελεύς* (*kelēis*) = a spot, and *γράφω* (*graphō*) = to write.] A description or treatise of the spots on the sun. (*Crabb*.)

\* **çĕl'ĭ-dōn-ŷ, \*çĕl'ŷ-dōn-ŷ, s.** [**CHELIDONIUM.**]

Bot.: A plant, *Chelidonium majus*. (*Prompt. Parv.*)

**çĕll, \*çĕllie, \*çĕelle, s. & a.** [O. Fr. *celle*; Lat. *cella*.]

**A. As substantive:**

**I. Ordinary Languages:**

**1. Literally:**

(1) A small room or apartment in a monastery or convent inhabited by a person devoted to religion.

"A monk of a *celle*."  
*Robert of Gloucester*, p. 267.

(2) A small room in a prison or asylum.

"... regarded as fit only for a *cell* in Saint Luke's."—*Macaulay: Hist. Eng.*, ch. xxiii.

(3) A small religious house, attached to a monastery or convent.

"As loud as doth the chapel belle,  
"There as this lord was keeper of the *celle*."  
*Chaucer: C. T.*, 172.

(4) A cottage, or small place of residence.

"In cottages and lowly *cells*."  
*Somerville: Epitaph on Hugh Lumber*.

(5) A small cavity or hollow place.

"The brain contains ten thousand *cells*."  
*Prior: Alma*, III, 168.

**2. Fig.:** A place of existence, a seat.

"Mine eyes be closed, but open left the *cell*  
Of fancy, my internal sight."  
*Milton: P. L.*, VIII, 460.

**II. Technically:**

**1. Entom.:** The compartments of a honey-comb.

**2. Bot.:** The substance of plants is not homogeneous, but is composed of small structures, generally indistinguishable by the naked eye; and each of those, at least for a time, is a whole complete in itself, being composed of solid, soft, and fluid layers, different in their chemical nature, and disposed concentrically from without inwards. These structures are termed *cells*. For the most part, a group of them is in close contact, and firmly united; they then form a *cell-tissue*. Each cell fulfils its own definite part in the economy of the plant, and shows a variety in form corresponding to the different functions. By far the largest proportion of cells in the living succulent parts of plants are seen to be made up of three concentrically-disposed layers: first, an outer skin, firm and elastic, called the *cell-wall* or *cell-membrane*, consisting of a substance peculiar to itself. [**CELLULOSE.**] The second layer is soft and elastic, and always contains albuminous matter. [**PROTOPLASM.**] And thirdly, the cavity enclosed by the protoplasm-sac is filled with a watery fluid called *cell-sap*.

**3. Anat. & Zool.:** A term often applied to any small cavity but properly restricted to a microscopical anatomical element with a nucleus *cell-wall* and *cell-contents* when typically formed. (*Huxley*.) The animal cell is ordinarily a closed sac, the envolving membrane almost always consisting of a nitrogenous compound. The sac generally contains a liquid or semi-fluid protoplasm, in which are suspended molecules, granules, globules, or other very minute cells. Along with these are *nuclei*, which again contain *nucleoli*. [**NUCLEUS, NUCLEOLUS.**] Cells may be formed from a protoplasm existing without the cell or within other cells. Or they may be made within others by what has hence been called an endogenous method or by division or in other ways. (*Griffith & Henfrey*.)

**4. Arch., &c.:**

(1) The space between the two ribs of a vault.

(2) The space enclosed within the walls of an ancient temple.

**5. Iron-working:** A structure in a wrought-iron beam or girder; a tube consisting of four wrought-iron plates riveted to angle-iron at the corners.

**6. Elect.:** A single jar, bath, or division of a compound vessel containing a couple of plates, say copper and zinc, united to their opposites or to each other usually by a wire. [**GALVANIC BATTERY.**]

**B. As adjective:** (See the compounds).

**cell-bred, a.** Bred in a cellar or poor cottage, low born.

"Around him wide a sable Army stand,  
A low-born, *cell-bred*, selfish, servile band."  
*Pope: Duncead*, bk. II, 355-6.

**cell-cavity, s.**  
Bot. *Physiol.*: The hollow internal part of a cell.

**cell-contents, s. pl.**  
Bot. *Physiol.*: Substances contained in cells. Of solid substances there are pigments, starch, crystalline formations, aleurone, and resin; of fluids, oil, caoutchouc, viscin, and gutta serena, with sugar, tannic acid, and inuline dissolved in water. (*Thomé: Botany*, ed. Bennett.)

**cell-division, s.**  
Bot. *Physiol.*: The division of a plant cell into two as the plant develops.

**cell-door, s. & a.** (See the compound).  
*Cell-door lock:* A prison-door lock, to whose bolt no access is possible from the inside, and which may fit in a rabbit in the door-jamb.

**cell-family, s.**  
Bot. *Physiol.*: A group of cells genetically and organically united. They have originated from a single "mother-cell." (*Thomé: Botany*, ed. Bennett.)

**cell-fluids, s. pl.**  
Bot. *Physiol.*: The fluids in the cells of plants. [**CELL-CONTENTS.**]

**cell-formation, s.**  
Bot. *Physiol.*: The mode of origin and multiplication of cells. (*Thomé*.)

**cell-fusion, s.**  
Bot. *Physiol.*: Cells united into a group the elements, i.e. the separate cells, of which can still be recognised, and still possess a certain individuality. (*Thomé*.)

**cell-membrane, s.**

Bot. *Physiol.*: [**MEMBRANE.**]

**cell-sap, s.**

Bot. *Physiol.*: The watery fluid contained in a cell as distinguished from the mucilaginous semi-fluid protoplasm.

**cell-tissue, s.**

Bot. *Physiol.*: [**TISSUE.**]

**cell-wall, s.**

Bot. *Physiol.*: The wall of a cell surrounding its cavity.

† Some of the foregoing words may be used in an analogous sense of animal cells.

\* **çĕl'ĭ-a, s.** [Lat.] The interior space of a temple.

**çĕl'ĭ-lar, \*çĕl'ĭ-ēr, s.** [O. Fr. *cellier*; Lat. *cellarium*.]

1. A vault or place underground where liquors and stores are kept.

"Each hand marched to the nearest mauso, and asked the *cellar* and larder of the minister. . . ."  
*Macaulay: Hist. Eng.*, ch. xiii.

\* 2. A case or box; a receptacle for bottles. [**SALT-CELLAR.**]

"Run for the *cellar* of strong waters quickly."—*Ben Jonson: Mag. Lady*, III, 1.

**çĕl'ĭ-lar-āge, s.** [Eng. *cellar*, and suff. -age.]

1. That part of a building in which the cellars are constructed; cellars.

"... you bear this fellow in the *cellarage*.—  
Consent to swear." *Shakesp.: Hamlet*, I, 5.

2. The charge made or money paid for the storage of goods in a cellar.

**çĕl'ĭ-lar-ēr, \*çĕl'ĭ-ēr-ēr, \*çĕl'ĭ-ēr-ēr, s.** [Eng. *cellar*; -ēr.] The officer in a monastery appointed to take charge of the stores; a butler.

"Upon my faith, thou art some officer,  
Some worthy sexton, or some celler."  
*Chaucer: Monk's Prologue*.

**çĕl'ĭ-lar-ēt, s.** [Eng. *cellar*, and dimin. suff. -et.] A small case with compartments for holding bottles. (*Smart*.)

† **çĕl'ĭ-lar-ĭng, s.** [Eng. *cellar*; -ing.] Cellaring.

"... a retired and peaceful cottage, situated in a delightful sporting country, with attached and detached offices, roomy *cellaring*, and commodious attics."—*Morton: Secrets worth knowing*, III, 4.

\* **çĕl'ĭ-lar-ist, s.** [Eng. *cellar*; -ist.] The officer in a religious house who had charge of the provisions, &c.; a cellarer.

† **çĕl'ĭ-lar-ōis, a.** [Eng. *cellar*; -ous.] Belonging to a cellar, subterranean, sunk.

"A little side-door . . . stood open and disclosed certain *cellarous* steps."—*Dickens: Uncom. Traveller*, II.

**çĕlled, a.** [**CELL.**]

\* 1. Confined in a cell.

"*Cell*ed under ground."—*Warton*.

2. Containing one or more cells.

**çĕl'ĭ-lĕp'ĭ-ōr-a, †çĕl'ĭ-lĕp'ĭ-ōr-a** (*Mod. Lat.*), **çĕl'ĭ-lĕ-pōre, †çĕl'ĭ-lĕ-pōre** (*Eng.*), s. [Lat. *cella* = a cell, and *porus*, Gr. *πόρος* (*poros*) = a passage.]

Zool.: A genus of infundibulate Polyzoa, the typical one of the family Celleporidae (q.v.). It is distinguished by the massive globose and incrusting, or erect and branched calcareous polyzoid, and the irregularly hesped vasiform cells, vertical to the common plane, with a beak on one or both sides, furnished with an avicularium. There are five British species. (*Griffith & Henfrey*.)

**çĕl'ĭ-lĕ-pōr'ĭ-dĕ-a, s. pl.** [From *Mod. Lat. cellepora* (q.v.), and fem. pl. adj. snff. -idæ-].

Zool.: A family of infundibulate Polyzoa, of the sub-order Cheilostoma. It contains the single genus *Cellepora* (q.v.).

**çĕl'ĭ-lĭf-ēr-ōis, a.** [Lat. *cella* = a cell; *fĕro* = to bear.] Having or containing cells.

**çĕl'ĭ-lĭtes, s. pl.** [From Lat. *cellita*. So called from the cells which they inhabited.]

Ch. *Hist.*: An order of monks who arose at Antwerp in the fourteenth century. They were called also the Brethren and Sisters of Alexius, whom they had for their patron saint. They specially attended to the visitation of the sick and dying. They were sometimes called Lollards (q.v.). (*Mosheim*.)

An abbreviation of *violoncello*.

**çĕll-u-lar**, *s.* & *a.* [Fr. *cellulaire*, from Lat. *cellula*, dimin. of *cella* = a cell.]

**A. As substantive:**

**Bot.**: A plant having no distinct stem nor leaves, but forming a cellular expansion of various kinds, which bears the organs of reproduction.

**B. As adj.:** Consisting of cells or little cavities.

**cellular-beam**, *s.* An application of wrought-iron, in which wrought-iron plates are riveted with angle-irons in the form of longitudinal cells, with occasional cross struts.

**cellular pyrites**, *s.*

**Min.**: A variety of Marcasite.

**cellular quartz**, *s.*

**Min.**: A variety of quartz. (*Brit. Mus. Cat.*)

**cellular system**, *s.*

**Bot. Physiol.**: The part of a plant which consists of cells (q.v.) (*Lindley, &c.*), or spiral vessels, or has a tendency to them, though till lately the latter were supposed to be confined to plants of higher organisation.

**cellular theory**, *s.* A theory according to which all the vegetable and animal tissues are derived from the union and metamorphosis of primitive embryonic cells.

**cellular tissue**, *s.*

**1. Bot. Physiol.**: A kind of tissue made up of a number of separate cells or minute bags adherent together. These, when first formed, are usually nearly globular or egg-shaped, but afterwards by pressure become flattened. It is often called parenchyma.

**2. Animal Physiol.**: Fibro-cellular connective or areolar tissue (q.v.). It is found filling interstices between the various organs in man and the lower animals.

**çĕll-u-lār-ĕs**, *s. pl.* [Pl. of Mod. Lat. *cellularis*=cellular, from Clasa. Lat. *cella* = a cell.]

**Bot.**: A name given to Cryptogams, from an erroneous notion that they are composed entirely of cells. *Podaxon* amongst fungi, and *Conferva Melagonium* amongst algae, are excellent examples.

**çĕll-u-lār-ĭ-s**, *s.* [Lat. *cellula* = a little cell, dimin. of *cella*; and neut. pl. suff. *-aria*.]

**Zool.**: A genus of infundibulate Polyzoa (Bryozoa), of the sub-order Cheilostomata, and family Cellulariidae. It is distinguished by the jointed, branched, erect polydium, with flat linear branches, the contiguous cells in two or three rows, perforated behind, and more than four between two joints, and the absence of avicularia and vibracula. There is one British species. (*Griff. & Henfrey*.)

**çĕll-u-lār-ĭ-i**, *s. pl.* [Lat. *cellula*, dimin. of *cella* = a cell.]

**Zool.**: A family of Corals, in which each polype is adherent in a corneous or calcareous cell, with thin walls.

**çĕll-u-lā-rĭ-i-dæ**, *s. pl.* [Mod. Lat. *cellulari*(*æ*), and fem. pl. suff. *-idæ*.]

**Zool.**: A family of infundibulate Polyzoa (Bryozoa), of the sub-order Cheilostomata. They are distinguished by the branched, erect polydium, and the flat linear branches, with the cells in one plane. (*Griff. & Henfrey*.)

**çĕll-u-lā-tĕd**, *s.* [Lat. *cellula*(*a*), and Eng. suff. *-ated*.] Formed or consisting of cells.

**çĕll-ule**, *s.* [Fr. *cellule*, from Lat. *cellula*, dimin. of *cella* = a cell.] A little cell.

**çĕll-u-lif-ĕr-ō-us**, *a.* [Lat. *cellula* = a little cell; *fero* = to bear, and Eng. suff. *-ous*.] Bearing or producing cellules or little cells, or cellular tissue.

† **çĕll-u-line**, *a. & s.* [Lat. *cellula* = a little cell, and suff. *-ine* (*Chem.*).] The same as **CELLULOSE** (q.v.).

**çĕll-u-lōid**, *a. & s.* [Lat. *cellula* = a little cell, and Gr. *εἶδος* (*eidos*) = form, appearance.]

† **A. As adjective:**

**Nat. Science:** Having the form or appearance of one or more small cells.

**B. As subst.:** An ivory-like compound, which can be moulded, turned, or otherwise

manufactured for various purposes for which, before its introduction, ivory and bone were employed. The process of manufacture is as follows: Paper, by immersion in sulphuric and nitric acids, is converted into nitro-cellulose. This product, after washing and bleaching, is passed through a roller-mill, with the addition of a certain quantity of camphor. Celluloid softens at 176° Fahr., when it can be moulded into the most delicate forms, to become hard when cold. It is very inflammable, unless blended with some chemical having an opposite property.

**çĕll-u-lōse**, *a. & s.* [Lat. *cellula*(*a*) = a little cell; *cella* = a cell, and Eng. suff. *-ose*.]

**A. As adj.:** Consisting of or containing cells.

**B. As subst.:** A substance of general occurrence, and constituting the basis of vegetable tissues. Its chemical formula is  $C_{12}H_{10}O_{11}$  or  $(C_{12}H_{10}O_{11})_n + HO$ . It is in many respects allied to starch, and is changed into starch by the unaided action of heat, or by sulphuric acid, or caustic potash. Cellulose was long considered as peculiar to vegetable tissues, but it has been shown by Schmidt, Löwig, and others to exist in the tissues of tunicates and some molluscs. Pure cellulose is a ternary compound of carbon and the elements of water.

**çĕl-lō-sĭ-a**, *s.* [Gr. *κῆλεος* (*kēleos*) = burning, from *καῖω* (*kaïō*) = to burn, from the appearance of the flowers.]

**Bot.**: A genus of amaranthada, consisting principally of tropical annuals. The best known, *Celosia cristata*, the Cockcomb of our gardens, has astrigent qualities.

\* **çĕl-lōt-ō-mŷ**, *s.* [Fr. *celotomie*, from Gr. *κῆλη* (*kēlē*) = a tumour, and *τομή* (*tomē*) = a cutting, from *τέμνω* (*temnō*) = to cut.]

**Surg.**: An operation for the radical cure of inguinal hernia, by ligature of the sac and spermatic cord.

**çĕll-sĭ-a**, *s.* [Named in honour of Dr. Olaus Celsus, Professor of Oriental languages in the University of Upsal.]

**Bot.**: A small genus of liariadae closely allied to *Verbascum*. The species are annuals or biennials, with entire or pinnatifid foliage, and apikes of bright yellow mullein-like flowers.

\* **çĕll-sĭ-tūde**, *s.* [Lat. *cellitudo* = height, from *cellus* = high, lofty.]

**1. Lit.:** Height, altitude.

**2. Fig.:** Nobility, excellence.

**çĕlt** (1), **Cĕlt** (1), *s.* [Lat. *celti*; Gr. *κέλτοι*, *κέλται* (*keltōi*, *keltai*); Wel. *celtiad* = one dwelling in a covert, an inhabitant of the woods, from *celt* = cover, shelter; *celu* = to cover, shelter, akin to Lat. *celo* (*Mahn*).] [KELT.]

**Anthrop.**: One of an ancient race of Asiatic origin, who formerly inhabited a great part of Gaul, Italy, Spain, and Britain, and whose descendants still occupy the Highlands of Scotland, Ireland, Wales, and part of the North of France.

**çĕlt** (2), **Cĕlt** (2), *s.* [From a pseudo-Lat. *celtis*, assumed as the nom. of *celte*, rendered "with a chisel" in the Vulgate (Job xix. 24). It is prob. a misreading of *certe* = certainly.]

**1.** The longitudinal and grooved instrument of mixed metal often found in Scotland.

**2.** A prehistoric stone implement or weapon of a wedge-like form.

¶ Though the primary application of the word *celt* was to the metallic implement, yet the stone celt (No. 2) is the older of the two.

**çĕlt-ĭ-bĕr-r-ĭ-an**, *a. & s.* [Lat. *Celtiber*, *Celtiberia*, from *Celtiberia*, a district of Spain.]

**A. As adj.:** Pertaining to Celtiberia or its inhabitants, the Celtiberi or Celts of the Iberus (Ebro), in Spain.

**B. As subst.:** A native or inhabitant of Celtiberia.

**çĕlt-tic**, **Cĕlt-tic**, *a. & s.* [Lat. *celticus*; Gr. *κέλτικός* (*keltikos*).]

**A. As adj.:** Of or pertaining to the Celts or their language.

**B. As subst.:** The language of the Celts.

¶ Remains of the Celtic language survive in Gaelic, Erse or Irish, Manx, Welsh, and Armorican or Breton.

**Celtic architecture**, *s.*

**Arch.**: A type of architecture existent in

this country before the Roman invasion. It is called also Druidic, but it is a question whether the structures classed under it are all really pre-Roman.

**Celtic pipes**, *s.* [ELFIN PIPES.]

**Celtic province**, *s.*

**Zool.**: The third of the geographical provinces through which Testaceous Molluscs are distributed. Prof. E. Forbe described it as including the coasts of Britain, Denmark, Southern Sweden, and the Baltic.

**çĕl-tĭ-çĭsm**, *s.* [Eng. *celtic*; *-ism*.] A custom of the Celts, or an idiom of their language.

**çĕl-tis**, *s.* [Lat. *celtis*, the name for an African species of Lotus.]

**Bot.**: A genus of Ulmaceæ (*Elma*) known as Nettle-trees. The fruit of the European Nettle-tree, *Celtis australis*, has been supposed by some to be the *Lotna* of classic myth. The tree grows on both sides of the Mediterranean. The

(2) Spec. : [I. 1.]

2. Fig. : Anything which forms a bond of union socially or morally.

"For loat, this social cement of mankind, The greatest empire, by scarce-felt degrees," Thomson : *Liberty*, p. v.

¶ In some of the poets the accent is on the first syllable, both in the noun and verb.

II. Technically :

1. Building : Of cements there are many varieties, according to the special needs of different trades. In building the principal are known as Portland and Roman.

(1) Portland Cement was patented in England by Joseph Aspdin in 1824. It is so called because it resembles in colour Portland-stone. It is manufactured by calcining a mixture of clayed mud from the Thames with a proper proportion of chalk. The calcined mass is then reduced to a fine powder, and intimately mixed with the addition of water. The resulting paste is moulded into bricks, dried and burnt. The heat during the process of calcining must be a white heat, otherwise the carbonic acid and water may be expelled without the reaction between the lime and the clay necessary for the production of cement. The material is then assorted, all which has been too much or too little calcined being set aside and pulverized.

(2) Roman Cement is a name given to certain hydraulic mortars, varying considerably in their chemical composition, though physically possessing the same general character. It is an argillaceous lime, manufactured from a dark brown stone, a carbonate of lime with much alumina, found in the Island of Sheppey. The stone is calcined and mixed with sand in various proportions. Any limestone containing from fifteen to twenty per cent. of clay will, when properly prepared, form this cement. Calcine any ordinary clay and mix it with two-thirds its quantity of lime, grind to powder, and calcine again. The epithet Roman is improperly given, since the preparation was entirely unknown to the Romans.

(3) Hydraulic Cement is a kind of mortar used in building piers and walls under or exposed to water. There are many varieties. Hamall's is composed of ground Portland-stone sixty-two parts, sand thirty-five, and litharge three.

2. Glass Manufacture : Cement for glass is of various kinds, according as it is designed for ordinary or for chemical glass, for the necks of bottles, for lens grinders, or for affixing metallic letters to plate-glass windows.

3. Gold Mining : Oravel cemented by clay, constituting an ariferous atratum in Sierra Nevada and Placer Counties in California. (Knight.)

4. Metallurgy :

(1) A brown deposit in the precipitation tank in which the soluble chloride of gold obtained by the chlorination process is deposited by the addition of sulphate of iron to the solution. (Knight.)

(2) The material in which metal is embedded in the cementing-furnace (q.v.) (Knight.)

5. Odontology : The tissue which forms the outer crust of the tooth. It is less bony than dentine, and commences at the cervix or neck of the tooth, where the enamel terminates, increasing in thickness to the lower extremities of the root.

"A single tooth may be composed of dentine, cement, enamel, and bone; but the dentine and cement are present in the teeth of all reptiles." Owen : *Anatomy of Vertebrata*.

B. As adj. : (See the compounds).

cement-ducts, s. pl.

\***çen-sure** (2), s. [CENSURE.]

**çēn-sure** (s as sh), v. t. & t. [CENSURE, s.]

A. *Transitive*:

1. To form or give a judgment or opinion regarding anything without its being implied that this award was unfavourable.

"His voyage was variously çensured; the Templars who consented not to the peace, flouted thereat." —*Fuller: The Holy War*, vol. iv. ch. 3.

† It is not creditable to man's candour in judging of others that the word *çensure* in process of time became limited to the pronouncing of unfavourable judgments, these having from the first been so much more numerous than favourable verdicts that the word *çensure* ceased to be applied to the latter at all.

\* 2. To condemn judicially, to sentence.

"Has çensur'd him Already, and, as I hear, the provost hath A warrant for his execution." —*Shakespeare: Measure for Measure*, l. 6.

3. To blame, to find fault with, to reprimand.

"To çensure Homer, because it is unlike what it was never meant to resemble." —*Pope: Homer's Odyssey*, Postscript.

B. *Intrans.*: To form or give an opinion, to judge (followed by *on*).

"Tis a passing shame, That I, unworthy body as I am, Should çensure thus on lovely gentlemen." —*Shakespeare: Two Gent. of Verona*, l. 2.

† (1) Crabb thus discriminates between to *çensure*, to *animadvert*, and to *criticize*:—"To çensure and *animadvert* are both personal, the one direct, and the other indirect; *criticism* is directed to things and not to persons only. *Çensuring* consists in finding some fault real or supposed; it refers mostly to the conduct of individuals. *Animadvert* consists in suggesting some error or impropriety; it refers mostly to matters of opinion or dispute. *Criticism* consists in minutely examining the intrinsic characteristics and appreciating the merits of each individually or the whole collectively; it refers to matters of science and learning. To *çensure* requires no more than simple attention; its justice or propriety often rests on the authority of the individual; *animadversions* require to be accompanied with reasons. . . . *Criticism* is altogether argumentative and illustrative. . . ."

(2) He thus distinguishes between to *çensure*, to *carp*, and to *cavil*:—"To *çensure* respects positive errors, to *carp* and *cavil* have regard to what is trivial or imaginary; the former is employed for errors in persons, the latter for supposed defects in things. *Çensures* are frequently necessary from those who have the authority to use them. . . . *Çarping* and *cavilling* are resorted to only to indulge ill-nature and self-conceit. . . ."

(3) The distinction between to *accuse* and to *çensure* is thus stated:—"To *accuse* is only to assert the guilt of another; to *çensure* is to take that guilt for granted. . . . An accusation may be false or true, a *çensure* mild or severe."

(4) For the difference between to *blame* and to *accuse*, see *BLAME*, v. (*Crabb: Eng. Synon.*)

çen'-süs, s. [Lat. census, from censeo = to rate, to value.] The act of taking the numbers and other statistics of the population of any district or country, or of the members of any class or denomination.

1. In Ancient Rome: The Censura was established at Rome by Servius, and was held every five years in the Campus Martius. Every Roman citizen was obliged, on oath, to give in a statement of his own name and age, of the names and ages of his wife, children, slaves, and freedmen, if he had any. The punishment for a false return was that the person's goods should be confiscated, and he himself scourged and sold for a slave. Taxation depended upon the results of the Census.

2. In the United States: The first Census in the United States was taken in 1790, since which time it has been repeated regularly every ten years. In Great Britain the first census was taken in 1801, and in Ireland in 1813. They have been repeated every ten years since.

II. Technically:

1. Geom., Nat. Phil., &c.: [I. I.]

2. Mech.: One of two conical steel pins on a lathe, on which the body to be turned is fixed and revolves.

3. Building:

(1) Any timber frame, or set of frames, for

CENTRE OF AN ARCH.

supporting the archstones of a bridge during the construction of an arch. (Weale.)

(2) Pl. centres: The length of timber disposed in a certain way by the process called centering (q. v.).

4. Turnery (pl. centres): The two cones with their axes horizontally poised for sustaining the body while it is turned. (Weale.)

III. Compound Terms:

(1) Centre of a bastion:

Mil.: A point in the middle of the gorge of the bastion, whence the capital line commences; it is generally at the inner polygon of the figures. (James.)

(2) Centre of a battalion on parade:

Mil.: The middle, where an interval is left for the colours. (James.)

(3) Centre of a circle:

Geom.: A point within a circle, and so situated that all straight lines drawn from it to the circumference are equal to one another.

(4) Centre of a conic section:

Geom.: The point which bisects any diameter, or the point in which all the diameters intersect each other. [Nos. 7 & 11.]

(5) Centre of a curve of the higher kind:

Geom.: The place where two diameters meet.

(6) Centre of a dial:

That part where the gnomon or style, placed parallel to the axis of the earth, intersects the plane of the dial. (Weale.)

(7) Centre of a hyperbola:

Conic Sect.: The point of bisection of a straight line joining the foci.

(8) Centre of a regular polygon:

Geom.: A point so situated that the straight line drawn from it to the several angles of the polygon are equal to one another.

(9) Centre of a sphere:

Geom.: A point within a sphere, so situated that all the radii running from it to the circumference of the sphere are equal to each other. It is the centre also of every great circle of the sphere.

(10) Centre of a square:

Geom.: A point so situated that straight lines drawn from it to the several angular points of the square are equal to each other.

(11) Centre of an ellipse:

Conic Sect.: The point of bisection of a straight line joining the foci of an ellipse. [No. 4.]

(12) Centre of attack:

Mil.: An attack carried upon a capital in the middle, which generally leads to the half moon. The term is used when works with a considerable front upon three capitals are used in besieging a place. (James.)

(13) Centre of attraction:

Nat. Phil.: The point to which bodies tend through the attraction of gravity.

† The strength of a centre, called also the absolute force of a centre of attraction: The intensity of force at unit distance. Attraction being inversely as the square of the distance, the strength of a centre of attraction is =  $\frac{L^2}{r^2}$ , L standing for length, and T for time. (Everett: The C. G. S. System of Units, ed. 1875, ch. I., p. 6.)

(14) **Centre of buoyancy:**  
*Ship-building:* The same as *Centre of displacement* (q.v.).

(15) **Centre of cavity:**  
*Ship-building:* The same as *Centre of displacement* (q.v.).

(16) **Centre of conversion:**  
*Nat. Phil.:* A point in a body about which it tends to turn, or turns when struck by another body.

(17) **Centre of displacement:**  
*Ship-building:* The mean centre of the portion of the vessel immersed in the water. It is called also the *Centre of cavity, immersion, or buoyancy.*

(18) **Centre of equilibrium in a series of connected bodies:**  
*Nat. Phil.:* A point so situated that if it be supported the whole series of bodies will remain at rest.

(19) **Centre of forces:**  
*Nat. Phil.:* The point of application of a number of forces where they can be counteracted by a single force.

(20) **Centre of friction:**  
*Nat. Phil.:* The point around which any thing gyrates.

(21) **Centre of gravity:**  
*Nat. Phil.:* A point in any material body or system of particles rigidly connected which is so situated that if it be supported or fixed the body will remain at rest whatever be the position which the body itself may occupy at the time.

(22) **Centre of gyration:**  
*Geom.:* The point at which, if the whole matter in the body were collected, given forces would produce the same angular velocity of rotation in a given time as they would do if the particles of the body were distributed in their proper places. (*Pen. Cycl.*)

(23) **Centre of immersion:**  
*Ship-building:* The same as *Centre of displacement* (q.v.).

(24) **Centre of inertia:**  
*Nat. Phil.:* The same as *Centre of gravity* (q.v.).

(25) **Centre of magnitude:**  
*Nat. Phil.:* A point in a body equally distant from all its external parts.

(26) **Centre of motion:**  
*Nat. Phil.:* The point which remains at rest while all the other parts move about it.

(27) **Centre of oscillation:**  
*Nat. Phil., Pendulum, &c.:* The point in which the whole of the matter must be collected that the time of the oscillation may be the same as when it is distributed.

(28) **Centre of percussion:**  
*Nat. Phil.:* The point at which the force of the stroke is the greatest possible.

(29) **Centre of position:**  
*Nat. Phil.:* The same as *Centre of gravity* (q.v.).

(30) **Centre of pressure:**  
*Nat. Phil.:* The point at which the whole amount of pressure may be applied with the same effect as when it is distributed.

(31) **Centre of pressure in a fluid against a plane:**  
*Hydrostatics:* A point so situated that it will just sustain a force equal and contrary to the whole pressure of the fluid.

(32) **Centre of rotation:**  
*Nat. Phil.:* The point around which a body rotates, the centre of motion of a body.

(33) **Centre of spontaneous rotation:**  
*Nat. Phil.:* The centre around which a body, every part of which is free to move, actually does as when struck by a force not passing through its centre of gravity.

**B. As adjective:** (See the compounds).

**centre-bit, s.**  
*Mech.:* An instrument turning on a centre, and having a projecting conical point. It is used for boring circular holes of various diameters. The head of the stock is pressed against the breast, and the stock itself caused to revolve swiftly by means of a handle.

**centre-board, s.**  
*Naut.:* A board placed amidship in a well

which extends longitudinally and vertically through the keel, and is adapted to be lowered to give a deeper draft, in order to avoid leeway and to give the vessel greater stability under press of canvas. It is the old Dutch lee-board in a central position. A sliding-keel. (*Knight.*)

**centre-chisel, a.**  
*Metal.:* A chisel used to make a dent at the exact centre, to form a starting-point for the drill, in drilling holes in metal. A pointed cold-chisel.

**centre-chuck, s.**  
*Turning:* A chuck which can be screwed on the mandril of a lathe, and has a hardened steel core or centre fixed on it, and also a projecting arm or driver.

**centre-drill, s.**  
*Turning:* A small drill used for making a short hole in the ends of a shaft about to be turned, for the entrance of the lathe-centres.

**centre-fire, s. & a.** (See the compound).  
*Centre-fire cartridge:* A cartridge in which the fulminate occupies an axial position, instead of being around the periphery of the flanged capsule.

**centre-gauge, s.** A gauge for showing the angle to which a lathe-centre should be turned, and also for accurately grinding and setting screw-cutting tools.

**centre-lathe, s.**  
 1. A lathe in which the work is supported upon centres at each end; one on the end of the mandrel in the head-stock, and the other, the back-centre, on the axis in the tail-stock. The latter is adjustable.  
 2. A pole lathe; a lathe in which the work is held by centres projecting from two posts, and is driven by a band, which passes two or three times around it. The band is fastened at its respective ends to a treadle beneath the lathe and a spring bar above it. (*Knight.*)

**centre-line, s.**  
*Shipbuilding:* A central, longitudinal, vertical section of the hull.

**centre-phonio, s.**  
*Acoustics:* The place where the speaker stands in making polysyllabical and articulate echoes. (*Weale.*)

**centre-phonoacoustic, s.**  
*Acoustics:* The place or object which returns the voice. (*Weale.*)

**centre-pin, s.** The pivot on which the needle oscillates in a mariner's compass.

**centre-punch, s.**  
*Joinery:* A small piece of steel, with a hardened point at one end, used for making a small hole or indent.

**centre-rail, s.**  
*Rail Engineering:* A third, or middle, rail placed between the ordinary rails of a track, and used on inclined planes in connection with wheels on the locomotive in ascending or descending the grade. (*Knight.*)

**centre-saw, s.** A machine for splitting round timber into bolts, instead of riving it, for axe and pick handles, and heavy spokes. It has a sliding carriage, furnished with centre head-blocks, upon which the log is placed; and is provided with a dial-plate and stops, by which the log can be spaced into stuff the desired size. The centres can be adjusted up or down, to suit the work. It is capable of splitting timbers up to 20 inches in diameter, 3½ feet long; cuts invariably toward the centre, and is calculated for a saw 22 inches or less in diameter. (*Knight.*)

**centre-second, s.** A term applied to a watch or clock in which the second-hand is mounted on the central arbor and completes its revolution in one minute. It is more easily read than the ordinary second-hand traversing in its own small dial. (*Knight.*)

**centre-valve, s.** A device in gas-works intended to distribute the coal-gas to the purifiers.

**centre-velic, s.** The centre of gravity of an equivalent sail, or that single sail whose position and magnitude are such as cause it to be acted upon by the wind when the vessel

is sailing, so that the motion shall be the same as that which takes place while the sails have their usual positions. (*Weale.*) It is called also *relie-point.*

**centre-wheel, s.** The "third wheel" of a watch in some kinds of movements.

**çen'tre (tre as tēr), çen'tēr, v. t. & t.** [CENTRE, s.]

**A. Transitive:**

**I. Ordinary Language:**

1. *Lit.:* To place in the centre.  
 "One foot he centred, and the other turned  
 Round through the vast profundity obscure."  
*Milton: P. L., viii. 238.*

2. *Fig.:* To collect or gather at one point; to concentrate.  
 "He may take a range all the world over, and draw in all that wide air and circumference of sin and vice, and centre it in his own breast."  
 "But here our hopes are centred . . ."  
*Hemans; Stanzas on the Death of the Princess Charlotte, &c.*

**II. Optics:** To grind an optic glass so that the thickest part shall be exactly in the centre.

**B. Intransitive:**

**I. Lit.:** To be placed or to stand in the centre.  
 "As God in Heaven  
 Is centre, yet extends to all, so thou,  
 Centring receipt from all these orbs."  
*Milton: P. L., bk. 109.*

**II. Figuratively:**

1. To rest or repose as a body in a state of equilibrium.  
 "Where there is no visible truth wherein to centre, error is as wide as men's fancies, and may wander to eternity."  
*Deacy of Pley.*

2. To be collected to one point, to be concentrated.  
 "Speak, for he can, and none so well as he,  
 What treasures centre, what delights, in thee."  
*Cowper: Hope, 174.*

**çen'tred (tred as tered or tērd), çen'tered, pa. par. or a.** [CENTRE, v.]

**çen'tre-ī-ty, s.** [Eng. centre; -ity.] The quality or state of being central; centrality.  
 "In every thing composed  
 Each part of th' essence its centrality  
 Keeps to itself, it shrinks not to a nullity."  
*Mere: Song of the Soul, pt. II. bk. iii. c. 2. a. 20.*

**† çen'tre-mēt (tre as tēr), çen'tre-mēt, s.** [Eng. centre; -ment.] The centre, the chief point.  
 "They fall at once into that state in which another person becomes to us the very gift and centrement of God's creation."  
*Cornhill Magazine; On Falling in Love.*

**çen'tric, çen'trick, çen'tric-al, a. & s.** [Eng. centr(e), and suff. -ic, -ical.]

**A. As adj.:** Placed in the centre; central.  
 "Some, that have deeper digg'd in mine than I,  
 Say where his centrick happiness doth lie."  
*Donne.*

**B. As subst.:** A circle having the same centre as the earth.  
 "How gird the sphere  
 With centric and eccentric circles."  
*Milton: P. L., viii. 83.*

**çen'tric-al-ly, adv.** [Eng. centric; -ly.] Centrally, in the centre.

**çen'tric-al-ness, s.** [Eng. centric; -ness.] The state or quality of being central.

**çen'tric-ī-ty, s.** [Eng. centric; -ity.] The same as CENTRICNESS.

**çen'trif-ū-gal, a.** [Fr. centrifuge, from Lat. centrum = the centre, and fugio = to fly from.]

1. *Mech.:* Having a tendency to or causing to recede from the centre. [CENTRIFUGAL FORCE.]  
 "They described an hyperbola, by changing the centripetal into a centrifugal force."  
*Newton.*

† 2. *Botany:*  
 (1) An epithet applied to that kind of inflorescence, which, like the cyme, flowers first at the end and last at the base; called also *Determinate, Definite, or Terminal inflorescence.* [CENTRIFUGAL INFLORESCENCE.]  
 "The expansion of the flowers is in this case centrifugal, that is, from apex to base, or from centre to circumference."  
*Balfour: Botany (1856), § 303.*

(2) Having the radicle turned towards the sides of the fruit.

**centrifugal drill, s.** A drill having a fly-wheel upon the stock, to maintain and steady the motion against the effect of temporary impediments.

**centrifugal filter, s.** A filter the cylinder of which has a porous or foraminous

periphery, and is very rapidly rotated on its vertical axis, so as to drive off by centrifugal force the liquid with which the substance contained in the cylinder is saturated.

centrifugal force, s.

Nat. Phil.: The force which impels a revolving body from the centre to the circumference of its orbit.

Prof. Airy objects to the use of the term centrifugal force, saying that there is no force in operation. He proposes to substitute the expression "centrifugal tendency." — (Prof. Airy: Pop. Astron., 6th ed., pp. 241-2.)

centrifugal gun, s.

Mil.: A form of machine-cannon in which balls are driven tangentially from a chambered disk rotating at great speed.

centrifugal inflorescence, s.

Bot.: An inflorescence in which the terminal flower opens first and the lateral ones successively afterwards. (Figuer: Vegetable World.)

centrifugal machine, s.

1. Hydraul.: A machine contrived to raise water by means of centrifugal force, combined with the pressure of the atmosphere.

CENTRIFUGAL INFLORESCENCE—GERANIUM.

2. Manufac.: A machine for drying yarn, cloth, clothes, sugar, &c., by centrifugal action. The fibre or other material is placed in a hollow cylinder with a reticulated periphery of wire gauze, and being rotated at a rate of from 1,000 to 2,000 revolutions per minute, the water flies off by the centrifugal action, and is collected by the enclosing cylinder, down which it trickles to a discharge-pipe. It is also found useful in removing the must from the grape after crushing. (Knight.)

centrifugal pump, s. The same as CENTRIFUGAL MACHINE, 1. Hydraul.

centrifugal radicle, s. Bot.: An embryonic radicle which is turned away from the centre of a seed.

centrifugal sugar, s. A trade-name for sugar prepared in a centrifugal machine.

centrifugal tendency, s. A compound term designed to express the same idea as the more common one, centrifugal force (q.v.)

A circular hoop when set to spinning becomes more or less elliptic owing to this centrifugal tendency. — (Prof. Airy: Pop. Astron., 6th ed., pp. 241-2.)

gên-trif-ù-gal-lý, adv. [Eng. centrifugal; -ly.]

- 1. Lit.: In a centrifugal manner.
2. Fig.: Spreading outwards.

The British Association then, as a whole, faces physical nature on all sides and pushes knowledge centrifugally outwards. — (Tyndall: Frag. of Science, 3rd ed., vi. 110.)

gên-trif-ù-gênçe, s. [Eng. centrifug(al); -ence.] Centrifugal tendency (q.v.).

gên-trîng, gên-trîng, a. & s. [CENTRE, v.]

A. As adj.: Tending or gravitating towards the centre.

- B. As substantive:
1. Building: [CENTERING.]
2. Optics: The grinding of a lens, so that the thickest part be exactly in the middle.

gên-trîp-ô-tal, a. [In Fr. centripète, from Lat. centrum = centre, and peto = to seek.]

1. Mech.: Having a tendency to or causing to approach the centre; having gravity. It is the opposite of centrifugal (q.v.).

In the same manner the centrifugal force is not a distinct force in a strict sense, but only a certain result of the first law of motion, measured by the portion of centrifugal force which counteracts it. — (Hewell: History of Scientific Ideas, i. 384.)

- 2. Botany:
(1) An epithet for that kind of inflorescence which, like the spike or capitulum, flowers first at the base and last at the end or centre; called also Indeterminate, Indefinite, or Axil-

lary inflorescence. [CENTRIPETAL INFLORESCENCE.]

The expansion of the sowers is thus centripetal, that is, from base to apex, or from circumference to centre. — (BaFour: Botany (1855), § 381.)

(2) Having the radicle turned towards the axis of the fruit.

3. Osteology: Progressing by changes from the exterior towards the centre, as the centripetal calcification of a bone. (Owen.) (Webster.)

centripetal force, s.

Nat. Phil.: A so-called force which tends to make a body move towards a centre.

centripetal inflorescence, s.

Bot.: An inflorescence in which the lowest flowers open first and the main stem continues to elongate, developing fresh flowers. (Figuer: Veg. World.)

CENTRIPETAL INFLORESCENCE—PRIMULA.

centripetal press, s. A mechanical contrivance for pressing inwardly on a radial line from all directions in the common plane. (Knight.)

centripetal pump, s. A pump in which the water is gathered by revolving blades or arms, and drawn to the axis from whence the discharge-tube rises. (Knight.)

centripetal tendency, s.

Nat. Phil.: A name proposed by Prof. Airy to designate what is now commonly called "centripetal force," but properly speaking is not a force but a tendency. [CENTRIPETAL FORCE.] Centripetal and centrifugal tendencies make the planets revolve around the sun in their present elliptic orbits. If centripetal action ceased, they would fly off into space; if centrifugal action failed longer to operate, they would move with continually augmenting velocity towards the sun, against which they would ultimately impinge, with the effect that everything in them combustible would be burnt.

gên-trîp-ô-tal-lý, adv. [Eng. centripetal; -ly.] In a centripetal manner; by centripetal force.

gên-trîp-ô-tên-çý, s. [Lat. centrum = centre; petens (genit. petentis), pr. part. of peto = to seek.] The quality of having a tendency to approach the centre. (Month. Rev.)

gên-tris-cüs, s. [Lat. centricus; Gr. kêntrikos (kentrikos).]

Ichthy.: A genus of fishes of the family Fistulariæ or Aulostomidae, having the head lengthened into a very narrow snout, mouth without teeth, gills broad and flat, body compressed, belly carinate, ventral fins united. (Craig.) Centriscus scolopax is the Trumpet-fish or Sea-snipe, called in Cornwall the Bellows-fish. It is about five inches long. Its habitat is in the Mediterranean. It has been found, though rarely, in the British seas.

gên-trô-bâr-ic, a. [Gr. kêntrôbariká (kentrobárika), the title of a book by Archimedes on the finding the centre of gravity; from kêntrôbaris (kentrobáris) = gravitating towards the centre; kêntron (kentron) = centre, báros (baros) = weight, gravity.] Relating to the centre of gravity, or to the process of finding it.

centrobaric method, s.

Math.: A process invented for measuring or determining the quantity of any surface or solid, by considering it as generated by motion, and multiplying the generating line or surface into the path of its centre of gravity. It is sometimes called the Theorem of Pappus, and also, but incorrectly, Guldinus's properties.

gên-trô-car-pha, s. [Gr. kêntron (kentron) = a spur; káphos (karpheos) = a stalk.]

Bot.: A group of Composites, differing but slightly, if at all, from Rudbeckia (q.v.).

gên-trô-clîn-ý-lâm, s. [From Gr. kêntron (kentron) = a sharp point, a centre; klînê (klinê) = a couch, a bed.]

Bot.: A genus of composita plants, with two-lipped corollas. The four known species are herbs or small shrubs found in the Peruvian Andes at an elevation of 6,000 to 8,000 feet. They have alternate leaves, stalked, toothed, or entire, and covered beneath, as well as the stems, with a white tomentum. The flower-heads are purple, about an inch in diameter; the ray florets are few and female. Centroclinium dilpressum and C. reflexum are cultivated, and produce rose-coloured flowers, smelling like hawthorn. (Treasury of Botany.)

gên-trô-lê-pís, s. [Gr. kêntron (kentron) = a spur; lêpis (lepis) = a scale.]

Bot.: A genus of Desvantiaceæ, containing a few small tinted edge-like herbs from Australia and Tasmania. Leaves setaceous, all radical; scapes short and terminated by a simple spike; glumes two, membranous; stamen one; ovaries two to twelve, becoming utricles in fruit. (Treas. of Bot.)

gên-trô-lîn-ê-ad, s. [Lat. centrum = centre; linea = a line.] An instrument for drawing lines converging to or passing through a point.

gên-trô-lîn-ê-ál, a. & s. [Lat. centrum = centre; linealis = pertaining to a line, from linea = a line.]

A. As adj.: An epithet applied to lines converging to or meeting in a point or centre. B. As substantive: A Centreline.

gên-trô-lô-bý-úm, s. [Gr. kêntron (kentron) = a spur; lôbos (lobos) = a hood, a capsule.]

Bot.: A genus of leguminous trees from Brazil, Guiana, and Venezuela. The leaves are a foot or more in length, and clad with a rusty pubescence. The pod is the most remarkable part of the plant. It is like the fruit of the common maple. It is about nine inches in length, the lower or seed-bearing portion globular, and clad with long, straight prickles; the upper or winged portion thin, papery in texture, about 2½ inches broad, and bearing on its back a long, straight, spurred spine, which is the hardened style. Centrolobium parsonsii furnishes one of the most esteemed timbers of the Orinoco; its colour is bright orange while fresh, fading to brown after exposure.

gên-trôi-ô-phüs, s. [Gr. kêntron (kentron) = a goad, a spur; lôphos (lophos) = a crest.]

Ichthy.: A genus of fishes of the family Coryphænidæ, with elongated bodies, the dorsal fin commencing evenly with the pectoral; ventral fin small; anal fin half as long as the dorsal; vent central; lateral line prominent. Centrolophus morio is the "Black fish," rarely met with on the British coasts. It is intensely black above, especially on the fins. It is of a paler colour beneath.

\*gên-trô-nól, s. [A corrupt form of centinel (q.v.).] A sentinel.

gên-trô-nî-g, s. [Gr. kêntron (kentron) = a spur, from the anthers being furnished with a long spur.]

Bot.: A genus of plants of the order Melanostomaceæ, having large purple flowers.

gên-trô-nôt-ý-dæ, s. pl. [From Mod. Lat. centronotus, the typical genus; and fem. pl. adj. suff. -ide.]

Ichthy.: A lapsed family of fishes, of which Centronotus (q.v.) was the type.

gên-trô-nô-tüs, s. [Gr. kêntron (kentron) = a goad, a spur; nótos (notos) = the back; so called from the fact that the dorsal fin is entirely composed of spines.]

Ichthy.: A genus of fishes, family Blenniide, with ten species, of which one, C. guineus, the Gunnel, or Butter-fish, is British. The body is elongata; dorsal (of spines only) and anal fins of equis length and falcated; caudal fin large and forked; scales minute.

gên-trô-pô-gôn, s. [Gr. kêntron (kentron) = a spur; pôgon (pogon) = a beard.]

Bot.: A genus of Lobeliaceæ, natives of tropical America. All the plants are undershrubs with irregular flowers on long axillary stalks. It is alleged that the succulent fruit of Centropogon is eatable (Lindley), though the Lobeliaceæ are generally dangerous.

gên-trô-pô-ma, gên-trô-pô-müs, s. [Gr. kêntron (kentron) = a goad, a spur; and pôma (poma) = a lid, a cover.]

*Ichthy.*: A genus of fishes belonging to the Percidae or Perch family. *Centropomus undecimalis*, the specific name of which refers to the fact that it had eleven rays to the posterior dorsal fin, frequents the mouth of some South American rivers. It is called by the English residents the Sea-pike, and is eaten.

**çen-trô-pris-tis**, s. [Gr. *κέντρον* (*kentron*) = a spur; and *πρίστις* (*pristis*) = a large fish, prob. the saw-fish (q.v.).]

*Ichthy.*: A genus of fishes belonging to the Percide or Perch family. *Centropriestis nigricans*, one of the species called Black Perch or Black Bass, is abundant in the rivers of the United States, and is esteemed for the table.

**çen-trô-pûs**, s. [Gr. *κέντρον* (*kentron*) = a spur; *πούς* (*pous*) = a foot.]

*Ornith.*: A genus of birds belonging to the Coccozyinae or Hooked-billed Cuckoos.

**çen-trô-sé-lê-nî-a**, s. [Gr. *κέντρον* (*kentron*) = a spur; *σελήνη* (*selênê*) = the moon.]

*Bot.*: A genus of Gesneraceae, from British Guiana. It consists of but a single plant, which has a short, creeping stem, subcordate, petiolate leaves, and solitary axillary peduncles. The calyx is five-parted, with serrate segments. It is distinguished from *Nematanthus*, to which it is allied, by the spur of the flower, coupled with the habit and the toothed segments of the calyx. (*Treas. of Botany*.)

**çen-trô-sé-ma**, s. [Gr. *κέντρον* (*kentron*) = a spur; *σημα* (*sema*) = a mark, a device.]

*Bot.*: A genus of leguminous prostrate or twining perennial plants, distinguished by having on the back and near the base of the standard a short spur. The species are entirely American, and are mostly found in Brazil. The large and elegant pea-like flowers are white, violet, rose, or blue in colour, single or in axillary racemes. The pods are very narrow, compressed, thickened at both sides, and terminating in a long point; in some species they are eight inches in length. Upwards of twenty species are known.

**çen-trûm**, s. [From Mod. Lat. *centrum*; Gr. *κέντρον* (*kentron*) = a horse-goad, . . . the stationary part of a pair of compasses.]

*Anat. & Zool.*: A centre, applied especially to the "bodies" of vertebrata. (*Huxley*). The central portion or "body" of a vertebra. (*Nicholson*.)

**çen-trÿ**, s. [SENTRY.]

"The thoughtless with shall frequent forfeits pay,  
Who 'gainst the centry's box discharge their tea."  
*Gay*.

**çen-tûm-vir** (pl. **çen-tûm-vir-i**), s. [AN adaptation of Lat. *centumviri*: *centum* = a hundred; *vir*, nom. pl. of *vir* = a man.]

*Rom. Antiq.*: One of the centumviri or judges appointed by the prætor to decide common causes amongst the Romans. They were selected from the most learned in the law, and were elected from the thirty-five tribes, three out of each tribe, so that their number really was one hundred and five, though, for the sake of the round number, called centumviri. They were afterwards increased in number to one hundred and eighty, yet still retained their original name.

**çen-tûm-vir-al**, a. [Lat. *centumviralis* = pertaining to the centumviri.] Pertaining to the centumviri or a centumvir. (*Ash*.)

**çen-tûm-vir-ate**, s. [Fr. *centumvirat*; Lat. *centumviritas*.] The office or position of a centumvir. (*Quar. Rev.*)

**çen-tûn-çq-lûs**, s. [Lat. = bind-weed.]

*Bot.*: A genus of plants, order Primulaceae. *Centunculus minimus* is the Bastard Plimpernel, a British annual weed with alternate ovate leaves and sessile flowers. A book-name for it is the Small Chaffweed.

**çen-tû-ple**, a. [Fr. *centuple*; Lat. *centuplex* = a hundred-fold: *centum* = a hundred; *plexus*, pa. par. of *plecto* = to twist, to weave.] A hundred-fold. (*Ben Jonson*.)

**çen-tû-ple**, v. t. [CENTUPLE, a.] To multiply or increase a hundred-fold.

"Then would he centuple thy former store,  
And make thee far more happy than before."  
*Shakspeare, Paraphr. of Job*.

**çen-tû-ptic-ate**, v. t. [Lat. *centuplicatus*, pa. par. of *centuplico* = to make a hundred-

fold: *centum* = a hundred; *plico* = to weave, to twist.] To make a hundred-fold, to repeat a hundred times.

**çen-tû-pli-çâ-têd**, pa. par. or a. [CENTUPPLICATE, v.] Made a hundred-fold, repeated a hundred times.

"I perform'd the civilities you enjoy'd me to your friends here, who return you the like centuplicatèd, . . ."  
*Hovell, bk. iv. Let. 2*.

**çen-tû-pli-çâ-tîng**, pr. par., a., & s. [CENTUPPLICATE, v.]

**A. & B.** As pr. par. & partia. adj.: (See the verb).

**C.** As subst.: The act of multiplying a hundred-fold.

**çen-tûr-ÿ-al**, a. [Lat. *centuriatus* = pertaining to a century; *centuria* = a century; *centum* = a hundred.] Pertaining to a century or a hundred. (*Edin. Cycl.*)

**çen-tûr-ÿ-an**, s. [Eng. century; -an.] A centurion. (See example under *centenier*.)

**çen-tûr-ÿ-ate**, v. t. [Lat. *centuriatus*, pa. par. of *centurio*.] To divide into centuries or hundreds. (*Coles*.)

**çen-tûr-ÿ-ate**, a. [Lat. *centuriatus*, pa. par. of *centurio*.] Pertaining to, or divided into, centuries or hundreds.

"The centuriate assemblèd."  
*Holland; Lévy, bk. vi., ch. xli.*

**çen-tûr-ÿ-â-tôr**, s. [Lat. *centurio* = to divide into centuries or hundreds.] A name given to historians who distinguish times by centuries, which is generally the method of ecclesiastical history. Used specially of the Magdeburg centuriators—viz., Matthias Flacius, John Wigand, Matthew Judex, Basil Faber, Andrew Corvinus, Thomas Holt-hunters, and others, who between A.D. 1559 and 1574 published a Church History in thirteen volumes, each volume comprising a century.

"The centuriators of Magdeburg were the first that discovered this grand imposture."  
*Ayliffe; Parergon*.

**çen-tû-rie**, \* **çen-tûr-ÿ** (1), s. [CENTAURY.]

"Of laurial, century and famytère."  
*Chaucer; C. T., l. 16,448*

**çen-tûr-ÿ-ôn**, s. [Lat. *centurio*, from *centum* = a hundred.]

*Roman Antiq.*: A Roman military officer commanding a century or a company of infantry, consisting of one hundred men. He answered to our captain. (*Mat. viii. 5*.)

**çen-tû-rist**, s. [Eog. *centuri*(y); -ist.] The same as CENTURIATOR (q.v.).

"You cannot justly join Oxindar and the centurists with the heathens."  
*Sheldon; Miracles of Antichrist, p. 105.*

**çen-tû-rÿ** (2), s. [Lat. *centuria*, from *centum* = a hundred.]

**I. Ordinary Language:**

**1. Literally:**

(1) An aggregate number of a hundred of things.

"And so it said a century of prayers,  
Such as I can, twice o'er, I'll weep and sigh."  
*Shakspeare; Cymbeline, iv. 2.*

(2) A period of a hundred years.

" . . . though our joys, after some centuries of years, may seem to have grown older . . ."  
*Boyle*

**2. Fig.:** Any exceedingly long period of time. (*Colloquial*.)

"And fair unblemish'd centuries elaps'd,  
When not a Roman bleed hot in the field."  
*Thomson; Liberty, vt. iii.*

**\* II. Roman Antiq.:**

**1.** A division of the Roman tribes for the election of magistrates, the passing of laws, &c., on which the voting was by centuries.

**2.** A company of cavalry; a sub-division in the Roman army.

¶ *Centuries of Magdeburg*: An ecclesiastical history, arranged in thirteen centuries, compiled by a great number of Protestants at Magdeburg. (*Webster*.) Bacon also wrote a work on natural history, under the title of *Ten Centuries of Natural History*, it being divided into ten books, each containing one hundred short articles.

**century-plant**, s. The American Aloe, *Aloe americanus*, so called from its being formerly supposed to flower only once in each century.

\* **ceorl**, s. [CARL, CHURL.]

**çê-pa**, s. [Lat.]

*Bot.*: The common onion, *Allium cepa*.

**çê-pâ-ceous**, a. [Mod. Lat. *cep(a)*; -aceous.]

*Bot.*: Alliaceous, having an odour like that of onions or garlic.

**çê-pêv-ôr-ôus**, a. [Lat. *cepa* = an onion; *vorô* = to devour.] Feeding upon onions.

**çêph-a-êl-ÿs**, s. [Gr. *κεφαλή* (*kephalê*) = head, and *ἔλλω* (*ellô*) = to roll or twist tight np, from the flowers growing closely together.]

*Bot.*: A genus of plants of the order Cinchonaceae, one of the species of which, *Cephaelis ipecacuanha*, a little creeping-rooted Brazilian plant, yields the well-known emetic of that name. *C. ruelliaefolia* is poisonous, and is used to kill rats and mice.

**çêph-a-la-çân'-thûs**, s. [Gr. *κεφαλή* (*kephalê*) = head; *ἀκανθα* (*akantha*) = a spine.]

*Ichthy.*: A synonym of *Dactylopterus* (q.v.).

**çêph-al-âl-gîo**, a. & s. [Lat. *cephalalgicus*; Gr. *κεφαλαλγικός* (*kephalalgikos*): *κεφαλή* (*kephalê*) = head; *ἀλγέω* (*algêô*) = to pain, to suffer pain.]

**A.** As adj.: Affected with, suffering from, or producing headache.

**B.** As subst.: A remedy for the headache.

" . . . cephalgics, leturics, apoplegmatics, acoutics, and their several cases required."  
*Swiff; Gulliver's Travels*.

**çêph-al-âl-gÿ** (Eng.), **çêph-al-âl-gî-a** (Mod. Lat.), s. [Fr. *céphalalgie*; Gr. *κεφαλαλγία* (*kephalalgia*) = headache; *κεφαλή* (*kephalê*) = head; *ἀλγέω* (*algêô*) = to suffer pain.]

*Med.*: The pathological name for the headache.

**çêph-al-ân-thêr-a**, s. [Gr. *κεφαλή* (*kephalê*) = head; *ἀνθερα* (*anthera*) = an anther.]

*Bot.*: A genus of Orchids, three species of which are common in this country, *Cephalanthera pallens*, *ensifolia*, and *vulgaris*. They have nearly regular white or red half-closed flowers with a saccate hypodril.

**çêph-al-ân-thi-ûm**, s. [Gr. *κεφαλή* (*kephalê*) = head; *ἄνθος* (*anthos*) = a flower.]

*Bot.*: The head or capitate inflorescence of a composite flower. (*Brande*.)

**çêph-al-ân-thûs**, s. [Gr. *κεφαλή* (*kephalê*) = head; *ἄνθος* (*anthos*) = a flower.]

*Bot.*: A genus of plants, order Cinchonaceae, called in North America Button-wood. *Cephalanthus occidentalis* is a bushy shrub with leaves opposite, or sometimes three in a whorl, and yellowish-white flowers in round heads of the size of a marble. It is common in swamps from Carolina to Canada. The inner bark of the root is an agreeable bitter, and is often taken as a remedy in obstinate conglus

**çêph-al-âr-ÿ-a**, s. [Gr. *κεφαλή* (*kephalê*) = the head, from the form of the groups of the flowers, and Lat. fem. sing. adj. suff. -aria.]

*Bot.*: A genus of plants belonging to the Teazel-worts. There are about twenty species known, occurring in Middle Europe, North Asia, and the Cape of Good Hope. They are mostly perennial herbs, a few only being annual. The flowers are white, yellow, or lilac.

**çêph-al-âs-pi-dæ**, s. pl. [From Mod. Lat. *cephalaspis* (q.v.), and fem. pl. adj. suff. -idæ.]

*Palæont.*: A family of fossil fishes, order Ganoidel, sub-order Ostracoeati, or Placoderms. They commence in the Upper Silurian, but do not attain importance till the Devonian period. [CEPHALASPIS.]

**çêph-al-âs-pis**, s. [Gr. *κεφαλή* (*kephalê*) = head; *ἀσπίς* (*aspis*) = a shield.]

*Palæont.*: A genus of ganoid fossil fishes found in the Old Red Sandstone formation. The cephalic shield is prolonged behind into three acute projections, the two lateral ones produced backwards so as to make the buckler resemble "a saddler's knife," i.e., the instrument with which leather merchants and shoemakers cut their leather. The species are sometimes called Bucklerheads. The most common one is *Cephalaspis Lyellii*. It is found in Forfarshire.

• **ceph'al-áte, a. & s.** [Gr. κεφαλή (kephalē) = head.]

**A.** *As adj.*: Having a distinct head; belonging to the Cephalata (an old synonym of Cephalophora, q.v.).

**B.** *As subst.*: A mollusc having a head.

**ceph'al-ō-my'-i'-s, s.** [Gr. κεφαλή (kephalē) = head; μυία (múia) = a fly.]

*Entom.*: A genus of dipterous insects of the family Cestridae, or Gadflies.

**ceph'al-īc, \*ceph'al-īck, a. & s.** [Fr. céphalique; Gr. κεφαλικός (kephalikos) = pertaining to the head; κεφαλή (kephalē) = the head.]

**A.** *As adj.*: Pertaining to the head; useful as a remedy for pain in the head.

"Cephalic medicines are all such as attenuate the blood, so as to make it circulate easily through the capillary vessels of the brain."—*Arbuthnot: On Alim.*

**B.** *As subst.*: A medicine or remedy for pains in the head.

**cephallo index, s.**

*Anat., Ethnol.*: The ratio of the transverse to the longitudinal diameter of the skull.

**cephallo snuff, s.**

*Pharm.*: The name of an errhine powder, the chief ingredient in which is asafoetida.

**cephallo vein, s.** A vein running along the arm, so called because the ancients used to open it for disorders of the head.

† **ceph'al-ís-tic, a.** [Gr. κεφαλή (kephalē) = the head.] Belonging to or situated in the head.

**ceph'al-ī-tis, s.** [Gr. κεφαλή (kephalē) = the head, and med. suff. -itis (q.v.).]

*Med.*: Inflammation of the brain or its investing membranes.

**ceph'al-ī-zā-tion, s.** [Gr. κεφαλή (kephalē) = the head.]

*Biol.*: A word first used by J. Dana to indicate the tendency in certain animals to have their forces localised in or near the head.

"This centralization is literally a cephalization of the forces. In the higher groups, the larger part of the whole structure is centred in the head."—*Dana: Crustacea*, pt. II., p. 1,397.

**ceph'al-ize, v. t.** [Gr. κεφαλή (kephalē).]

*Biol.*: To cause cephalization in (an animal) or of (its limbs).

**ceph'al-ō, in comp.** [Gr. κεφαλή (kephalē) = head.] Pertaining to the brain.

**cephalo-branchiata, s. pl.**

*Zool.*: The same as TUBICOLA (q.v.).

**cephalo-branchiate, a.**

*Zool.*: Having branchiæ (gills) upon the head. Example, the Serpula in the class Annelida.

**ceph'al-ōd-ine, a.** [From Gr. κεφαλή (kephalē) = a head, d euphonic, and Eng. suff. -ine.] Forming a head. (*R. Brown, 1874.*)

\* **ceph'al-ōg'-raph-ŷ, s.** [Gr. κεφαλή (kephalē) = head; λόγος (logos) = a discourse; γράφω (graphō) = to write.]

*Anat.*: A description of the head.

† **ceph'al-ōid, a.** [Gr. κεφαλή (kephalē) = head; εἶδος (eidos) = form.] Head-shaped.

**ceph'al-ōi-ō-ŷ, s.** [Gr. κεφαλή (kephalē) = head; and λόγος (logos) = a treatise.]

*Anat.*: A treatise on the head.

**ceph'al-ōm'-ē-tēr, s.** [From Gr. κεφαλή (kephalē) = the head, and μέτρον (metron) = a measure.] An instrument for measuring the size of the fetal head during parturition.

**ceph'al-ōph'-ōr-a, s. pl.** [From Gr. κεφαλή (kephalē) = the head, and φορέω (phoreō) = to bear.]

*Zool.*: A sub-class of mollusca containing those which possess a distinct head. They are called also Eucephala.

**ceph'al-ōph'-ōr-ōus, a.** [From Mod. Lat. cephalophor(a), and Eng. suff. -ous.] Pertaining to or of the nature of the Cephalophora.

**ceph'al-ō-phūs, s.** [Gr. κεφαλή (kephalē) = the head, and λόφος (lophos) = crest.]

*Zool.*: A genus of Antelopes, peculiar to

tropical or southern Africa. The males have horns which are short, straight, simple cones, slanting backwards, and a long tuft of hair (whence the name) directed backwards behind the ears. They are known as Bushbucks, and there are several species, the smallest, the Pigmy Bush-buck, being no bigger than a rabbit. The better form Cephalophus is gaining ground.

**ceph'al-ōp'-ōd-a (Lat.), ceph'al-ō-pōds (Eng.), s. pl.** [Gr. κεφαλή (kephalē) = head, and πούς (pous), genit. ποδός (podos) = a foot.]

1. *Zool.*: A class of mollusca, characterized by a distinct head, surrounded by a circle of long arms or tentacles, used for crawling and seizing objects. It includes the Argonaut, Octopus, Cuttle-fish, &c., with the fossil Belemnites and Ammonites. They are furnished with two large eyes, and mostly with an internal shell. They swim with the head backwards. The Nautilus and Spirula form the living types of hundreds of species which have become extinct, and the remains of which are found in great abundance in secondary strata; they occur also in the Paleozoic formations. [AMMONITE.] The Cephalopoda are divided into two orders: Dibranchiata, containing those which have two branchiæ only, and Tetrabranchiata, or those which have four branchiæ.

CEPHALOPOD.

2. *Palæont.*: The order Tetrabranchiata comes first in time, appearing in the Lower Silurian rocks, attaining its maximum in Paleozoic times, and decreasing through Meozoic and Cainozoic periods till now its solitary representative is the genus Nautilus. The order Dibranchiata began with Mesozoic epoch and has since increased, reaching its maximum in the present day. (*Nicholson.*)

**ceph'al-ō-pōde, s.** [Fr. céphalopode, from Gr. κεφαλή (kephalē) = head, and πούς (pous) = a foot.]

*Zool.*: A mollusc of the order Cephalopoda.

**ceph'al-ō-pōd'-īc, a.** [Eng. cephalopod, and suff. -ic.] Pertaining to or of the nature of cephalopods.

**ceph'al-ōp'-ō-dōus, s.** [Eng. cephalopod, and suff. -ous.] The same as CEPHALOPODIC.

**ceph'al-ōp'-tēr-a, s.** [Gr. κεφαλή (kephalē) = head, and πτερόν (pteron) = a feather, a wing.]

*Ichthy.*: A genus of fishes, the typical one of the family Cephalopteridæ (q.v.). *Cephaloptera giorna* is large in size. It occurs in the Mediterranean.

**ceph'al-ōp'-tēr'-ī-dæ, s. pl.** [From Mod. Lat. cephalopter(a) (q.v.), and fem. pl. sdj. suff. -idæ.]

*Ichthy.*: A family of fishes, sub-order Plagiodontata. The jaws have many small teeth and the tail a long barbed spine. The head looks horned from its having two small projecting appendages; hence the name Cephaloptera.

HEAD OF CEPHALOPTERA.

**ceph'al-ōp'-tēr'-ūs, s.** [CEPHALOPTERA.]

*Ornith.*: A genus of the Coraciæ or Fruit-crows, family Corvidæ, having an enlarged crest of feathers on the head, which advances in front and overshadows the bill. *Cephalopterus ornatus* is the Umbrella-bird of Brazil.

**ceph'al-ōt, s.** [Gr. κεφαλή (kephalē) = the head.] The same as cεεbrot (q.v.).

**ceph'al-ō-tā'-cō'-sæ, s. pl.** [Mod. Lat. cephalo(cus), and Lat. fem. pl. sdj. suff. -accæ.]

*Bot.*: The Australian Pitcher-plant, *Cephalotus follicularis*, a curious herb, with radical leaves, which is a plant of very doubtful affinity, has been considered provisionally as a distinct family under this title. It has a very short or contracted stem, with spoon-shaped stalked leaves, among which are

mingled small pitcher-like bodies, placed on short stout stalks, and closed at the top like the true pitcher-plants (*Nepenthes*). These pitchers are of a green colour, spotted with purple or brown, and provided with hairs.

**ceph'al-ō-tāx'-ūs, s.** [Gr. κεφαλή (kephalē) = a head (referring to the clusters of the male flowers); Lat. taxus = a yew.]

*Bot.*: A genus of Coniferous plants, belonging to the family Taxaceæ. They are nearly allied to the *Taxus* or Yew in general habit, foliage, and essential characters. There are four or five species known, all from Japan or North China. One, *Cephalotaxus Fortunei*, is frequently found in our collections of Conifers.

**ceph'al-ō-tōs, s.** [Gr. κεφαλή (kephalē) = a head, οὖς (ous), genit. ὠτός (otios) = an ear.]

*Zool.*: A genus of mammiferous animals, natural order Chiroptera, with conical head, ears short, and tail but little apparent.

**ceph'al-ō-thōr'-āx, s.** [Gr. κεφαλή (kephalē) = head; θώραξ (thōrax) = chest.]

*Entom. & Zool.*: The name given to the first division of the body of the Arachnida and Crustacea, consisting of the head and chest united.

**ceph'al-ō-tōme, s.** [From Gr. κεφαλή (kephalē) = head, and τμήσις (tomē) = cutting.]

*Surg.*: An instrument for cutting into the fetal head, to assist its forcible contraction and facilitate delivery.

\* **ceph'al-ōt'-ōm-ŷ, s.** [Gr. κεφαλή (kephalē) = head, τομή (tomē) = a cutting, τέμνω (temnō) = to cut.]

1. *Anat.*: The dissection of the head.

2. *Midwifery*: The removal of the brain of a child impacted in the pelvis.

**ceph'al-ō-tribe, s.** [Gr. κεφαλή (kephalē) = head; τριβή (tribē) = to rub away, to crush.] An obstetrical instrument for crushing the head of the child in the womb, in order to facilitate delivery. (*Webster.*)

**ceph'al-ōt'-rī-chūm, s.** [Gr. κεφαλή (kephalē) = the head; θρίξ (thrix), genit. τριχός (trichos) = hair.]

*Bot.*: A genus of Dematiæ (hyphomycetous Fungi). *Cephalotrichum curvum* is an extremely minute plant growing upon the leaves of sedges, with scattered, short, brown, erect filaments, bearing somewhat globular heads composed of tufts of forked or ternate branches, with one or two short acute branchlets, slightly scabrous, bearing smooth spores. (*Grijfh & Heufrey.*)

**ceph'al-ōt'-tūs, s.** [Gr. κεφαλή (kephalē) = a head.]

*Bot.*: A genus of very singular dwarf pitcher-plants, of which only one species is known, *Cephalotus follicularis*, a native of swampy places in King George's Sound. [CEPHALOTACEÆ.]

† **ceph'al-ōūs, a.** [Gr. κεφαλή (kephalē) = head; Eng. suff. -ous.]

*Zool.*: Having a head, applied principally to a division of Molluscs, the Cephalata, which includes the Univalves, &c. (*Dana.*)

**ceph'al-ūs, s.** [Gr. κεφαλωτός (kephalōtos) = furnished with a head.]

1. *Ichthy.*: A genus of Cod-fishes (Gadidæ), in which the head is remarkably large, depressed, and broad.

2. *Entom.*: A genus of dipterous insects.

**çē'-phēūs, s.** [Named after the husband of Cassiopeia and father of Andromeda.]

*Astron.*: A constellation in the Northern hemisphere, lying between Cassiopeia and Draco. In the British Catalogue thirty-five stars are enumerated.

**çē'-phūs, s.** [From Gr. κηφήν (kēphēn) = a drone.]

*Entom.*: A genus of Hymenopterous insects, of the family Xiphidridæ. Mr. Stephens enumerates ten species of this genus occurring in Britain. *Cephus ruggæus* is common in flowers, particularly buttercups.

**çē'-pō-læ, s.** [Lat. = a small ontion, s. chvis.]

*Ichthy.*: A genus of anguilliform fishes, order Thoracica, having the head roundish, compressed, teeth curved; gill-membrane with six rays; body ensiform and naked.

**çê-pôl'-î-dæ**, s. pl. [From Mod. Lat. *cepolæ*, and fem. pl. adj. suff. *-idæ*.]

*Ichthy.*: Band-fishes, a family of fishes in which the body is very long, compressed, and ribbon-like. Genera *Cepolæ*, *Gymnetrus*, *Trichlurus*, &c. Some are British.

\* **çêp'-têr**, \* **çêp'-trê**, \* **çêp'-tyr**, s. [SCPTREÆ.]

\* **cep-tur-it**, a. [SCPTREÆ.]

**çêr-â'-çêous**, a. [Lat. *cer(a)* = wax, and Eng. suff. *-aceous*.] Pertaining to or made of wax; like wax in appearance. Specially in botany. (Branda.)

**çêr-â'-dî-a**, s. [From Gr. *κέρως* (*kêros*) = bees-wax, and *ἀδήν* (*adên*) = a gland.]

*Bot.*: *Ceradia furcata*, a half succulent plant from the most barren part of South-west Africa, yields African Bellium. It is a brittle, resinoid substance, fragrant when burned, and must not be confounded with ordinary Bellium. (Lindley.)

**çêr-â'-gô**, a. [Lat. *cera* = wax. Second element in the compound unknown.] Bee-bread, a substance consisting principally of the pollen of flowers, and used by bees for food.

**çêr-â'-in**, **çêr-â'-ine**, a. [From Lat. *cera* = wax, and Eng., &c. suff. *-in*, *-ine* (Chem.) (q.v.).]

*Chem.*: The part of beeswax which is sparingly soluble in alcohol and not sponified by potash.

**çê-râm-bÿç'-î-dæ**, s. pl. [Lat. *cerambyz*, genit. *cerambycis*; suff. *-idæ*.]

*Entom.*: A family of coleopterous insects, which have the head large and vertical, the jaws sharp and strong, the tarsi prehensile, and the thorax nearly as broad as the body. They live upon solid or decayed wood, both in their larva and perfect states.

**çê-râm-bÿç**, s. [Lat. *cerambyz*, from Gr. *κέρας* (*keras*) = a horn, and *ἀμβύξ* (*ambuz*) = a cup, from the form of the joints of the antennæ.]

*Entom.*: A genus of Coleoptera, or beetles, the typical one of the family Cerambycidae. They are widely distributed all over the world, but mainly in hot countries. The Musk Beetle (*C. Moschatus*) is found on willows in England. It has a strong but agreeable odour, somewhat resembling that of attar of roses.

**çê-râm-î-â'-çê-æ**, s. pl. [Lat. *cerami(um)*; fem. pl. suff. *-æceæ*.]

*Bot.*: An order of Florideous Algae. Rose-red or purple sea-weeds with a filiform frond, consisting of an articulated, branching filament, composed of a single string of cells, sometimes coated with a stratum of small cells. (Griff. & Henfrey.)

**çê-râm-î-c**, a. [Gr. *κεραμικός* (*keramikos*) = pertaining to pottery; *κεράμος* (*keramos*) = a potter.] Of or pertaining to pottery, or the art of pottery.

**çê-râm-î-cç**, s. [CERAMIC.] All the varieties of baked or burnt clay. It is distinguished from *vitres*, in which silice predominates, the result being glass.

**çêr-am-îd'-î-ûm**, s. [A dimin. from Gr. *κεράμιον* (*keramion*) = a pitcher.]

*Bot.*: A name given to the globose-ovate or conical capsule of rose-spored Algae. Examples are afforded by Laurencia.

† **çêr-â'-mîst**, s. [Eng. *ceram(ic)*; *-ist*.] A maker of pottery or earthenware; a potter.

**çêr-â'-mî-ûm**, s. [Gr. *κεράμιον* (*keramion*) = a little pitcher, from the shape of the capsules.]

*Botany*:  
1. A genus of marine, rose-spored Algae belonging to the order Ceramiceae. The tips of the filaments are incurved. Several species occur on our coast, *Ceramium rubrum* being especially common.  
2. A synonym of *Didymochlæna*, a peculiar genus of South American Ferns. (Treas. of Bot.)

**çêr-â'-pûs**, s. [From Gr. *κέρας* (*keras*) = horn, and *πούς* (*pous*) = a foot.]

*Zool.*: A genus of Amphipodous Crustaceans. *Cerapus tubularis*, the Caddis-shrimp, occurs among Sertulariæ in the sea, near Egg harbour in the United States.

**çêr-ar'-gÿr-îte**, s. [Gr. *κέρας* (*keras*) = a horn; *ἀργυρός* (*argyros*) = silver, and Eng. suff. *-ite* (Min.).]

*Min.*: A mineral of a pearl-grey, greyish-green, or whitish colour; transparent. Composition: Chlorine, 24.7; silver, 75.3. It is found principally in Peru, Chili, and Mexico.

**çêr-â'-sîn**, **çêr-â'-sîne**, s. [Lat. *ceras(um)* = a cherry, and Eng. suff. *-in*, *-ine* (Chem.).]

1. *Chem.*: The portion of the gum of the cherry, plum, and other trees, insoluble in water.  
2. *Min.*:

- (1) A mineral, the same as Mendipite (q.v.).
- (2) Cromfordite (q.v.).

† **çê-râs'-î-noûs**, a. [From Lat. *cerastinus* = cherry-coloured.]

- 1. *Ord. Lang.*: Cherry-coloured.
- 2. *Chem.*: Pertaining to cerasin.

**çêr-â'-sîte**, s. [Lat. *ceras(um)* = a cherry, and Eng. suff. *-ite* (Min.).]

*Min.*: Native muriate of lead.

**çêr-âs'-tôs**, s. [Gr. *κεράστis* (*kerastis*) = horned, from *κέρας* (*keras*) = a horn.]

1. *Ord. Lang.*: A horned serpent, *Cerastes horridus*.  
"Scorpion, and asp, and amphibena dire, ..  
*Cerastes* horned, hydras, and chaps dire."  
 *Milton: P. L. l. s. 625.*

2. *Zool.*: A genus of Indian and African vipers, remarkable for their fatal venom, and for two little horns or pointed bones placed over each eye. They are of a livid grey colour, and have a most terrific appearance.

HEAD OF CERASTES.

**çê-râs'-tî-ûm**, s. [Gr. *κέρας* (*keras*) = a horn, from the shape of the capsules.]

*Bot.*: An extensive genus of Caryophyllaceæ, containing small, white-flowered plants, generally called Mouse-ear Chickweeds. The petals are generally bifid. The number of sepals, petals, and stamens varies; it is generally five in the two former, and ten in the staminal whorl. Several species occur in Britain. *Cerastium arvense* is a common English plant. (Treas. of Bot.)

**çêr-â'-sûs**, s. [Lat., from Gr. *κεράσος* (*kerasos*) = a cherry-tree.]

*Bot.*: The Cherry-tree, a genus of trees of the order Amygdalaceæ. Three species are British—(1) *Cerasus vulgaris*, called also *Prunus cerasus*, the Dwarf Cherry; (2) *C. Avium*, called also *Prunus Avium*, the Gean, and (3) *Cerasus Padus*, called also *Lauro-cerasus Padus* and *Prunus Padus*, the Bird Cherry. Hooker considers Nos. 1 and 2 mere varieties of each other. The first of these is generally supposed to have originated the Garden Cherry, and the second the Morella. The leaves, bark, and fruit of *Cerasus Lauro-cerasus* (the Common Laurel), and the oil derived from them, are virulent poisons, owing to the amount of prussic acid which they contain. For a similar reason *C. capricida*, of Nepal, kills, as the Latin specific name imports, the goats of that region. *C. Padus* and *C. virginiana* have the deleterious property in less measure. All the species of *Cerasus* yield a gum analogous to gum tragacanth. The leaves of *Cerasus Avium* have been used as a substitute for tea. A variety of the same tree is used in the Voges and in the Black Forest in the preparation of the liquor called "Kirschwasser." The kernel of *C. occidentalis*, a West Indian species, is employed in flavouring the liquor called "Noyau." The bark of *Cerasus virginiana* is prescribed as a febrifuge. So also is that of *C. axillifera* of Mexico. [CHERRY.]

† **çêr-âte**, s. [Lat. *ceratus*, pa. par. of *cero* = to cover with wax; *cera* = wax.] A pharmaceutical preparation of wax, oil, and some softer substance made into a plaister.

\* **çêr-â'-têd**, a. [Lat. *ceratus* = waxed, pa. par. of *cero* = to wax; *cera* = wax.] Waxed, covered with wax. (Bailey.)

**çê-râ-tîd'-î-ûm**, s. [Gr. *κέρας* (*keras*) = a horn; *εἶδος* (*eidos*) = form, appearance.]

*Zool.*: A genus of Infusoria, of the family Oxytrichina. It is furnished with cilia, horns on the fore part of the body, but neither looks nor styles. One species, *Ceratidium cucumatum*, Dujardin considered to have been a mutilated Oxytricha. The appearance of horns arises from the anterior part of the body being deeply notched. (Griff. & Henfrey.)

\* **çêr-â'-tîne**, a. [From Gr. *κερατίνης* (*keratînis*) = the fatty called the horns; *κέρας* (*keras*) = a horn.] Sophistical.

**çêr-â'-tî-tôs**, **çêr-â'-tîte**, s. [From Gr. *κέρας* (*keras*), genit. *κεράτος* (*keratos*) = a horn, and suff. *-tîs* (*tîs*).] [IRE.]

*Palæont.*: A genus of Ammonitidæ, with a discoidal shell, having lobed sutures with the lobes ovalated. They exist from the Devonian to the Cretaceous formations, occurring in Europe and India.

**çê-râ'-tî-ûm**, s. [Gr. *κεράτιον* (*keration*), dim. of *κέρας* (*keras*) = a horn.]

*Botany*:

1. A genus of Isariæ (hyphomycetous Fungi), containing a generally diffused British plant, *C. hydnoides*, which grows on rotten wood, has a tuft of white simple or slightly-branched prickly-like processes, which produce on their surface stigmatæ (spicules, Berk.), each of which is surmounted by a spore which easily falls off. The whole plant readily collapses into a mucilaginous mass. The cellular appearance figured by Greville depends on the collapsing of the processes. (Griff. & Henfrey.)

2. A kind of fruit, placed by Lindley under his class Syncarpi. It is similar to the silique, but has no septum.

**çêr-â'-tô**, in compos. [From Gr. *κέρας* (*keras*), genit. *κεράτος* (*keratos*) = a horn.] Provided with a horn or horns.

**cerato-branchial**, a.

*Comp. Anat.*: A term applied by Prof. Owen in his Homologies to the longer bent piece supported by the bones which form the lower extremities of the branchial arches in fishes.

**cerato-glossus**, s.

*Anal.*: A name for the hyo-glossus muscle, from its appearance and insertion into the tongue. (Mayne.)

**cerato-hyal**, a. Pertaining to the larger of the two chief parts of the hyoid bone.

**çêr-â'-tô-çêic**, s. [Gr. *κέρας* (*keras*) = a horn; *κῆλη* (*kêlê*) = a tumour.]

*Pathol.*: A term for a hernia of the corner of the eye, consisting in the protrusion of the inner layer by the pressure of the aqueous humour at some point where the outer layer is destroyed by ulceration.

**çêr-â'-tôde**, **çêr-â'-tôse**, s. [Gr. *κερατώδης* (*keratôdis*) = horn-like.] The horny or spongy skeletal substance of sponge.

**çêr-ât'-ô-âus**, s. [From Gr. *κέρας* (*keras*), genit. *κεράτος* (*keratos*) = a horn; and *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

1. *Zool.*: A genus of fishes, order Dipnoi, with Lepidosiren, till lately placed among the Amphibia, it constitutes the point of transition between Fishes and Amphibiana. *Ceratodus Fosteri* is the Australian Mud-fish.

2. *Palæont.*: Agassiz first founded the genus on certain horned teeth found in Triassic and Jurassic rocks. Seventeen types of teeth have since been found in Queensland in Australia, and in Central India.

**çêr-â'-tô-mî-a**, s. [Gr. *κεράτιον* (*keration*) = a little horn; dim. of *κέρας* (*keras*) = a horn, from the shape of the pods.]

*Bot.*: A genus of leguminous plants. *Cercotonia Siliqua* is the Caroh (q.v.).

**çê-râ-tô-phÿl-lâ'-çê-æ**, s. pl. [Mod. Lat. *ceratophyllum*]; and Lat. nom. pl. fem. suff. *-æceæ*.]

*Bot.*: A natural order of plants, consisting

**îate**, **fât**, **färe**, amidst, whât, **fáll**, father; **wê**, **wêt**, **hêre**, **camp**, **hêr**, **thêre**; **pine**, **pît**, **sîre**, **sîr**, marine; **gô**, **pôt**, or, **wôre**, **wôlf**, **wôrk**, **whô**, **sôn**; **mûte**, **cûb**, **ôure**, **unite**, **ôur**, **rûle**, **fûll**; **trÿ**, **Sÿrian**. **æ**, **æ** = **ê**. **ey** = **â**. **qu** = **kw**.

of floating herbs with whorls of multifold, cellular leaves.

q̄er-a-tō-phyl-lūm, s. [Gr. κέρας (keras) = a horn; φύλλον (phullon) = a plant, a leaf, the petals resembling a horn in shape.]

Bot.: A genus of plants, the typical one of the Ceratophyllaceae, of which it is the only known genus, and has only one known species. C. demersum (Hornwort) is fairly common in ponds and slow streams in Britain.

q̄er-a-tōph-ŷ-ta, s. [Gr. κέρας (keras) = a horn; φυτόν (phiton) = a plant.] A tribe of Corals, the internal axis of which has the appearance of wood or horn. It includes Antipathes and Gorgonia.
